SUMMER STUDY IN WASHINGTON

The Summer Session offers an opportunity to continue university study during the summer period. The educational value of a summer session in the Capital of the Nation is of great importance. It gives a background for both intelligent and appreciative citizenship. History, political science, economics, literature, and government are all viewed by a first-hand knowledge of our institutions and traditions. The schedule of classes gives ample time to visit the great libraries and laboratories, to see the great works of art, and to observe the departments and bureaus of the Government in operation. The many educational and scientific institutions with central offices and exhibits situated in Washington are accessible to students whose special interests draw on them. The following are arranged in the main classes of the Summer Session.

The National Capital stands in a region distinguished by the brilliant personality of George Washington, and in this area our national traditions were first expressed. A short distance down the Potomac River is Mount Vernon, the home of Washington, the place most intimately associated with his career. The city of Alexandria is extremely rich in its associations with the American Revolution and with early American history. Directly across the Potomac from Washington are the hills of Arlington, the last resting place of General Robert E. Lee when he resigned command to assume charge of the Confederate forces at Appomattox. The historic Georgetown, now a part of the District of Columbia, has many memories of General Washington. It was in this place that he met local landowners and arranged for the purchase of the land for the District of Columbia. Georgetown was the headquarters of Washington and Major L'Enfant when they supervised the work of the surveyors laying out the Capital of the Nation.

SUMMER STUDY IN WASHINGTON

The Summer Sessions offer an opportunity to continue university work during the summer period. The educational value of a term of study in the Capital of the Nation is of great importance. It forms a background for both intelligent and appreciative citizenship. History, political science, economics, literature, and current events are all vivified by a first-hand knowledge of our national institutions and traditions. The schedule of classes gives the student ample time to visit the great libraries and laboratories of the Capital, and to observe the departments and bureaus of the Government in operation. The many educational and scientific organizations with central offices and exhibits situated in Washington are accessible to students whose special interests draw on such resources. Excursions are arranged to the many places of beauty and historic association in near-by Virginia and Maryland.

The National Capital stands in a region distinguished by the personal activities of George Washington, and in this area our national traditions were first expressed. A short distance down the Potomac River is Mount Vernon, the home of Washington and the place most intimately associated with his career. The nearby town of Alexandria is extremely rich in its associations with the First President and with early American history. Directly across the Potomac from Washington are the hills of Arlington, which was the estate of General Robert E. Lee when he resigned from the army to assume charge of the Confederate forces at Richmond. Old historic Georgetown, now a part of the District of Columbia, has many memories of General Washington. It was in this village that he met local landowners and arranged for the purchase of the land for the District of Columbia. Georgetown was the headquarters of Washington and Major L'Enfant when they supervised the work of the surveyors laying out the Capital of the Nation.

The city of Washington, situated on the east bank of the Potomac, with its many parks and shaded boulevards, has the reputation of being the most beautiful city in America. The monumental classic buildings which house the departments of the Government, the elegant dignity of the White House, and the grandeur of the Capitol dominate a city of handsome residences and wide avenues. The notable monuments, the parks and

wooded drives contribute to an atmosphere of distinction expressive of the best spirit of our national life.

The Government has been likened to a great university offering special opportunity in the study of governmental administration, diplomacy, the practical application of our constitutional principles, the administration of law, and of political affairs generally. Thousands of eminent specialists in all fields of science give to the Nation in a multitude of reports the results of study and research in bureaus, experimental stations, laboratories, museums, and observatories. Realizing the educational value of such activities, Congress resolved "that the facilities for research and illustration in . . . any . . . governmental collections now existing or hereafter to be established in the city of Washington for the promotion of knowledge shall be accessible . . . to the scientific investigators and to students in any institution of higher education now incorporated . . . under the laws of Congress".

The Library of Congress is the greatest of our national institutions in its relation to research and learning. Its large collections include the rarest historical documents and publications; its manuscripts and records make up the richest body of source material bearing on the history of our Nation. It contains practically every book printed in America, as well as the most prized of foreign publications. The new Folger Shakespeare Library and special collections in other museums and institutions supplement the Library of Congress in placing Washington foremost as a center of research. The Government's broad educational program centers in the Office of Education, which advises with state, county, and urban school officers as to the administration and improvement of schools, and brings to teachers the results of national experiment and experience. The Bureau of Standards, a unique scientific laboratory, with its large staff of experts, conducts special investigations in the interests of science and technical subjects. The Smithsonian Institution, with its International Exchange Service, distributes a vast accumulation of scientific data and information. The National Museum, with many millions of specimens, is a vast organized collection of the ideas and works of man, illustrating how his simple arts and early beliefs developed into our modern complex culture.

In addition to these federal institutions which contribute so largely to Washington as a center of learning, there are many other forces converging to make it the focus of educational, intellectual, and cultural achievement. Scientific and educational groups such as the Carnegie Institution of Washington, the

American Council on Education, the National Academy of Sciences, the National Research Council, the National Education Association, and the National Geographic Society, with many others, are situated here. Many art galleries, such as the National, the Corcoran, and the Freer are accessible to the student of fine arts. The National Gallery of Art has become one of the leading galleries of the world because of its recent priceless acquisitions and monumental new building. And with the increasing importance of the United States in world affairs, Washington also has become the crossroads of international life, in contact with old-world cultures, and an internationally recognized center of influence. International groups, such as the Pan American Union and the Carnegie Endowment for International Peace, have made Washington their headquarters. The embassies and legations of foreign countries, with their staffs of diplomatic experts and assistants, also contribute largely to the international aspect of life in the Capital of the Nation.

THE SUMMER SESSIONS

The Summer Sessions of 1941 of The George Washington University will present a full program of academic and professional courses. In addition, a special curriculum has been prepared in the School of Education. A large number of the regular members of the University Faculty will teach during the summer, and distinguished specialists from the departments of the United States Government and from national economic and educational organizations have been added to the staff.

The Summer Sessions will be held as follows: nine weeks' term, June 16 to August 15; six weeks' term, June 23 to August 1. In the Law School the first term will be from June 16 to July 28, and the second term from July 29 to September 11.

Courses will be offered in the Junior College, Columbian College (the senior college), the Law School, the School of Education, the School of Government, and the Division of University Students. The student in the School of Engineering or the School of Pharmacy will have the opportunity to take many of his elective and required courses in the Junior College and Columbian College curricula.

ACADEMIC CREDIT

The Summer Sessions are an integral part of the University. Since the courses offered are the equivalent of the corresponding courses offered in the regular terms, academic credit for the completed work will be given toward the appropriate degrees in the various Colleges and Schools of the University in accordance with their separate regulations and requirements.

MAXIMUM OF CREDIT

In general no student may take more than three courses, aggregating nine semester-hours of credit; no employed student may take more than two courses, aggregating six semester-hours of credit.

A student registered only during the six weeks' term may take no more than three courses, aggregating six semester-hours of credit; an employed student in the six weeks' term may take no more than two courses, aggregating four semester-hours of credit.

A student in the Law School may obtain a maximum of four semester-hours of credit in each term.

Any exceptions to these general regulations must be made by the Dean or Director of the College, School, or Division concerned.

STUDENT LIFE

Provision is made for the social and recreational side of student life during the Summer Sessions. The Annual Summer Sessions Party opens the season and is followed by the Starlight Dances each Friday evening on the Lisner Terrace. Picnics and teas are arranged so that new students will have a chance to become acquainted with their fellow students.

For the benefit of out-of-town students, competent guides conduct sightseeing tours and excursions to points of interest in the locality.

The city of Washington affords a variety of recreational opportunities. Wooded trails for hiking, riding, and picnicking wind through Rock Creek Park. Water sports are available on the Potomac River and at nearby beaches on Chesapeake Bay. Tennis courts, golf courses, and other outdoor sports facilities are conveniently located near the University.

The National Symphony Orchestra presents a weekly series of concerts at the Potomac Watergate.

The Director of Recreation, whose office is in Building H, makes arrangements for recreational and social activities and each student is urged to make known to her any particular interests and any requests for assistance in making recreational plans.

LIVING ACCOMMODATIONS

MEN STUDENTS

The University provides limited dormitory facilities for men students.

A registry of nearby rooms which have been inspected and approved is kept in the Office of the Director of Personnel Guidance, where inquiries in respect to housing should be addressed. Single rooms usually range in price from \$20 to \$30 a month, and double rooms from \$10 to \$20 a month a person. Rooms, with board consisting of breakfast and dinner, cost from \$40 to \$50 a month a person.

It is advisable for students to reach the University two or three days before the opening of the term in order that they may become established in satisfactory living quarters before class work begins.

WOMEN STUDENTS

The Hattie M. Strong Residence Hall is open to women students registered in the Summer Sessions. Single rooms are \$25 a month and double rooms \$18 a month a person. Forms for application for room reservations, together with detailed information about the dormitory, may be obtained from the Director of Personnel Guidance.

UNIVERSITY REGULATIONS

The right is reserved to drop any student whenever, in the interest of the student or the University, the Faculty deems it advisable to do so.

The University is not responsible for the loss, in any University building, of personal property belonging to a student.

The University and its various Colleges, Schools, and Divisions reserve the right to modify or change the requirements, rules, and fees of the University. Such regulations shall go into force whenever the proper authorities may determine and shall apply to every student of the University.

The residence requirement for graduation in all undergraduate divisions of the University is the completion of a minimum of one year, or thirty semester-hours. Summer Sessions work may be counted in residence, but in no case may the period of residence aggregate less than thirty weeks.

Detailed information concerning admission; scholarship requirements of the individual Colleges, Schools, and Divisions; requirements for degrees may be obtained from the general catalogue which is available on request at the Office of the Director of Admissions.

THE UNIVERSITY

HISTORY, ORGANIZATION, AND LOCATION

The idea of a university located in the Capital of the Nation was sponsored by George Washington, who during his public life urged the establishment of such an institution and who in his will left fifty shares of stock in the Potomac (Canal) Company for the endowment of a university to be established in the District of Columbia "to which the youth of fortune and talents from all parts thereof might be sent for the completion of their Education in all the branches of polite literature;—in arts and Sciences,—in acquiring knowledge in the principles of Politics & good Government".

The George Washington University is the successor of Columbian College in the District of Columbia, which was chartered by an act of Congress of February 9, 1821. In 1873 the name was changed to "Columbian University" and in 1904 to "The George Washington University".

The University as it is now organized consists of the Junior College, comprising the work of the freshman and sophomore years; a senior college of liberal arts, known as "Columbian College", which offers work leading to the Bachelor's and Master's degrees; the Graduate Council, which offers work leading to the degree of Doctor of Philosophy; the professional Schools and Divisions, which include Medicine, Law, Engineering, Pharmacy, Education, and Government; the Division of University Students, which leads to no degree but makes the work of the University accessible to the mature student; the Inter-American Center; and the Summer Sessions.

The George Washington University is in downtown Washington, four blocks west of the White House and an equally short distance east of the Potomac River with its extensive parkway. Within a few blocks are the buildings housing the offices of many of the departments of the Government, including the Department of State, the Department of the Treasury, the Department of War, the Department of Justice, the Department of the Navy, the Department of the Interior, the Department of Agriculture, the Department of Commerce, and the Department of Labor. The Corcoran Gallery of Art, the Pan American Union Building, and the National Academy of Sciences are also near by; and the Capitol and the Library of Congress can be reached by streetcar in twenty minutes from any of the University buildings.

EDUCATIONAL FACILITIES

Buildings, grounds, and equipment of the University are valued at \$4,500,000. The buildings of the Colleges, Schools, and Divisions offering Summer Sessions work are located in the vicinity of Twenty-first and G Streets NW.

THE UNIVERSITY LIBRARY

The University Library contains more than 125,000 volumes.

The well equipped six-story Library building, which was opened in September 1939, houses all of the library except the law and medical collections.

The Library includes, in addition to the general collection, the library of the late Professor Richard Heinzel, of the University of Vienna, which contains 7,200 books and pamphlets on Germanic philology and literature and cognate branches; the library of the late Professor Curt Wachsmuth, of the University of Leipzig, which contains 7,900 books and pamphlets on Greek and Roman literature, archeology, and history; the Mount Vernon Alcove, which contains 4,000 volumes on political history, international law, and the social sciences; a representative collection of Spanish American books, the gifts of the governments of Hispanic America; the Chauncey Mitchell Depew Public Speaking Library of approximately 500 volumes, the gift of the late Mrs. Chauncey M. Depew; and the collection of the Department of Art, which contains over 2,000 volumes, mainly on architecture, and the Russell Sturgis collection of 7,500 mounted photographs. About 1,000 of these last-named volumes constitute a collection made available by the American Institute of Architects.

Every student registered in the Summer Sessions is entitled to the reference use of the Library. The card issued upon payment of the University fee must be presented as identification.

The books in the Law collection do not circulate, but subject to certain necessary library regulations, books in the University Library may be drawn for home use for a period of two weeks. Any book which does circulate is subject to recall by the Librarian at any time. Reserve books and periodicals for collateral reading must be used in the reading room when the library is open. With special permission they may be drawn for overnight use when the library closes. A fine of twenty-five cents will be charged for the first hour or fraction of an hour and five cents for each hour or

fraction thereafter that a reserve book is overdue. Grades of a student will be withheld until his library record is clear.

The University Library is open from 8:30 A.M. to 9:30 P.M. Monday to Friday, and from 10:00 A.M. to 2:00 P.M. on Saturday.

The Law Library, in Stockton Hall, is open from 10:00 A.M. to 10:00 P.M. Monday to Friday, and from 1:00 to 5:00 P.M. on Saturday.

OTHER LIBRARY FACILITIES

The student has access also to the Library of Congress; the Public Library of the District of Columbia and its branches; the Library of the Carnegie Endowment for International Peace; the Library of the Pan American Union; the Library of the Bureau of Railway Economics; the Library of the United States Department of Agriculture, with its scientific departmental collections; the Library of the United States Office of Education; the Army Medical Library; the Library of the Smithsonian Institution and many of the other great special collections of the government departments.

GOVERNMENTAL INSTITUTIONS ACCESSIBLE TO STUDENTS

In order to promote research and the diffusion of knowledge, the Congress of the United States has made the scientific resources of the Government accessible to students under the terms of the following joint resolution, approved April 12, 1892:

Resolved by the Senate and House of Representatives of the United States of America, in Congress assembled, That the facilities for research and illustration in the following and any other governmental collections now existing or hereafter to be established in the city of Washington for the promotion of knowledge shall be accessible, under such rules and restrictions as the officers in charge of each collection may prescribe, subject to such authority as is now or may hereafter be permitted by law, to the scientific investigators and to students of any institution of higher education now incorporated or hereafter to be incorporated under the laws of Congress or of the District of Columbia, to wit:

- One. Of the Library of Congress
- Two. Of the National Museum
- Three. Of the Patent Office
- Four. Of the Bureau of Education
- Five. Of the Bureau of Ethnology
- Six. Of the Army Medical Museum
- Seven. Of the Department of Agriculture
- Eight. Of the Fish Commission
- Nine. Of the Botanic Gardens
- Ten. Of the Coast and Geodetic Survey
- Eleven. Of the Geological Survey
- Twelve. Of the Naval Observatory

ADMISSION

The courses given in the Summer Sessions offer opportunities to the qualified student of two distinct classes: first, the person interested in special subjects who does not desire credit for a degree from The George Washington University; second, the student who plans to work toward a degree in this institution.

Entrance requirements are stated in this bulletin under the various Colleges, Schools, and Divisions. Further details may be obtained from the Director of Admissions.

A student desiring admission should obtain from the Office of the Director of Admissions an application blank which he should fill out completely and return to the Office of the Director of Admissions.

To insure prompt action, applications should be filed as early as possible for all Summer Sessions.

FOR THE STUDENT NOT SEEKING A DEGREE

The student will be admitted to those courses for which he has adequate preparation and the approval of the instructor.

The student in this group will register in the Division of University Students.

FOR THE STUDENT SEEKING A DEGREE

Applicant from a secondary school should request his high school principal to mail directly to the Office of the Director of Admissions a transcript of his record, which should be recorded on the blank provided by the University.

An applicant who has previously attended an institution of higher learning should request the registrar of that institution to mail directly to the Office of the Director of Admissions a transcript of his record. If he has attended more than one such institution he must request the registrar of each institution to send to the Office of the Director of Admissions a transcript of his record, even though credits were not *earned*, together with an honorable dismissal.

REGISTRATION

Before a student may be admitted to registration he must have satisfied the Office of Admissions that he is qualified for entrance to the University (see "Admission", page 21). A student who has previously matriculated in the University, but who has not been in attendance during the semester prior to registration should file an application for readmission in advance of registration.

TIME AND PLACE OF REGISTRATION

Registration for the nine weeks' term in the Junior College, Columbian College, the School of Education, the School of Government, and the Division of University Students will be held on Monday, June 16. Registration will be conducted in the Hall of Government, 710 Twenty-first Street NW., from 11:00 A.M. to 7:00 P.M. Registration for the six weeks' term in these Colleges, Schools, and Divisions will be held on Monday, June 23. Registration for the first term in the Law School will be conducted in Stockton Hall on Monday, June 16. Registration for the second term in the Law School will be held on Tuesday, July 29.

LATE REGISTRATION

For registration after June 16 in the nine weeks' term and in the first term of the Law School, after June 23 in the six weeks' term, and after August 1 in the second term of the Law School, a late-registration fee of \$5 will be charged. Registration in all courses for credit closes on June 23 for the nine weeks' term and for the first term in the Law School, on June 30 for the six weeks' term, and on August 5 for the second term of the Law School.

CHANGE IN REGISTRATION

Application for a change in registration should be filed in the Office of the Dean or Director of the College, School, or Division. Change may be made only with the permission of the adviser or major professor and the Dean of the School or College or the Director of the Division concerned.

FEES AND FINANCIAL REGULATIONS

By authorization of the Board of Trustees, the following fees have been adopted, effective at the beginning of the Summer Sessions of 1941.

UNIVERSITY FEE

ZOOLOGY

Material fee:

Zoology 1, 2..... 4.50

PAYMENT OF FEES

All fees are payable at the Office of the Cashier, 725 Twenty-first Street NW. No student is permitted to complete registration or to attend classes until all fees are paid. All fees are due in advance at the time of registration.

In exceptional cases, subject to the approval of the Comptroller, the student in the nine weeks' course may sign a contract for the charges permitting two payments as follows: one half plus the University fee and deposits at the time of registration, and one half on July 17. The student whose fees are paid between July 18 and July 22 is charged a service fee of \$1.00. A student who fails to make this payment by July 22 will be suspended and may not attend classes until he has been officially reinstated and has paid all accrued fees and a reinstatement fee of \$5.00. A suspended student may not be reinstated for the session after one week from the date of suspension. Applications for reinstatement are to be made to the Dean of the College or School or the Director of the Division in which the student is registered.

Fees for the six weeks' courses are payable in full at the time of registration.

Fees in the Law School are payable in advance at the beginning of each term.

An auditor pays a University fee of \$2.00 and all other fees chargeable to the student registered for credit except the late-registration fee.

High School Scholarships and other scholarships do not apply to work taken during the Summer Sessions.

WITHDRAWALS AND REFUNDS

In the nine weeks' courses, if the notice of withdrawal or change in schedule is received by the Dean of the College or School or the Director of the Division in which the student is registered on or before July 16, the second payment will be cancelled or adjusted. Notification to an instructor is not an acceptable notice. In no case will any part of an initial payment of tuition be reduced or refunded because of nonattendance upon classes.

In all six weeks' courses, including courses in the Law School, registrations are for the term, and no refunds or rebates are allowed, unless the registration is in advance and the course is dropped before the day of registration for the term involved.

Payments apply only to the session for which registration charges are incurred and in no case will these payments be credited to another semester.

Any student in Chemistry who fails to check out of the laboratory on or before the date set by the instructor, unless excused by the instructor, shall forfeit the balance of his deposit. A student dropping a course before the end of the term must check out of the laboratory at once.

No permission to withdraw and no certificate to work done will be given a student who has not a clear financial record.

As the fiscal year of the University ends on August 31, no requests for refunds can receive consideration after that date.

WITHDRAWALS AND REFUNDS

in the case of a student who withdraws from the University before the end of the semester, the Dean of the College of Arts and Sciences is authorized to refund to the student the amount of the tuition and fees paid for the semester, less the amount of the refundable portion of the tuition and fees. The refundable portion of the tuition and fees is the amount of the tuition and fees paid for the semester, less the amount of the non-refundable portion of the tuition and fees. The non-refundable portion of the tuition and fees is the amount of the tuition and fees paid for the semester, less the amount of the refundable portion of the tuition and fees.

Any student who withdraws from the University before the end of the semester, shall be entitled to a refund of the tuition and fees paid for the semester, less the amount of the non-refundable portion of the tuition and fees. The refundable portion of the tuition and fees is the amount of the tuition and fees paid for the semester, less the amount of the non-refundable portion of the tuition and fees.

The refundable portion of the tuition and fees is the amount of the tuition and fees paid for the semester, less the amount of the non-refundable portion of the tuition and fees. The non-refundable portion of the tuition and fees is the amount of the tuition and fees paid for the semester, less the amount of the refundable portion of the tuition and fees.

The refundable portion of the tuition and fees is the amount of the tuition and fees paid for the semester, less the amount of the non-refundable portion of the tuition and fees. The non-refundable portion of the tuition and fees is the amount of the tuition and fees paid for the semester, less the amount of the refundable portion of the tuition and fees.

The refundable portion of the tuition and fees is the amount of the tuition and fees paid for the semester, less the amount of the non-refundable portion of the tuition and fees. The non-refundable portion of the tuition and fees is the amount of the tuition and fees paid for the semester, less the amount of the refundable portion of the tuition and fees.

The refundable portion of the tuition and fees is the amount of the tuition and fees paid for the semester, less the amount of the non-refundable portion of the tuition and fees. The non-refundable portion of the tuition and fees is the amount of the tuition and fees paid for the semester, less the amount of the refundable portion of the tuition and fees.

THE JUNIOR COLLEGE

INTRODUCTION

The Junior College includes the first two years of college work. Its objects are intended to continue the studies of a general cultural history begun in the secondary schools, and to lay a foundation for the more specialized work which is to follow. During the freshman and sophomore years, therefore, emphasis is laid (1) upon the social, cultural, biological, and physical background of civilization (history, political science, physical and biological sciences, literature, etc.) and (2) upon the discipline necessary to the effective presentation of more advanced work (foreign, classical, and contemporary, foreign languages, mathematics, etc.).

The Junior College also provides the professional work required for admission to the Schools of Medicine, Pharmacy, Education, and Law.

THE COLLEGES, SCHOOLS, AND DIVISIONS

Students who do not look forward to a four-year college course

ADVISORY SYSTEM

It is the aim of the college to give the student opportunity not only for freedom in planning his course of study but also for personal attention and guidance in every phase of his academic life. During the first two years, a number of members of the faculty serve as Junior College advisers. Every student who is on probation or "warned" is required to consult his adviser at such intervals as the Dean or adviser may direct. (See "Warning System.") The student is, however, encouraged to consult the members of the Faculty and the Dean about any college problem or question, irrespective of these requirements.

ADMISSION

Students enter the Junior College on acceptable certificate of high school standing, or on satisfactory completion of the satisfactory completion of the Entrance Board examinations in secondary schools, or on recommendation of the Director of Admissions, or on recommendation of the Director of Admissions.

THE COLLEGE, SCHOOLS, AND DIVISIONS

THE JUNIOR COLLEGE

INTRODUCTORY

The Junior College includes the first two years of college work. Its curricula are intended to continue the studies of a general cultural nature begun in the secondary schools, and to lay a foundation for the more specialized work which is to follow. During the freshman and sophomore years, therefore, emphasis is laid (1) upon the social, cultural, biological, and physical background of civilization (history, political science, physical and biological sciences, literature, etc.) and (2) upon the discipline necessary to the effective prosecution of more advanced work (English rhetoric and composition, foreign languages, mathematics, etc.).

The Junior College also provides the professional work required for admission to the Schools of Medicine, Pharmacy, Education, and Government.

In addition, it provides two two-year curricula, leading to the Junior Certificate, which are intended to meet the needs of the student who does not look forward to a four-year college course.

ADVISORY SYSTEM

In order that the student may have opportunity not only for assistance in planning his course of study but also for personal, educational, and vocational advice in every phase of his academic work during the first two years, a number of members of the Faculty serve as Junior College advisers. Every student who is on probation or "warned" is required to consult his adviser at such stated intervals as the Dean or adviser may direct. (See "Warnings", below.) The student is, however, encouraged to consult with members of the Faculty and the Dean about his college problems at any time, irrespective of these requirements.

ADMISSION

For admission to the Junior College an acceptable certificate of graduation from an accredited secondary school, or the satisfactory passing of College Entrance Board examinations in secondary school subjects selected with the approval of the Director of Admissions is required.

THE JUNIOR CERTIFICATE

Upon the satisfactory completion of the requirements of the Junior College, a Junior Certificate is granted. This certificate is required for admission to the junior class of Columbian College and to the professional Schools which require two years of pre-professional work.

REQUIREMENTS FOR THE CERTIFICATE

To be recommended for a certificate, a student must satisfy the admission, residence, scholarship, and curriculum requirements. The curriculum requirements include at least sixty-four semester-hours of credit. A semester-hour of credit is one recitation or lecture a week or one laboratory period a week for one semester.

The scholarship requirements of the academic year are in effect during the Summer Sessions.

WARNINGS

At stated intervals during the Summer Sessions, instructors shall file in the Office of the Registrar the names of those students who are doing work of *D* grade or lower. A "warning" shall then be transmitted to the student concerned and a copy forwarded to his adviser. A warning constitutes notice to the student that he must consult his adviser within a reasonable time and in any case not later than two weeks after receipt of the warning.

"Warning periods" during the Summer Sessions are established as follows: six-week courses, third to fourth week; nine-week courses, fourth to fifth week.

COURSES OF INSTRUCTION

A Junior College student may not take second-group courses (courses numbered 101-200) without the written permission of the instructor and of the Dean of the Junior College. A student will not be permitted to postpone a first-group course, required under the curriculum for which he is registered, in order to take a second-group course for elective credit. The principle that first-group courses must be taken in the Junior College years, and advanced courses in Columbian College and the professional Schools, will be rigidly adhered to in approving student programs.

COLUMBIAN COLLEGE

INTRODUCTORY

Columbian College, the senior college of liberal arts and sciences, comprises the work of the junior and senior years and the Master of Arts discipline.

ADMISSION

Two years of Junior College work leading to the Junior Certificate, or the lower division work in other accredited institutions not following the junior-senior-college plan, following a specified curriculum, meet the minimum requirements of Columbian College. In addition, however, scholarship requirements may be set somewhat higher than those for graduation from the Junior College.

Bachelor of Arts or Bachelor of Science.—A Junior Certificate based on the appropriate curriculum of the Junior College, or the equivalent is required.

Master of Arts or Master of Science.—An approved Bachelor's degree from an accredited institution and a transcript of studies previously pursued, which show a superior quality of work in the Major field is required.

Applications for admission must be approved by the Department or Division and by the Dean.

THE BACHELOR'S DEGREES

Upon the satisfactory completion of the undergraduate requirements of Columbian College, the degree of Bachelor of Arts or Bachelor of Science is conferred.

In cooperation with the School of Medicine a seven-year curriculum leading to the combined degrees of Bachelor of Arts and Doctor of Medicine is offered.

REQUIREMENTS FOR THE DEGREES

To be recommended for a Bachelor's degree a student must satisfy the admission, residence, scholarship, and curriculum requirements.

A minimum of one year, i.e., thirty semester-hours, must be completed in residence. Summer Sessions work may be counted in residence, but in no case may the period of residence aggregate

less than thirty weeks. Unless special permission is granted by the Dean to pursue work elsewhere, the work of the senior or final year must be completed in residence.

The scholarship requirements of the academic year are in effect during the Summer Sessions.

CURRICULUM REQUIREMENTS

Every candidate for graduation must satisfy one of the curricula listed below leading to the degree of Bachelor of Arts or Bachelor of Science. The curriculum requirements include at least sixty semester-hours of credit beyond that of the Junior College.

The first year of Medicine satisfies the requirements for the major in the combined Arts and Medicine curriculum.

The student is required to select and file with the Registrar a choice of a major upon entering Columbian College. He may change the major only with the consent of the Dean and of the department or division concerned.

Attention is called to the new plan of studies in Columbian College, which is described in a separate pamphlet, available on request.

BACHELOR OF ARTS

B-I.* *General Curriculum.*—The work of the junior and senior years, including a major, must be approved by the major department or division and by the Dean.

G.* *Combined Curriculum: Bachelor of Arts and Doctor of Medicine.*—This curriculum contemplates three years of collegiate study (the final thirty semester-hours of which must be taken in Columbian College) and four years in the George Washington University School of Medicine. The student wishing to avail himself of the opportunity offered by the combined curriculum must obtain the approval of the Dean of Columbian College at the time of entering the School of Medicine. Upon the completion of all prescribed courses in the first year of the School of Medicine, and upon the recommendation of its Dean, the degree of Bachelor of Arts will be conferred. The entire work must be upon the scholarship level required for graduation. A candidate for the combined degrees may not count professional work taken at another institution as satisfying the requirement for the first year in the George Washington University School of Medicine.

* See the table of the Junior College curricula in the general catalogue of the University, facing the Junior College announcement.

BACHELOR OF SCIENCE

The work of the junior and senior years, including a major in one of the sciences mentioned below, must be approved by the major department or division and by the Dean.

Biological Sciences

Biology
Botany
Geology
Zoology

Physical Sciences

Chemistry
Mathematics
Physics

THE MASTER'S DEGREES

Upon the satisfactory completion of the graduate requirements of Columbian College, the degree of Master of Arts or Master of Science is conferred.

DEFINITION OF THE MASTER'S WORK

The purpose and function of study leading to the degree of Master of Arts or Master of Science is to give the student a comprehensive survey of a field of knowledge. This study involves the continuation of the cultural elements provided for in the undergraduate major and a greater acquaintance with scholarly methods.

The basis for granting the degree is the completion of a consistent plan of study, as demonstrated by the successful passing of a written examination (together with such other examinations involving special skills or techniques as the department or the division may require) and by the presentation of a satisfactory thesis.

The student must satisfy certain minimum requirements as to previous preparation, residence, ability to read an approved modern foreign (European) language, and courses taken; but these requirements, while essential, are regarded primarily as qualifying measures. The student's knowledge of his field, as demonstrated by his thesis and by the results of his Master's examination, constitutes the fundamental evidence of his worthiness to receive the Master's degree of The George Washington University.

RESIDENCE

An academic year of residence is required, i.e., completion of a minimum of thirty semester-hours of work including the thesis, which is counted as six semester-hours of work. Summer Sessions work may be counted in residence, but in no case may the period

of residence aggregate less than twenty-seven weeks. Not more than twelve semester-hours (which must be approved in advance by the Dean of Columbian College) may be taken in another School or Division of this University, and such work may not be counted toward both a degree in that School or Division and the Master's degree in Columbian College. No part of the minimum requirement may be taken elsewhere. All work for the degree of Master of Arts or Master of Science shall be completed within a maximum of three years, unless the Dean's Council considers the circumstances so unusual as to justify an extension of time.

PROGRAM OF STUDIES

The student's program of studies shall be outlined in detail at the beginning of his work, and one copy of the program shall be given to the student, one retained by the adviser, and one filed in the Office of the Registrar. Each program is subject to the approval of the department or division. The program may be revised as occasion requires, but revisions shall be made from the point of view of the program as a whole, and copies distributed as in the case of the original program.

A student who expects to continue his studies for the degree of Doctor of Philosophy after receiving the Master's degree is strongly advised so to plan his program from the beginning that work for the lower degree may prepare him for the higher.

ADMISSION TO CANDIDACY

A student shall be admitted to candidacy, at the discretion of the department and the division concerned, before he begins the last half of his work for the Master's degree. Application for admission to candidacy is made on a form obtained at the Office of the Registrar, and must be approved by the appropriate representative of the division and by the Dean. If a prospective candidate, in his previous academic work, has not substantially satisfied the prerequisites for the Master of Arts or Master of Science study, as defined by the appropriate department or division, he will not be admitted to candidacy until such deficiency has been made up.

Before being admitted to candidacy the student must also show that he has a reading knowledge (certified by the appropriate foreign-language department) of at least one modern foreign (European) language, which shall be selected by the division under which he is studying.

THE MASTER'S THESIS

The thesis may be of a research, expository, critical, or creative type. The main purpose of a Master's thesis is to demonstrate the student's ability to make independent use of the information and training acquired through his other disciplines, and to furnish objective evidence of his constructive powers in his chosen field. The thesis must be registered for not later than the beginning of the final year of preparation unless the professor in charge of the thesis permits registration at the beginning of the final semester. For this purpose the nine weeks' term of the Summer Sessions is considered a semester. The choice of the thesis subject must be approved by the professor in charge of the field of study and recorded in the Office of the Registrar by the date announced in the University calendar. The typewritten thesis in its final form must have the approval of the professor in charge and of the Educational Committee of the division concerned, and must be presented to the Dean by the student not later than the date announced in the University calendar. Requirements regarding the form of the thesis are stated in the general catalogue of the University.

THE MASTER'S EXAMINATION

In addition to such other examinations as may be required, the candidate must pass a general written examination on the field of study. The provisions of the new plan for undergraduate majors, as far as they concern the general examination for the major, also apply to the Master's examination. A student who fails to pass the Master's examination may, in exceptional cases and with the approval of the division concerned, repeat the examination, but only after the lapse of one semester. If the candidate fails a second time, no further opportunity to take the examination will be given.

THE GRADUATE COUNCIL

The Graduate Council offers work leading only to the degree of Doctor of Philosophy. The discipline for this degree is divided into two stages: a program of advanced study under the advisement of a Consultative Committee, culminating in the council fellowship examination; and research under the direction of a Master, culminating in the doctoral thesis and a final oral examination. A student wishing to undertake a program of study under the Graduate Council must possess an adequate academic preparation for advanced study in the proposed field. Such preparation must be evidenced by the Master of Arts degree, or the equivalent, within the general field of learning of the doctoral program, together with acceptable personal qualities and capacity for creative work. A reading knowledge of both French and German as necessary implements of research is required of all applicants, and other additional subjects necessary to the performance of advanced study may be designated.

Because of the nature of the graduate discipline, credit hours and attendance in courses of instruction are not required. Students registered under the Council may attend courses in the Summer Sessions which will be of help to their program of study. It is not possible, however, for a student to meet all of the requirements for the degree of Doctor of Philosophy by attendance in the Summer Sessions alone.

More complete general information concerning procedures and requirements for work with the Graduate Council may be found in the general catalogue of the University and in a separate pamphlet which will be sent upon request to the Office of the Graduate Council.

THE LAW SCHOOL

ADMISSION

A candidate for degree must have received before admission to the Law School the degree of Bachelor of Arts or an equivalent degree from an approved college or university. A student in good standing in another approved law school may be admitted for the Summer Session only as an unclassified student.

A qualified student is permitted to begin the study of Law in the Summer Session.

THE DEGREES

The Law School offers the degrees of Bachelor of Laws (LL.B.), Master of Laws (LL.M.), Juris Doctor (J.D.), and Doctor of Juridical Science (S.J.D.). Regarding requirements for these degrees, see the Law School Bulletin.

RESIDENCE AND ATTENDANCE

The Summer Session is a regular part of the work of the School. Credit is given for subjects completed by the regularly qualified student. Residence credit is given for one fifth of a part-time year for attendance in one term of the Summer Session. A part-time year is three fourths of a full-time year and one-fourth of the residence requirement for the degree of Bachelor of Laws. In no case will residence credit amounting to more than this be allowed for attendance during the Summer Session.

COURSES OF INSTRUCTION AND CREDITS

The student may obtain a maximum of four semester-hours of credit in each term by attendance aggregating ten periods a week.

THE SCHOOL OF ENGINEERING

ADMISSION

For admission to the School of Engineering, an acceptable certificate of graduation from an accredited secondary school, or satisfactory passing of College Board examinations in secondary school subjects selected with the approval of the Director of Admissions is required. Full-time or part-time students transferring from accredited engineering colleges may, under regulations established by the School of Engineering, be granted advanced standing toward the Bachelor's degree upon application to the Director of Admissions.

THE DEGREES

The School of Engineering offers the degrees of Bachelor of Civil Engineering, Bachelor of Electrical Engineering, Bachelor of Mechanical Engineering, and Bachelor of Science. Professional degrees of Civil Engineer, Electrical Engineer, or Mechanical Engineer may be conferred upon graduates of the School who have demonstrated their professional ability.

SUMMER SESSIONS COURSES

For several summers courses in special advanced engineering subjects have been available. It is anticipated that for the summer of 1941 defense training courses planned in cooperation with the Office of Education and the governmental departments of national defense will be offered. Announcement of these courses will be made in the early spring.

Students in the School of Engineering are urged to consult with the Dean and departmental advisers in regard to taking required courses and electives, such as Chemistry, Economics, English, Languages, Mathematics, Physics, and Political Science in the Summer Sessions.

THE SCHOOL OF EDUCATION

INTRODUCTORY

It is the purpose of the School of Education to prepare teachers, supervisors, and administrators for the higher ranges of educational service and to offer opportunities to teachers of experience to extend their training. The School embraces the Departments of Education, Physical Education, and Home Economics, and it is affiliated with all the other departments of the University in which the student is likely to elect work. It offers both graduate and undergraduate work.

The program for a degree in the School of Education is planned with the assistance of a Faculty adviser to meet the specific needs of each student. It is important, therefore, that a student have a clear idea of his interest in Education, and also that he be familiar with whatever teaching-certificate requirements he wishes to meet.

The Department of Education offers fundamental courses in the field of Education; the student is encouraged to take a large part of his work in the content fields provided by the other departments of the University.

ADMISSION

Admission to the undergraduate division of the School is based on (a) the satisfactory completion of two years of approved college work, or (b) graduation from an approved two-year normal school, or the equivalent.

To be admitted to graduate standing a candidate must hold a Bachelor's degree from an accredited school or college or must have completed a course of study that is judged by the Faculty to be the equivalent. In addition, the candidate must be accepted by the Committee on Admission and Advanced Standing. The general procedure in meeting this requirement will usually include scholarship and personality ratings from instructors under whom the candidate has studied, a personal interview with the committee, and a scholastic-aptitude test.

THE BACHELOR'S DEGREES

Upon the satisfactory completion of the undergraduate requirements of the School of Education, the degree of Bachelor of Arts

in Education, Bachelor of Science in Home Economics, or Bachelor of Science in Physical Education is conferred.

To be recommended for a degree a student must satisfy the admission, residence, scholarship, and curriculum requirements.

A minimum of one year, or thirty semester-hours, must be completed in residence. Summer Sessions work may be counted in residence, but in no case may the period of residence aggregate less than thirty weeks. Unless special permission is granted by the Dean to pursue the work elsewhere, the work of the senior or final year must be completed in residence.

The scholarship requirements of the academic year are in effect during the Summer Sessions.

BACHELOR OF ARTS IN EDUCATION

The student admitted with two years of approved college work is granted the degree of Bachelor of Arts in Education upon the completion of sixty-six semester-hours of work. This work must include:

| | |
|--|----------|
| *Education (including Observation and Cadet Teaching)..... | 18 |
| †Educational Psychology | 2 or 3 |
| †Educational Sociology | 2 or 3 |
| Subject-matter field | 24 to 36 |
| Electives | 6 to 20 |

To the extent that courses in the foregoing list are offered for admission, the range of electives is increased.

BACHELOR OF SCIENCE

For detailed information concerning curricula leading to degrees of Bachelor of Science in Home Economics and Bachelor of Science in Physical Education, see the general catalogue.

THE HIGHER DEGREES

Upon the satisfactory completion of the graduate requirements of the School of Education, the degree of Master of Arts or the degree of Doctor of Education is conferred.

Graduate work completed in other accredited institutions of learning may be credited toward the Master's degree, but a minimum of twenty-four semester-hours must be completed at The George Washington University.

Transferred work completed more than three years prior to

* The choice of electives in Education and the number of hours elected in excess of eighteen will depend largely upon the certification requirements that the student wishes to meet.

† Required in addition to eighteen semester-hours in Education.

registration for the Master's degree at The George Washington University will be credited only after the candidate has satisfied the department concerned that he is proficient in the subject matter of the courses offered for credit. Such proficiency may be determined by examination or by other means.

MASTER OF ARTS

The degree of Master of Arts is a professional degree designed to prepare the student for some particular type of educational service. The program of studies leading to the degree will be selected by the candidate and his consultative committee from the various departments of the University to give the student an adequate background in his chosen vocational field.

A candidate must pass in resident study at this University at least two semesters, or one semester and a nine-week summer term, or three nine-week summer terms, or four six-week summer terms.

A student whose previous preparation in his chosen field has been adequate may complete his class requirements, including the thesis, by a minimum of thirty semester-hours of work; others may be required to take as many as twelve semester-hours additional.

The program of study will be rounded out by a thesis, which will count as six semester-hours of credit toward the degree. It may be of a research, expository, critical, or creative type, and is intended to demonstrate the student's ability to make independent use of the information and training that he has acquired, and to furnish objective evidence of his constructive powers in his chosen field. The thesis subject must be approved in writing by the candidate's adviser and recorded in the Office of the Registrar by the date announced in the University calendar.

DOCTOR OF EDUCATION

The degree of Doctor of Education is conferred upon the completion of three years of graduate work, including a thesis. The work required is given a practical bent and emphasizes the mastery and application of professional subject matter, both in the study requirements and in the thesis. The tools of investigation are not set, but are determined by the student's committee in relation to the student's needs. These tools may include statistical methods, historical criticism, and the use of one or more foreign languages. At least two semesters must be spent in residence at this University. Special emphasis is placed upon the candidate's success in teaching, supervision, administration, or publication.

THE SCHOOL OF GOVERNMENT

INTRODUCTORY

The purpose of the School of Government is to prepare the student for public affairs, for various branches of the public service, both foreign and domestic, and for positions in business.

ADMISSION

Admission to undergraduate work is based upon a Junior Certificate in Government from the Junior College of this University, or the equivalent.

Admission to work for the Master's degree is based upon a Bachelor's degree which includes the proper basic training completed with superior grades. For instance, admission to work for the Master's degree with a major in Foreign Commerce is based upon a Bachelor's degree with training approximately equivalent to the Bachelor's degree with a major in Foreign Commerce.

THE DEGREES

The degrees offered are Bachelor of Arts in Government and Master of Arts in Government. For a complete statement of the requirements for these degrees, see the announcement of the School of Government in the general catalogue.

THE DEGREE OF BACHELOR OF ARTS IN GOVERNMENT

The curricula leading to the Bachelor's degree are in Public Affairs, Foreign Service, Foreign Commerce, Public Administration, Business Administration, Public Finance, Public Accounting, and Business and Government Statistics. The requirements of these curricula are set forth in the general catalogue.

THE DEGREE OF MASTER OF ARTS IN GOVERNMENT

For the Master's degree a minimum of thirty semester-hours of work must be completed successfully. No part of the minimum requirement may be taken in any other institution. The curricula are in Public Affairs, Foreign Service, Foreign Commerce, Public Administration, Business Administration, Public Finance, Public Accounting, Business and Government Statistics, and Public Personnel Administration.

A student is formally recognized as a candidate for the Master's degree only when his application for candidacy has been approved by the Dean of the School of Government. Before being admitted to candidacy in the curricula in Public Affairs, Foreign Service, and Foreign Commerce, he must show a reading knowledge of at least one modern foreign language.

ADMISSION

A qualified student, not a candidate for a degree in The George Washington University, who desires to pursue courses in the Summer Sessions, may be enrolled in the Division of University Students. In each case the approval of the instructor concerned must be obtained.

An applicant for admission must present a complete statement of the work previously pursued on the University form. A student who is unable to pursue with advantage a course for which he is registered, may be dropped from the roll of that course upon the recommendation of the instructor and with the approval of the Dean.

In special instances, with the permission of the instructor, a person may be registered as an "auditor" in a class without being required to take active part in the exercises or to pass examinations, but no credit will be allowed for such attendance.

For adult students who do not present the work of a satisfactory high school certificate, a program of studies of college grade may be outlined by the Office of the Director of Admission. Such work completed with a grade of at least C in the Division of University Students, may be converted into the equivalent of high school work in the ratio of three semester-hours to one unit and applied toward the entrance requirements of the College or School to which admission is sought.

TRANSFER TO REGULAR STATUS

A "University student" may be transferred, at his request, to another College, School, or Division of the University only upon complying with the regulations of the specific College, School,

THE DIVISION OF UNIVERSITY STUDENTS

INTRODUCTORY

The Division of University Students was organized in 1930 in order to make the work of the University in its several divisions more fully accessible to the mature student and to provide for the offering of special courses to meet special demands as they may arise from time to time. A student registered in this Division is designated a "University student", as distinguished from the regularly matriculated undergraduate and graduate student.

The courses of instruction listed below are subject to change. Courses are offered in the Junior College, Columbian College (the senior college), the Law School, the School of Education, the School of Government, and the Division of University Students. The student in the School of Pharmacy will have the opportunity to take many of his elective and required courses in the Junior College and Columbian College curricula.

Four-week term (all Divisions other than Law School)

Spring: June 16, ends August 13

Six-week term (all Divisions other than Law School)

Spring: June 23, ends August 1

Two-week Summer Sessions

Session begins June 16, ends July 28

COURSES OF INSTRUCTION

Abbreviation of Course Numbers

The number which precedes the name of the course indicates the semester in which that course is offered during the regular academic year. These numbers concern the Summer Sessions only and are not to be confused with the numbers which indicate the year of study.

Courses of Law, first-year courses are numbered from 101 to 199; second-year courses, from 201 to 299; third-year courses, from 301 to 399; and graduate courses from 401 to 499.

The following system of numbering is used in the Department of Education:

Courses numbered from 1 to 100 are planned for the freshman or sophomore year. With the approval of the Dean, they may also be taken by a junior or senior student. They may be taken by a graduate student as an undergraduate deficiency or as prerequisite for a higher course, but they may not be credited toward a higher degree.

Courses numbered from 101 to 200 are planned for the junior or senior year. They may be credited toward a degree only when registration for graduate credit is required.

Law School Summer Sessions

First term begins June 16, ends July 28

Second term begins July 29, ends September 11

EXPLANATION OF COURSE NUMBERS

The number which precedes the name of the course indicates the semester in which that course is offered during the regular academic year. These numbers concern the Summer Sessions only as a means of course identification and as an indication of the level of the work offered.

In the Department of Law, first-year courses are numbered from 101 to 200; second-year courses, from 201 to 300; third-year courses, from 301 to 400; and graduate courses from 401 to 500.

In all other departments the following system of numbering is used:

First-group courses, numbered from 1 to 100, are planned for the student in the freshman or sophomore year. With the approval of the adviser and the Dean, they may also be taken by a junior or senior. In certain instances, they may be taken by a graduate student to make up undergraduate deficiencies or as prerequisite to advanced courses, but they may not be credited toward a higher degree.

Second-group courses, numbered from 101 to 200, are planned for the student in the junior or senior year. They may be credited toward higher degrees only when registration for graduate credit

has been approved at the beginning of the course by the Dean responsible for the graduate work and by the officer of instruction, and when the completion of additional work has been certified by the officer of instruction.

Third-group courses, numbered from 201 to 300, are planned primarily for the graduate student. They are open, with the approval of the officer of instruction, to the qualified senior; they are not open to the Junior College student or any other undergraduate.

INDICATION OF THE AMOUNT OF CREDIT

The number of semester-hours of credit given for the satisfactory completion of a course is in most cases indicated in parentheses after the name of the course. Thus, a year course giving three hours of credit each semester is marked (3-3), and a semester course giving three hours of credit is marked (3). A semester-hour of credit usually consists of the completion of one fifty-minute period of class work or of one laboratory period a week for one semester.

A dagger (†) preceding the number of a year course indicates that the course *may not be entered in the second semester and that credit will not be given until the work of both semesters has been completed.*

BIOLOGY

1-2 *Survey in Biology* (3-3)

Bowman

A review of the plant and animal kingdom based on field work as far as possible, followed by a study of evolution, heredity, public health and conservation. Material fee, \$4.50 for each half. Nine weeks' term; daily except Sat., 5:10 to 7:00 P.M. and Sat. afternoon. (Room: C-405)

William Randall Compton, M.B.A., LL.B., J.S.D., *Associate Professor of Law*

Chester Charles Ward, B.S., LL.B., LL.M., *Associate Professor of Law*

CALENDAR

The Summer Session will include two terms of six weeks each. Classes in the first term will begin Monday, June 16, and end Friday, July 25. Examinations will be held July 28. Classes in the second term will begin Tuesday, July 29, and end Tuesday, September 9. Examinations will be held Thursday, September 11.

RESIDENCE AND ATTENDANCE

The Summer Session is a regular part of the work of the School. Credit is given for subjects completed by regularly qualified students. Residence credit is given for one fifth of a part-time year for attendance in one term of the Summer Session. A part-time year is three fourths of a full-time year and one fourth of the residence requirement for the degree of Bachelor of Laws. In no case will residence credit amounting to more than this be allowed for attendance during the Summer Session.

ADMISSION

Candidates for degrees must have received, before admission, the degree of Bachelor of Arts or an equivalent degree from an approved college or university. The conferring of this degree must be evidenced by proper certificates. Applications for admission are passed upon by the Director of Admissions of the University.

Students in regular standing in other approved law schools may be admitted as unclassified students for the Summer Session only.

Qualified students are permitted to begin the study of Law in the Summer Session.

REGISTRATION

No student will be registered until proper credentials have been filed and approved. The registration days will be Monday, June 16, for the first term, and Tuesday, July 29, for the second term. A late-registration fee of \$5 will be charged students registering on or after June 17 for the first term and on or after August 2, for the second term. No student will be permitted to register after the first week of a term.

FEES

Fees are as follows: University fee, \$4; tuition fee, for each semester-hour of credit, \$8; late-registration fee, \$5; service fee, \$1; reinstatement fee, \$5.

Fees for each term are payable in advance at the beginning of the term.

A student who is compelled to withdraw before the end of a term should apply to the Dean of the Law School at once for permission to withdraw. Until this application for withdrawal has been made and approved, the student is treated as still in registration. In case of a withdrawal during a term no refund of fees will be granted.

HOURS OF INSTRUCTION AND CREDITS

All classes are held in the late afternoon from 5:10 to 7:00 P.M., from Monday to Friday, inclusive.

Students may obtain a maximum of four semester-hours of credit in each term.

Regarding requirements for the degrees, see the Law School announcement.

Announcement of a Summer Session's Course in
INTRODUCTORY NAVAL ARCHITECTURE

WASHINGTON, D. C.

MAY 1941

INTRODUCTORY NAVAL ARCHITECTURE

To meet the continued demand for Naval Architects by the United States Maritime Commission, Navy, Coast Guard, and private shipyards, the School of Engineering of The George Washington University will again offer, in the 1941 Summer Sessions, an introductory course in Naval Architecture described below. This course will carry five semester-hours of credit toward the degree of Bachelor of Science with a major in Naval Architecture.

This course was first offered in the 1939 Summer Sessions at the request of the United States Maritime Commission which has furnished plans, specifications, data, and models for instructional purposes. It is accepted by the United States Civil Service Commission as meeting the requirements for examinations which specify technical training in Naval Architecture.

DESCRIPTION OF THE COURSE

MECHANICAL ENGINEERING 5

Introductory Naval Architecture (5) Reed, Cruickshanks

The nomenclature, functions, and arrangements of hull structure, equipment, and machinery of steel merchant vessels. Lectures supplemented by visits to shipyards. Classes will meet from 5:10 to 7:00 P.M. Monday through Thursday in the nine weeks' term.

REQUIREMENTS

Admission Requirements.—Trigonometry and a knowledge of Mechanical Drawing are essential. Prospective students are advised to confer with the Dean of the School of Engineering from whom permission may be obtained to enroll for the course.

Fees.—The fee for the five semester-hour course in Naval Architecture is \$40.00 plus the University Fee of \$4.00. Payment of the University Fee entitles the student to the regular University privileges, including medical attention and hospital services as described in the University Catalogue.

Registration.—Registration will be from 11:00 A.M. to 7:00 P.M. on Monday, June 16, 1941, in the School of Government, 21st and G Streets, NW. Classes begin on Tuesday, June 17, at 5:10 P.M. and continue for nine weeks.

HATTIE M. STRONG HALL

THE HATTIE M. STRONG HALL FOR WOMEN
THE GEORGE WASHINGTON UNIVERSITY
WASHINGTON, D. C.

The Hattie M. Strong Hall, gift of Mrs. Henry Alvah Strong, is the dormitory for 110 resident women students of The George Washington University. On the University campus in downtown Washington, Strong Hall is within walking distance of the main shopping district of the city and the extensive park along the Potomac River.

A residence hostess is in charge of the building.

Student Rooms.—All rooms are furnished and equipped with telephones. Double rooms, each with running water, are arranged in suites of two connected by a bath.

The girls are responsible for their laundry and for the daily care of their rooms which are cleaned weekly by maids.

Living costs.—A single room with breakfast and dinner is \$50.00; a place in a double room with breakfast and dinner is \$43.00 a month.

Health.—The University physician for women keeps daily office hours. Students are entitled to certain health services, including three visits by the University physician during any one illness and hospitalization with board, medicine, and nursing care in the University Hospital for two weeks during a school year.

Application for Residence.—Application should be made no later than August first but cannot be approved until the Director of Admissions has certified the student for admission to the University.

Consideration will be given all applications for rooms from students who have satisfied the admissions requirements. However, preference will be given to women under twenty-five years of age who carry a full academic schedule.

A deposit of \$25.00 must accompany each room reservation. This deposit is applied to the rent for the first month of occupancy, but is forfeited if the room is not claimed by the date of the opening of the University.

For further information, address the Director of Admissions, The George Washington University, Washington, D. C.

HISTORY AND ORGANIZATION

HISTORY

The idea of a university located in the Capital of the Nation was conceived by George Washington, who during his public life urged the establishment of such an institution and who in his will left fifty shares or stock in the Potomac (Canal) Company for the endowment of a university to be established in the District of Columbia "to which the youth of fortune and talents from all parts should be sent for the cultivation of their Education in all the branches of polite Literature, in arts and Sciences, in acquiring knowledge in the principles of Politics & good Government".

It was George Washington's hope that the "Federal Government" would extend toward such an institution "a fostering hand". No action was taken by Congress to carry out the provision of Washington's will and the fact that he had bequeathed for the establishment of a university in the District of Columbia became a subject of regret in the history of the Potomac Canal.

THE UNIVERSITY

Meanwhile, however, the education of the youth of the Nation was left under the leadership of Luther Rice as a child in the Nation's hands. At the time of the war of the National Government for the education of the Nation's youth and to afford general collegiate training. In 1800 an academy was founded by Luther Rice, Christian B. Brown, Spencer H. Cox, and Francis Brevint for the purpose of sending youth to the land of the war of the college.

A group of the Nation's leaders who were especially fond of Washington's idea became patrons of the college and contributed to funds raised for the purchase of land and erection of buildings. Among them were James Monroe, President of the United States; William H. Crawford, Secretary of the Treasury; John C. Calhoun, Secretary of War; William Wirt, Attorney General; Rufus B. Mason, Postmaster General; and other two members of the Congress.

Finally to inaugurate the college's mission was made in Congress for the establishment of "the General Convention of the District Department in the District of Columbia for theological and literary purposes". This action was denied by Congress on April 25, 1802, because of its national character.

Finally in 1802 a Congressional chapter, committee of the Senate was charged with the mission to prepare a bill for the establishment of a university of Government leaders there was presented in Congress a bill for the establishment of "the Columbian University for literary and theological purposes" to replace in this way the acquisition of Wash-

HISTORY AND ORGANIZATION

HISTORY

The idea of a university located in the Capital of the Nation was sponsored by George Washington, who during his public life urged the establishment of such an institution and who in his will left fifty shares of stock in the Potomac (Canal) Company for the endowment of a university to be established in the District of Columbia "to which the youth of fortune and talents from all parts thereof might be sent for the completion of their Education in all the branches of polite literature;—in arts and Sciences,—in acquiring knowledge in the principles of Politics & good Government".

It was George Washington's hope that the "General Government" would extend toward such an institution "a fostering hand". No steps were taken by Congress to carry out the provision of Washington's will, and the stock that he had bequeathed for the establishment of a university in the District of Columbia became valueless owing to the failure of the Potomac Canal properties.

Meanwhile, however, a movement was started by private persons under the leadership of Luther Rice to establish an institution of higher learning at the seat of the National Government for the education of the Baptist ministry and to afford general collegiate training. In 1819 an association was formed by Luther Rice, Obadiah B. Brown, Spencer H. Cone, and Enoch Reynolds for the purpose of raising funds to buy land for the use of the college.

A group of the Nation's leaders who were especially interested in Washington's idea became patrons of the college and contributed to funds raised for the purchase of land and erection of buildings. Among them were James Monroe, President of the United States; William H. Crawford, Secretary of the Treasury; John C. Calhoun, Secretary of War; William Wirt, Attorney General; Return J. Meigs, Postmaster General; and thirty-two members of the Congress.

Legally to implement the college a petition was made to Congress for the incorporation of "the General Convention of the Baptist Denomination in the District of Columbia for evangelical and literary purposes". This petition was denied by Congress, on April 26, 1820, because of its sectarian character.

Failing to obtain a denominational charter, members of the association enlarged their objective to embrace national aims, and with the sponsorship of Government leaders there was presented in Congress a bill for the incorporation of "the Columbian Society for literary purposes", it being proposed to realize in this way "the aspirations of Wash-

ington, Jefferson and Madison for the erection of a university at the seat of the federal government".

Acting upon this second petition, on February 9, 1821, Congress chartered Columbian College in the District of Columbia, inserting in the charter by special action the provision "That persons of every religious denomination shall be capable of being elected Trustees; nor shall any person, either as President, Professor, Tutor or pupil, be refused admittance into said College or denied any of the privileges, immunities or advantages thereof, for or on account of his sentiments in matters of religion".

Thus Columbian College in the District of Columbia was chartered by Congress as one of the early nonsectarian institutions of higher learning in the United States, under the distinguished favor of President James Monroe and members of his Cabinet.

A tract of approximately forty-seven acres, extending about one-half mile northwest of Boundary Street (Florida Avenue) between 14th and 15th Streets, was purchased and by 1822 the main building was completed sufficiently to use.

Two years later, when the first Commencement was held on December 15, 1824, Congress and the Supreme Court adjourned their sessions to enable their members to attend the exercises. President Monroe, John Quincy Adams, John C. Calhoun, Henry Clay, and the Marquis de Lafayette headed the eminent company in attendance.

The School of Medicine, established in 1821, was formally opened in 1825 and has been in continuous operation since that time. The Law School, organized in 1826, was discontinued the following year, and was reestablished in 1865. It is the oldest law school in Washington.

By an act of Congress of March 3, 1873, the name of the college was changed to "Columbian University", in recognition of the enlarged scope of the institution. The following year the University was moved from its first location on "College Hill", now Columbia Heights, to the new University Hall built for it at Fifteenth and H Streets. Near-by buildings accommodated the School of Medicine.

For a period of six years, from 1898 to 1904, the University was placed under control of the Baptist Denomination. In 1904 an act restoring the original secular character of the University and authorizing change of name to The George Washington University was passed by Congress.

Subsequently all the Colleges, Schools, and Divisions of the University except the School of Medicine, which is situated on H Street between Thirteenth and Fourteenth Streets NW., were brought together at the present location in the city block bounded by Twentieth, Twenty-first, G, and H Streets NW., and in the blocks adjacent.

In 1930 a new plan of academic organization for the liberal arts work was effected. The Junior College was established, comprising the work of the freshman and sophomore years. The junior and senior years were retained in Columbian College, which was designated the senior college of letters and sciences. As a further step, the year of study leading to the Master's degree was separated from the graduate work for the Doctor's degree and assigned to Columbian College. The Graduate Council was organized to administer the work for the degree of Doctor of Philosophy. These innovations were accompanied by the establishment of a carefully controlled independent study plan, the grouping of departments of instruction under the divisional type of organization, and the institution of a new plan of administration both for the undergraduate major and for the Master's work.

THE COLLEGES, SCHOOLS, AND DIVISIONS

The George Washington University offers courses in twelve Colleges, Schools, and Divisions, as follows: the Junior College; Columbian College, the senior college of letters and sciences; the Graduate Council; the School of Medicine; the Law School; the School of Engineering; the School of Pharmacy; the School of Education; the School of Government; the Division of University Students; the Inter-American Center; and the Summer Sessions.

ACADEMIC STATUS

The George Washington University is on the approved list of the Association of American Universities, the standard accrediting body for the United States. This fact not only assures to students the academic standards of this accrediting body, but also is important to those who desire to transfer credits from one institution to another.

The University is also accredited by its regional accrediting agency, the Middle States Association of Colleges and Secondary Schools, and is on the approved list of the American Association of University Women.

The Law School is a charter member of the Association of American Law Schools and is approved by the Council of Legal Education of the American Bar Association. The School of Medicine is a member of the Association of American Medical Colleges, is one of the medical colleges which have been designated continuously as "class A" by the American Medical Association, and is accredited for all its work by the Combined (Royal) Medical Examining Boards in England. The School of Pharmacy is accredited by the American Council on Pharmaceutical Education and is a member of the American Association of Colleges of Pharmacy. The School of Engineering is on the accredited list of the Engineers' Council for Professional Development.

LOCATION

The George Washington University is located in downtown Washington, four blocks west of the White House and an equally short distance from the Potomac River with its extensive parkway. Within a few blocks are many of the departments of the Government, including the Department of State, the Department of the Treasury, the Department of War, the Department of Justice, the Department of the Navy, the Department of the Interior, the Department of Agriculture, the Department of Commerce, and the Department of Labor. The Corcoran Gallery of Art, the Pan American Union Building, and the National Academy of Sciences are also near by, and the Capitol, the Library of Congress, and the National Gallery of Art can be reached by streetcar in twenty minutes from any of the University buildings.

GOVERNMENT

The government and general educational management of The George Washington University are vested in a self-perpetuating Board of Trustees, with the President of the University as member ex officio. The members of the Board are named for a period of three years and are divided into three classes. The members of one class are elected at each annual meeting to fill the places of the members whose terms of office expire. Two members of each class are nominated by the Alumni Association. The charter provides that "persons of every religious denomination shall be capable of being elected Trustees".

ENDOWMENT

The endowment of The George Washington University is \$2,355,137.34. This figure does not include funds temporarily functioning as endowment nor the value of buildings, grounds, and equipment.

EDUCATIONAL FACILITIES

BUILDINGS

Buildings, grounds, and equipment are valued at approximately \$6,000,000.

The buildings of the Junior College, Columbian College, the Graduate Council, the Law School, the School of Engineering, the School of Pharmacy, the School of Education, the School of Government, and the Division of University Students are grouped in the vicinity of Twenty-first and G Streets NW. The School of Medicine, the University Hospital, and the Dispensary are situated at Fourteenth and H Streets NW. The buildings of the University are as follows:

THE UNIVERSITY LIBRARY

The University Library contains more than 125,000 volumes. The well equipped six-story Library building, which was opened in September 1939, houses all of the library except the law and medical collections. The Library includes, in addition to the general collection, the library of the late Professor Richard Heinzel, of the University of Vienna, which contains 7,200 books and pamphlets on Germanic philology and literature and cognate branches; the library of the late Professor Curt Wachsmuth, of the University of Leipzig, which contains 7,900 books and pamphlets on Greek and Roman literature, archeology, and history; the Mount Vernon Alcove, which contains 4,000 volumes on political history, international law, and the social sciences; a representative collection of Spanish American books, the gift of the governments of Hispanic America; the Chauncey Mitchell Depew Public Speaking Library of approxi-

mately 500 volumes, the gift of the late Mrs. Chauncey M. Depew; and the Art Collection, which contains over 2,000 volumes, mainly on architecture, and the Russell Sturgis collection of 7,500 mounted photographs. About 1,000 of the last-named volumes constitute a collection made available by the American Institute of Architects.

OTHER LIBRARY FACILITIES

The student has access also to the Library of Congress; the Public Library of the District of Columbia and its branches; the Library of the Carnegie Endowment for International Peace; the Library of the Pan American Union; the Library of the Bureau of Railway Economics; the Library of the United States Department of Agriculture, with its scientific departmental collections; the Library of the United States Office of Education; the Army Medical Library; the Library of the Smithsonian Institution; and many of the other great special collections of the government departments.

GOVERNMENTAL INSTITUTIONS ACCESSIBLE TO STUDENTS

In order to promote research and the diffusion of knowledge, the Congress of the United States has made the scientific resources of the Government accessible to the student under the terms of the following joint resolution, approved April 12, 1892:

Resolved by the Senate and House of Representatives of the United States of America, in Congress assembled, That the facilities for research and illustration in the following and any other Governmental collections now existing or hereafter to be established in the city of Washington for the promotion of knowledge shall be accessible, under such rules and restrictions as the officers in charge of each collection may prescribe, subject to such authority as is now or may hereafter be permitted by law, to the scientific investigators and to students of any institution of higher education now incorporated or hereafter to be incorporated under the laws of Congress or of the District of Columbia, to wit:

- One. Of the Library of Congress.
- Two. Of the National Museum.
- Three. Of the Patent Office.
- Four. Of the Bureau of Education.
- Five. Of the Bureau of Ethnology.
- Six. Of the Army Medical Museum.
- Seven. Of the Department of Agriculture.
- Eight. Of the Fish Commission.
- Nine. Of the Botanic Gardens.
- Ten. Of the Coast and Geodetic Survey.
- Eleven. Of the Geological Survey.

ADMISSION

All departments of the University accept men and women.

Students may enter any College, School, or Division of the University except the School of Medicine and the Law School at the beginning of either semester or either of the summer terms.

Entrance to the School of Medicine is permitted only at the beginning of the first semester of the academic year.

Entrance to the Law School is permitted at the beginning of either semester and at the beginning of the first summer term.

GENERAL ADMISSION REQUIREMENTS

The following factors are considered in determining the eligibility of an applicant for admission:

1. The adequacy of previous academic work as preparation for the course of study now contemplated. This includes the amount and quality of work and the standing of the institution in which it was done.
2. The aptitude of the student if bent upon study for a profession.
3. The character of the student.

The University reserves the right to refuse admission to any student whose previous work has been of such grade as to create doubt of his ability to pursue college work successfully, or who for any other reason deemed adequate by the University would not be a desirable student.

APPLICATION FOR ADMISSION

A student desiring admission should obtain from the Office of the Director of Admissions an application blank which he should fill out completely and return to the Office of the Director of Admissions.

A recent photograph, with signature, of the applicant must be attached to the application blank.

To insure prompt action, applications should be filed not later than July 1 for the first semester, January 1 for the second semester, and May 1 for all Summer Sessions. Applications for admission to the School of Medicine should be filed not later than March 1 because qualified applicants far outnumber the capacity of the School.*

* A fee of \$3 to defray the costs of completing the records for final consideration for admission must accompany each application.

An applicant from a secondary school should request his high school principal to mail directly to the Office of the Director of Admissions a transcript of his secondary school record, which should be recorded on the blank provided by the University.

An applicant who has previously attended an institution of higher learning should request the registrar of that institution to mail directly to the Office of the Director of Admissions a transcript of his record. If he has attended more than one such institution he must request the registrar of each institution to send to the Office of the Director of Admissions a transcript of his record, even though credits were not earned, together with an honorable dismissal from the institution last attended.

METHODS OF ADMISSION

FROM SECONDARY SCHOOLS

An applicant from a secondary school may be admitted by certificate or examination.

BY CERTIFICATE

A certificate of graduation with a minimum of fifteen "units"* from an accredited secondary school and the recommendation from the principal of the secondary school that the applicant is prepared to undertake college work will be accepted subject to the following conditions:

1. If the school is accredited by the regional accrediting association, the student must have attained a rank not lower than the fourth fifth of his class.
2. If the school is not listed by the regional accrediting association, but has been accredited by the state accrediting agency, the student shall be required to have attained a rank in the upper two fifths of his class. The Committee on Admission and Advanced Standing may review the case of a student in the third or fourth fifth and, when such action is warranted by evidence of progress in the last two years of work, may permit such a student to take a special aptitude test, from the results of which the committee will determine his eligibility or ineligibility.

BY COLLEGE ENTRANCE BOARD EXAMINATIONS

An applicant for admission who furnishes a certificate of graduation from an unaccredited secondary school shall take the examinations offered by the College Entrance Examination Board. Such an applicant must satisfactorily pass these examinations in not less than the prescribed

fifteen units, including for curricula other than the pre-medical curriculum, subjects from each of the following fields: English, Foreign Languages, Mathematics, and Science. The exact number of units in each of these fields must be approved by the Director of Admissions.

An applicant for admission who, though a graduate of an accredited secondary school, presents a certificate not acceptable in quality may seek to qualify through passing satisfactorily College Entrance Board examinations in subjects prescribed by the University.

The examinations of the College Entrance Examination Board are held each spring in Washington as well as in other centers. These examinations will be given in Washington at The George Washington University June 14-21, inclusive, and September 8-10, inclusive, 1941. Applications and fees for the June examinations should reach the College Entrance Examination Board, 431 West 117th Street, New York City, not later than May 11, 1941. For the September examinations, applications and fees should reach the Board in New York City not later than August 11, 1941.

The student planning to take College Entrance Board Examinations should obtain the definitions of requirements in subjects as published by the Board, as well as application forms, prior to the above dates.

FROM HIGHER INSTITUTIONS

An applicant for advanced standing is admitted upon the presentation of satisfactory credentials from an accredited institution of higher learning. The student must be in good standing as to scholarship and conduct, and must be eligible to return to the previously attended institutions in the semester for which he seeks admission to The George Washington University.

If the transcript of record from such an institution includes the record of his secondary school work, it is not necessary for the applicant to have forwarded a separate record directly from the principal of the secondary school. High school work is considered only as fulfilling entrance requirements; it is never credited toward advanced standing.

Properly certified courses of study taken in accredited colleges and universities may, under the rules of the College, School, or Division concerned, be credited toward the requirements of an appropriate curriculum in that College, School, or Division, and applied toward a degree at this University. Course-credits must represent a quality of work as determined by this University. Work of low pass grade (such as *D* or the equivalent) may not be considered for transfer. Certain courses completed with satisfactory grade at another college or university may not count at The George Washington University toward a particular degree representing largely required courses.

ENTRANCE REQUIREMENTS

THE JUNIOR COLLEGE

For admission to the Junior College an acceptable certificate of graduation from an accredited secondary school, or the satisfactory passing of College Entrance Board examinations in secondary school subjects selected with the approval of the Director of Admissions is required. (See "Methods of Admission".)

Distribution of Units for All Curricula except Premedical.—Except for admission to the premedical curriculum, certification by the principal that the student has satisfied all curriculum requirements of the school will be accepted in lieu of any prescribed distribution of units. Attention is called, however, to the necessity of completing stated prerequisite studies during the secondary school period for admission to certain curricula. For a statement of the foreign-language requirements, see pages 61-62.

Distribution of Units for the Premedical Curriculum.—The several state medical boards govern the granting of licenses to practice; hence their requirements as to high school credits must be met exactly. The fifteen units required must include three in English, two in one foreign language, one in Algebra, one in Geometry, one in History, and one in Science. Eleven of the units offered must be in the above subjects.

COLUMBIAN COLLEGE (THE SENIOR COLLEGE)

Two years of Junior College work leading to the Junior Certificate, or the lower-division work in institutions not organized on the junior-senior-college plan, following a specified curriculum, meet the minimum requirements of Columbian College. In addition, however, scholarship requirements for admission may be set somewhat higher than those for graduation from the Junior College. Thus a selective process of choosing the most promising students may be employed.

FOR THE BACHELOR'S DEGREES

Bachelor of Arts.—A Junior Certificate based on curriculum A-I in the Junior College, or the equivalent (see page 59 and table facing pages 62-63) is required. A student taking the combined Arts and Medicine curriculum is subject to this requirement, and must include all the special premedical requirements (see pages 14-15).

Bachelor of Science.—A Junior Certificate based on curriculum A-II in the Junior College, or the equivalent (see page 59 and table facing pages 62-63) is required.

FOR THE MASTER'S DEGREE

An approved Bachelor's degree from an accredited higher institution is required. A student from an unaccredited institution may be admitted at the discretion of the Committee on Admission and Advanced Standing, but he will be required to take such extra work above the minimum requirements as may be prescribed. A superior quality of work in the major field is essential.

Applications for admission must be approved by the department or division and by the Dean.

Master of Arts.—The student's undergraduate curriculum must include a program of study substantially equivalent to a major in his chosen field, together with an appropriate distribution of courses in other fields, or he must complete this prerequisite work in addition to that required for the Master's degree.

Master of Science.—The student's undergraduate curriculum must include the equivalent of the undergraduate major of the scientific department under which he desires to work.

THE GRADUATE COUNCIL

A student wishing to undertake work leading to the degree of Doctor of Philosophy which is administered by the Graduate Council must possess an adequate academic preparation for advanced study in the proposed field, as evidenced by approved Bachelor's and Master's degrees, or the equivalent, together with acceptable personal qualities and capacity for creative work.

THE SCHOOL OF MEDICINE

For admission to the School of Medicine, a Junior Certificate or the equivalent from an accredited higher institution is required. This certificate must be based on the premedical college requirements totaling at least sixty semester-hours.* Graduation from the Junior College of this University or attainment of junior standing in another college or university does not automatically admit to the School of Medicine.

SPECIFIC EDUCATIONAL REQUIREMENTS

SECONDARY SCHOOL REQUIREMENTS

Of the fifteen secondary school units required, three must be in English, two in one foreign language (ancient or modern), one in Algebra, one in Geometry, one in History, and one in Science (Botany, Chemistry, Physics, or Zoology). Eleven of the units offered must be in English,

* Beginning September 1942, premedical college requirements must total ninety semester-hours, exclusive of Physical Education, except for those students registered in the premedical curriculum during the academic year 1940-41.

foreign language, Mathematics, Science, and History. No candidate will be accepted with any condition in secondary school work.

PREMEDICAL COLLEGE REQUIREMENTS

Sixty Semester-Hours

1. Chemistry, twelve semester-hours as follows: (a) eight semester-hours of General Inorganic Chemistry, of which at least four semester-hours are laboratory work (Qualitative Analysis may be counted as General Inorganic Chemistry); (b) four semester-hours of Organic Chemistry, of which two semester-hours are laboratory work. It is strongly recommended, however, that an additional four semester-hours of Organic Chemistry be taken.
2. Physics, eight semester-hours, of which at least two semester-hours are laboratory work. It is recommended that this course be preceded by one in Trigonometry.
3. Biology, eight semester-hours, of which at least four semester-hours are laboratory work. This requirement may be satisfied by a course of eight semester-hours in either General Biology or Zoology, or by a course of four semester-hours each in Zoology and Botany, but not by Botany alone.
4. English composition and literature, six semester-hours: the usual introductory college course, or the equivalent. The student should develop facility in speaking and writing English.
5. Modern foreign language: a reading knowledge, preferably of French or German.
6. Electives. It is recommended that the remaining semester-hours required include: (a) Comparative Vertebrate Anatomy; (b) Qualitative and Quantitative Chemical Analysis; (c) Social Science and Psychology. No student will be accepted with any condition in college work.

ADVANCED STANDING

A student who has satisfactorily attended one or more years at any other "class A" medical school, and who has the necessary preliminary educational requirements, may be admitted to advanced standing. No student, however, will be admitted to advanced standing in the senior class.

THE LAW SCHOOL

FOR THE DEGREES IN THE PROFESSIONAL COURSE

Bachelor of Laws and Juris Doctor.—The degree of Bachelor of Arts or an equivalent degree from an approved college or university is required.

ADVANCED STANDING

Advanced standing toward the degree of Bachelor of Laws may be granted for work successfully completed in other law schools which are members of the Association of American Law Schools. A student transferring from another approved law school with advanced standing must show that at the time he began the study of law at the other school he could have met the requirements then in force for admission to the Law School of The George Washington University. The right is reserved to refuse such credit, in whole or in part, or to allow it conditionally or after examination, and credit given may be withdrawn for subsequent poor work.

Advanced standing toward the degree of Juris Doctor will not be granted for work in other law schools.

FOR THE DEGREES IN THE GRADUATE COURSE

Master of Laws.—The degree of Bachelor of Arts or an equivalent degree from an approved college or university and the degree of Bachelor of Laws from an approved law school are required.

Doctor of Juridical Science.—The following are required: (1) the degree of Juris Doctor from the George Washington University Law School; or (2) the degree of Bachelor of Arts from an approved college, the degree of Bachelor of Laws or the equivalent (earned with high rank), from an approved law school, outstanding capacity for scholarly work in the field of law, and acceptance as a candidate by the Dean's Council of the Law School.

UNCLASSIFIED STUDENTS

A person eligible for admission to regular standing but not a candidate for a degree may, at the discretion of the Dean, be admitted as an unclassified student.

A person who is in good standing as a candidate for a degree in another approved law school may, at the discretion of the Dean, be admitted as an unclassified student. Work taken by an unclassified student will not be accepted for credit toward a degree at this Law School.

THE SCHOOL OF ENGINEERING

For admission to the School of Engineering, an acceptable certificate of graduation from an accredited secondary school, or the satisfactory passing of College Entrance Board examinations in secondary school subjects selected with the approval of the Director of Admissions is required.

Nine and one-half of the fifteen units required for entrance must be distributed as follows: three in English, two in Algebra, one in Plane Geometry, one-half in Plane Trigonometry, one in Physics or Chemistry, and two in one foreign language or History. A graduate of an approved high school who does not offer for admission the particular subjects required for the Engineering curriculum, but who does present not less than fifteen acceptable units, may be admitted on condition, if such deficiency in the distribution of units does not exceed two units. If the deficiency is more than two units, it is frequently possible to admit an otherwise qualified student to the Junior College (liberal arts college) as an unclassified student for such period as may be necessary to permit him to make up such units by taking college courses designed for this purpose.

THE SCHOOL OF PHARMACY

For admission to the School of Pharmacy a Junior Certificate based on the curriculum in Pharmacy in the Junior College, or the equivalent is required.

A student who has received a Bachelor's degree from an accredited institution or who has completed work in the general cultural or foundational subjects of the pharmacy curriculum may be admitted to advanced standing. No more than one year of advanced standing will be granted a student from any institution other than an accredited college of pharmacy.

THE SCHOOL OF EDUCATION

Bachelor of Arts in Education, Bachelor of Science in Home Economics, Bachelor of Science in Physical Education.—A Junior Certificate based on curriculum D-I, D-II, or D-III-IV in the Junior College, or the equivalent from an accredited higher institution, or a certificate of graduation from an approved normal school or the equivalent is required.

FOR THE DEGREE OF MASTER OF ARTS IN EDUCATION

A Bachelor's degree from an accredited institution, or the completion of a course of study that is the equivalent is required. A student from an unaccredited institution whose work is judged by the Faculty to be not more than twelve semester-hours short of that required for an approved Bachelor's degree may remove his deficiencies while registered for the Master's degree.

FOR THE DEGREE OF DOCTOR OF EDUCATION

The degree of Master of Arts in Education or the equivalent, and at least three years of satisfactory educational experience are required.

THE SCHOOL OF GOVERNMENT

FOR THE BACHELOR'S DEGREE

For admission to the School of Government a Junior Certificate based on the curriculum in Government in the Junior College, or the equivalent is required.

FOR THE MASTER'S DEGREE

A Bachelor's degree from an accredited institution, or evidence of a course of study that is judged by the Faculty to be the equivalent is required. A student from an unaccredited institution may be admitted at the discretion of the Dean's Council, but he will be required to take such extra work above the minimum requirements as may be prescribed.

The course of study pursued for the Bachelor's degree must be approved by the Dean as having provided the proper basic training. If this course of study is deemed inadequate, additional undergraduate work will be required. The Dean may permit deficiencies to be made up concurrently with work for the degree.

THE DIVISION OF UNIVERSITY STUDENTS

Men and women over twenty-one years of age may apply for admission as "University students", to pursue courses for which they have had adequate preparation. An applicant who presents credentials evidencing eligibility for degree candidacy but who does not desire to become a candidate for a degree in The George Washington University may be admitted as a "University student". In each case, the approval of the instructor concerned must be obtained. The applicant for admission must present on the appropriate University form a complete statement of the work previously pursued. A student who is found unable to pursue with advantage a course for which he is registered, may be dropped from the rolls of that course upon the recommendation of the instructor and with the approval of the Dean.

In special instances, with the permission of the instructor, a person may be registered as an "auditor" in a class without being required to take active part in the exercises or to pass examinations, but no credit will be allowed for such attendance.

For the adult student who does not present the work of a satisfactory high school certificate, a program of studies of college grade may be outlined by the Office of the Director of Admissions. Such work completed with a grade of at least *C* in the Division of University Students, may be converted into the equivalent of high school units in the ratio of three semester-hours to one unit and applied toward the entrance requirements of the College or School to which admission is sought.

CLASSIFICATION OF STUDENTS

REGULAR STUDENTS

Regular students are those who have met the entrance requirements for candidacy and are registered for certificates or degrees.

UNIVERSITY STUDENTS

Persons of mature age, as specified in the rules of the Division of University Students, may be admitted to that Division to pursue courses for which they have had adequate preparation. In special instances, with the permission of the instructor, a person may register as an auditor in a class without being required to take active part in the exercises or to pass examinations, but no credit will be allowed for such attendance. (See the announcement of the Division of University Students, page 149.)

Students may obtain additional information concerning curricula, courses offered, entrance requirements, or admission procedure from the Office of the Director of Admissions.

TIME AND PLACE OF REGISTRATION

Registration for the first semester will be conducted on September 17, 1911, for entering freshmen, and on September 18, 19, and 20, 1911, for all other students. Registration for the second semester will be conducted on February 2, 1912, for entering freshmen, and on February 3 and 4, 1912, for all other students. Registration for all College, School, and Division of the University except the Law School will be conducted in the Hall of Government, 710 Twenty-first Street N.W., from 11:00 A.M. to 7:00 P.M. Registration for the Law School will be conducted in Jackson Hall, 720 Twentieth Street N.W., from 11:00 A.M. to 7:00 P.M.

LATE REGISTRATION

For registration after September 20 in the first semester, and after February 5 in the second semester, a late-registration fee of \$2.50 will be charged. In all courses, registration for credit closes on October 1 in the first semester, and on February 10 in the second semester.

CHANGES IN REGISTRATION AND WITHDRAWALS

A student may not change or drop courses or change his section in that or another except with the permission of the Dean of the College School or Division in which he is registered, upon the presentation of adequate reasons for such change. (See "Withdrawal from Courses," page 41.) Changes from one section to another of the same course may be made at

REGISTRATION

Before a student may be admitted to registration he must have satisfied the Office of the Director of Admissions that he is qualified for entrance to the University. (See "Admission", pages 10-19.)

A student who has previously matriculated in the University, but who has not been in attendance during the semester prior to registration, should file an application for readmission in advance of registration.

Registration is for the semester unless otherwise indicated on the registration paper. No registration is accepted for less than a semester or one summer term.

A student may not register concurrently in The George Washington University and another institution without the permission of the Dean of the College, School, or Division in which he is registered in The George Washington University. Allowance of credit for work done concurrently will be at the discretion of the appropriate Committee on Admission and Advanced Standing.

TIME AND PLACE OF REGISTRATION

Registration for the first semester will be conducted on September 17, 1941, for entering freshmen, and on September 18, 19, and 20, 1941, for all other students. Registration for the second semester will be conducted on February 3, 1942, for entering freshmen, and on February 4 and 5, 1942, for all other students. Registration for all Colleges, Schools, and Divisions of the University except the Law School will be conducted in the Hall of Government, 710 Twenty-first Street NW., from 11:00 A.M. to 7:00 P.M. Registration for the Law School will be conducted in Stockton Hall, 720 Twentieth Street NW., from 11:00 A.M. to 7:00 P.M.

LATE REGISTRATION

For registration after September 20 in the first semester, and after February 5 in the second semester, a late-registration fee of \$5 will be charged. In all courses, registration for credit closes on October 4 for the first semester, and on February 20 for the second semester.

CHANGES IN REGISTRATION AND WITHDRAWALS

A student may not change or drop courses or change his status to that of auditor except with the permission of the Dean of the College, School, or Division in which he is registered, upon the presentation of adequate reasons for such change. (See "Withdrawal from Courses", page 43.) Changes from one section to another of the same course may be made at

any time with the permission of the Dean of the College, School, or Division concerned.

A student desiring to change his major subject should make application to his Dean. In making such change all requirements specified in the course of study to which the change is made must be satisfied before graduation.

A student desiring to transfer from one College, School, or Division to another should make application to the Director of Admissions. Such change may be made only with the approval of the Deans concerned.

A student who is obliged to withdraw from the University during the semester must immediately report in person or in writing to the Dean of the College, School, or Division in which he is registered. No permission to withdraw from the University will be given to a student who has not a clear financial record. (See "Fees and Financial Regulations", pages 22-27.)

A student is liable for all charges for courses for which he has registered unless changes have been made with the approval of the Dean, as stated above. Reporting the dropping of a course to an instructor does not effect its discontinuance.

FEES AND FINANCIAL REGULATIONS

By authorization of the Board of Trustees, the following fees have been adopted, effective at the beginning of the academic year 1941-42:

UNIVERSITY FEE

| | |
|--|--------|
| For each semester or for any part thereof..... | \$8.00 |
| For the Summer Sessions..... | 4.00 |
| For auditors and for extension students, for each registration*..... | 2.00 |

TUITION FEES

| Wherein a certificate is granted..... | 10.00 |

| | |
|--------------------------------------|------|
| FEE FOR BINDING MASTER'S THESIS..... | 3.00 |
|--------------------------------------|------|

* Payment of this fee does not entitle auditors or extension students to the general privileges to which payment of the preceding fees entitles resident students.

† Registration in the School of Medicine is for a period of one year. After the student has entered the courses of instruction, he is obligated for the full tuition for the year. No part of the tuition will be refunded upon withdrawal or dismissal for any cause.

‡ Payment of tuition for the thesis will entitle the candidate, during the academic year of registration, to the advice and direction of the member of the Faculty under whom the thesis is to be written. In case a thesis is unfinished, an additional successive academic year may be granted without further tuition payment. If the preparation of the thesis extends beyond the two-year period, it must be registered for again, and tuition paid on the same basis as for a repeated course.

§ When a limited schedule is carried which extends the time of either the preparation period or the examination period to more than one year, the proportionate part of the charge may be fixed by the Comptroller.

FEE FOR THE PROFESSIONAL THESIS IN THE SCHOOL OF ENGINEERING.... 50.00
An annual fee: one half, plus the University fee, payable in advance at the time of each registration.

FEE FOR PRINTING AND FILING SUMMARY OF DOCTORAL THESIS..... 50.00

SPECIAL FEES

Late-registration fee, charged each student who fails to register within the designated period..... 5.00
Service fee, charged each student whose payments, not met when due on the seventeenth day, are paid between the eighteenth and twenty-second days, inclusive, of the month in which payment is due 1.00
Reinstatement fee, charged each student who is reinstated after suspension for delinquency in fees..... 5.00
For special physical examination..... 2.00
For examining admission credentials in the School of Medicine..... 3.00

UNIVERSITY FEE

Payment of the University fee covers all expenses incident to registration and, in addition, secures to each student the following University privileges: (1) the issuance of three certified transcripts of record, if and when desired; (2) the services of the Placement Office; (3) the use of University library facilities, except as otherwise designated; (4) gymnasium privileges; (5) admission to all athletic contests, unless otherwise specified; (6) subscription to the *University Hatchet*, the student newspaper; (7) admission to University debates; (8) medical attention and hospital services as described under the Department of Health Administration. These privileges, however, with the exception of the issuance of transcripts, terminate, and a student is no longer in residence, when he withdraws or is dismissed from the University.

LABORATORY FEES AND DEPOSITS

Fees are charged in each course listed below as indicated. All fees are charged by the semester and unless otherwise indicated may be defrayed in three payments when the tuition is paid in this manner. Fees and deposits payable in advance are due in full at the time of registration. Breakage of apparatus is charged against the individual student, and the amount paid in excess of breakage will be returned at the end of the year.

PAYMENT OF FEES

All fees are payable at the Office of the Cashier, 725 Twenty-first Street NW. No student is permitted to complete registration or to attend classes until all fees are paid. Fees for each semester are due and payable in advance at the time of registration.

In exceptional cases, subject to the approval of the Comptroller, the student may sign a contract for semester charges, except for the University fee and other fees payable in advance, permitting payments as follows:

First semester—one third at the time of registration, plus the University fee and deposits; one third on November 17; one third on December 17.

Second semester—one third at the time of registration, plus the University fee and deposits; one third on March 17; one third on April 17.

Students in the School of Medicine are not privileged to sign contracts for semester charges.

A student who fails to meet payments when due, on the seventeenth day, but who pays his fees between the eighteenth and twenty-second days, inclusive, of the month in which payment is due is charged a service fee of \$1. A student who fails to meet payments by the twenty-second day of the month in which payment is due will be suspended and may not attend classes until he has been officially reinstated and has paid all accrued fees and a reinstatement fee of \$5. A suspended student may not be reinstated for the semester after two weeks from the date of suspension. Applications for reinstatement are to be made to the Dean of the College, School, or Division in which the student is registered.

An auditor pays a University fee of \$2 and all other fees chargeable to the student registered for credit except the late-registration fee.

WITHDRAWALS AND REFUNDS

Application for withdrawal from the University or for change in class schedule must be made in person or in writing to the Dean of the College, School, or Division in which the student is registered. Notification to an instructor is not an acceptable notice (see "Withdrawal from Courses", page 43).

In authorized withdrawals and changes in schedules, financial adjustments will be made as follows:

First semester—withdrawal dated on or before November 15, cancellation of the second and third payments; withdrawal dated on or before December 15, cancellation of the third payment. No refund or reduction will be allowed on a withdrawal dated subsequent to December 15.

Second semester—withdrawal dated on or before March 15, cancellation of the second and third payments; withdrawal dated on or before April 15, cancellation of the third payment. No refund or reduction will be allowed on a withdrawal dated subsequent to April 15.

In no case will the University fee or any part of an initial payment of fees be refunded, and in no case will tuition be reduced or refunded because of nonattendance upon classes.

Payment applies only to the semester for which a registration charge is incurred and in no case will this payment be credited to another semester.

Any student in Chemistry who fails to check out of the laboratory on or before the date set by the instructor, unless excused by the instructor, will forfeit the balance of his deposit. A student who drops a course before the end of the semester must check out of the laboratory at once.

Authorization to withdraw and certification for work done will not be given a student who has not a clear financial record.

FELLOWSHIPS, SCHOLARSHIPS, PRIZES, LOANS

FELLOWSHIPS

The following fellowships are available to graduate students. Applications should be submitted for consideration not later than March 1 preceding the academic year for which the fellowship is to be awarded.

THE SCHOOL OF GOVERNMENT

Fellowships of the Grand Encampment, Knights Templar of the U. S. A., Educational Foundation Committee.—Five fellowships of the value of \$1,000 each are offered annually in the School of Government by the Educational Foundation of the Grand Encampment of Knights Templar of the U. S. A. These fellowships, open to men holding the Bachelor's degree from an accredited institution, are intended to train for governmental service. They will be allotted according to districts defined by the Educational Foundation Committee of the Grand Encampment of Knights Templar.

The fellowship of the Southeastern District is named for J. K. Orr, Past Grand Master of the Grand Encampment. For information concerning these fellowships, apply to the Honorable Fred A. Aldrich, Chairman of the Educational Foundation Committee, Grand Encampment of Knights Templar, P. O. Box 149, Flint, Michigan.

THE GRADUATE COUNCIL

The applicant for a University Teaching Fellowship or a Special Fellowship is expected to be a prospective candidate for the degree of Doctor of Philosophy, and to have the Master of Arts degree, or the equivalent, in the general field of his future doctoral study and research. Forms on which to make application for these fellowships may be obtained from the Chairman of the Graduate Council.

University Teaching Fellowships.—These are assigned for the academic year 1941-42 in the following departments of instruction: Bacteriology, Biochemistry, Botany, Chemistry, Economics, English, History, Physics, Psychology, Romance Languages, Statistics, Zoology. Each fellow receives a stipend of \$600, plus full tuition in the Graduate Council for whatever schedule of study or research his Fellowship duties permit him to carry. The occupant of each of these Fellowships renders a designated unit of service to the department of instruction in his major field of doctoral study, usually in classroom or laboratory assignments.

Special Fellowships.—A number of special Fellowships are supported by endowment, and are awarded to doctoral students of unusual promise and ability. The stipend is not fixed but varies in amount with the need of the individual receiving the award. In applying for one of these Fellowships it is advantageous that the student appear personally for an interview with the Chairman and such other members of the Graduate Council as would be interested in the research investigations proposed. These Fellowships include the following:

Isabella King Research Fellowship.—Of the value of \$1,200 annually, offered in the general field of Biology, and intended to foster research for which the libraries and scientific establishments in Washington provide special facilities.

Thomas Bradford Sanders Fellowships.—Established by Miss Addie Sanders in memory of her brother, Thomas Bradford Sanders, and offered in various academic fields of study, with stipends designated by the Chairman of the Graduate Council.

SCHOLARSHIPS

Scholarships are awarded for one year unless otherwise specified and are credited in equal parts for each semester. Each holder must carry a full schedule of academic work (fifteen semester-hours or in the professional schools the full prescribed schedule) during the period for which the scholarship is awarded. Except in the case of the Columbian Women's Scholarships, the High School Scholarships, the Metzert Scholarship, the National League of Masonic Clubs Scholarships, the Order of the Eastern Star Scholarship, and the Trustee Scholarships, applicants must have established an academic record in courses at this institution and should apply on prescribed forms which must be filed in the Office of the Registrar not later than May 15th preceding the academic year for which the scholarship is to be awarded. Further information may be obtained from the Registrar of the University.

Byron Andrews Scholarships.—Three scholarships, in the amount of \$100 each, founded by Mrs. Belle Fisk Andrews in memory of her husband, the late Byron Andrews, are available "for ambitious and needy students, who desire to pursue courses in English, Latin, Journalism, History, Literature, or Political Science".

Emma K. Carr Scholarships.—Four scholarships in the amount of \$240 each and twelve in the amount of \$100 each, founded in 1932 by Mrs. Emma K. Carr, are awarded annually to "young men (of the white race) for undergraduate or postgraduate work, considering character, capacity, and need".

Henry Harding Carter Scholarships.—These three scholarships, founded in 1896 by Mrs. Maria M. Carter in memory of her husband, Henry Harding Carter, are of the annual value of \$50 each and may be awarded to deserving students who are preparing for the civil-engineering profession.

Maria M. Carter Scholarship.—This scholarship, in the amount of \$30 to be awarded annually to a young man, was given to the University in 1871 by Mrs. Maria M. Carter.

Isaac Davis Scholarship.—This scholarship, in the amount of \$30 to be awarded annually, was given to the University in October 1869 by the Honorable Isaac Davis, of Massachusetts. Nominations for the scholarship may be made "by the founder or his eldest lineal descendant". In case no such nomination is made, the scholarship is to be awarded by the University.

Charles Worthington Dorsey Memorial Scholarship.—This scholarship, established as a memorial to Charles Worthington Dorsey, Bachelor of Laws, '81, Master of Laws '82, is awarded upon the recommendation of the Faculty of the Law School to a needy and promising graduate of Columbian College or other division of the University, with a Bachelor of Arts or other equivalent degree, who has maintained an average of *B* as an undergraduate student and who desires to pursue the study of law as a full-time student. The scholarship covers tuition for the course leading to the first degree from the Law School, Bachelor of Laws or Juris Doctor, provided that the holder maintains an average of *B*. The right is reserved to suspend the benefits of the scholarship for cause at any time. The scholarship is awarded ordinarily once every three years.

Robert Farnham Scholarship.—This scholarship, in the amount of \$30 to be awarded annually to a student in Columbian College, was given to the University in 1871 by Mrs. Robert Farnham.

Elma Lewis Harvey Scholarship.—This scholarship, of the annual value of \$200, was founded in 1921 by Mrs. Emma Elizabeth Harvey in memory of her daughter, and is to be awarded every four years, or as often as vacant, to a young woman student in Columbian College of the Protestant faith and of the Caucasian race who shall be selected for scholarship and moral qualifications.

High School Scholarships.—Two University scholarships, one for a man student, the other for a woman, are assigned for award to each of the following schools: Anacostia, Central, Eastern, McKinley, Roosevelt, Western, and Woodrow Wilson High Schools (District of Columbia); Bethesda-Chevy Chase High School (Maryland); Washington-Lee and George Washington High Schools (Virginia). The *Amos Kendall Scholarship*, founded by the late Honorable Amos Kendall, is one of the

two assigned to the Central High School. Each of the above scholarships is awarded annually, on the recommendation of a committee consisting of the Dean of the Junior College of The George Washington University, the principal of the high school concerned, and an alumnus of both the high school and the University, to a member of the graduating class who intends to enter the Junior College and to continue in Columbian College. A principal and an alternate may be recommended.

The holders of these scholarships are exempt from tuition fees, the Summer Sessions excepted, but are charged the University, laboratory, graduation, and other fees. The scholarships are valid for four continuous academic years following the award, subject to the following conditions: The principal, or, if the principal declines, the alternate, must register during the registration period for the fall term following the award. To retain any High School Scholarship a student must carry a full program of study (a full program being defined as at least fifteen hours of work each semester), unless otherwise determined in individual cases by the Committee on Student Loans and Scholarships upon recommendation of the Dean of the College concerned. An average of *B* and a high standard of deportment must be maintained. In case the holder of the scholarship does not use it, the scholarship will not be reassigned.

John Hitz Metzerott Scholarship.—This scholarship in the amount necessary to cover tuition charges, exclusive of special fees, was established in 1923 in memory of John Hitz Metzerott, M.D. '91, by members of his family, and is to be awarded every six years, or as often as vacant, to a young man preparing to enter the medical profession. The donors reserve the right to nominate the holder of this scholarship. The holder of the scholarship may be a student pursuing a premedical course in the Junior College or Columbian College, or the professional course in the School of Medicine.

A. Morehouse Scholarship.—This scholarship was founded by Mr. A. Morehouse, of Washington, D. C., in 1861. It carries an annual stipend of \$45, which is available for an undergraduate intending to enter the Christian ministry.

The National League of Masonic Clubs Scholarships.—Twelve scholarships, in the amount of \$600 each, are offered for the academic year 1941-42 by the National League of Masonic Clubs. These scholarship awards, based upon competitive examinations, are available to Masons and sons of Masons affiliated with the National League of Masonic Clubs. Information in regard to the regulations governing these awards may be obtained from the Executive Secretary, Board of Trustees and Administration, Educational Foundation, National League of Masonic Clubs, P. O. Box 56, Station H, New York City.

Order of the Eastern Star Scholarship.—This scholarship in the amount of \$125 was established by the Order of the Eastern Star of the District of Columbia and is to be awarded to a woman of the Order or to a daughter of a member in good standing. The donors reserve the right to nominate the holder of this scholarship.

David Spencer Scholarship.—This scholarship, established in 1918 by Louisa J. Spencer, is available under conditions stated in the bequest.

Mary Lowell Stone Scholarship.—This scholarship, founded in 1893 in memory of Mary Lowell Stone, is in the amount of \$60, to be awarded annually to a woman student of science in Columbian College.

Trustee Scholarships.—Five scholarships are awarded each year, upon the recommendation of regional alumni clubs, to outstanding male graduates of accredited high schools. The scholarships cover tuition costs for two years of full-time work but do not include the University fee, special fees such as laboratory charges, room, board, or other expenses. To retain the scholarship for the second year, the student must maintain a *B* average. Additional information may be obtained from the Alumni Secretary.

William Walker Scholarship.—This scholarship was founded in 1824 by William Walker, Esq., of Putnam County, Georgia. It carries an annual stipend of \$75, which is available for an undergraduate intending to enter the Christian ministry.

John Withington Scholarship.—This scholarship was founded in 1830 by the New York Baptist Theological Seminary, to be known as the John Withington Scholarship. It has an annual stipend of \$60.

Ellen Woodhull Scholarship.—This scholarship, founded by the late Ellen M. E. Woodhull, is in the amount of \$25, to be awarded annually to a student in Columbian College.

THE COLUMBIAN WOMEN SCHOLARSHIP FUNDS

The prize essays shall become the property of the University and shall not be printed or published without the written consent of the University. The University reserves the right to withhold the award if no essay attaining the required degree of excellence is submitted.

LOAN FUNDS

Loan funds are administered by the University Committee on Student Loans and Scholarships. Applications upon the required forms must be filed in the Office of the Comptroller at least ten days before the first day of registration in each semester. Applications for loans to cover the second or third payments of tuition in each semester must be filed on or before the tenth day of the month in which the fees are due. Applications for loans cannot be considered if they are received after the dates stated above. Loans will be limited to the amount required for tuition in each case. Borrowers will sign notes for the amount borrowed. The terms of repayment of interest and principal will be arranged at the time of making the loan. When a student withdraws from the University, his loan automatically becomes due. No candidate will be approved for graduation if he is delinquent in a loan obligation incurred for educational purposes either at The George Washington University or elsewhere.

University Student Loan Fund.—The Trustees of The George Washington University have established a loan fund amounting to \$10,000.

Daughters of the American Revolution Loan Fund.—The District of Columbia Chapters of the Daughters of the American Revolution have established an endowment fund of \$5,000.00, the income of which is available for interest-bearing loans to descendants of patriots of the American Revolution. At present the loan fund amounts to \$1,256.51.

Henry Strong Educational Foundation.—The Henry Strong Educational Foundation, established at Chicago under the will of General Henry Strong, makes available a fund for loans to both men and women students under the age of twenty-five years, preferably in the upper classes, who possess not only zeal for leadership but also character and those traits tending to leadership, to aid them "in obtaining a practical, literary, scientific, mechanical, or business education". The amount available for the year 1941-42 is \$1,293.24.

Henry Strong-William A. Maury Loan Fund.—This fund, also allocated from the funds of the Henry Strong Educational Foundation, is to be loaned to students under the age of twenty-five years in the George Washington University Law School. The amount available for 1941-42 is \$964.59.

Knights Templar Educational Loan Fund.—This fund, contributed and administered by the Grand Commandery of Knights Templar of the District of Columbia, is available for loans to students, preferably in the upper classes, who are residents of the District of Columbia. The amount loaned to a student is limited to \$200, and the terms of repayment are specially arranged in each instance by the Loan Committee of the Knights Templar.

Pharmacy Loan Fund.—This fund of \$155.69, established in 1932 by the Washington Chapter No. 4 of the Women's Organization of the National Association of Retail Druggists, is available to students in the School of Pharmacy. Application should be made to the Dean of the School.

REGULATIONS

A student enrolled in the University is required to conform to the general University regulations and to comply with the rules and regulations of the College, School, or Division in which he is registered.

If a student knowingly makes a false statement or conceals material information on an application for admission, registration card, or any other University document, his registration may be cancelled and he will be ineligible (except by special action of the Faculty) for subsequent registration in any unit of The George Washington University.

ATTENDANCE

A student is not permitted to attend classes until registration has been completed and fees due have been paid. Regular attendance is required. For undue absence in any course, a student may be dropped from the course. Tuition charges are made on a semester basis and in no case will tuition be refunded or reduced because of non-attendance.

A student who has been suspended, either for delinquency in payment of fees or for any other reason, is not permitted to attend classes during the period of suspension.

For further regulations regarding attendance, consult the announcements of the several Colleges and Schools.

CONTINUOUS REGISTRATION

A student who withdraws or is suspended, or is otherwise absent from the University for one semester or more, may re-enter and continue his work only under the rules and regulations in force at the time of his return. With the approval of the Dean of the College or School concerned, a student may be granted leave of absence for a semester or an academic year; such student should, however, remain technically in residence by paying the usual University fee for each semester he is absent.

For the purpose of this regulation, the Summer Sessions will not be considered a semester.

PHYSICAL EDUCATION REQUIREMENTS

Every student in the Junior College and every freshman and sophomore in the School of Engineering is required to take certain specified courses in Physical Education.

A student who takes less than three courses, or who, because of regular employment during the day, must take all of his classes during the late afternoon hours, is exempt from these regulations.

Any other exemption will be granted only upon written application which has been recommended by the Physical Education Department concerned and approved by the Dean of the College, School, or Division in which the student is registered.

A student entering the University with advanced standing is not exempt from the Physical Education requirements unless he has satisfactorily met the requirements elsewhere. Courses in Military Training are not accepted in satisfaction of these requirements.

The required medical and physical examinations, as specified by the Departments of Physical Education, will be arranged at the time of registration.

SCHOLARSHIP REQUIREMENTS

A student who fails to maintain the scholarship requirements of the College, School, or Division in which he is registered may be dismissed from the University.

EXAMINATIONS

Examinations are scheduled in all courses at the end of each semester or at the completion of the course.

A student guilty of dishonesty in examinations may be deprived of credit for the courses in which dishonesty occurs and may be dismissed from the University.

For further regulations regarding examinations, consult the announcements of the several Colleges, Schools, and Divisions.

GRADES

Grades are not given out by instructors but are mailed to the student through the Office of the Registrar at the close of each semester. Upon request, a copy of the student's grades will be forwarded to his parent or guardian.

The following grading system is used in all undergraduate divisions of the University: *A* (90-100 per cent), excellent; *B* (80-89 per cent), good; *C* (70-79 per cent), average; *D* (60-69 per cent), passing; *E*, conditioned, not passing; *F* (below 60 per cent), failing; *Inc.*, incomplete; *W*, withdrawn. *W* is followed by a letter grade indicating the quality of work the student was doing at the time of withdrawal. A course failed must be repeated with a passing grade in order to be credited. No student may repeat for credit a course in which he has received a grade above *E*, without the permission of the Faculty of the College, School, or Division in which he is registered. A condition may be removed within one year on terms specified by the instructor, but in no case will a

final grade above *D* be given unless the course is repeated in class. A grade of "incomplete" cannot be altered after the lapse of one calendar year except by action of the Faculty.

In all graduate divisions of the University, grades are indicated as "satisfactory", "unsatisfactory", or "incomplete".

For the grading systems of the Law School and the School of Medicine, see the explanations in the announcements of those Schools.

WITHDRAWAL FROM COURSES

Withdrawal from any course must be approved by the Dean of the College, School, or Division in which the student is registered. The grade *F* (failing) will be given in a course dropped without the permission of the Dean. Application for withdrawal from any course within one month before the end of the semester or two weeks before the end of the Summer Sessions will be approved only in exceptional cases. Forms upon which to make requests for withdrawal may be obtained at the Office of the Dean. (See "Withdrawals and Refunds", pages 26-27.)

QUALITY-POINT INDEX

Quality-points are computed from grades as follows: *A*, four points; *B*, three points; *C*, two points; *D*, one point; *E* and *F*, no points, for each semester-hour for which the student has registered.

Scholarship is computed in terms of the quality-point index, obtained by dividing the number of quality-points by the number of semester-hours for which the student has registered, both based on the complete collegiate record. Courses marked *W* or *Inc.* are not considered in determining the index.

CREDIT

Credit toward a degree is given only after regular registration for and satisfactory completion of the required work of classes in the University, or upon the granting of advanced standing in accordance with the regulations of the several Colleges, Schools, and Divisions.

On request the Registrar will issue to the student a balance sheet showing the amount of work completed and the amount necessary to complete the requirements for a degree.

TRANSFER OF SUMMER SCHOOL CREDIT

A student who plans to attend summer school sessions at another institution with the intention of having credits so obtained apply toward graduation at this institution must first secure the written approval of the Dean of his College or School. In no event will such credits be recognized to an amount in excess of that which might be earned in a similar period in this institution.

GRADUATION REQUIREMENTS

To be recommended for graduation a student must have met the admission requirements of the College, School, or Division in which he is registered, completed satisfactorily the residence, scholarship, and other requirements for the certificate or degree for which he is registered, and be free from all indebtedness to the University.

Application for Graduation.—Application for a degree or a Junior Certificate should be filed in the Office of the Registrar at the time of registration for the first semester of the senior or final year and may not be filed later than the date specified in the University calendar.

Residence Requirements.—In all undergraduate divisions of the University a minimum of one year, or thirty semester-hours, must be completed in residence. Summer Sessions work may be counted in residence, but in no case may the period of residence aggregate less than thirty weeks. Unless special permission is granted by the Dean of the College, School, or Division concerned to pursue work elsewhere, the work of the senior or final year must be completed in residence.

The graduate student must meet the residence requirements for the particular degree for which he is registered.

Scholarship Requirements.—In all undergraduate divisions of the University the scholarship requirement for graduation is a quality-point index of at least 2.00.

The graduate student must meet the scholarship requirements for the particular degree for which he is registered.

Attendance and Conduct.—The University reserves the right of refusing to confer a degree upon a candidate whose attendance or conduct has been unsatisfactory.

Presence at Graduation.—A candidate is required to be present at the graduation exercises unless written application for graduation in absentia is approved by the Dean of his College or School.

HONORS

In all undergraduate divisions of the University the degree may be conferred "with distinction", at the discretion of the Faculty, upon a student attaining a quality-point index of 3.50 or higher on all work taken at this institution except for the grades immediately preceding the granting of the degree. To be eligible for this honor a student must have completed at this institution at least one half of the work required for the degree.

SPECIAL HONORS

Special honors may be awarded by the Faculty to any member of the graduating class for outstanding achievement in the student's major field of work on recommendation of the major department, under the following regulations:

1. The student shall have his candidacy for special honors approved by the Faculty member representing the major department not later than the beginning of the senior year.
2. The candidate shall meet such other conditions as the major department may set at the time the student's candidacy is approved.
3. No student shall be awarded special honors unless he has a quality-point index of at least 3.00 on all work taken at this institution except for the grades immediately preceding the granting of the degree. To be eligible for this honor a student must have completed at this institution at least one half of the work required for the degree.

FORMAL REQUIREMENTS FOR THESES

A thesis submitted in partial satisfaction of requirements for the Master's degree, the professional degrees in Engineering, the degree of Doctor of Education, or the degree of Doctor of Philosophy must be presented in its final form to the Dean of the College, School, or Division concerned not later than the date specified in the University calendar. Three* copies of each thesis are required, one typewritten original and two legible carbon copies, on official thesis paper, which is obtainable at the Student Club. All copies should be unbound. The title page must be in the following form:

(title of thesis)

By (full name of candidate)

(degrees held, with dates of conferment and names of conferring institutions)

A thesis submitted to the Faculty of the (name of the College, School, or Division) of The George Washington University in partial satisfaction of the requirements for the degree of (name of degree).

(date of Convocation at which the degree is to be conferred)

Accepted theses, with accompanying drawings, are the property of the University and will be deposited in the University Library, where the duplicate copies will be bound and made available for circulation. Permission to publish or adapt material in the thesis must be secured from the appropriate Faculty.

Special requirements regarding theses are stated in the announcements of the Colleges, Schools, and Divisions.

* In the School of Education, four copies.

TRANSFER OF RECORDS

Official transcripts of student records will be forwarded on request to other institutions. Unofficial copies of records will be issued to the student on request. No charge is made for the first three transcripts; a fee of one dollar is charged for each one thereafter. No certificate of work done will be issued for a student who does not have a clear financial record.

THE LIBRARY

A student registered in the University is entitled to the reference use of the University Library. The Student Activities Book, issued upon payment of the University fee, must be presented as identification.

Library books, with the exception of those in the Law and Medical collections, may be drawn for home use for a period of two weeks. Any book which does circulate is subject to recall by the Librarian at any time. Reserve books and periodicals for collateral reading must be used in the reading rooms when the Library is open. With special permission they may be drawn for overnight use when the Library closes. A fine of twenty-five cents will be charged for the first hour or fraction of an hour and five cents for each hour or fraction thereafter that a reserve book is overdue. Grades of a student will be withheld until his library record is clear.

HOURS

The University Library is open from 8:30 A.M. to 10:30 P.M. each class day (Saturday, 8:30 A.M. to 6:00 P.M.), and from 2:00 to 6:00 P.M. on Sunday.

The Law Library, in Stockton Hall, 720 Twentieth Street, is open from 9:00 A.M. to 11:00 P.M. each class day (Saturday, 9:00 A.M. to 6:00 P.M.), and from 2:00 to 6:00 P.M. on Sunday.

The Medical Library, at 1335 H Street, is open from 8:30 A.M. to 9:00 P.M. each class day (Saturday, 8:30 A.M. to 4:00 P.M.)

RIGHT TO DISMISS STUDENTS

The right is reserved by the University to dismiss any student from the University, or from any class or classes, whenever, in the interest of the student or the University, the University Administration deems it advisable to do so.

RIGHT TO CHANGE RULES

The University and its various Colleges, Schools, and Divisions reserve the right to modify or change requirements, rules, and fees. Such regulations shall go into force whenever the proper authorities may determine.

STUDENT LIFE

LIVING ACCOMMODATIONS

It is advisable for the student to reach the University two or three days before the opening of the term in order that he may become established in satisfactory living quarters before class work begins.

A woman student under twenty-three years of age must have her residence approved by the Director of Personnel Guidance. Registration is not complete until such approval is given.

The Hattie M. Strong Residence Hall is open to women students. Charges for rooms in Strong Hall for the academic year (September 15 to June 1) are as follows: In a single room with breakfast and dinner, \$425.00; in a double room with breakfast and dinner, \$365.50. Arrangements may be made to defray dormitory charges in monthly payments. Forms for application for room reservations, together with detailed information about the dormitory, may be obtained from the Director of Personnel Guidance.

The University has limited dormitory facilities for men. For the benefit of men students a register of rooms that have been inspected and approved is kept in the Office of the Director of Personnel Guidance, to whom inquiries in respect to housing should be addressed. Single rooms usually range in price from \$20.00 to \$30.00 a month, and double rooms from \$10.00 to \$20.00 a month a person. Rooms with board consisting of breakfast and dinner cost from \$40.00 to \$50.00 a month a person. The men's fraternities have houses which provide living accommodations for their members.

PLACEMENT OFFICE

The Placement Office is maintained to assist graduates and students in finding positions for which their college work has prepared them, and to cooperate with employers who wish to fill vacancies. Enrollment is open to alumni members and students of the University without charge for placement.

For further information address the Placement Office.

STUDENT EMPLOYMENT

An employment service is operated to assist the self-supporting student in finding employment.

The prospective student who expects to earn any part of his expenses and who does not have a definite appointment to a position before coming to Washington should have the means of support for at least one semester. A minimum budget of \$80 a month is recommended.

Many out-of-town students secure positions in the departments of the Government in Washington by taking the United States Civil Service examinations in their home states. The hours of employment permit them to pursue a college course in the late afternoon.

HEALTH ADMINISTRATION

The University maintains a staff of medical officers and a hospital.

The University Physician for Women maintains an office in the University.

The payment of the University fee entitles the student to certain health services described under the Department of Health Administration.

STUDENT ACTIVITIES

Control and direction of all student activities are vested in the Committees on Extracurricular Activities and Student Relationships. For list of student activities and rulings governing them see the special printed regulations of the University.

RECOGNITION OF STUDENT ORGANIZATIONS

No student club or society (except social fraternities, sororities, scholastic honor societies, religious or professional clubs or societies) organized as a branch or affiliate of a non-George Washington University organization will be recognized by the Committee on Student Life.

UNIVERSITY CHAPEL

The University Chapel is maintained as a non-sectarian expression of the faith of the University in the contribution that religion can make to the education of its students. It is held on Friday of each week at 12:10 P.M. in the West Room of Columbian House.

Students are encouraged to participate in denominational clubs which serve as links between the University and the local churches.

PROPERTY RESPONSIBILITY

The University is not responsible for the loss, in any University building, of personal property belonging to a student.

For further information, catalogues, and application blanks, address the Director of Admissions.

GENERAL INFORMATION

INTRODUCTORY

The Junior College curricula are intended to continue the studies of a general cultural nature begun in the secondary schools, and to lay a foundation for the more specialized work which is to follow. During the freshman and sophomore years emphasis is accordingly laid (1) upon the social, cultural, biological, and physical background of civilization (history, political science, physical and biological sciences, literature, etc.) and (2) upon the discipline necessary to the effective prosecution of more advanced work (English rhetoric and composition, foreign languages, mathematics, etc.).

The Junior College also provides the preprofessional work required for admission to the Schools of Pharmacy, Education, and Government, and the first two years of the preprofessional work required by the Schools of Medicine and Law.

In addition it provides two-year curricula in vocational training, leading to the Junior Certificate.

FRESHMAN WEEK

In order to assist students in making adjustments to college work, a special program of orientation is provided for entering freshmen. Each student is given a scholastic-aptitude test, an English placement test, and a physical examination. The results of these tests provide information for the use of Faculty advisers in assisting the student to make up his program of study and in advising the student during his first two years of college work. In addition, the entering freshmen attend a series of lectures relating to study methods, student activities, and the general organization and regulations of the University. A separate day is set aside for freshman registration in order that full opportunity may be given for the careful planning of the student's college course.

ADVISORY SYSTEM

In order that students may have opportunities for assistance in planning their courses and also for obtaining personal, educational, and vocational advice in every phase of their academic work during the first two years, a number of members of the Faculty serve as advisers to Junior College students.

Members of the Faculty, selected for their knowledge of Junior College requirements and student programs, advise both incoming freshmen and old students in making up their programs of study for each semester. A separate staff of experienced advisers under the chairmanship of the Dean assists those students who find it difficult to make adjustments to college life because of scholastic or other reasons. Students who are "warned" or who are on probation may be required to consult these Faculty members at regular intervals. Students are encouraged to consult any members of the Advisory Staff or their instructors about college problems at any time.

Copies of notices of "warning" or probation will be sent to the parents or guardians of students on request, and the Dean and members of the Advisory Staff are always available for consultation with parents or guardians concerning student problems.

GENERAL REGULATIONS

Students in the Junior College are subject to, and are expected to familiarize themselves with regulations regarding ADMISSION, REGISTRATION, FEES AND FINANCES stated on pages 10-27, and the general University regulations stated on pages 41-46.

SCHOLASTIC-APTITUDE TESTS

Students admitted to the Junior College will be required to take the scholastic-aptitude tests of the University.

AMOUNT OF WORK

Fifteen or sixteen semester-hours, not including required Physical Education, constitute normal work. A student not on probation may be permitted by the Dean to take seventeen semester-hours.

A student having a total quality-point index of 3.50 may, with the permission of the Dean, take eighteen or nineteen semester-hours. No student may take more than nineteen semester-hours, except with the permission of the Committee on Scholarship.

For an employed student working more than twenty-four hours a week, nine semester-hours, not including required Physical Education, constitute normal work. An employed student not on probation may be permitted by the Dean to take ten semester-hours. An employed student having a total quality-point index of 3.50 may be permitted by the Dean to take twelve or thirteen semester-hours.

ATTENDANCE

The student is held responsible to the instructor in charge of the course for which he is registered for all the work of the course, and all absences must be excused before provision will be made for him to make up the work missed.

With the exceptions noted below, occasional absences, not to exceed in number for each semester the semester-hours of credit for the semester, will be automatically excused. (If a course has distinct divisions such as lectures, laboratories, recitations, etc., these excuses apply *rata* to such separate divisions.) In applying this rule absences immediately preceding or following holiday periods are to be counted double.

Such automatic excuses are intended to cover the occasional minor exigencies and not to constitute an indiscriminate privilege. A student on probation is allowed no automatic excuses.

Excuses for absences from two or more consecutive class periods, and for absences from examinations which have been announced in advance, can be obtained only by making written application to the Dean of the Junior College. All other absences may be excused by the instructor in charge.

A student whose absences from any class, whether excused or unexcused, are in excess of one fourth of the total number of class periods will receive the grade of *F* for the course, except by special ruling of the Dean on recommendation of the instructor in the course.

CLASSIFICATION OF STUDENTS

A student who has satisfactorily completed at least thirty-two semester-hours of work, including eighteen semester-hours' credit in his curriculum requirements, shall be classed as a *sophomore*.

COURSES OF INSTRUCTION

The courses of instruction are listed in alphabetical order, beginning on page 157.

THE JUNIOR CERTIFICATE

Upon the satisfactory completion of the requirements of the Junior College, a Junior Certificate is awarded. This certificate is required for admission to the junior class of Columbian College and to the professional schools which require two years of preprofessional work (see "Curriculum Requirements", below).

REQUIREMENTS FOR THE CERTIFICATE

SCHOLARSHIP

The system of grading and of computing scholarship is described in detail on pages 42-43.

In order to receive a Junior Certificate a student must have a quality-point index of at least 2.00 on his complete record.

Honor Roll.—The name of every student who has a quality-point index of 3.50 or higher on the basis of his complete record will be placed on the honor roll and published. No consideration is given to those who have completed a total of less than fifteen semester-hours. A place on the honor roll does not necessarily mean that the student will receive honors upon graduation.

Probation.—A student must maintain a quality-point index of at least 2.00, or be placed on probation. The case of each student who has a quality-point index between 1.50 and 2.00, however, will be considered by the Committee on Scholarship, which may retain or remove the probation. A student remains on probation as long as his quality-point index is below 2.00, or until his probation is removed by the committee.

Suspension.—A student who has a total quality-point index below 1.50 will be suspended. The case of each student who has a total quality-point index between 1.35 and 1.50, however, will be considered by the Committee on Scholarship, which may retain him on probation or suspend him.

A student who falls under probation for the third semester, whether successive or after an interval, will be suspended.

For the purpose of these rules, the Summer Sessions are considered a semester.

A student suspended for poor scholarship may apply for readmission after an interval of a calendar year. He must then submit evidence to the Committee on Admission and Advanced Standing that during his absence from the University he has so conducted himself as to indicate that he will profit by readmission. A student suspended twice for poor scholarship will not be readmitted.

The foregoing scholarship rules are applied to a student with a limited schedule only when he has undertaken a minimum of fifteen semester-hours.

Warnings.—At stated intervals during the academic year instructors shall file in the Office of the Registrar the names of those students who are doing work of *D* grade or lower. A "warning" will then be transmitted to the student concerned and a copy forwarded to his adviser. A warning constitutes notice to the student that he must consult his adviser within two weeks after receipt of the warning. Upon request a parent or guardian may receive a copy of a warning notice sent to a student. "Warning periods" are established as follows: First semester—November 1 to 15. Second semester—March 15 to 30. Summer Sessions—six-week courses, third to fourth week; nine-week courses, fourth to fifth week.

PHYSICAL EDUCATION

The Physical Education requirement applies to all students in the freshman and sophomore years. (See the announcement of courses under the departments of Physical Education for Men and Physical Education for Women.)

CURRICULUM REQUIREMENTS

The following curricula lead to the Junior Certificate and, with the exception of the specialized Junior College curricula, qualify the holder to apply for admission to Columbian College (the senior college) and to the professional schools. Provision is made for certain differentiations to meet the needs of preparing for the several professional fields. Graduation from the Junior College does not, however, automatically admit a student to Columbian College or to a professional school.

A detailed statement of the various Junior College curricula will be found in the table facing pages 62-63.

After selecting a curriculum, a student is not permitted to change to another except with the permission of the Dean and on condition that he fulfill the requirements of the curriculum to which he changes.

The curriculum requirements include at least sixty semester-hours of credit exclusive of Physical Education.

Special placement examinations, required of all entering freshmen, will be conducted by the English Department prior to the regular registration periods in September and February. These examinations will test the student's proficiency in spelling, grammar, punctuation, and sentence structure; his vocabulary; and, through an impromptu theme, his ability to present his ideas in logical sequence with clarity and effectiveness. On the basis of these tests students will be classified as follows: (1) especially superior students who, by the unanimous decision of the examiners, are regarded as possessing the equivalent discipline of English 1-2 and who, upon payment of the fee required for waiving curriculum requirements

(see page 62), may be relieved of the curriculum requirement of the course; (2) students who score "unsatisfactory" and who will be required to take English 0, *Remedial English* (three semester-hours), upon the satisfactory completion of which they will enter English 1-2; and (3) all other students, who will be required to take English 1-2.

The use of correct English, oral or written, is required in all of the student's work, not only in his English courses but in all his courses in the Junior College. Any instructor may report any student whose use of English is unsatisfactory to the Dean of the Junior College and the Committee on the Use of English. The Chairman of this Committee shall then arrange with the student to make up his deficiency as soon as practicable. The Chairman shall report to the Dean if the student fails to cooperate and the Dean of the Junior College may hold up the awarding of the Junior Certificate in such cases. If the amount of prescribed work is equivalent to a course, the regular tuition fee will be charged. When the Chairman is satisfied that the student has made up his deficiency, he shall certify this fact to the Dean.

A Junior College student may not take second-group courses (courses numbered 101-200) without the written permission of the instructor and of the Dean of the Junior College. A student will not be permitted to postpone a first-group course, required under the curriculum for which he is registered, in order to take a second-group course for elective credit. The principle that first-group courses must be taken in the Junior College years, and advanced courses in Columbian College and the professional schools, will be rigidly adhered to in approving student programs. No student on probation is permitted to take second-group courses except by the express permission of the scholarship committee.

A. CURRICULA FOR ADMISSION TO COLUMBIAN COLLEGE

I. *Curriculum Leading to the Degree of Bachelor of Arts.*—This curriculum comprises the first two years of a standard four-year course in arts and letters, leading to the degree of Bachelor of Arts, which is granted by Columbian College.

II. *Curriculum Leading to the Degree of Bachelor of Science.*—This curriculum covers the first two years of a standard four-year course leading to the degree of Bachelor of Science with a major in Biology, Botany, Chemistry, Geology, Mathematics, Physics, or Zoology.

B. CURRICULUM FOR ADMISSION TO THE SCHOOL OF MEDICINE

This curriculum covers the three years (ninety semester-hours) of college work required for admission to the School of Medicine. It includes the requirements of the Arts and Letters Curriculum (A-I) and the following additional required courses: Chemistry 11-12, or 21-22; Chemistry 151-52; Physics 6, 7, and 8; and Zoology 1-2.

Each premedical program must be approved by the premedical adviser

and should be so planned as to make it possible for the student to complete an academic major at the end of the fourth year.

Under specified conditions, as stated on page 71 under A-I-a, a student who completes this program and the first year in the School of Medicine may receive the degree of Bachelor of Arts in Columbian College.

C. CURRICULUM FOR ADMISSION TO THE SCHOOL OF PHARMACY

This curriculum covers the required college work for entrance to the School of Pharmacy and comprises the first two years of a four-year course leading to the degree of Bachelor of Science in Pharmacy.

D. CURRICULA FOR ADMISSION TO THE SCHOOL OF EDUCATION

I. *Curriculum Leading to the Degree of Bachelor of Arts in Education.*—This curriculum is the same as A-I, Arts and Letters.

II. *Curriculum Leading to the Degree of Bachelor of Science in Home Economics.*—This curriculum covers the first two years of preparation for majors in Home Economics, leading to the degree of Bachelor of Science in Home Economics.

III-IV. *Curricula Leading to the Degree of Bachelor of Science in Physical Education.*—These curricula cover the first two years of a four-year course in Physical Education for Men and Physical Education for Women, leading to the degree of Bachelor of Science in Physical Education.

E. CURRICULUM FOR ADMISSION TO THE SCHOOL OF GOVERNMENT

This curriculum covers the work required for entrance to the following curricula which are offered in the School of Government: Public Affairs, Foreign Service, Foreign Commerce, Public Administration, Business Administration, Business and Government Statistics, Public Finance, Public Accounting, and Public Personnel Administration.

F. TWO-YEAR CURRICULA IN VOCATIONAL TRAINING

I. *Curriculum Leading to the Junior Certificate in Secretarial Studies.*—This curriculum covers an intensive two-year terminal course in secretarial training, leading to the Junior Certificate.

FOREIGN-LANGUAGE REQUIREMENTS

The curriculum requirement in foreign languages is articulated with the admission requirements. For the Junior Certificate a student must have completed satisfactorily the equivalent of two years of college work in a single foreign language.

A student offering for admission four acceptable high school units of a single foreign language, or the equivalent, is not required to take any foreign language. If he offers three units, he must complete the second semester of the second-year college course in the same language. If he offers two units, he must complete the entire second-year college course in the same language. If he offers one unit, he must complete the second semester of the first-year college course and the entire second-year course in the same language. A student who offers irregular or inadequate preparatory work in a given language, or who has permitted a year or more to elapse since the completion of the second high school unit, must consult the executive officer of the department in question for assignment to proper courses. On written recommendation of the proper executive officer, and with the approval of the Dean of the Junior College, a student may repeat for credit a language course taken in high school.

In some instances foreign languages are required or recommended as a preparation for advanced work in Columbian College and the professional schools. The student should consult his adviser as to these requirements,

so that appropriate foreign languages may be included, when necessary, in his Junior College program.

EXAMINATIONS FOR WAIVING CURRICULUM REQUIREMENTS*

A student desiring to omit a required course may take such examination as the department prescribes, and, on passing satisfactorily, he may be relieved of the curriculum requirements in that subject and may qualify for registration in an advanced course. Passing of this examination shall not entitle the student to any hours of credit toward the degree. A student desiring to take such examinations should make the request of the Dean.

A fee of \$5 for each examination is to be paid at the Office of the Comptroller and the receipt exhibited at the door of room 105, Building D, on September 16, at 2:00 P.M. for the first semester, and on February 2 at 2:00 P.M. for the second semester. Two hours will be allowed for the examination. Should a student wish to take more than one examination, arrangements will be made accordingly.

HONORS

Honorable mention with the Junior Certificate may be granted to the student who has a total quality-point index of 3.50 or higher.

* This provision does not apply to the premedical student, all of whose required premedical work must be taken in a recognized college of arts and sciences.

GENERAL INFORMATION

INTRODUCTORY

Columbian College was founded in 1821, during the presidency of James Monroe. A charter was obtained from Congress establishing "The Columbian College of the District of Columbia" for the "sole and exclusive purpose of educating youth in the English, learned and foreign languages, the liberal arts, sciences and literature", with full power to confer all degrees "usually granted and conferred in colleges".

Since the founding of old Columbian College, many other Schools and Divisions have been established to form what is now The George Washington University. In 1930, when the Junior College was established, the name "Columbian College" was bestowed upon the senior college.

THE COLUMBIAN COLLEGE PROGRAM

In The George Washington University, the program for liberal arts and sciences extends from the general collegiate education of the Junior College (the freshman and sophomore years), through the instruction for the Bachelor's degrees of Columbian College (the junior and senior years), and the studies for the Master's degree which are also in Columbian College, to the graduate discipline leading to the degree of Doctor of Philosophy which is administered by the Graduate Council.

The purpose of Columbian College is to round out the program of liberal education begun in the Junior College and to bring to a focus

educationally the individual talents and aptitudes of the student of liberal arts. The program involves a comprehensive survey of a field of study, together with such knowledge of other fields as will contribute to the general educational development of the student.

Courses open to students in the arts and sciences are offered under the following twenty-three departments: Art, Bacteriology, Biochemistry, Biology, Botany, Chemistry, Classical Languages and Literatures, Economics, English, Geology, Germanic Languages and Literatures, History, Mathematics, Philosophy, Physics, Physiology, Political Science, Psychology, Public Speaking, Romance Languages and Literatures, Sociology, Statistics, and Zoology. Under approved conditions, liberal arts students may also elect courses in certain other departments.

Under the new plan for undergraduate majors, which went into effect in 1937, emphasis is definitely placed upon fields of study rather than upon the mere accumulation of course-credits. The new type of undergraduate major (described on pages 72-75) is offered only in certain designated fields of study. As additional new-type majors are developed the plan will be extended. Students may elect majors under either the old plan or the new plan, but for fields of study for which specific majors have been established under the new plan, the provisions of the old plan will apply only to the student previously registered as a candidate for degree with a major in one of these fields.

DIVISIONAL ORGANIZATION

The divisional type of educational organization, which distinguishes between instruction and administration, is based on the relationship of course content, the interrelation of methods and prerequisites, and the similarity of background and viewpoint. Divisions are not, however, considered as unrelated and self-sufficient. It is recognized that many contacts between divisions arise, and the full value of the organization, both for the instructor and for the student, is realized only to the extent that such contacts are fostered and improved.

The divisional and departmental officers administer the educational requirements for the student majoring within the divisions.

The divisions under which University departments are included are as follows: (1) *the Division of Languages and Literatures*, which comprises the Departments of Classical Languages and Literatures, English, Germanic Languages and Literatures, and Romance Languages and Literatures; (2) *the Division of Mathematics and the Physical Sciences*, which comprises the Departments of Biochemistry, Chemistry, Mathematics, Pharmacology, Physics, and Statistics; (3) *the Division of the Natural Sciences*, which comprises the Departments of Anatomy, Bacteriology, Biology, Botany, Geology, Neurology, Pathology, Physiology, Psychology, and Zoology; (4) *the Division of the Social Sciences*, which

comprises the Departments of Business Administration, Economics, Education, History, Journalism, Law, Philosophy, Political Science, Public Speaking, and Sociology.

GENERAL REGULATIONS

Students in Columbian College are subject to, and are expected to familiarize themselves with, the regulations regarding ADMISSION, REGISTRATION, FEES AND FINANCES stated on pages 10-27, and the general University regulations stated on pages 41-46.

AMOUNT OF WORK

A full-time student who is not on probation may take ordinarily not more than seventeen semester-hours. A student employed more than twenty-four hours a week, who is not on probation, may take not more than ten semester-hours.

A full-time student whose quality-point index is 3.50 or higher may take not more than nineteen semester-hours. An employed student who meets the same standard may take not more than twelve semester-hours.

A student previously unemployed who accepts employment subsequent to registration or at any time during a semester is required to report that fact immediately to the Dean, in order that adjustments in schedule may be made, if necessary, to bring his program within the Faculty's limitations upon the amount of work to be carried by an employed student.

ATTENDANCE

The student is held responsible for all the work of the courses in which he is registered, and all absences must be excused by the instructor in charge before provision is made for the student to make up the work missed.

CLASSIFICATION OF STUDENTS

A student who has completed less than thirty semester-hours in Columbian College, and who has registered his major at the Office of the Registrar, is classed as a *junior*. A student who has completed thirty semester-hours in Columbian College, including at least one course in his major, is classed as a *senior*. A student who has satisfactorily completed the work for the Bachelor's degree, and whose program of study has been approved and filed in the Office of the Registrar, is classed as a *master in course*.

INDEPENDENT STUDY PLAN

Under the independent study plan a student of demonstrated capacity, with special interest in the subject matter of a course, may be permitted to undertake independent study under the personal direction of an in-

structor, in accordance with the rules of the division in which the subject falls. Credit under this plan is limited to the specific course-credits as designated in the list of courses of instruction in the CATALOGUE.

CORRESPONDENCE AND HOME-STUDY COURSES

No credit is given for work done by correspondence or in home-study courses.

COURSES OF INSTRUCTION

The courses of instruction are listed in alphabetical order, beginning on page 157.

THE BACHELOR'S DEGREES

Upon the satisfactory completion of the undergraduate requirements of Columbian College, the degree of Bachelor of Arts or Bachelor of Science is conferred. In cooperation with the School of Medicine a seven-year curriculum leading to the combined degrees of Bachelor of Arts and Doctor of Medicine is offered.

REQUIREMENTS FOR THE DEGREES

SCHOLARSHIP

The system of grading and of computing scholarship is described in detail on pages 42-43.

In order to graduate, a student must have a general quality-point index of at least 2.00. In addition, he must have a quality-point index of at least 2.50 in his major subject. Grades in courses taken at other institutions are not considered in computing the quality-point index.

In computing the quality-point index in the major, all second-group and third-group courses in the major field taken at The George Washington University are included, even though minimum requirements for the major may have been exceeded. Grades received in first-group courses are not considered.

Probation.—A student must maintain a quality-point index of at least 2.00, or be placed on probation. A student remains on probation as long as his quality-point index is below 2.00, or until his probation is removed by the Committee on Scholarship.

Suspension.—A student who has a quality-point index below 1.00 or who is placed on probation for a third semester, whether successive or after an interval, is suspended.

A student suspended for poor scholarship may apply for readmission after an interval of a calendar year. He must then submit evidence to the Committee on Admission and Advanced Standing that during his

absence from the University he has so conducted himself as to indicate that he will profit by readmission. A student suspended twice for poor scholarship will not be readmitted.

For the purpose of these rules, the Summer Sessions are considered a semester.

The foregoing scholarship rules are applied to a student with a limited schedule only when he has undertaken a minimum of fifteen semester-hours.

USE OF ENGLISH

The use of correct English, oral or written, is required in all the student's work, not only in English courses but in all courses. It shall be the duty of instructors to report any student whose English is unsatisfactory to the Dean of Columbian College and to the Chairman of the Committee on the Use of English. It shall be the duty of the Chairman to summon the student and to arrange with him to make up his deficiency as soon as is practicable. If the student fails to co-operate, the Chairman shall report the student to the Dean of Columbian College, who will have discretionary power to hold up the granting of the student's degree. When the Chairman is satisfied that the student has made up his deficiency, he shall certify this fact to the Dean of Columbian College. If the amount of prescribed work is equivalent to a course, the regular tuition fee will be charged.

CURRICULUM REQUIREMENTS

Every candidate for graduation must satisfy one of the curricula listed below leading to the degree of Bachelor of Arts or Bachelor of Science. The curriculum requirements include at least sixty semester-hours of credit beyond that of the Junior College. Not more than twelve semester-hours of professional courses (approved by the Dean of Columbian College) may be counted toward the Bachelor's degrees in Columbian College.

After selecting a curriculum, a student may not change to another except by permission of the Dean and on condition that he fulfill the requirements of the curriculum to which he changes as of the date when the change is approved by the Dean.

The freshman and sophomore years of each curriculum will be found in the announcement of the Junior College.

In the case of curricula A-I and A-II in Columbian College, the requirements (including prerequisites) for the major in the several departments of instruction are stated immediately preceding the announcement of courses offered (see page 157). The first year of Medicine satisfies the requirements for the major in the combined Arts and Medicine curriculum (A-I-a).

First-group courses may be required as prerequisites to undergraduate-major or Master's programs, but because of their introductory character may not be counted as part of such programs. (See "Explanation of Course Numbers", pages 159-60.)

Each student is required to select and file with the Registrar a choice of major upon entering Columbian College. He may change the major only with the consent of the Dean and of the department or division concerned, and must meet the requirements for the major to which he changes as of the date when the change is approved by the Dean.

Beginning with the academic year 1937-38, undergraduate majors in certain designated fields of study have been offered under a new plan of study, a statement of which will be found on pages 72-75.

BACHELOR OF ARTS

A-I.* *Curriculum Leading to the Degree of Bachelor of Arts.*—The work of the junior and senior years, including a major, must be approved by the major department or division and by the Dean.

A-I-a.* *Combined Curriculum Leading to the Degrees of Bachelor of Arts and Doctor of Medicine.*—This curriculum contemplates three years of collegiate study (the last thirty semester-hours of which must be taken in Columbian College) and four years in the George Washington University School of Medicine. The student wishing to avail himself of the opportunity afforded by the combined curriculum must obtain the approval of the Dean of Columbian College at the time of entering the School of Medicine. Upon the completion of all the prescribed courses in the first year of the School of Medicine, and upon the recommendation of its Dean, the degree of Bachelor of Arts will be conferred. The entire work must be upon the scholarship level required for graduation. A candidate for the combined degrees may not count professional work taken at another institution as satisfying the requirement for the first year in the George Washington University School of Medicine.

BACHELOR OF SCIENCE

A-II.* *Curriculum Leading to the Degree of Bachelor of Science.*—The work of the junior and senior years, including a major in one of the sciences mentioned below, must be approved by the major department or division and by the Dean.

EXAMINATIONS FOR WAIVING CURRICULUM REQUIREMENTS

A student desiring to omit a required or prerequisite course may take such examination as the department prescribes, and, on passing satisfactorily, he may be relieved of the curriculum or prerequisite requirement in that subject and may qualify for registration in an advanced course. Passing of this examination shall not entitle him to any credit toward the degree. A student desiring to take such examinations should make written request of the Dean.

A fee of \$5 for each examination is to be paid at the Office of the Comptroller and the receipt exhibited at the door of room 105, Building D, on September 16 at 2:00 P.M. for the first semester, and on February 2 at 2:00 P.M. for the second semester. Two hours will be allowed for the examination. Should a student wish to take more than one examination, arrangements will be made accordingly.

THE UNDERGRADUATE MAJOR

A student in Columbian College pursuing a course in the general curricula leading to the degree of Bachelor of Arts or Bachelor of Science must complete an undergraduate major. The usual requirement for the satisfaction of an undergraduate major is the completion of a consistent plan of study, as demonstrated by the passing of a written examination in the subject or field of the major. The divisions also may establish additional tests suitable to the subject matter or skills on which the candidate is examined. Although the minimum requirements for the Bachelor's degrees include completion of courses carrying a specific number of credit-hours, the requirement for the major is not stated in terms of semester-hours or of definite courses.

DEFINITION OF THE UNDERGRADUATE MAJOR

An undergraduate major may be defined as a coordinated study of a field of knowledge. Although generally confined to a single department of instruction, a major may also be taken in a group of closely related subjects, or in some important and integral subdivision of a departmental program. In other words, a major may be offered by a single department, or in a group of related studies involving more than one department, or even more than one division; or one department may offer more than one major field of study within itself.

The objective of the major is to make certain that the student shall have, at the time of his graduation, the skill and knowledge of a field of learning, enlarged and strengthened by studies in related subjects, so that he may, with conviction and understanding, meet the activities and interests of modern life.

Study for the major, however, is not intended to displace the ideal of a liberal education. The student is advised against overspecialization, protected from undue encroachment upon his time and energy by major requirements, and given opportunity for the broadening of his knowledge throughout the undergraduate discipline. In order to assure this, at least twenty-four semester-hours of course work must be taken in subjects not included in the major. Responsibility for carrying out this provision rests with the major adviser, by whom all courses taken by the student in Columbian College will be approved.

ADMINISTRATION OF THE MAJOR

All majors are subject to the approval and supervision of the division in which the major field is classified. The professor or adviser of the field of study will formulate the contents of the major, which will be submitted through the Educational Committee to the division. All majors are intended to be comparable; that is, they should have the same general proportion in relation to the whole undergraduate academic program, and should maintain similar standards of achievement.

PROSEMINAR IN THE MAJOR

For the convenience of the student a proseminar course is offered in each field of study, under the supervision of the division in which the major is taken. This course, planned and administered by the professor or adviser of the major subject, will advise, guide, and instruct the student in his reading, study, and laboratory exercises in order to assist him in gaining a coordinated knowledge of his field. This course is not required; registration in it is voluntary on the part of the student. Six semester-hours' credit, but no qualitative grade, may be assigned. When registered in this course the student will have the privilege of visiting any other course offered in the college. This proseminar is not a "cramming course"; it is a presentation of the content and methods of the major field as a whole through the organization and coordination of the knowledge obtained in the various formal courses in the major subject and of material not usually included in such courses.

Proseminars in the new-type major fields are open only to the student who has been accepted as a candidate under the respective new-type majors. These proseminars may not be taken as electives nor will credit for them be granted to a student with a major in another field.

THE MAJOR EXAMINATION

The major examination will normally be taken by the student at the close of the senior year; in the case of the student on a limited schedule, the major examination may be taken not earlier than one calendar year before graduation. A student who fails to pass a major examination may,

at the discretion of the Columbian College Committee on Studies, be re-examined at a later regular major-examination period. The Educational Committees of the respective divisions will have general supervision of the preparation, reading, and grading of major examinations. Major examinations will be held in each regular semester and, with the permission of the Committee on Studies, at the conclusion of the Summer Sessions. Examinations will be held on dates fixed by the respective Educational Committees, but in no case later than January 15 for the first semester, May 15 for the second semester, and August 7 for the Summer Sessions.

NEW-TYPE UNDERGRADUATE MAJORS

New-type majors are offered as follows:

1. *American Thought and Civilization*
2. *International Relations*
3. *English Literature*
4. *Statistics*
5. *Biology*
6. *Philosophy*
7. *History*
8. *Zoology*
9. *French Literature*
10. *Spanish Literature*
11. *Spanish American Literature*

On the basis of techniques developed and experience gained in the administration of these majors, additional new-type majors will gradually be introduced until all majors offered in Columbian College conform to the new plan. In the meantime, old-type majors will continue to be offered, until further notice, in Art, Botany, Chemistry, Classical Languages and Literatures, Economics, Geology, Germanic Languages and Literatures, Mathematics, Physics, Political Science, Psychology, Public Speaking, and Sociology. A student who has already begun work on an old-type major in Biology, French, English, History, Philosophy, Spanish, Statistics, or Zoology will of course be permitted to complete his major under the old plan if he wishes; but the new candidate for a major in these fields will be subject to the new requirements.

Of the new-type majors offered, two, those in International Relations and in Biology, extend broadly over the work of their respective divisions, and another, that in the field of American Thought and Civilization, involves studies in two divisions, those of Languages and Literatures and of Social Sciences. The other majors, with the exception of the major in Spanish American Literature, replace old-type majors in their respective fields.

A special bulletin containing a detailed description of the new-type undergraduate majors is available at the Office of the Dean of Columbian College.

THE MASTER'S DEGREES

Upon the satisfactory completion of the graduate requirements of Columbian College, the degree of Master of Arts or Master of Science is conferred.

DEFINITION OF THE MASTER'S WORK

The purpose and function of study leading to the degree of Master of Arts or Master of Science is to give the student a comprehensive survey of a field of knowledge. This study involves the continuation of the cultural elements provided for in the undergraduate major and a greater acquaintance with scholarly methods.

The basis for granting the degree is the completion of a consistent plan of study, as demonstrated by the successful passing of a written examination (together with such other examinations involving special skills or techniques as the department or the division may require) and by the presentation of a satisfactory thesis.

The student must satisfy certain minimum requirements as to previous preparation, residence, ability to read an approved modern foreign (European) language, and courses taken; but these requirements, while essential, are regarded primarily as qualifying measures. The student's knowledge of his field, as demonstrated by his thesis and by the results of his Master's examination, constitutes the fundamental evidence of his worthiness to receive the Master's degree of The George Washington University.

REQUIREMENTS FOR THE DEGREES

RESIDENCE

An academic year of residence in Columbian College is required, i.e., completion of a minimum of thirty semester-hours of work including the thesis, which is counted as the equivalent of six semester-hours of course work. Summer Sessions work may be counted in residence, but in no case may the period of residence aggregate less than twenty-seven weeks. Not more than twelve semester-hours (which must be approved in advance by the Dean of Columbian College) may be taken in another School or Division of this University, and such work may not be counted toward both a degree in that School or Division and the Master's degree in Columbian College. No part of the minimum requirement may be taken elsewhere. All work for the degree of Master of Arts or Master of Science shall be completed within a maximum of three years, unless the Dean's Council considers the circumstances so unusual as to justify an extension of time.

SCHOLARSHIP

A student whose scholarship is unsatisfactory may be suspended by the Dean upon recommendation of the division under which the student is working. Regarding the system of grading, see pages 42-43.

PROGRAM OF STUDIES

The student's program of studies shall be outlined in detail at the beginning of his work, and one copy of the program shall be given to the student, one retained by the adviser, and one filed in the Office of the Registrar. Each program is subject to the approval of the department and division. The program may be revised as occasion requires, but revisions shall be made from the point of view of the program as a whole, and copies distributed as in the case of the original program.

Courses numbered from 1 to 100 may not be credited toward the Master's degree, but may in certain instances be required as a basis for advanced work. (See "Explanation of Course Numbers", pages 159-60.)

A student who expects to continue his studies for the degree of Doctor of Philosophy after receiving the Master's degree is strongly advised so to plan his program from the beginning that work for the lower degree may help to prepare him for the higher.

Particular attention is called to the statement of graduation requirements on pages 44-45.

ADMISSION TO CANDIDACY

A student shall be admitted to candidacy, at the discretion of the department and the division concerned, before he begins the last half of his work for the Master's degree. Application for admission to candidacy is made on a form obtained at the Office of the Registrar, and must be approved by the appropriate representative of the division and by the Dean. If a prospective candidate, in his previous academic work, has not substantially satisfied the prerequisites for the Master's degree, including the undergraduate major as defined by the appropriate department or division, he will not be admitted to candidacy until such deficiency has been made up.

Before being admitted to candidacy the student must also show that he has a reading knowledge (certified by the appropriate foreign-language department) of at least one modern foreign (European) language, which shall be selected by the division under which he is studying. A student whose field is a modern foreign language or literature may not offer that language in satisfaction of the reading-knowledge requirement. Examinations in modern foreign languages will be given on Saturday, October 4, Saturday, February 7, and Saturday, May 2, at 2:00 P.M. In exceptional circumstances the respective departments will arrange for examinations at other times.

THE MASTER'S THESIS

The thesis may be of a research, expository, critical, or creative type. The main purpose of a Master's thesis is to demonstrate the student's ability to make independent use of the information and training acquired through his other disciplines, and to furnish objective evidence of his constructive powers in his chosen field. Registration for the thesis must be no later than the beginning of the final year of preparation, unless the professor in charge of the thesis permits registration at the beginning of the final semester. For this purpose the nine weeks' term of the Summer Sessions is considered a semester. The choice of the thesis subject must be approved by the professor in charge of the student's field and recorded in the Office of the Registrar by the date announced in the University calendar. Registration for the thesis is ordinarily made on the basis of three semester-hours for two successive semesters. In exceptional cases, and with the approval of the professor in charge of the thesis, the student may register for the entire six semester-hours during a single semester. The typewritten thesis in its final form must have the approval of the professor in charge of the student's field and of the Educational Committee of the division concerned, and must be presented to the Dean by the student not later than the date announced in the University calendar. Requirements regarding the form of the thesis are stated on page 45.

Payment of tuition for the thesis will entitle the candidate, during the academic year of registration, to the advice and direction of the member of the Faculty under whom the thesis is to be written. In case a thesis is unfinished, an additional successive academic year may be granted without further tuition payment. If the preparation of the thesis extends beyond the two-year period the student must register for it again, and pay tuition on the same basis as for a repeated course.

THE MASTER'S EXAMINATION

In addition to such other examinations as may be required, the candidate must pass a general written examination on the major subject. Examinations will be held on dates fixed by the respective Educational Committees, but in no case later than January 15 for the first semester, May 15 for the second semester, and August 7 for the Summer Sessions. The provisions of the new plan for undergraduate majors, as far as they concern the general examination for the major, also apply to the Master's examination. A candidate who fails to pass the Master's examination may, in exceptional circumstances and with the specific approval of the division concerned, repeat the examination, but only after the lapse of one semester. If he fails a second time, no further opportunity to take the examination will be permitted.

GENERAL INFORMATION

INTRODUCTORY

The purpose of the Graduate Council of The George Washington University is to create a fellowship between the Masters in Research in the various fields and the students who have apprenticed themselves to these Masters, and through this fellowship to foster a creative spirit in the graduate studies leading to the degree of Doctor of Philosophy. The basic conception of this degree is the attainment of a mastery of related fields of knowledge, achieved without regard to specific courses of instruction and culminating, through original research, in a contribution to knowledge. It is hoped that in the development of this program the historical relationship of master and apprentice may be revived. In keeping with this idea a student, after satisfying certain requirements, is responsible solely to the Master under whom he has signified his desire to work.

APPLICATION TO UNDERTAKE DOCTORATE DISCIPLINES

A student wishing to undertake work under the Graduate Council must possess an adequate academic preparation for advanced study in the proposed field, as evidenced by satisfactory Bachelor's and Master's degrees, or their equivalent, together with acceptable personal qualities and capacity for creative work.

After an applicant's credentials have been filed with the Director of Admissions of the University, the Chairman of the Graduate Council will appoint a consultative committee (usually composed of five members), which will evaluate the records submitted and interview the appli-

cant. The applicant will then meet the personnel committee of the Graduate Council. When the recommendations of the consultative and personnel committees have been presented, the Graduate Council will act upon the application for candidacy for Fellowship in the Graduate Council.

CANDIDACY FOR FELLOWSHIP

If accepted, the candidate must demonstrate his ability to read French and German and must satisfy such other prerequisites for advanced study as shall be specified by the consultative committee. The necessary examinations will be arranged by the Chairman of the Graduate Council.

The consultative committee will, after consultation with the candidate, designate a program of study in the several fields of learning on which the candidate must stand examination as a part of the requirements for admission to Fellowship in the Graduate Council.

The candidate will be directed by his consultative committee throughout the entire period of preparation for this Council Fellowship examination.

THE COUNCIL FELLOWSHIP EXAMINATION

Upon application of the consultative committee the Chairman of the Graduate Council will set a date for the Council Fellowship examination and appoint an examining committee, composed of the members of the consultative committee and at least two other members of the Graduate Council. The Council Fellowship examination will be a written examination, conducted during a period of one week. The candidate, in consultation with the Chairman of the Graduate Council, will have designated the Master with whom he wishes to undertake research if admitted as a Fellow. If he is successful in the Council Fellowship examination and is accepted by the Master, the candidate will be nominated to the Graduate Council for election as a Fellow.

FELLOWSHIP IN THE GRADUATE COUNCIL

When a student has been admitted as a Fellow of the Graduate Council, his consultative committee will be discharged and he will become responsible to his Master alone for the development of his field, the selection of a thesis subject, and the preparation of his thesis. He will be formally inducted into Fellowship, which carries with it the privilege of membership in the Graduate Council, including participation in its general meetings, and unrestricted use of all the academic facilities of the University. The Master may refer the Fellow to other institutions for special study, under arrangements made by the Council.

THE THESIS

Not later than the date specified in the University calendar the Fellow must submit to the Chairman of the Graduate Council one typewritten original and two legible carbon copies of his thesis in its final form and also a typewritten summary of the thesis consisting of not more than 2,500 words. Requirements regarding the form of the thesis are stated on page 45.

The summaries of accepted theses will be printed in a volume forming a number of the University BULLETIN. The successful candidate for the doctorate is required, before receiving his degree, to pay a fee to cover the expense of printing the summary of his thesis.

THE FINAL EXAMINATION

After the presentation of the Fellow's thesis, the Chairman of the Council, upon application of the Master, will set the date of the final examination and appoint the final examination committee. The examiners will include at least five members of the Graduate Council other than the Master, and at least two qualified experts in the Fellow's special field from other institutions of research. The Master will present the Fellow to the examining committee. In this final examination, which will be oral, the Fellow will defend his thesis in relation to the field of learning in which it lies. The examination will be public.

THE DEGREE OF DOCTOR OF PHILOSOPHY

If the Fellow satisfies this committee in respect to the high quality of his contribution to knowledge and his mastery of the field, he will be recommended by the committee to the Graduate Council and, if approved, nominated by the Council to the Board of Trustees of the University for the degree of Doctor of Philosophy.

TEACHING FELLOWSHIPS

Teaching fellowships are available in the Departments of Bacteriology, Biochemistry, Botany, Chemistry, Economics, English, History, Physics, Psychology, Romance Languages, Statistics, and Zoology. An announcement regarding qualifications and application for these fellowships will be sent upon request to the Chairman of the Graduate Council.

GENERAL REGULATIONS

Candidates and Fellows in the Graduate Council are subject to, and are expected to familiarize themselves with, the regulations regarding ADMISSION, REGISTRATION, FEES AND FINANCES *stated on pages 10-27, and the general University regulations stated on pages 41-46.*

RESIDENCE AND CONTINUOUS REGISTRATION

The Graduate Council has no formal regulations concerning the minimum amount of time a student must spend in residence, either in preparation for the Council Fellowship examination or as a Fellow of the Council engaged in doctoral research. The student who undertakes either part of the doctoral program on full or limited schedule must, in accordance with University regulations, maintain continuous registration under the Graduate Council even when the Council has granted a leave of absence for study or residence elsewhere. Failure to maintain registration in each semester of the academic year disrupts the residence status of the student under his consultative committee or his Master in Research. In such a case, the student must reapply for admission to the Council, under whatever new conditions and regulations are set up by his consultative committee or by his Master in Research.

COURSES OF INSTRUCTION

Ordinarily courses of instruction are assigned by the consultative committee only to make up deficiencies. The descriptions of courses will be found in alphabetical order, beginning on page 157.

A pamphlet describing details of the Graduate Council program will be sent upon request to the Office of the Graduate Council.

RESIDENCE AND CONTINUOUS REGISTRATION

The Graduate Council has no formal regulations concerning the minimum amount of time a student must spend in residence, either in person or by correspondence, for the Council Fellowship examination or as a Fellow of the Council engaged in doctoral research. The student who undertakes a part of the doctoral program on full or limited schedule must, in accordance with University regulations, maintain continuous registration under the Graduate Council even when the Council has granted a leave of absence for study or research elsewhere. Failure to maintain registration in each semester of the academic year during the residence study of the student under his consultative committee or his Master in Research is such a case, the student must expressly for admission to the Council. However, whatever new conditions and regulations are set up by his consultative committee or by his Master in Research, to maintain his status, he must be registered in the Council.

COURSES OF INSTRUCTION

Graduate courses of instruction are designed by the consultative committee only, to meet its objectives. The descriptions of courses will be found in alphabetical order, beginning on page 125. The student must be registered in the Council in order to receive credit for the courses. A pamphlet describing details of the Graduate Council program will be sent upon request to the Office of the Graduate Council.

The student who is admitted to the Council is expected to maintain his residence in the Council and to continue his study in the Council. The Council is not responsible for the student who leaves the Council without notice. The Council is not responsible for the student who leaves the Council without notice.

ELIGIBILITY

The following are the requirements for admission to the Council: The student must be a graduate of a college or university in the United States or a foreign country. The student must have a minimum grade point average of 3.0. The student must have completed a minimum of 12 credit hours in the Council. The student must have completed a minimum of 12 credit hours in the Council.

GENERAL INFORMATION

INTRODUCTORY

The School of Medicine of The George Washington University was opened in March 1825; of the medical schools now in existence in the United States, it is the eleventh in chronological order of founding. The University Hospital and Dispensary were established in 1898 and made a part of the organization of the School.

The School is a member of the Association of American Medical Colleges and is one of the medical colleges which have been designated continuously as "class A" by the American Medical Association. The degrees of the School of Medicine are recognized by all state examining boards.

ADVANTAGES OF LOCATION

The Library of the Surgeon General's Office of the United States Army is the most complete general medical library in the world. In addition to its great collections of medical works, all leading medical periodicals of the world are available. This Library, as well as the Library of Congress, the Public Library, and the many excellent libraries of the various Government departments, is available to students and teachers through a service maintained by the Medical School Library.

The Army Medical Museum affords opportunity for studying the conditions met in military and general medicine and surgery. Its collection of anatomical and pathological specimens is unequaled by any other museum in this country. The Museum of Hygiene, the National Museum, the Smithsonian Institution, the Botanic Gardens, and the Department of Agriculture all afford opportunities for study in Medicine and its allied sciences.

EQUIPMENT

Medical School Building.—The building housing the School of Medicine is a modern, five-story structure with lecture rooms and classrooms, laboratories, and students' rooms, equipped with modern improvements.

Laboratories.—A four-story laboratory building is adjacent to the main medical building. The major laboratories are for Anatomy, Histology and Embryology, Bacteriology, Hygiene and Preventive Medicine, Biochemistry, Pathology, Pharmacology and Physiology, and Clinical Microscopy. They are fully equipped to enable students to pursue adequately the laboratory courses and to acquire the technical skill necessary in modern clinical and investigative work.

Medical Library.—The Library contains a selected reference collection of more than 3,000 volumes, and provision is made to add to it the important new medical works. The principal medical periodicals are received regularly.

The University Hospital and the University Dispensary.—The Hospital and Dispensary are adjacent to the School of Medicine and are controlled by the Faculty of Medicine.

CLINICAL FACILITIES

The city of Washington, with more than a half-million inhabitants, provides ample clinical material. The University Hospital and Dispensary furnish clinical facilities and a large proportion of the materials studied in the courses in Pathology and Clinical Microscopy.

The University Hospital.—All clinics are under the supervision of the Dean, who is also Medical Director of the Hospital. This insures the

highest possible utilization of available clinical material for teaching purposes and the proper supervision of clinicians and students; it brings the individual student into direct contact with patients and requires him to do, under authoritative supervision, the clinical and laboratory work necessary for diagnosis and treatment; and it permits proper interpretation of the conditions occurring during the progress of cases and promotes the keeping of adequate records. Clinical and clinico-pathological conferences are held in which the history of cases, the physical findings, laboratory records, and the post-mortem pathology when available, are presented and correlated.

The University Dispensary.—The Dispensary has a large out-patient service in all departments, to which several thousand visits are made annually. Fourth-year students are assigned in rotation by sections for clinical instruction in the Dispensary.

Gallinger Municipal Hospital.—Clinical instruction is available in all branches of Medicine. A great wealth of clinical material is afforded in this hospital by ordinance of the municipal authorities of the District of Columbia, whereby one half of the patients are assigned for treatment and clinical teaching to members of the Faculty of this School, nominated by this University. Third-year students serve their clinical clerkships at this institution.

Children's Hospital.—Clinical instruction in Pediatrics, Dermatology, and Orthopedic Surgery.

Emergency Hospital and Central Dispensary.—Clinical instruction in Medicine, Surgery, Obstetrics and Gynecology, and the specialties.

Garfield Memorial Hospital.—Clinical instruction in Gynecology and Obstetrics in the out-patient department, on the wards, and in the operating room.

St. Elizabeths Hospital.—Clinical instruction in mental and nervous diseases, medicine, post-mortem work, and gross pathology. This hospital, with four thousand beds, is maintained by the United States Government. The psychiatric clinic is one of the largest in the world.

Episcopal Eye, Ear and Throat Hospital.—Clinical instruction in Ophthalmology, Otology, Rhinology, and Laryngology.

Columbia Hospital.—Clinical instruction in Gynecology and Obstetrics in the out-patient department, on the wards, and in the operating room.

ADMISSION, REGISTRATION, FEES AND FINANCIAL REGULATIONS

Students in the School of Medicine are subject to, and are expected to familiarize themselves with, the regulations stated on pages 10-27.

Registration in the School of Medicine is for a period of one year. After the student has entered the courses of instruction he is obligated

for the full tuition for the year. No part of the tuition will be refunded upon withdrawal or dismissal for any cause. Acceptance by the School of a student's fees does not in any way obligate the School to accept the student for any subsequent year.

A fee of \$3 to defray the costs of completing the records for final consideration for admission must accompany each application. Fees for each semester (including the University fee) are \$275, payable in advance.

Because the number of applicants far exceeds the limit of each class, places can be reserved for only those qualified applicants who remit a deposit of \$100 which will be credited toward the tuition of the first semester. Should the matriculant be unable to attend, this initial payment, less a charge of \$50 for registration, transfer, etc., will be returned up to one month before the opening of the session.

Credit for work will not be given until, at the completion of a laboratory course, the student has replaced or paid for all articles of equipment or other University property which he has lost, broken, or destroyed. All breakage or loss not directly traceable to an individual student is assessed pro rata.

COST OF TEXTBOOKS AND STUDENT EQUIPMENT

The minimum cost of necessary textbooks and student equipment (microscope, drawing materials, glass slides, clinical thermometer, stethoscope, hemocytometer, etc.) is approximately as follows: first year, \$150; second year, \$87; third year, \$60; fourth year, \$60; total, \$357.

GENERAL REGULATIONS

Students in the School of Medicine are subject to, and are expected to familiarize themselves with, the general University regulations stated on pages 41-46.

ATTENDANCE

Absence consists in being away from a class or clinic during a scheduled period, entering after the class or clinic has begun, or leaving before either is dismissed.

Absence is not allowed unless an excuse is obtained from the Dean or the instructor.

Excuse for absence due to sickness must be accompanied by a certificate signed by the attending physician and must be filed in the Office of the Dean.

For every unexcused absence a department will deduct one half of one per cent from the student's final grade in the subject involved.

GRADES

Proficiency in all subjects is marked on a basis of *A* (90-100); *B* (80-89); *C* (75-79); *D* (65-74), condition; *E* (below 65), failure; *Inc.*, incomplete. The passing grade in each subject is *C*.

ADVANCEMENT

Any student who has satisfactorily completed the required work of the first, second, or third year of the course and has passed all examinations is eligible for advanced standing, if approved by the Committee on Scholarship. No student may be enrolled for the clinical work of the third and fourth years without first having qualified in all the preclinical sciences.

FAILURE

A student who has failed in any subject will not be advanced until such failure is removed and then only by authority of the Committee on Scholarship. All conditions must be removed at the next make-up examination period provided for this purpose.

EXAMINATIONS

Examinations, which may be written, oral, or practical, will be held at the end of the first semester and at the end of the academic year.

A student who fails to appear at a regularly scheduled final examination will not be examined until the next regular examination, except by special permission of the Committee on Scholarship. For make-up examinations to remove conditions, a fee of \$5 will be charged for each subject.

SPECIAL UNDERGRADUATE AND GRADUATE ADVANTAGES

PHYSICAL EXAMINATIONS

All first-year students are given a comprehensive physical examination by the Department of Health Administration upon admission to the School of Medicine. The students are informed of the findings and advised regarding such measures as will tend to maintain a high standard of health.

RESERVE OFFICERS' TRAINING CORPS, U. S. ARMY, MEDICAL UNIT

A Medical Unit of the Reserve Officers' Training Corps is established in this School by authority of the Secretary of War, and an officer of the Medical Corps of the Army is detailed to the University for supervision and instruction of the unit.

Membership in the Unit, which is voluntary, is open to any physically fit male student who is a citizen of the United States. The instruction is divided into two two-year courses, the basic and the advanced. Stu-

dents who satisfactorily complete the basic course may, up to the quota allowed by the War Department, enter the advanced course. A student who enters the advanced course receives approximately \$200 from the Government. He is obligated to complete the course and to attend one summer camp of six weeks, for which he receives \$21 a month, travel allowance, all camp equipment, uniforms, and medical attention. A student who successfully completes the course is recommended for a commission in the Medical Section, Officers' Reserve Corps, if he desires appointment. A graduate may, after completion of one year's internship in a civil hospital, compete in the examinations held yearly for appointment as first lieutenant in the Medical Corps, Regular Army.

HOSPITAL APPOINTMENTS

Interns and residents are appointed annually in the University Hospital. Students who, after graduation, desire internships in other hospitals should apply directly to the institutions which they wish to enter. A list of hospitals approved for intern training is published annually in the *Journal of the American Medical Association*, and a copy of the list may be consulted in the Office of the Dean.

COMMISSION ON LICENSURE, DISTRICT OF COLUMBIA

Graduates who wish to take the examinations of the Commission on Licensure, District of Columbia, or desire to use the District license for reciprocity with the states, should apply to the Secretary, Commission on Licensure, Healing Arts Practice Act, District Building, Washington, D. C.

DEPARTMENTS OF INSTRUCTION

The work of the School is organized under the following departments: Anatomy; Bacteriology, Hygiene, and Preventive Medicine; Biochemistry; Dermatology and Syphilology; Experimental Medicine; Medicine; Military Science and Tactics; Neurology; Obstetrics and Gynecology; Ophthalmology; Oto-rhino-laryngology; Pathology; Pediatrics; Pharmacology and Therapeutics; Physiology; Psychiatry; Surgery; and Urology.

CLINICS

Courses of clinical instruction are included in the announcements of the clinical departments. The Dean prepares schedules of clinics and of student section assignments to the various hospitals and dispensaries.

COURSES OF INSTRUCTION

The courses of instruction are listed in alphabetical order, beginning on page 157.

THE DEGREE OF DOCTOR OF MEDICINE

Upon the satisfactory completion of the requirements of the School of Medicine, the degree of Doctor of Medicine is conferred.

REQUIREMENTS FOR THE DEGREE

Every candidate for graduation with the degree of Doctor of Medicine must be at least twenty-one years of age, of reputable character, and free of all indebtedness to the University. He must have satisfied the admission requirements, completed satisfactorily not less than four years of study as a matriculated student in Medicine, completed all required courses, and passed satisfactorily all prescribed examinations.

Particular attention is called to the statement of graduation requirements on pages 44-45.

COMBINED ARTS AND MEDICINE CURRICULUM

The candidate registers in the Junior College for the freshman and sophomore years of the premedical curriculum and in Columbian College for the junior year. In order to be recommended for the degree of Bachelor of Arts, he must complete at least ninety-four semester-hours of prescribed college work including Physical Education (at least thirty semester-hours and one year of residence must be completed in Columbian College), and the first year of the medical curriculum. Upon completion of the fourth year in the medical curriculum the student becomes eligible for the degree of Doctor of Medicine.

PLAN OF INSTRUCTION

Each year of the medical curriculum is divided into two semesters of sixteen weeks each. The curriculum for the degree of Doctor of Medicine must begin with the fall semester.

Laboratory training, demonstrations, and clinical teaching, with recitations and lectures clarify the many problems presented. The clinical material in the various hospitals and out-patient departments is utilized to the fullest extent for both clinical instruction and laboratory work.

HONORS

A candidate who has completed the four-year medical course with an average grade of *A* may be recommended for graduation "with distinction".

GENERAL INFORMATION

INTRODUCTORY

The George Washington University Law School, established in 1826, discontinued later, and reorganized in 1865, is the oldest in the District of Columbia. The course of instruction for the degree of Bachelor of Laws, originally requiring two years, was increased in 1898 to three years. A course leading to the degree of Master of Laws was added in 1877. In 1900 the School took part in the organization of the Association of American Law Schools and has been a member of the association since that time. In 1911 the School became coeducational. On September 1, 1925, the entrance requirements were increased to two years of college work; in 1936 they were increased to a college degree. The School is approved by the Council of Legal Education of the American Bar Association. The Law School building is named Stockton Hall in honor of the late Rear Admiral Charles Herbert Stockton, President of the University from 1910 to 1918.

* The President of the University and the Dean of the Law School are members ex officio of all committees.

† Elected by the Faculty.

THE LIBRARY

The Law School Library of 22,500 volumes contains the official reports of the decisions of the courts of last resort of all the states prior to the National Reporter System and of fourteen states complete to date; the National Reporter System, complete; the reports of the United States Supreme Court and lower federal courts, and the reports of federal administrative agencies; Shepard's Citations for the units of the Reporter System; the English Reprint and English Law Reports; the United States Statutes; the United States Code, Annotated, and the Federal Code, Annotated; reasonably complete sets of statutes of all of the states; the English statutes; the principal English and American digests and encyclopedias; collections of special reports and annotated cases; and the leading textbooks, casebooks, and legal periodicals.

The Library is open from 9:00 A.M. to 11:00 P.M. each class day (Saturday, 9:00 A.M. to 6:00 P.M.), and from 2:00 to 6:00 P.M. on Sunday.

THE LAW REVIEW

The George Washington Law Review, published monthly from November to June, inclusive, by the University, is edited by the Faculty and students of the Law School. It is devoted exclusively to the field of state and federal public law. The location of the University in the National Capital, where the primary sources of federal public law may be observed in operation, affords an unexcelled opportunity for specialization in this field.

The *Review* is edited by a Faculty editor-in-chief, a Faculty board of associate editors, a board of departmental advisory editors, and a board of student editors. The student editors are chosen each year from those students who have attained senior standing in their work for the degree in Law with an average grade of B or higher.

RESEARCH IN PUBLIC LAW

Washington, the capital of the Nation, furnishes unsurpassed advantages for research in the fields of public law. In it are the offices of the major executive departments, the Congress, the Supreme Court of the United States, and four lower federal courts. In the executive departments and among the many independent establishments of the Federal Government there have been estimated to be between seventy-five and one hundred agencies the activities of which involve the various branches of public law, particularly administrative law. The student of public law can study at first hand the work of these administrative agencies. He also has available as sources for investigation their records of administrative adjudications. In addition there are more than double the

number of law offices in the various departmental and independent agencies the principal business of which is public law.

To promote research in public law there have been established in the Law School seminars in Administrative Law, Business Associations, Constitutional Law, Trade Regulation, and Public Corporations. The purpose of this research is to furnish means for training specialists in public law, either as government lawyers or as lawyers representing individuals or corporations in cases in which the Government is a party, and to assist in the analysis, clarification, formulation, and improvement of public law, substantive and procedural.

Candidates for the graduate degrees in the Law School and seniors who are candidates for the degree of Juris Doctor are eligible to pursue this work. Other students may be admitted with the special permission of the professor in charge.

As part of the research in public law the Law School conducts each year a conference on specific problems of public law. Leading experts in the field under discussion are brought together for these conferences. Private practitioners, government lawyers, and government administrative officers are invited. The results of these conferences are published in the *George Washington Law Review*. The following conferences have been held: Government Corporations, July 1938; Administrative Law, February 1939; Constitutional Law, March 1940; and Labor Relations Regulations, March 1941.

THE STUDENT BAR ASSOCIATION

Every student in the Law School is required to be a member of the Student Bar Association. This is organized to enable the student to become better acquainted with problems of the profession, to develop better professional ideals, and to bring about closer contact with members of the profession engaged in active practice of the law.

The work of the Student Bar Association is carried on by various committees and by group and general meetings of a professional and social nature. From time to time lectures are given by outstanding authorities on legal and professional problems. The various committees include the following: Lectures, Court Practice, Literary, Case Clubs, Placement and Alumni Relations, Study Groups, and Social Affairs.

Each member of the Student Bar Association receives a subscription to *The George Washington Law Review*.

PRACTICE AND PRACTICE COURT

The curriculum is planned to include such training in the fundamentals of practice as is feasible in a law school. Classroom instruction is conducted in the theories of pleading and procedure, trial and appellate practice, and evidence. This instruction includes grounding in the

principles of the new Rules of Federal Civil Procedure. In addition each senior student is required to participate in the work of the practice or Moot Court. This includes trying a specified number of cases, both as a senior counsel and junior counsel.

The work of the general practice court is conducted in five parts in order that each student may have the opportunity to take part actively. For students who are planning to practice patent law, there is an additional part devoted exclusively to the trial of cases in that field.

The Moot Court follows the new Federal Rules of Civil Procedure which apply to all federal district courts including the District Court of the United States for the District of Columbia. Recognized court procedure is observed at all the sessions of the various parts in order that students may become familiar with it. One of the parts is presided over by a judge of the District Court of the United States for the District of Columbia and the others by leading members of the bar of long and varied experience.

ORDER OF THE COIF

The Order of the Coif, a national honor society with chapters in thirty-five law schools, aims "to foster a spirit of careful study and to mark in a fitting manner those who have attained a high grade of scholarship". The George Washington University Chapter was established in 1926. Members are elected each year from the highest-ranking ten per cent of the graduating class of the Law School.

GENERAL REGULATIONS

Students in the Law School are subject to, and are expected to familiarize themselves with, the regulations concerning ADMISSION, REGISTRATION, FEES AND FINANCES stated on pages 10-27, and the general University regulations stated on pages 41-46.

HOURS OF INSTRUCTION

The regular course for full-time students is given from 9:10 A.M. to 1:00 P.M. Employed students may take the regular course in the classes held from 5:10 to 7:00 P.M.

REGISTRATION

The curriculum is organized on a semester basis. Students may begin the study of law in the first semester, the second semester, or the Summer Session.

For further information concerning registration, see pages 20-21.

AMOUNT OF WORK

A student who takes a majority of his courses in the full-time sections, from 9:10 A.M. to 1:00 P.M., may, with the permission of the Dean, take work not exceeding fifteen hours a week. For such a student the minimum period of attendance is three academic years.

A student who takes a majority of his courses in the afternoon sections may not register for more than ten hours a week. For such a student the minimum period of attendance is four academic years.

The amount of work carried by any student may be restricted when, in the judgment of the Dean, the best interests of the student require it.

ATTENDANCE

A student who has been absent from more than twenty per cent of the classes in any subject will not be permitted to take the examination in the subject except with special permission of the Dean's Council.

RESIDENCE REQUIREMENTS

A year's attendance in the late-afternoon classes is counted as residence for three fourths of a year. A student admitted with advanced standing must complete at least one year of residence in this School and pass twenty-eight semester-hours with the required average for the degree.

A student who at the end of any regular period of residence—the first semester, the second semester, or the summer session—has completed subjects which equal in semester-hours the total number of semester-hours required for the degree for which he is a candidate, but who has failed to complete the full residence requirements for that degree, must be in residence during additional periods sufficient to satisfy completely the residence requirements. In all such cases the student must be in residence during the entire period and must satisfy the attendance requirements of, and pass the examination in, at least one subject.

GRADES

At the end of each semester each student is given a letter grade in each subject completed and a letter grade indicating the average for the semester.

Grades are indicated by the letters *A*, excellent; *B*, very good; *C*, good; *D*, poor—below standard for graduation; and *F*, failed.

The grades *A*, *B*, *C*, and *D*, mean that the work has been successfully completed and credit given for the subjects.

F, failed, means that the work in the subject has been a failure and that no credit will be given. To obtain credit the student must repeat the subject; but a student who has obtained an average of *C* in the work of the academic year and received a grade of *F* in only one subject may take

the next regular examination in that subject, and if on such reexamination he obtains a passing grade he will be given credit in the subject with the grade thus obtained.

EXAMINATIONS

Final written examinations are held at the close of each semester. Every student is required to take the regular examinations in the subjects pursued, unless excused by the Dean. A student who, with the consent of the Dean, does not take the final examination in a subject with the class in which he is enrolled may take the next regular examination given in the subject.

No special examinations will be given; except that, upon written application to the Dean's Council, showing sufficient cause, a candidate for a degree at a convocation before the next regular examination, if he would be entitled to take a postponed examination, may, at the discretion of the Dean's Council, be given a special examination.

EXCLUSION AND PROBATION FOR POOR SCHOLARSHIP

A student who during an academic year fails in two or more full-year subjects or the equivalent in half-year subjects will be excluded. Such a student is not eligible to be registered in the Law School or to attend classes in the next academic year. He may, however, be admitted to the regular examinations in that academic year in those subjects in which he has made a grade below passing, and if he receives a grade of passing in these subjects with an average sufficient to make his general average not less than *C*, he will be reinstated at the beginning of the academic year next succeeding the passing of these examinations.

A student not subject to exclusion under the foregoing rule who at the end of an academic year has failed to maintain a general average of at least *C*, will be on probation during the next academic year. A student on probation may at the discretion of the Dean be required to reduce his program of study. A student on probation will be excluded at the end of the probationary year unless he has made grades sufficient to give him a general average of at least *C*.

The general average of a student shall include all the grades in all the subjects taken while he is in the Law School working for a particular degree. When a subject has been repeated or a reexamination has been taken, both the first grade and the subsequent grade or grades shall be counted in the general average.

In special cases in which it is clear that the student's failure does not indicate lack of ability to pursue the study of law, the student who has become subject to exclusion may be readmitted by vote of the Dean's Council of the Law School.

No student shall be put on probation or excluded because of the work of one semester only, the work of the Summer Sessions, or as the result of a program of less than four hours a week during the academic year.

CLASSIFICATION OF STUDENTS

Students are divided into classes on the completion of semester-hours of credit as follows: First year, to twenty-seven; second year, twenty-eight to fifty-five; third year, fifty-six or more.

COURSES OF INSTRUCTION

The courses of instruction are listed in alphabetical order, beginning on page 157.

THE DEGREES

IN THE PROFESSIONAL COURSE

These degrees are Bachelor of Laws (LL.B.) and Juris Doctor (J.D.).

REQUIREMENTS FOR THE DEGREE OF BACHELOR OF LAWS

To be recommended for this degree the student must have completed: (1) a residence period of not less than three academic years on a full-time basis (four years on a part-time basis); (2) eighty semester-hours with a general average of at least *C*; and (3) the course in Moot Court.

REQUIREMENTS FOR THE DEGREE OF JURIS DOCTOR

This degree is conferred as a recognition of the completion at the George Washington University Law School, with high rank, of the full professional course of not less than three full years (four years on a part-time basis) including experience in research and legal authorship.

To be recommended for this degree the student must have completed: (1) a residence period of not less than three academic years on a full-time basis (four years on a part-time basis); (2) eighty semester-hours with a general average of at least *B*; (3) the course in Moot Court and either the course in Comparative Law or one of the graduate seminars, i.e., Administrative Law II, Business Associations II, Constitutional Law II, Public Corporations, or Trade Regulation II; and (4) one year of acceptable service on the board of student editors of *The George Washington Law Review*, election to which is subject to regulations laid down by the Faculty.

PATENT LAW CURRICULUM

To provide training for the student who plans to specialize in Patent Law, the courses in Substantive Patent Law, Patent Office Practice, and Patent Moot Court are offered as third-year electives. They may be counted toward the degree of Bachelor of Laws or Juris Doctor, or they may be taken by the qualified student not a candidate for degree.

HONORS

The degree of Bachelor of Laws or of Juris Doctor "with distinction" will be awarded the student who obtains a general average of *A* in the work for the degree.

IN THE GRADUATE COURSE

These degrees are Master of Laws (LL.M.) and Doctor of Juridical Science (S.J.D.)

REQUIREMENTS FOR THE DEGREE OF MASTER OF LAWS

To be recommended for this degree the student must have completed a residence period of not less than one academic year. He must have completed satisfactorily twenty semester-hours, of subjects in the graduate curriculum. In individual cases, third- or fourth-year subjects listed in the professional curriculum may be included in the program of study. All requirements for this degree must be completed in a period not exceeding two academic years.

REQUIREMENTS FOR THE DEGREE OF DOCTOR
OF JURIDICAL SCIENCE

To be recommended for this degree the student must have completed a residence period of not less than one academic year. He must have pursued a course of study and research designated by his consultative committee and approved by the Dean's Council of the Law School. At the conclusion of his first year of residence or at such other time as the consultative committee may set, the candidate must pass an oral examination in those fields of study selected by the consultative committee. This examination shall be conducted by the consultative committee and such other members of the faculty as may be assigned by the Dean. The student must then submit a thesis which in the opinion of the examining committee shall constitute a substantial contribution to the field of law concerned and shall be suitable for publication.

FIELDS OF STUDY AND INVESTIGATION

A field of study may be selected from the following: Administrative Law, Civil Procedure, Conflict of Laws, Constitutional Law, Evidence, Federal Jurisdiction, Public Corporations, Government Regulation of Business Organization, History of Law, International Law, Labor Law, Municipal Corporations, Trade Regulation, and Trusts.

GENERAL INFORMATION

INTRODUCTORY

The School of Engineering of The George Washington University was organized in 1884 as the Corcoran Scientific School. In 1903 that school was combined with Columbian College in the Department of Arts and Sciences. In 1905 the engineering courses were placed under an administrative organization known as the Washington College of Engineering and in 1909 the name was changed to the College of Engineering and Mechanic Arts. In 1914 the name became the School of Engineering.

Courses leading to the degree of Bachelor of Civil Engineering, Bachelor of Mechanical Engineering, and Bachelor of Electrical Engineering are accredited by the Engineers' Council for Professional Development, the recognized accrediting body of the engineering profession, composed of representatives of the American Society of Civil Engineers, the American Institute of Mining and Metallurgical Engineers, the American Society of Mechanical Engineers, the American Institute of Electrical Engineers, the Society for the Promotion of Engineering Education, the American Institute of Chemical Engineers, and the National Council of State Boards of Engineering Examiners.

Courses of instruction leading to the Bachelor's degrees, are scheduled so as to make it possible for the employed student to enroll on a part-time basis. The curricula and the teaching staff are the same for both full-time and part-time students.

* Elected by the Faculty. The President of the University and the Dean of the School of Engineering are members ex officio of the council.

GENERAL REGULATIONS

Students in the School of Engineering are subject to, and are expected to familiarize themselves with the regulations concerning ADMISSION, REGISTRATION, FEES AND FINANCES stated on pages 10-27, and the general University regulations stated on pages 41-46.

AMOUNT OF WORK

The normal program of studies for full-time students is set forth below under "Curriculum Requirements". The student with a limited schedule is not allowed to carry more than nine semester-hours except by permission of the Dean's Council.

CLASSIFICATION OF STUDENTS

Students are classified as *freshmen, sophomores, juniors, and seniors*, in accordance with the curriculum requirements stated on pages 114-16.

COURSES OF INSTRUCTION

The courses of instruction are listed in alphabetical order, beginning on page 157.

THE BACHELOR'S DEGREES

Upon the satisfactory completion of the undergraduate requirements of the School of Engineering, the degree of Bachelor of Civil Engineering, Bachelor of Electrical Engineering, Bachelor of Mechanical Engineering, or Bachelor of Science is conferred. The total number of semester-hours for the four-year course is 144.

REQUIREMENTS FOR THE DEGREES

SCHOLARSHIP

The system of grading and of computing scholarship is described in detail on pages 42-43.

In order to graduate, a student must have a quality-point index of at least 2.00. No student whose quality-point index is below 2.00 will be admitted to the junior year.

Delinquency in scholarship will render the student liable to be placed on probation or suspended by the Dean's Council. Readmission will be subject to approval by the Dean's Council.

The purpose of this curriculum is to allow a student who has demonstrated his ability to do better than passing work to center his attention upon a group of subjects in which he has special interest. Options may be elected in Business Administration, Chemistry, Economics, Geology, Mathematics, Naval Architecture, Physics, or Statistics. The student's choice of subjects for the entire junior and senior years should be submitted to the Dean's Council for approval before the beginning of the junior year. The student must comply with such requirements as to subjects, schedules, and scholarship as the Department concerned may prescribe. This work must be taken at The George Washington University.

THE PROFESSIONAL DEGREES

The professional degree of Civil Engineer, Electrical Engineer, or Mechanical Engineer may be conferred upon a graduate of the School of Engineering who has demonstrated his professional ability.

* The student who begins Physics with Physics 6 or 7, Chemistry with Chemistry 12, or English with English 1 is subject to a qualifying examination. Credit will be given for Physics 5 or Chemistry 11 if not used for entrance requirement.

No credit is allowed for English 0.

REQUIREMENTS FOR THE DEGREES

1. Application may not be made sooner than three years after graduation, and then only if the candidate has had responsible charge of engineering work.
2. A detailed statement of the candidate's experience, references, the degree sought, and the title of the thesis must be filed with the Dean eight months before the Commencement at which the degree is to be conferred.
3. If his application is accepted, the candidate must prepare his thesis as required by the Executive Officer of the Department concerned.
4. One typewritten original and two legible carbon copies of the thesis must be presented to the Dean not later than the date announced in the University calendar. Requirements regarding the form of the thesis are stated on page 45.

REQUIREMENTS FOR THE DEGREE

Application may not be made until the third year after graduation and then only if the candidate has had satisfactory training in engineering work. A detailed statement of the candidate's experience, education, and other work, and the title of the thesis must be filed with the thesis. The statement being the Commencement at which the degree is to be conferred. If the application is accepted, the graduate must prepare his thesis under the supervision of the Executive Officer of the Department concerned. The thesis must be a research paper and two hard carbon copies of the thesis must be submitted to the Department not later than the date announced in the calendar. Requirements regarding the form of the thesis are given on page 43.

GENERAL INFORMATION

INTRODUCTORY

In 1867 the foundation for the National College of Pharmacy was laid by the Apothecaries' Association of the District of Columbia. The College was opened in 1872 and continued until 1906, when it became affiliated with The George Washington University.

The School of Pharmacy is accredited by the American Council on Pharmaceutical Education.

* The President of the University and the Dean of the School of Pharmacy are members ex officio of all committees.
 † Elected by the Faculty.

The School of Pharmacy is a member of the American Association of Colleges of Pharmacy.

Washington offers many opportunities for the study of Pharmacy. Not only are the facilities of government laboratories and libraries open to the student, but the School of Pharmacy is located only a few blocks from the American Institute of Pharmacy building, in which have been established a pharmaceutical museum and library, and research laboratories which have brought to Washington the outstanding men of the profession.

GENERAL REGULATIONS

Students in the School of Pharmacy are subject to and are expected to familiarize themselves with the regulations concerning ADMISSION, REGISTRATION, FEES AND FINANCES as stated on pages 10-27, and the general University regulations stated on pages 41-46.

AMOUNT OF WORK

Normal work for any year is that outlined under the head of "Curriculum Requirements", below. A student who wishes to take more than the normal amount of work may do so only with the permission of the Committee on Scholarship, the members of which shall be guided in their decision by his scholastic record and the extent to which he is employed. A student on probation shall be limited in the amount of work he may carry.

ATTENDANCE

Except by special permission of the instructor, credit will not be given for any course if absences, including both lecture and laboratory, exceed in number for each semester the semester-hours of credit for the semester.

Absence consists of being away from a lecture or a laboratory, entering after the lecture or laboratory has begun, or leaving before either is dismissed.

ELIGIBILITY FOR EXAMINATION BEFORE STATE BOARDS OF PHARMACY

To be eligible for examination before most state boards of pharmacy the applicant is required to present satisfactory evidence of college graduation and in addition must have had from one to four years of practical experience in a pharmacy where prescriptions are compounded. The student is not encouraged to obtain this professional experience while attempting a full course of study. In the case of a student who maintains a quality-point index of 2.00 or higher, permission may be granted by the Dean to acquire a limited amount of this professional experience by work in a pharmacy while carrying a full schedule. A student who

falls below a quality-point index of 2.00 will be required to reduce his academic load, or to limit his professional-experience time to less than twenty-four hours a week.

COURSES OF INSTRUCTION

The courses of instruction are listed in alphabetical order, beginning on page 157.

THE DEGREE OF BACHELOR OF SCIENCE

Upon the satisfactory completion of the requirements of the School of Pharmacy, the degree of Bachelor of Science in Pharmacy is conferred.

REQUIREMENTS FOR THE DEGREE

SCHOLARSHIP

The system of grading and of computing scholarship is described in detail on pages 42-43.

In order to graduate, a student must have a quality-point index of at least 2.00. In addition, he must have a quality-point index of at least 2.50 in all pharmacy courses.

Probation.—A student must maintain a quality-point index of at least 2.00, or be placed on probation where he will remain as long as he fails to attain this index.

Suspension.—A student who has a quality-point index below 1.00 or who is placed on probation for a third semester, whether successive or after an interval, will be suspended. A student who receives a grade of *E* or *F* in two courses in any semester will be suspended.

A student suspended for poor scholarship may apply for readmission after an interval of a calendar year. He must then submit evidence to the Dean of the School of Pharmacy that during his absence from the University he has so conducted himself as to indicate that he will profit by readmission. A student suspended twice for poor scholarship will not be readmitted.

The foregoing scholarship rules are applied to a student with a limited schedule only when he has undertaken a minimum of fifteen semester-hours.

CURRICULUM REQUIREMENTS

The laboratory method of teaching is used. Recitation classes are held in connection with each course in order to provide systematic drill in the subjects.

The curriculum requirements include at least 130 semester-hours of credit. The following curricula lead to the degree of Bachelor of Science in Pharmacy.

GENERAL INFORMATION

INTRODUCTORY

It is the purpose of the School of Education to prepare teachers, supervisors, and administrators for the higher ranges of educational service and to offer opportunities to teachers of experience to extend their education. The school embraces the Departments of Education, Physical Education, and Home Economics, and it is affiliated with all the other departments of the University in which the student is likely to elect work. It offers both graduate and undergraduate work.

The schedule of courses is arranged to meet the convenience of both full-time and part-time students. By attending afternoon, Saturday, and summer classes, teachers in the schools of Washington and vicinity may complete all the requirements for a degree without giving up their positions.

GENERAL REGULATIONS

Students in the School of Education are subject to, and are expected to familiarize themselves with the regulations concerning ADMISSION, REGISTRATION, FEES AND FINANCES stated on pages 10-27, and the general University regulations stated on pages 41-46.

AMOUNT OF WORK

A normal program of work for an undergraduate student is sixteen or seventeen semester-hours. A student with a quality-point index of 3.00 or higher may, with the Dean's permission, take nineteen hours. More than nineteen hours may not be taken except by special permission of the Committee on Scholarship.

For an employed student ten semester-hours constitute a normal program. A student with a quality-point index of 3.00 or higher for the preceding semester may be permitted by the Dean to take twelve or thirteen semester-hours.

For a graduate student twelve semester-hours, exclusive of the thesis, constitute a normal program. An employed student may not take more than nine semester-hours.

COURSES OF INSTRUCTION

The courses of instruction are listed in alphabetical order, beginning on page 157. The system of numbering courses is explained on pages 159-60.

THE BACHELOR'S DEGREES

Upon the satisfactory completion of the undergraduate requirements of the School of Education, the degree of Bachelor of Arts in Education, Bachelor of Science in Home Economics, or Bachelor of Science in Physical Education is conferred.

The program of work of each student must be approved by a Faculty adviser. Since each student's program of work will be defined by his particular needs, it is important that the student have a clear conception of his major interest in Education, and also that he be familiar with the teaching-certificate requirements in the locality in which he expects to teach.

REQUIREMENTS FOR THE DEGREES

To be recommended for a degree a student must satisfy the admission, residence, scholarship, and curriculum requirements. *Particular attention is called to the statement of graduation requirements on pages 44-45.*

RESIDENCE

For full details concerning continuous residence, see page 41.

SCHOLARSHIP

The system of grading and of computing scholarship is described in detail on pages 42-43.

In order to graduate, a student must have a quality-point index of at least 2.00.

Probation.—A student who fails to maintain a quality-point index of at least 2.00 will be placed on probation. A student remains on probation as long as his quality-point index is below 2.00, or until his probation is removed by the Committee on Scholarship.

Suspension.—A student who fails to pass (i.e., who receives a grade of E or F) in half or more than half of his work, based on a minimum of sixteen semester-hours, will be suspended.

A student who has been suspended for poor scholarship may within ten days appeal his case to the Committee on Scholarship through the Dean. If the case appears to be remediable and the student appears likely to improve in his scholarship thereafter, the committee may readmit him on probation. A student who has been denied readmission on probation may petition the Committee on Scholarship through the Dean for

readmission after the lapse of a calendar year. A student who has been suspended twice will not be readmitted.

CURRICULUM REQUIREMENTS

In any of the following curricula at least thirty semester-hours of work must consist of courses numbered above 100.

BACHELOR OF ARTS IN EDUCATION

Students admitted with two years of approved college work are granted the degree of Bachelor of Arts in Education upon the satisfactory completion of sixty-six semester-hours of work. This work must include:

| | Sem. hrs. |
|--|-----------|
| *Education (including Observation and Cadet Teaching)..... | 18 |
| †Educational Psychology | 2 or 3 |
| †Educational Sociology | 2 or 3 |
| Subject-matter field | 24 to 36 |
| Electives | 6 to 20 |

To the extent that courses in the foregoing list are offered for admission, the range of electives is increased.

Normal School Students.—Students from approved normal schools are granted such advanced standing as their credentials warrant. Their unfinished requirements are determined by the Dean.

Subject-Matter Field.—Courses elected within the subject-matter field will depend upon the teaching certificate desired. Usually twenty-four to thirty-six semester hours are required. The subject-matter program should be planned in consultation with, and must be approved by, the Faculty adviser in the field selected. Relevant work completed in normal school or junior college may be counted toward the subject-matter requirements with the approval of the Faculty adviser.

BACHELOR OF SCIENCE IN HOME ECONOMICS

The program of work of each student will be planned with the assistance of a Faculty adviser in the Department of Home Economics.

The purpose of the general home-making course is to educate young women for the important responsibility of home-making and to prepare them adequately for modern living.

Since there will be variation in the needs of each student, the general home-making program can be adapted with the assistance of the Faculty adviser to meet any special requirements.

* The choice of electives in Education and the number of semester-hours in excess of eighteen will depend largely upon the certification requirements that the student wishes to meet. Courses listed under the Department of Education as "Closely Related Courses in Other Departments" are accepted in fulfilling the requirement of eighteen semester-hours in Education, with the exception of Educational Psychology and Educational Sociology.

† Required in addition to eighteen semester-hours in Education.

The student desiring to prepare herself to teach another subject in addition to Physical Education for Women may do so by choosing her elective hours from one subject-matter field with the advice of the Executive Officer. Relevant work completed in the Junior College may be counted in this subject-matter field.

THE HIGHER DEGREES

Upon the satisfactory completion of the graduate requirements of the School of Education, the degree of Master of Arts or the degree of Doctor of Education is conferred.

REQUIREMENTS FOR THE DEGREE OF MASTER OF ARTS

ADMISSION TO CANDIDACY

In addition to admission requirements stated on page 17 the applicant for admission to candidacy for the degree of Master of Arts must be accepted by the Committee on Admission and Advanced Standing. The general procedure in meeting this requirement includes scholarship and personality ratings from instructors under whom the candidate has studied, a personal interview with the Dean, and a scholastic-aptitude test.

ADVANCED STANDING

Graduate work completed in other accredited institutions of learning may be credited toward the Master's degree, but a minimum of twenty-four semester-hours of work must be completed at The George Washington University.

Advanced courses completed in excess of the requirements for the Bachelor's degree in The George Washington University may be credited toward the Master's degree to the extent of twelve semester-hours, pro-

vided the work fits in with the student's plan of specialization and is approved in writing by the Dean before being undertaken.

Work completed more than three years prior to registration for the Master's degree at The George Washington University will be credited only after the candidate has satisfied the department concerned that he is proficient in the subject matter of the courses offered for credit. Such proficiency may be determined by examination or by other means.

PROGRAM OF STUDIES

The degree of Master of Arts is a professional degree, designed to prepare the student for some particular type of educational service. The program of studies leading to the degree will be selected by the candidate and his consultative committee from the various related departments of the University to give the student an adequate background in his chosen vocational field. For the prospective high school or junior high school teacher this will ordinarily include study in the subject which he is planning to teach as well as in the field of Education.

RESIDENCE

A candidate must pass in resident study at this University at least two semesters, or one semester and one nine-week summer term, or three nine-week summer terms, or four six-week summer terms.

AMOUNT OF WORK

A student whose previous preparation in his chosen field has been adequate may complete his requirements, including the thesis, by a minimum of thirty semester-hours of work; others may be required to take as many as twelve semester-hours additional.

THE THESIS

The program of studies will be rounded out by a thesis, which will count as six semester-hours of credit toward the degree. It may be of a research, expository, critical, or creative type, and is intended to demonstrate the student's ability to make independent use of the information and training that he has acquired, and to furnish objective evidence of his constructive powers in his chosen field. The thesis subject must be approved in writing by the candidate's adviser and recorded in the Office of the Registrar by the date announced in the University calendar. One typewritten original and three legible carbon copies of the thesis in its final form must be presented to the Dean by the candidate not later than the date announced in the University calendar. Requirements regarding the form of the thesis are stated on page 45.

Payment of tuition for the thesis will entitle the candidate, during the academic year of registration, to the advice and direction of the member

of the Faculty under whom the thesis is to be written. In case a thesis is unfinished, an additional successive academic year may be granted without further tuition payment. If the preparation of the thesis extends beyond the two-year period, it must be registered for again, and tuition paid on the same basis as for a repeated course.

FINAL EXAMINATION

In addition to the course examinations, the candidate must pass a final examination on the thesis and its related fields.

If the thesis is submitted more than three years after the course requirements have been completed, a written examination covering the student's complete program of study will also be required.

REQUIREMENTS FOR THE DEGREE OF DOCTOR OF EDUCATION

The requirements for the degree of Doctor of Education cannot be stated in semester-hours, but they consist in general of at least three full years of work beyond a standard Bachelor's degree. It is the function of these requirements to prepare the student for an administrative or supervisory position, the teaching of Education in normal school or college, the teaching of an academic subject in school or college, or specialized types of educational service. The work is given a practical rather than a theoretical bent, and emphasizes the mastery and application of subject matter, both in the study requirements and in the thesis. Special emphasis is placed upon the professional success of the candidate.

QUALIFICATIONS OF THE APPLICANT

The candidate for the degree of Doctor of Education must have completed (1) graduate work in fields prerequisite to his objective, equivalent to that required for the degree of Master of Arts in The George Washington University, and (2) at least three years of successful educational experience.

ADMISSION TO CANDIDACY

To be admitted to candidacy for the degree the applicant must be accepted by the Faculty of the School of Education on the basis of an examination conducted by a committee appointed by the Dean. This examination will usually include the following: (1) a written examination involving problems related to the applicant's background; (2) a scholastic-aptitude test; (3) an oral examination.

CONSULTATIVE COMMITTEE

If the applicant is accepted as a candidate, his consultative committee shall counsel the candidate and guide his work.

The consultative committee, in cooperation with the candidate, shall (1) determine the candidate's fields of study, in each of which the candi-

date must pass a written examination at least eight months before he presents himself for the degree; (2) formulate a list of course requirements and of readings that will assist him in preparing for these examinations; and (3) designate the tools of investigation that will be needed by the candidate in the prosecution of his study. These tools may include one or more foreign languages, statistical methods, historical criticism, or any others considered essential by the committee. An examination in the tools designated must be passed by the candidate before he takes his comprehensive examination.

THESIS ADVISER

After the candidate has satisfied the requirements enumerated in the preceding section, his committee is dissolved, and he is assigned to a member of the Faculty in whose field the topic of his thesis falls. It is the duty of this person to serve as the candidate's adviser on his thesis and in his field of specialization, and to recommend him to the Dean for the final oral examination when, in his judgment, the candidate's thesis is acceptable.

THE DOCTORAL THESIS

Not later than the date specified in the University calendar the candidate shall submit to the Dean of the School of Education four copies of his thesis—one typewritten original, on official thesis paper, and three legible carbon copies—and also a typewritten summary of the thesis consisting of not more than 2,500 words. Requirements regarding the form of the thesis are stated on page 45.

The successful candidate is required, before receiving his degree, to pay a fee to cover the expense of printing the summary of his thesis.

THE FINAL EXAMINATION

At least three weeks before the degree is to be conferred the candidate must pass an oral examination on his thesis and on his field of specialization before a committee of the Faculty appointed by the Dean, supplemented by two experts from outside the University appointed by the President. This examination is open to the public, and all are privileged to question the candidate. The Dean, or a member of the Faculty designated by him, will preside at this examination.

THE EDUCATION GUILD

To test methods of greater freedom in preparing for the doctoral examination and of correlating the doctoral work more closely with the candidate's occupation, the University in 1935-36 entered upon an experiment. Persons already professionally employed in Washington and vicin-

ity and known for their leadership in the classroom, in supervision, and in administration were invited to form a group for advanced study and discussion. Each member of this group is under the guidance of a consultative committee and must satisfy all the requirements laid down by the Faculty for the degree of Doctor of Education. Attendance upon seminars is advised but is optional, since directed reading and personal conferences may take the place of the more formal seminar.

This group calls itself "The Education Guild of The George Washington University". It has its own officers and is largely under its own management. Membership, at present restricted to twenty, is subject to invitation, and includes both men and women. Meetings, usually preceded by a dinner, are held from four to six times a year.

GENERAL INFORMATION

INTRODUCTORY

The George Washington University School of Jurisprudence and Diplomacy existed from 1898 to 1913, when it was discontinued as a separate school. The courses were given, however, in Columbian College until September 1928, when training in foreign service and governmental theory and administration was reestablished as a separate branch under the School of Government.

It is the purpose of the School to give the student an understanding of the responsibilities under the Constitution of the United States in the conduct of public office—domestic and foreign. This can be accomplished not through any single course but through a curriculum which correlates social, economic, political, historical, and psychological studies.

The courses in domestic government train in the theory of, and practice in, local, state, and national positions. The courses in Foreign Service train the student for the many opportunities offered in the foreign fields

* The President of the University and the Dean of the School of Government are members ex officio of all committees.
 † Elected by the Faculty.

to carry out the ideals for which America stands, not only in governmental work but in the much wider field of foreign trade as conducted by private enterprise in all parts of the world. This training fits the student especially to assist American citizens who have occasion to travel or to do business abroad, to understand their reciprocal rights and duties, and to protect them in these rights without infringing upon the rights of others, as well as to collect and report information concerning commercial conditions and opportunities abroad. The student thus gains an insight into international affairs from both the American and the foreign point of view, with a resultant broader understanding of economic and political problems.

GENERAL REGULATIONS

Students in the School of Government are subject to, and are expected to familiarize themselves with, the regulations concerning ADMISSION, REGISTRATION, FEES AND FINANCES as stated on pages 10-27, and the general University regulations stated on pages 41-46.

AMOUNT OF WORK

A full-time student not on probation may take ordinarily not more than seventeen semester-hours. A student employed more than twenty-four hours a week, who is not on probation, may take not more than ten semester-hours.

A full-time undergraduate student whose quality-point index is 3.50 or higher may take not more than nineteen semester-hours. An undergraduate student employed more than twenty-four hours a week, whose quality-point index is 3.50 or higher, may take up to twelve semester-hours.

Exceptions to these rules will require the approval of the Dean.

ATTENDANCE

The student is held responsible for all the work of the courses in which he is registered, and all absences must be excused by the instructor in charge before provision is made for him to make up the work missed.

CLASSIFICATION OF STUDENTS

A student who holds a Junior Certificate from the Junior College, or the equivalent from an accredited institution, and who has registered his choice of one of the prescribed curricula at the Office of the Registrar, is classed as a *junior*. A student who has completed thirty semester-hours in the School of Government is classed as a *senior*. A student who has satisfactorily completed the work for the Bachelor's degree, and who has registered his choice of one of the prescribed fields of study at the Office of the Registrar, is classed as a *master in course*.

INDEPENDENT STUDY PLAN

Under the independent study plan a student of demonstrated capacity, with special interest in the subject matter of a course, may be permitted to undertake independent study under the personal direction of an instructor, in accordance with the rules of the division in which the subject falls. Credit under this plan is limited to the specific course-credits as designated in the list of courses of instruction in this CATALOGUE.

COURSES OF INSTRUCTION

The courses of instruction are listed in alphabetical order, beginning on page 157.

THE DEGREE OF BACHELOR OF ARTS

Upon the satisfactory completion of the undergraduate requirements of the School of Government, the degree of Bachelor of Arts in Government, with a designation of the major field of study, is conferred. The major fields are Public Affairs, Foreign Service, Foreign Commerce, Public Administration, Business Administration, Public Finance, Public Accounting, and Business and Government Statistics.

REQUIREMENTS FOR THE DEGREE

SCHOLARSHIP

The system of grading and of computing scholarship is described in detail on pages 42-43.

In order to graduate, a student must attain the following: (1) a quality-point index in all of his work of at least 2.00 and (2) a quality-point index of at least 2.50 in thirty semester-hours, excluding electives, in the work of the third and fourth years.

Probation.—A student must maintain a quality-point index of at least 2.00, or be placed on probation, where he will remain as long as his quality-point index on all work taken is below 2.00.

Suspension.—A student who has a quality-point index below 1.00 or who is placed on probation for a third semester, whether successive or after an interval, will be suspended.

For the purpose of these rules, the Summer Sessions are considered a semester.

A student suspended for poor scholarship may apply for readmission after an interval of a calendar year. He must then submit evidence to the Committee on Admission and Advanced Standing that during his absence from the University he has so conducted himself as to indicate

that he will profit by readmission. A student suspended twice for poor scholarship will not be readmitted.

A student with a limited schedule is affected by the foregoing scholarship rules only when he has undertaken fifteen semester-hours.

CURRICULUM REQUIREMENTS

Curriculum requirements for the Bachelor's and Master's degrees are stated on pages 143-47.

EXAMINATIONS FOR WAIVING CURRICULUM REQUIREMENTS

A student desiring to omit a required course may take such examination as the department prescribes, and, on passing satisfactorily, he may be relieved of the curriculum requirement in that subject and may qualify for registration in an advanced course. Passing of this examination shall not entitle the student to any hours of credit toward the degree. A student desiring to take such examinations should make the request of the Dean.

A fee of \$5 for each examination is to be paid at the Office of the Comptroller and the receipt exhibited at the door of room 105, Building D, on September 16 at 2:00 P.M. for the first semester, and on February 2 at 2:00 P.M. for the second semester. Two hours will be allowed for the examination. Should a student wish to take more than one examination, arrangements will be made accordingly.

THE DEGREE OF MASTER OF ARTS IN GOVERNMENT*

Upon the satisfactory completion of the graduate requirements of the School of Government, the degree of Master of Arts in Government, with a designation of the major field of study, is conferred. The major fields are Public Affairs, Foreign Service, Foreign Commerce, Public Administration, Business Administration, Public Finance, Public Accounting, and Business and Government Statistics.

ADMISSION TO CANDIDACY

A student is formally recognized as a candidate for the Master's degree only when his application for candidacy has been approved by the Dean. Application is made on a form obtainable at the Office of the Registrar.

Before being admitted to candidacy in the curricula in Public Affairs, Foreign Commerce, or Foreign Service, the student must show a reading knowledge (certified by the appropriate language department) of at least one modern foreign language, to be approved by the Dean. Examina-

* For the degree of Master of Arts in Public Personnel Administration, see pages 147-48.

tions in modern foreign languages will be given on Saturday, October 4; Saturday, February 7, and Saturday, May 2, at 2:00 P.M.

REQUIREMENTS FOR THE DEGREE

A minimum of thirty semester-hours of work, as outlined in the curricula on pages 143-47, must be completed successfully. Variations from these curricula require the permission of the Dean.

Not more than twelve semester-hours of work may be taken in another professional School; and work so taken cannot be counted toward degrees in both Schools. No part of the minimum requirement may be taken in any other institution.

A second-group course (numbered 101-200), taken either in the undergraduate or graduate years, may be counted toward the Master's degree only when registration for advanced credit has been approved at the beginning of the course by the Dean and by the officer of instruction, and provided that the student shall have done such extra work in the course as may be prescribed by the instructor.

Work completed more than three years prior to registration for the Master's degree will be counted only if the candidate successfully passes an examination on the subject matter of the work offered for credit.

In addition to the course examinations, the candidate must pass a comprehensive written examination in his major field. An oral examination on his thesis may also be required.

No work counted toward a Bachelor's degree may be counted toward a Master's degree.

A student working toward the Master's degree who is completing an undergraduate major must attain a grade of *B* or higher in each course undertaken as part of his undergraduate-major program.

A student who expects to continue his studies for the degree of Doctor of Philosophy after receiving the Master's degree is strongly advised so to plan his program from the beginning that work for the lower degree may help to prepare him for the higher.

Particular attention is called to the statement of graduation requirements on pages 44-45.

RESIDENCE

No credit is granted for work done in absentia, i.e., without formal instruction, except for the thesis, which may be completed in absentia with the permission of the department concerned.

SCHOLARSHIP

A student whose scholarship is unsatisfactory may be suspended by the Dean. Regarding the system of grading, see pages 42-43.

CURRICULUM REQUIREMENTS

Curriculum requirements for the Bachelor's and Master's degrees are stated on pages 143-47.

THE THESIS

The thesis must be registered for not later than the beginning of the final year, unless the professor in charge of the thesis permits registration at the beginning of the final semester. For this purpose the nine weeks' term of the Summer Sessions is considered a semester. The choice of the thesis subject must be approved by the professor in charge and recorded in the Office of the Registrar by the date announced in the University calendar. The typewritten thesis in its final form must have the approval of the professor in charge and must be presented to the Dean by the student not later than the date announced in the University calendar. Requirements in regard to the form of the thesis are stated on page 45.

Payment of tuition for the thesis will entitle the candidate, during the academic year of registration, to the advice and direction of the member of the Faculty under whom the thesis is to be written. In case a thesis is unfinished, an additional successive academic year may be granted without further tuition payment. If the preparation of the thesis extends beyond the two-year period, it must be registered for again, and tuition paid on the same basis as for a repeated course.

CURRICULUM REQUIREMENTS

For recommendation for graduation the School of Government requires, in addition to the appropriate Junior College work (see page 60 and table facing pages 62-63), a minimum of sixty semester-hours during the junior and senior college years, as set forth in one of the following curricula. The junior and senior years of these eight curricula lead to the degree of Bachelor of Arts in Government with a designation of the major field of study; the graduate years as here outlined lead to the degree of Master of Arts (see pages 141-43) in the respective fields. Electives as well as other subjects must be approved by the Dean.

THE DEGREE OF MASTER OF ARTS IN PUBLIC PERSONNEL ADMINISTRATION

The degree of Master of Arts in Public Personnel Administration is a professional degree designed to provide the necessary pre-entry training for personnel work. The requirements for the degree cannot be stated definitely in terms of semester-hours, although a minimum of thirty semester-hours including either a thesis (6 semester-hours) or field work (6 semester-hours) is required. Unless a candidate is already credited with the introductory courses in Economics, Political Science, and Psychology prerequisite to admission to second-group courses, he will be required to take these courses without credit toward the Master's degree. Each student's program will be planned in the light of his background and

professional objective. A typical program of work is described below. It is assumed that many of these courses will be offered as undergraduate credits and that frequently the program will not exceed thirty semester-hours. Students qualified by experience or independent study may satisfy some of these requirements by examination without taking formal courses, although in no case will less than thirty semester-hours meet the requirement for the degree.

GENERAL INFORMATION

INTRODUCTORY

The Division of University Students was organized in 1930 in order to make the work of the University in its several divisions more fully accessible to mature students and to provide for the offering of special courses to meet special demands as they might arise from time to time. Students registered in this Division are designated "University students", as distinguished from regularly matriculated undergraduate and graduate students.

GENERAL REGULATIONS

Students in the Division of University Students are subject to, and are expected to familiarize themselves with, the regulations concerning ADMISSION, REGISTRATION, FEES AND FINANCES stated on pages 10-27, and the general University regulations stated on pages 41-46.

SCHOLARSHIP

The system of grading and of computing scholarship is described in detail on pages 42-43.

Probation.—A student must maintain a quality-point index of at least 2.00, or be placed on probation. The case of each student who has a quality-point index between 1.50 and 2.00, however, will be considered individually. A student will remain on probation as long as his quality-point index is below 2.00, or until his probation is removed.

Suspension.—A student who has a total quality-point index below 1.50 will be suspended. The case of each student having a total quality-point index between 1.35 and 1.50, however, will be considered individually.

* The President of the University and the Dean of University Students are members ex officio of the council.

A student who receives a grade of *E* or *F* in two courses in any two out of three successive semesters will be suspended.

A student who falls under probation for the third semester, whether successive or after an interval, will be suspended.

A student suspended for poor scholarship may apply for readmission after an interval of a calendar year. He must then submit evidence that during his absence from the University he has so conducted himself as to indicate that he will profit by readmission. A student suspended twice for poor scholarship will not be readmitted.

For the purpose of these rules, the Summer Sessions are considered a semester.

Warnings.—At stated intervals during the academic year instructors shall file in the Office of the Registrar the names of those students who are doing work of *D* grade or lower. "Warnings" will then be transmitted to the students concerned. Upon request a parent or guardian may receive a copy of a warning notice sent to a student. A warning constitutes notice to the student that he must consult the Dean within a reasonable time and in any case not later than two weeks after receipt of the warning. "Warning periods" are established as follows: First semester—November 1 to 15. Second semester—March 15 to 30. Summer Sessions—six-week courses, third to fourth week; nine-week courses, fourth to fifth week.

The foregoing scholarship rules are applied to a student with a limited schedule only when he has undertaken a minimum of fifteen semester hours.

TRANSFER TO REGULAR STATUS

A "University student" may be transferred, at his request, to another College or School of the University only upon complying with the regulations of the specific College or School to which he wishes to transfer. The student should familiarize himself with the regulations printed in the University CATALOGUE concerning admission, residence, amount and quality of work. Specifically, he should note that in some cases not more than thirty (30) semester-hours of credit may be transferred from this Division; that at least the last thirty (30) semester hours must be spent in residence in the College or School granting the degree; and that a general quality-point index of 2.00 must be maintained, with an index of 2.50 in the major.

COURSES OF INSTRUCTION

The courses of instruction are listed in alphabetical order, beginning on page 157.

EXTENSION COURSES

Special courses may be offered at the University or away from the University whenever the demand exists and the University is able to furnish proper facilities for instruction. Such courses may be credit or noncredit courses, according to University regulations. If they are for credit, the work will be of the same character and standard as that offered by the University in its regular courses.

Extramural classes may be formed by local groups. Such groups may determine, upon consultation with the Dean, the possibility of organizing the type of extramural work which they desire. Extramural courses will generally be arranged to meet in one period for one hour and forty minutes weekly, for fifteen weeks. This constitutes two class-hours of fifty minutes each and, when credit is granted, will count for two semester-hours credit. Such courses must be approved in advance by the department concerned. Tuition will be charged at the rate of \$8 a semester-hour, plus the University fee for extension students. Announcements of extension courses will be issued from time to time and may be obtained upon application at the Office of the Registrar.

Because of its situation in the National Capital, The George Washington University is able to offer certain types of academic work and to promote and foster conferences, publications, and studies which profit especially by the resources of the Federal Government, the Library of Congress, the Pan American Union, the various embassies and legations, and other institutions located in Washington. Particularly do these advantages apply to work concerning the nations of the Americas. It is intended that the Center shall take advantage of these manifold opportunities, not only by facilitating the offering of regularly constituted courses and special lectures, but also by encouraging directed research and scholarly and informational publications in the broad field of inter-American relations.

INTER-AMERICAN CENTER ACTIVITIES

1. Lectures on Latin American and Pan American problems, given for students at the University and for a limited number of the public
2. Annual Winter conference on Pan American affairs, given for the public and held at the Chamber of Commerce of the United States
3. Annual Pan American conference for Washington high school students, held at the University

4. Weekly broadcast in Spanish and Portuguese to Latin America; topics include current American and European affairs
5. Annual series of lectures in Spanish for Spanish-speaking people of Washington
6. Annual conference between representatives of business organizations and government departments
7. Series of talks at public high schools and private schools, and before civic organizations
8. Publication of addresses given at the various conferences

THE SUMMER SESSIONS

1941

Cloyd Heck Marvin, Ph.D., LL.D., *President of the University*

Mitchell Dreese, Ph.D., *Dean of the Summer Sessions*

GENERAL INFORMATION

The Summer Sessions are an integral part of the University, and all courses given are similar to the corresponding courses offered in the other terms. Academic credit for courses satisfactorily completed may be applied toward the appropriate degrees in the various Colleges and Schools of the University. The complete educational equipment and facilities of the University including libraries, laboratories, and field equipment, are available to the student in the Summer Sessions. All departments of the University are open to men and women.

The Summer Sessions offer an opportunity to continue university work during the summer period. The educational value of a term of study in Washington is of great importance; it forms a background for both intelligent and appreciative citizenship. History, political science, economics, literature, and current events are all vivified by a first-hand knowledge of our national institutions. The schedule of classes allows the student ample time to visit the great libraries and laboratories of the Capital and to observe the departments and bureaus of the Government in operation. The many educational and scientific organizations with central offices and exhibits situated in Washington are accessible to the student whose special interests draw on such resources. Excursions may be arranged to the many places of beauty and historic association in near-by Virginia and Maryland.

Courses will be offered in the Junior College, Columbian College, the Law School, the School of Education, the School of Government, and the Division of University Students. Students in the School of Engineering and the School of Pharmacy will have the opportunity to take many of their elective and required courses in the Junior College and Columbian College curricula.

Provision is made for the social and recreational side of student life during the Summer Sessions. The University's athletic facilities and equipment are available to all students. The numerous parks and golf courses of Washington, the riding trails, water sports on the Potomac and at near-by beaches, all offer a wide choice of outdoor recreation. The University receptions and dances are annual events, and other

student parties are organized. The University fee entitles each student in attendance to medical advice and treatment from the Office of the University Physician. Women registered in the Summer Sessions are privileged to live in the Hattie M. Strong Residence Hall (see page 47).

The Summer Sessions of 1941 will present a full program of academic and professional courses. In addition, a special group of studies has been prepared in the School of Education. A large number of the regular members of the University Faculty will teach during the summer, and distinguished specialists from national economic and educational organizations have been added to the staff.

More complete information concerning these and other features of the Summer Sessions curricula will be found in the Summer Sessions Bulletin, now available upon request.

GENERAL REGULATIONS

The rules and regulations of the University apply to all departments of the Summer Sessions.

COURSES OF INSTRUCTION

The courses of instruction offered in the Summer Sessions are included in the alphabetical list of courses, beginning on page 157, and also in the Summer Sessions Bulletin.

Special publications relating to the Summer Sessions will be sent to all interested persons on request.

COURSES OF INSTRUCTION

On the following pages of this Catalogue, under the alphabetically arranged names of the departments of instruction, are listed the courses of instruction offered by the University in the summer of 1941 and in the academic year 1941-42. The courses as here listed are subject to some slight change. The University reserves the right to withdraw any course announced.

Hours of Instruction

Courses of instruction are scheduled in the morning and early afternoon hours for full-time students.

In addition, there are late-afternoon sections of most of the courses of instruction, scheduled from 5:10 to 8:00 p.m. These classes are identical with the morning sections of the corresponding courses, are taught by the same instructors, and carry the same amount of credit. By taking the late-afternoon and summer classes and extending the time of study beyond the customary school year, a student is able to give only part of his time to his studies and still complete his course in a shorter period.

COURSES OF INSTRUCTION

Explanation of Course Numbers and Abbreviations of Names

The system of numbers and symbols used in connection with these announcements of courses is explained in the following paragraphs.

EXPLANATION OF COURSE NUMBERS

In all departments of instruction the number which precedes the name of a course indicates the semester in which that course is offered. A first number indicates that the course is offered in the first semester; a second number, that it is offered in the second semester; and a double number (e.g., 237-37), that it begins in the first semester and continues in the second. This rule has no application, however, to courses offered only in the Summer Session. In a few cases, where a course numbered for one semester and normally given in that semester is offered also year at the summer session, with exception to the foregoing rule is clearly noted in the description following the name of the course, and in each such case the course number is followed by the letter s (e.g., 115s).

In the departments of the School of Medicine, first-year courses are numbered 1001 to 1005; second-year courses, from 201 to 205; third-year courses, from 301 to 305; and fourth-year courses, from 401 to 405. In the Department of Law, first-year courses are numbered from 101 to 105; second-year courses, from 201 to 300; third-year courses, from 301 to 305; and graduate courses, from 401 to 500.

THE UNIVERSITY OF CHICAGO

The University of Chicago is a private research university located in Chicago, Illinois. It was founded in 1890 and is one of the leading universities in the United States. The university is known for its commitment to academic excellence and its diverse student body. It has a long history of producing world-class scholars and leaders in various fields of study. The university's campus is located in the Hyde Park neighborhood of Chicago, and it is home to some of the most famous buildings in the city. The University of Chicago is a member of the Ivy League and is ranked among the top universities in the world.

The university is a member of the Ivy League and is ranked among the top universities in the world. It has a long history of producing world-class scholars and leaders in various fields of study. GENERAL REGULATIONS

The following regulations apply to all students enrolled in the University of Chicago. It is the responsibility of each student to read and understand these regulations and to comply with them at all times.

REGULATIONS FOR STUDENTS

Students are expected to maintain high standards of academic integrity and to adhere to the following regulations. Any student who violates these regulations may be subject to disciplinary action.

Students are expected to maintain high standards of academic integrity and to adhere to the following regulations. Any student who violates these regulations may be subject to disciplinary action.

COURSES OF INSTRUCTION

On the following pages of this CATALOGUE, under the alphabetically arranged names of the departments of instruction, are listed the courses of instruction offered by the University in the summer of 1941 and in the academic year 1941-42. The courses as here listed are subject to some slight change. The University reserves the right to withdraw any course announced.

HOURS OF INSTRUCTION

Courses of instruction are scheduled in the morning and early afternoon hours for full-time students.

In addition, there are late-afternoon sections of most of the courses of instruction, scheduled from 5:10 to 8:00 P.M. These classes are identical with the morning sections of the corresponding courses, are taught by the same instructors, and carry the same amount of credit. By taking the late-afternoon and summer classes and extending the time of study beyond the customary four years, a student who is able to give only part of his time to college work may complete a regular curriculum and obtain a degree.

EXPLANATION OF COURSE NUMBERS AND AMOUNT OF CREDIT

The system of numbers and symbols used in connection with these announcements of courses is explained in the following paragraphs.

EXPLANATION OF COURSE NUMBERS

In all departments of instruction the number which precedes the name of a course indicates the semester in which that course is offered. *An odd number indicates that the course is offered in the first semester; an even number, that it is offered in the second semester; and a double number (e.g., 157-58), that it begins in the first semester and continues in the second.* This rule has no application, however, to courses offered only in the Summer Sessions. In a few cases, where a course numbered for one semester and normally given in that semester is offered this year in the opposite semester, such exception to the foregoing rule is clearly noted in the statement following the name of the course, and in each such case the course number is followed by the letter *x* (e.g., 21*x*).

In the departments of the School of Medicine, first-year courses are numbered from 101 to 200; second-year courses, from 201 to 300; third-year courses, from 301 to 400; and fourth-year courses, from 401 to 500.

In the Department of Law, first-year courses are numbered from 101 to 200; second-year courses, from 201 to 300; third-year courses, from 301 to 400; and graduate courses, from 401 to 500.

In all other departments the following system of numbering is used: First-group courses, numbered from 1 to 100, are planned for students in the freshman and sophomore years. With the approval of the adviser and the Dean, they may also be taken by juniors and seniors. In certain instances, they may be taken by graduate students to make up undergraduate deficiencies or as prerequisite to advanced courses, but they may not be credited toward a higher degree.

Second-group courses, numbered from 101 to 200, are planned for students in the junior and senior years. They may be credited toward higher degrees only when registration for graduate credit has been approved at the beginning of the course by the Dean responsible for the graduate work and by the officer of instruction, and when the completion of additional work has been certified by the officer of instruction.

Third-group courses, numbered from 201 to 300, are planned primarily for graduate students. They are open, with the approval of the officer of instruction, to qualified seniors; they are not open to Junior College students or other undergraduates.

INDICATION OF THE AMOUNT OF CREDIT

The number of semester-hours of credit given for the satisfactory completion of a course is in most cases indicated in parentheses after the name of the course. Thus, a year course giving three hours of credit each semester is marked (3-3), and a semester course giving three hours of credit is marked (3). A semester-hour of credit usually consists of the completion of one fifty-minute period of class work or of one laboratory period a week for one semester.

A dagger (†) preceding the number of a year course indicates that the course may not be entered in the second semester and that credit will not be given until the work of both semesters has been completed.

ANATOMY

Claude Matthews MacFall, LL.B., Ph.D., *Professor of Anatomy, Executive Officer*

Paul Calabrisi, A.B., *Instructor in Anatomy*

Vern Lauer Zech, B.S., M.D., *Instructor in Anatomy*

Ira Rockwood Telford, A.M., *Instructor in Anatomy*

101 *Gross Anatomy* MacFall and Staff
Instruction in osteology, followed by the careful dissection and study of the entire body. Fifteen hours a week.

103 *Histology and Embryology* The Staff
The histogenesis and microscopic structure of the tissues and organs of the human body. Twelve hours a week.

104 *Neuro-Anatomy* The Staff
Fifteen hours a week.

203-4 *Research* The Staff
Hours and credits to be arranged.

ART*

Norris Ingersoll Crandall, M.Arch., *Professor of Art, Executive Officer*
Donald Chenoweth Kline, B.Arch., *Associate Professor of Art*

FIRST GROUP

1-2 *Artistic Environments* (3-3) Crandall

The development of the home, home furnishing, and decoration. Offered in 1941-42 and alternate years, Tues. and Thurs., 12:10 to 1:25 P.M. Offered in 1942-43 and alternate years, Tues. and Thurs., 5:10 to 6:25 P.M.

†11-12 *Art Criticism* (3-3) Crandall

An introduction to the appreciation of the fine arts and to the interpretation of the paintings of the old and modern masters. Offered in 1941-42 and alternate years, Tues. and Thurs., 5:10 to 6:25 P.M. Offered in 1942-43 and alternate years, Tues. and Thurs., 12:10 to 1:25 P.M.

SECOND GROUP

121-22 *History of Art* (3-3) Kline

Painting and sculpture; their development from ancient sources to the modern period. Offered in 1941-42 and alternate years, Mon., Wed., and Fri., 5:10 P.M. Offered in 1942-43 and alternate years, Mon., Wed., and Fri., 11:10 A.M.

131-32 *History of American Fine Arts* (3-3) Kline

A survey of architecture, furniture, decoration, sculpture, painting, folk arts, and crafts in America from the early colonies to the present. Tues. and Thurs., 5:10 to 6:25 P.M.

†151-52 *A Survey of Modern Art* (3-3) Crandall

The interpretation of the contemporary arts in Europe and America. Offered in 1941-42 and alternate years, Mon., Wed., and Fri., 12:10 P.M. Offered in 1942-43 and alternate years, Mon., Wed., and Fri., 5:10 P.M.

†161-62 *Current Criticism* (3-3) Crandall

The history of art criticism; written criticisms of current art exhibitions. Offered in 1941-42 and alternate years, Mon., Wed., and Fri., 5:10 P.M. Offered in 1942-43 and alternate years, Mon., Wed., and Fri., 12:10 P.M.

* For Design, Drawing, and Painting, see special bulletin.

BACTERIOLOGY, HYGIENE, AND PREVENTIVE MEDICINE

- Leland Wilbur Parr, Ph.D., *Professor of Bacteriology, Executive Officer*
 Roscoe Roy Spencer, A.B., M.D., *Adjunct Professor of Hygiene and Preventive Medicine*
 Ralph Gregory Beachley, M.D., Dr.P.H., *Adjunct Professor of Public Health Practice*
 Angus MacIvor Griffin, Ph.D., *Assistant Professor of Bacteriology*
 Alden Franklin Roe, Sc.D., *Assistant Professor of Bacteriology*

SEMINAR LECTURERS

- Charles Armstrong, B.S., M.D., Sc.D., *Professorial Lecturer in Preventive Medicine*
 Rolla Eugene Dyer, A.B., M.D., *Professorial Lecturer in Preventive Medicine*
 Royd Ray Sayers, A.M., M.D., *Professorial Lecturer on Industrial Hygiene*
 Raymond Aloysius Vonderlehr, M.D., *Professorial Lecturer in Preventive Medicine*
 Sara Elizabeth Branham, Ph.D., M.D., Sc.D., *Professorial Lecturer in Preventive Medicine*
 Alice Catherine Evans, M.S., M.D., Sc.D., *Professorial Lecturer in Preventive Medicine*
 William Henry Sebrell, Jr., M.D., *Professorial Lecturer in Preventive Medicine*
 Newton Edward Wayson, A.B., M.D., *Professorial Lecturer in Preventive Medicine*
 James Anderson Crabtree, B.S., M.D., Dr.P.H., *Professorial Lecturer in Preventive Medicine*
 Chester Wilson Emmions, Ph.D., *Professorial Lecturer in Medical Mycology*
 Adolph Sylvester Rumreich, A.B., M.D., Dr.P.H., *Professorial Lecturer in Preventive Medicine*
 Willard Hull Wright, D.V.M., Ph.D., *Professorial Lecturer in Preventive Medicine*

Fees.—For a statement of material fees, see page 23.

112 *General Bacteriology* (4) Roe

A study of the fundamentals of bacteriology, including industrial and hygienic applications. Several groups of bacteria, yeasts, and molds are studied in the laboratory. Tues., Thurs., and Sat., 9:10 A.M. to 12:00 M.

205 *Advanced Bacteriology* Roe

Prerequisite: Bacteriology 112. Hours and credits to be arranged.

209 *Bacteriology and Immunology* Parr, Griffin

Bacteriological technique; study of micro-organisms related to medical and hygienic problems. Methods of diagnosis are stressed and immunological procedures and theory fully treated. Eighteen hours a week for ten weeks.

210 *Immunology and Serology (elective)* Griffin

Prerequisite: Bacteriology 112 or 209. Hours and credits to be arranged.

220 *Hygiene* Spencer

Transition from curative to preventive medicine, the problems of medical ethics and medical economics, and the social aspects of medical practice. Two hours a week.

303-4 *Research in Bacteriology* The Staff

Hours and credits to be arranged.

305-6 *Staff Seminar* (1-2) Parr, Griffin, Roe

Biweekly, first semester (Roe); weekly, second semester (Parr, Griffin).

401-2 *Preventive Medicine* (1-1) Spencer and Staff

Methods of study of epidemics; analysis of the epidemiological data; and exposition of the general and specific measures of control usually employed by modern health units. One hour a week.

404 *Public Health Practice* Beachley

Preventive medicine as applied in health-department practice. Eight periods.

BIOCHEMISTRY

Joseph Hiram Roe, Ph.D., *Professor of Biochemistry, Executive Officer*
 Arnold Kent Balls, Ph.D., *Adjunct Professor of Enzymology*
 Helen Marie Dyer, Ph.D., *Assistant Professor of Biochemistry*
 Oliver John Irish, Ph.D., *Instructor in Biochemistry*
 Alan Hisey, Ph.D., *Instructor in Biochemistry*

Fees.—For a statement of material fees, see page 24.

BIOLOGY*

‡Paul William Bowman, Ph.D., *Associate Professor of Biology, Executive Officer*

James Abbott Fowler, B.S., *Associate in Biology*

The major.—Prerequisite: Biology 1-2; two of the following three courses: Botany 1 and 2, Geology 21-22, and Zoology 1-2. The student who majors in Biology will be required to demonstrate in the major examination a reasonable knowledge and understanding of the following subjects: classification of plants and animals and their life histories, geology, ecology, evolution, heredity, the physical and cultural development of man, the biological problems of the community and the nation, the historical development of biology, and the great biologists of the past and present. Some of this information he will obtain by taking courses offered in these fields and some by reading and observations under the guidance of his adviser. For further details, see the pamphlet on this subject or consult the adviser.

Fees.—For a statement of material fees, see page 24.

FIRST GROUP

1-2 *Survey in Biology* (3-3)

Bowman, Fowler

Systematic study of the plant and animal kingdoms, with emphasis upon the interdependence of living things, followed by a review of work done in evolution, heredity, public health, and conservation. Sections A and B: Tues., 11:10 A.M.; section C: Wed., 6:10 P.M. Laboratory—section A: Mon., 1:40 to 3:30 P.M.; section B: Tues., 1:40 to 3:30 P.M.; section C: Mon., 6:10 to 8:00 P.M. Trip§—section A: Wed., 1:40 to 4:30 P.M.; section B: Thurs., 1:40 to 4:30 P.M.; section C: Sat., 2:00 to 5:00 P.M., sometimes Fri., 6:10 P.M.

Summer Sessions 1941 (3-3)—daily except Sat., 5:10 to 7:00 P.M., and Sat. afternoon, nine weeks' term.

SECOND GROUP

†107-8 *Evolution* (3-3)

Griggs

Survey stressing the data which have led to the larger generalizations of the science; the derivation and discussion of theories based largely on these data. Prerequisite: one year of college work in Biology, Botany, Geology, or Zoology. Offered in 1941-42 and alternate years, Mon., Wed., and Fri., 5:10 P.M.

* See also Departments of Botany and Zoology, pages 169 and 318.

‡ On sabbatical leave first semester 1941-42.

§ Excursions into the out-of-doors and visits to museums and other places of biological interest.

Offered in 1942-43 and alternate years, Mon., Wed., and Fri., 11:10 A.M.

115-16 *Principles of Cytology* (3-3) Bowman*

Study of plant and animal cells based on Sharp's *Introduction to Cytology*, with training in preparation of slides and use of laboratory equipment. Prerequisite: one year of college work in Biology, Botany, or Zoology. Offered in 1941-42 and alternate years, Tues., 5:10 P.M. Laboratory—Tues., 6:10 to 8:00 P.M., and Thurs., 5:10 to 7:00 P.M. Offered in 1942-43 and alternate years, Fri., 10:10 A.M. Laboratory—Mon. and Wed., 9:10 to 11:00 A.M.

127-28 *Introduction to Genetics* (3-3)

Study of the principles of heredity and their application, with experimental work in the breeding of fruit-flies. Prerequisite: one year of college work in Biology, Botany, or Zoology. (Not offered in 1941-42.)

131-32 *History of Biology* (2-2) Young

A study of the development of biology and of those men who have made important contributions in the field. Prerequisite: two years of Biological Sciences. (Not offered in 1941-42.)

†137-38 *General Physiology* (3-3) Yocum

The fundamental physiology of protoplasm as applicable to both animals and plants. Prerequisite: Chemistry 12 and one year of college work in Biology, Botany, or Zoology. Offered in 1942-43 and alternate years, Mon., Wed., and Fri., 11:10 A.M.

172 *Teaching of Science* (2) Yocum

The application of the theories of Education to the presentation of the principles of science. Prerequisite: courses in Science and Education satisfactory to the instructor. Hours to be arranged. (Not offered in 1941-42.)

199-200 *Proseminar: Biology* (3-3) Bowman*

Individually planned and directed work by means of which majors in Biology may learn something of those branches not studied in regular courses and may organize and coordinate their knowledge of the field. Hours to be arranged.

* On sabbatical leave first semester 1941-42.

THIRD GROUP

- 201-2 *Seminar: Cytology* (3-3) Bowman*
Individual problems for the advanced student. Prerequisite:
Biology 115-16. Hours to be arranged.
- 211-12 *Research in Cytology* Bowman*
Hours and credits to be arranged.
Summer Sessions 1941 (3)—hours to be arranged.
- 299-300 *Thesis* (3-3) Bowman*

* On sabbatical leave first semester 1941-42.

BOTANY*

Robert Fiske Griggs, Ph.D., *Professor of Botany, Executive Officer*
 William Webster Diehl, Ph.D., *Adjunct Professor of Mycology*
 Lawson Edwin Yocum, Ph.D., *Associate Professor of Botany*

Minimum requirements for the major.—Twenty-four semester-hours of Botany beyond the introductory courses, with collaterals as recommended in conference.

Fees.—For a statement of material fees, see page 24.

FIRST GROUP

1 *Structure and Functions of the Flowering Plant*†§ (3) The Staff
 The typical plant as a working mechanism, with the emphasis on the general biological significance of plant physiology. Section A: Tues. and Thurs., 9:10 A.M. Laboratory—Fri., 1:40 to 3:30 P.M. Section B: Tues. and Thurs., 11:10 A.M. Laboratory—Thurs., 1:40 to 3:30 P.M. Section C: Lecture and Laboratory—Tues. and Thurs., 5:10 to 7:00 P.M.

2 *Survey of the Plant Kingdom*§ (3) The Staff
 Study of the different kinds of plants, with emphasis on the evolution of the plant kingdom; practice in identifying flowering plants. Section A: Tues. and Thurs., 9:10 A.M. Laboratory—Fri., 1:40 to 3:30 P.M. Section B: Tues. and Thurs., 11:10 A.M. Laboratory—Thurs., 1:40 to 3:30 P.M. Section C: Lecture and Laboratory—Tues. and Thurs., 5:10 to 7:00 P.M.

5 *Field Botany*§ (6) Griggs
 Field trips to neighboring localities of botanical interest, with classroom study.

Summer Sessions—offered in 1942 and alternate summers.

SECOND GROUP§

121 *Grasses* (3) Griggs
 The taxonomy, morphology, phylogeny, and economics of the Poaceae; the making of a collection; and the determination of a series of representative grasses not available in the vicinity. Text: Hitchcock, *Manual of Grasses*. Offered in 1941-42 and alternate years, Mon., 6:10 P.M. Laboratory—Mon., Wed., and Fri., hours to be arranged.

* See also the Departments of Biology and Zoology, pages 166 and 318.

† Before completing registration for Botany 1, each student must obtain from the representative of the Department an assignment to a laboratory section.

§ Prerequisite to all second group courses: Botany 1 and 2, or 5.

- 122 *Higher Monocots* (3) Griggs
Survey of Arales, Palmales, Liliales, Amaryllidales, Marantales, Orchidales; study of flower morphology and evolutionary tendencies indicated, with the determination of a series of representative species. Offered in 1941-42 and alternate years, Mon., 6:10 P.M. Laboratory—Mon., Wed., and Fri., hours to be arranged.
- 123-24 *Dicots* (3-3) Griggs
Survey of selected dicotyledonous orders, the selection varying from year to year; practice in naming unknowns. Text: Pool, *Flowers and Flowering Plants*. Offered in 1942-43 and alternate years, Mon., 6:10 P.M. Laboratory—Mon., Wed., and Fri., hours to be arranged.
- 131-32 *Mycology* (3-3) Diehl
Offered in 1942-43 and alternate years, Wed., 6:10 P.M. Laboratory—Mon. and Wed., hours to be arranged.
- 133-34 *Plant Pathology* (3-3) Diehl
Offered in 1941-42 and alternate years, Wed., 6:10 P.M. Laboratory—Mon. and Wed., hours to be arranged.
- 135-36 *Plant Physiology* (3-3) Yocum
First semester: mineral and water relations of plants; second semester: organic syntheses and growth. Prerequisite: Chemistry 11-12. Offered in 1941-42 and alternate years, Mon. and Wed., 5:10 P.M. Laboratory—Mon. and Wed., hours to be arranged.
- 141-42 *Plant Ecology* (3-3) Griggs
Offered in 1942-43 and alternate years, Fri., 6:10 P.M. Laboratory—hours to be arranged.
- 143 *Plant Distribution* (3) Griggs
Plant distribution, especially in the United States and Canada; biological relationships of eastern America with eastern Asia and of lands in the Southern Hemisphere, and their bearing on biological and geological history. Offered in 1941-42 and alternate years, Fri., 6:10 P.M. Laboratory—hours to be arranged.
- 144 *Vegetation of the United States* (3) Griggs
Seminar on the areas and characteristics of the principal types of vegetation in the United States. Offered in 1941-42 and alternate years, Fri., 6:10 P.M. Laboratory—hours to be arranged.

THIRD GROUP

- 219-20 *Seminar: Morphology* (3-3) The Staff
Hours to be arranged.
- 221-22 *Seminar: Taxonomy* (3-3) Griggs
Hours to be arranged.
- 235-36 *Seminar: Physiology* (3-3) Yocum
Subject for 1941-42: Nitrogen Nutrition of Plants. Wed.,
7:10 to 9:00 P.M.
- 241-42 *Seminar: Ecology* (3-3) Griggs
Hours to be arranged.
- 251-52 *Seminar* (3-3) The Staff
Discussions of current advances in plant science by persons
especially competent to present them—partly by the staff and
advanced students, partly by authorities invited from neighbor-
ing laboratories. Thurs., 7:10 P.M.
- 261-62 *Research* The Staff
Hours and credits to be arranged.
- 299-300 *Thesis* (3-3) The Staff

SPECIAL METHOD COURSE

Biology 172, *Teaching of Science*

BUSINESS ADMINISTRATION

Richard Norman Owens, Ph.D., C.P.A., *Professor of Accounting and Business Administration*

Harold Griffith Sutton, M.S., *Professor of Finance*

Wilford Lenfestey White, M.B.A., D.C.S., *Professorial Lecturer on Marketing*

Ralph Dale Kennedy, Ph.D., *Associate Professor of Accounting and Business Administration, Executive Officer*

Orton Wells Boyd, A.M., C.P.A., *Lecturer in Business Administration*

Arlin Rex Johnson, Ph.D., *Lecturer on Accounting*

Gaze Elmer Lukas, M.S., C.P.A., *Lecturer in Business Administration*

Charles Higby Eisenhart, B.S., LL.B., *Lecturer on Accounting*

Jay Lea Chambers, Ph.D., *Lecturer in Business Administration*

Minimum requirements for the major.—See page 145.

FIRST GROUP

51-52 *Principles of Accounting* (3-3)

Kennedy and Staff

The rules of debit and credit, underlying principles of accounting records, simple partnership and corporation problems, and the preparation of financial statements. Section A: Tues., Thurs., and Sat., 11:10 A.M.; section B: Mon., Wed., and Fri., 5:10 P.M.; section C: Mon., Wed., and Fri., 6:10 P.M.; section D: Tues. and Thurs., 5:10 to 6:25 P.M.; section E: Tues. and Thurs., 6:35 to 7:50 P.M.

Business Administration 51x—same as Business Administration 51, but offered second semester. Tues. and Thurs., 6:35 to 7:50 P.M.

Business Administration 52x—same as Business Administration 52, but offered first semester. Prerequisite: Business Administration 51, or the approval of the instructor. Tues. and Thurs., 6:35 to 7:50 P.M.

Summer Session 1941 (3-3)—daily except Sat., 6:10 to 8:00 P.M., nine weeks' term (Kennedy).

SECOND GROUP

101-2 *Business Organization and Management* (3-3)

Owens

Promotion of an enterprise and selection of a form of organization; departmentizing and administration. Offered in 1941-42 and alternate years, Mon., Wed., and Fri., 11:10 A.M. Offered

in 1942-43 and alternate years, Tues. and Thurs., 5:10 to 6:25 P.M.

Summer Sessions 1941: Business Administration 101, *Business Organization* (3)—daily except Sat., 5:10 P.M., nine weeks' term; Business Administration 102, *Business Management* (3)—daily except Sat., 6:10 P.M., nine weeks' term.

- 111 *Analysis of Financial Statements* (3) Kennedy
Technique of analyzing financial statements for the guidance of operating executives, directors, stockholders, and creditors; valuation of balance sheet items; determination and interpretation of ratios. Prerequisite: Business Administration 51-52. Tues., Thurs., and Sat., 10:10 A.M.

Business Administration 111X—same as Business Administration 111, but offered second semester. Tues. and Thurs., 5:10 to 6:25 P.M.

- 115 *Business Finance* (3) Sutton
The basic principles involved in the financial policies of business enterprises. Prerequisite: Business Administration 51-52; Economics 1-2. (Not offered in 1941-42.)

Summer Sessions 1941 (3)—daily except Sat., 7:30 A.M., nine weeks' term (Kennedy).

- 116 *Corporation Financial Problems* (3) Sutton
The determination of effective financial policies from the solution of typical financial problems. Prerequisite: Business Administration 115. (Not offered in 1941-42.)

- 118 *Investments* (3) Sutton
Analysis of the factors of investment credit with application to different types of investments; proper selection of investments for various classes of investors; regulation. Prerequisite: Business Administration 115. Mon., Wed., and Fri., 6:10 P.M.

- 121 *Bank Management* (3) Sutton
Analysis of the lending and investing policies which under various business conditions are best adapted to efficient bank management. Prerequisite: Economics 119-20. Mon., Wed., and Fri., 6:10 P.M.

- 127 *Speculation and Business Forecasting* (2)
The forces and factors underlying the fluctuations of business activity and methods of forecasting such fluctuations. Prerequisite: Economics 1-2. Offered in 1942-43 and alternate years, Tues. and Thurs., 5:10 P.M.

128 *Principles of Insurance* (2)

Kennedy

A general course in underlying principles of property, life, marine, and casualty insurance, and the function of insurance in the economic life of a business or individual. Prerequisite: Economics 1-2. Offered in 1941-42 and alternate years, Tues. and Thurs., 10:10 A.M. Offered in 1942-43 and alternate years, Tues. and Thurs., 5:10 P.M.

141 *Federal Taxation* (3)

Boyd

The tax problems which confront business enterprise: income, excess profits, capital stock, pay roll, and excise taxes. Prerequisite: Business Administration 51-52. Tues. and Thurs., 6:35 to 7:50 P.M.

146 *Cost Accounting* (3)

Job order and process systems of cost findings; interrelation of the cost records and the general accounts; standard costs; distribution costs. Prerequisite: Business Administration 51-52. Tues. and Thurs., 6:35 to 7:50 P.M.

151-52 *Advanced Accounting* (3-3)

Owens, Lukas

Corporations and partnerships, valuation, actuarial science, estates, receiverships, and reorganizations, consolidated statements, and other topics. Prerequisite: Business Administration 51-52. Section A: Mon., Wed., and Fri., 5:10 P.M.; section B: Mon., Wed., and Fri., 6:10 P.M.

160 *Governmental Accounting and Budgets* (3)

Boyd

Accounting problems of federal, state, and local government. Budgetary control; appropriation accounts; encumbrances; fund accounting. Prerequisite: Business Administration 151-52. Tues. and Thurs., 6:35 to 7:50 P.M.

165 *Auditing* (3)

Owens

Duties and responsibilities of the auditor; principles and procedures in making audits; arrangement of working papers and the preparation of reports. Prerequisite: Business Administration 151-52. Mon., Wed., and Fri., 6:10 P.M.

168 *Accounting Theory and Problems* (3)

Owens

The solution of advanced problems and a discussion of the principles involved. Prerequisite: Business Administration 151-52. Mon., Wed., and Fri., 6:10 P.M.

171 *Principles of Marketing* (3)

White

A survey of marketing, giving particular attention to consumption, retailing, wholesaling, and sales management; the entire

marketing structure and its relation to the total economy. Prerequisite: Economics 1-2. Tues. and Thurs., 6:35 to 7:50 P.M.

172 *Marketing Problems* (3)

White

Marketing principles applied to specific distribution policy and operating problems of retailers, wholesalers, and manufacturers handling consumers' and industrial goods. Prerequisite: Business Administration 171. Offered in 1941-42 and alternate years, Tues. and Thurs., 6:35 to 7:50 P.M.

174 *Exporting and Importing* (3)

White

The policy and operating questions of foreign marketing, both of exporting and importing; markets, limitations, and opportunities. Prerequisite: Economics 1-2. Offered in 1942-43 and alternate years, Tues. and Thurs., 6:35 to 7:50 P.M.

177-78 *Problems in Retailing* (3-3)

Johnson

Principles and problems in retail merchandising, including mark-up, inventory valuation, and expense control; also, service and personnel problems. Admission by permission of the instructor. Tues., 8:00 to 10:30 P.M.

181 *Public Utilities* (3)

Kennedy

A study of public utility characteristics, organization, management, financing, combinations, and accounting; regulation, valuation, and rate-making are stressed. Prerequisite: Economics 1-2. Offered in 1941-42 and alternate years, Tues. and Thurs., 5:10 to 6:25 P.M. Offered in 1942-43 and alternate years, Tues., Thurs., and Sat., 10:10 A.M.

185 *Principles of Railroad Transportation* (3)

Kennedy

A study of railroad history, organization, regulations, rate-making theory and practice, accounting, securities, and consolidation. The work of the Interstate Commerce Commission is stressed. Prerequisite: Economics 1-2. Offered in 1941-42 and alternate years, Tues., Thurs., and Sat., 9:10 A.M. Offered in 1942-43 and alternate years, Tues. and Thurs., 6:35 to 7:50 P.M.

186 *Principles of Motor, Air, and Water Transportation* (3)

Kennedy

The history, organization, economics, regulations, and rates of motor, air, and water carriers; coordination of transportation. Prerequisite: Economics 1-2. Offered in 1941-42 and alternate years, Tues., Thurs., and Sat., 9:10 A.M. Offered in 1942-43 and alternate years, Tues. and Thurs., 6:35 to 7:50 P.M.

THIRD GROUP

251-52 *Seminar in Accounting* (3-3)

Research in accounting problems. Admission by permission of the instructor. Thurs., 8:00 to 10:30 P.M. Owens

291-92 *Seminar in Business Administration* (3-3)

Admission by permission of the instructor. Wed., 7:30 P.M.

299-300 *Thesis* (3-3)

CHEMISTRY

Colin Mackenzie Mackall, Ph.D., *Professor of Chemistry*
 Benjamin Douglass Van Evera, Ph.D., *Professor of Chemistry, Executive Officer*
 Ralph Edward Gibson, Ph.D., *Adjunct Professor of Chemistry*
 DeWitt Clinton Knowles, Jr., M.S., *Assistant Professor of Chemistry*
 Samuel Nathaniel Wrenn, Ph.D., *Assistant Professor of Chemistry*
 Charles Rudolph Naeser, Ph.D., *Assistant Professor of Chemistry*
 Maurice Hart Van Horn, Ph.D., *Assistant Professor of Chemistry*
 Joseph Alfred Ambler, Ph.D., *Lecturer in Chemistry*
 Stephen Brunauer, Ph.D., *Lecturer in Chemistry*
 James Irvin Hoffman, Ph.D., *Lecturer in Chemistry*
 Robert Corbin Vincent, Ph.D., *Instructor in Chemistry*

The Major.—Prerequisite: Chemistry 11-12, 21, and 22; Mathematics 19 and 20; Physics 5, 6, 7, and 8. Required: Chemistry 22, 111-12, 122, 151-52, and 191. The work of the junior and senior years must be approved by the Department. The German language is strongly recommended for all majors, and is essential for all students doing graduate work.

Requirements for the Master's degree.—In addition to the requirements for the Bachelor's degree: Chemistry 131-32, 211-12, 251-52, 291-92, 299-300, and the program must include at least four semester-hours of laboratory courses and a reading knowledge of French or German (German preferred).

Registration.—Before completing registration for courses in which there are laboratory sections, each student must obtain from the representative of the Department an assignment to a laboratory section.

Fees.—For a statement of material fees and deposits, see page 24.

FIRST GROUP

3-4 *Introductory Survey in Physical Science* (3-3) Seeger, Naeser
 A study of energy and matter, their relation to each other, and their significance to man. Mon., Wed., and Fri., 10:10 A.M.
 (Same as Physics 3-4.)

†11-12 *General Chemistry* (4-4)

Van Evera, Naeser, Vincent, and Assistants
 Section A: Mon. and Wed., 10:10 A.M.; section B: Mon. and Wed., 5:10 P.M. Laboratory—section M: Mon. and Wed., 1:40 to 4:30 P.M.; section N: Tues. and Thurs., 1:40 to 4:30 P.M.; section O: Mon. and Wed., 7:10 to 10:00 P.M.; section P: Tues. and Thurs., 7:10 to 10:00 P.M.

Chemistry 11X—same as Chemistry 11, but offered second semester. Section A: Tues. and Thurs., 10:10 A.M.; section B:

Tues. and Thurs., 5:10 P.M. Laboratory—section N: Tues. and Thurs., 1:40 to 4:30 P.M.; section P: Tues. and Thurs., 7:10 to 10:00 P.M.

Chemistry 12x—same as Chemistry 12, but offered first semester. Section A: Tues. and Thurs., 10:10 A.M.; section B: Tues. and Thurs., 5:10 P.M. Laboratory—section N: Tues. and Thurs., 1:40 to 4:30 P.M.; section P: Tues. and Thurs., 7:10 to 10:00 P.M.

Summer Sessions 1941 (4-4)—daily except Sat., 8:30 A.M. to 1:20 P.M., nine weeks' term (Van Horn, Vincent).

21 *Inorganic Qualitative Analysis* (4)

Knowles, Vincent, and Assistants

Theoretical and practical study of methods of separating and identifying the more common cations and anions. Prerequisite: Chemistry 12. Section A: Mon. and Wed., 11:10 A.M.; section B: Mon. and Wed., 5:10 P.M. Laboratory—section M: Mon. and Wed., 1:40 to 4:30 P.M.; section N: Tues. and Thurs., 1:40 to 4:30 P.M.; section P: Tues. and Thurs., 7:10 to 10:00 P.M.

Chemistry 21x—same as Chemistry 21, but offered second semester. Section A: Tues. and Thurs., 10:10 A.M.; section B: Tues. and Thurs., 5:10 P.M. Laboratory—section N: Tues. and Thurs., 1:40 to 4:30 P.M.; section P: Tues. and Thurs., 7:10 to 10:00 P.M.

Summer Sessions 1941 (4)—daily except Sat., 9:30 A.M. to 1:20 P.M., six weeks' term (Knowles).

22 *Quantitative Inorganic Analysis* (4) (formerly 121)

Knowles and Assistants

The principles of gravimetric and volumetric analysis. Prerequisite: Chemistry 21. Section A: Mon. and Wed., 11:10 A.M.; section B: Mon. and Wed., 5:10 P.M. Laboratory—section M: Mon. and Wed., 1:40 to 4:30 P.M.; section O: Mon. and Wed., 7:10 to 10:00 P.M.

22x—same as Chemistry 22, but offered first semester. Section A: Tues. and Thurs., 11:10 A.M.; section B: Tues. and Thurs., 5:10 P.M. Laboratory—section M: Mon. and Wed., 1:40 to 4:30 P.M.; section P: Tues. and Thurs., 7:10 to 10:00 P.M.

Summer Sessions 1941 (4)—daily except Sat., 8:30 A.M. to 12:30 P.M., six weeks' term.

SECOND GROUP

- †111-12 *Physical Chemistry* (4-4) Van Horn
Physical laws as applied to chemical problems. Prerequisite: Chemistry 22 (formerly 121); Mathematics 20; Physics 8. Section A: Mon. and Wed., 11:10 A.M.; section B: Mon. and Wed., 5:10 P.M. Laboratory—section N: Tues. and Thurs., 1:40 to 4:30 P.M.; section O: Mon. and Wed., 7:10 to 10:00 P.M.; section P: Tues. and Thurs., 7:10 to 10:00 P.M.
- 122 *Advanced Quantitative Analysis* (4) Knowles and Assistants
Application of the fundamental principles of analysis to more difficult separations and determinations. Prerequisite: Chemistry 22 (formerly 121). Thurs., 5:10 P.M. Laboratory—section M: Mon., Wed., and Fri., 1:40 to 4:30 P.M.; section O: Mon., Wed., and Fri., 7:10 to 10:00 P.M.
- 123 *Qualitative Inorganic Microanalysis* (2) Knowles
The microtechnique of Emich and others applied to inorganic qualitative analysis. Prerequisite: Chemistry 22 (formerly 121). Laboratory Tues. and Thurs., 7:10 to 10:00 P.M.
- †131-32 *Inorganic Chemistry* (2-2) Naeser
Chemistry and its theories from the standpoint of the periodic table, with major emphasis on the more common elements. Prerequisite: Chemistry 152. Prerequisite or concurrent registration: Chemistry 111-12. Tues. and Thurs., 5:10 P.M.
Summer Sessions 1941 (4)—daily except Sat., 5:10 to 6:15 P.M., nine weeks' term (Naeser).
- 135-36 *Inorganic Chemistry: Preparations* (2-2) Naeser
Application of the technique of inorganic chemistry to the preparation and purification of a selected list of substances. Prerequisite: Chemistry 152. Prerequisite or concurrent registration: Chemistry 111-12. Laboratory—section M: Mon. and Wed., 1:40 to 4:30 P.M.; section O: Mon. and Wed., 7:10 to 10:00 P.M.
- †151-52 *Organic Chemistry* (4-4) Mackall, Wrenn, and Assistants
151: Chemistry of the acyclic carbon compounds. Prerequisite: Chemistry 12; however, students are strongly advised to take Chemistry 21 and 22 (formerly 121) before entering this course. Section A: Mon., Wed., and Fri., 10:10 A.M.; section B: Mon., Wed., and Fri., 5:10 P.M. Laboratory—section M: Wed., 1:40 to 4:30 P.M.; section N: Tues., 1:40 to 4:30 P.M.; section O: Wed., 7:10 to 10:00 P.M.

152: Chemistry of the cyclic carbon compounds. Prerequisite: Chemistry 151. Section A: Mon. and Wed., 10:10 A.M.; section B: Mon. and Wed., 5:10 P.M. Laboratory—section M: Wed. and Fri., 1:40 to 4:30 P.M.; section N: Tues. and Thurs., 1:40 to 4:30 P.M.; section O: Mon. and Wed., 7:10 to 10:00 P.M.

Summer Sessions 1941 (4-4)—daily except Sat., 8:30 A.M. to 1:20 P.M., nine weeks' term (Mackall, Wrenn).

- 155 *Organic Chemistry: Preparations* (2) Wrenn, Mackall
The synthesis of carbon compounds, and a study of the fundamental techniques of purification. Prerequisite: Chemistry 22 (formerly 121) and 152. Laboratory—section N: Tues. and Thurs., 1:40 to 4:30 P.M.; section P: Tues. and Thurs., 7:10 to 10:00 P.M.

- 191 *History of Chemistry* (2) Mackall
The development of chemistry, and the biographies of eminent contributors to the science. Prerequisite: Chemistry 152. Prerequisite or concurrent registration: Chemistry 22 (formerly 121). Tues. and Thurs., 5:10 P.M.

THIRD GROUP

- 203 *Chemical Kinetics* (2) Brunauer
The rates of chemical reaction and factors influencing them. Prerequisite: Chemistry 212. Tues. and Thurs., 6:10 P.M.

- 204 *Catalysis* (2) Brunauer
Prerequisite: Chemistry 203. Tues. and Thurs., 6:10 P.M.

- 205-6 *Colloid and Surface Chemistry* (2-2)
(Not offered in 1941-42.)

- 211-12 *Advanced Physical Chemistry* (2-2) Van Evera
Development and application of the principles of thermodynamics and the kinetic theory to chemical problems. Prerequisite: Chemistry 112. Mon. and Wed., 5:10 P.M.

- 215-216 *Physical Chemistry of Solids, Liquids, and Solutions* (2-2) Gibson

215: solids, liquids, and solutions of nonelectrolytes.
216: thermodynamics and statistical mechanics of solutions. Prerequisite: Chemistry 212. Mon. and Wed., 6:10 P.M.

- 217-218 *Recent Advances in Physical Chemistry* (2-2) Gibson
Prerequisite: Chemistry 212. Offered in 1942-43 and alternate years.

- †221-22 *Advanced Quantitative Analysis* (2-2) Hoffman
The theory of the quantitative estimation of the less common elements. Prerequisite: Chemistry 122 and 132. Offered in 1941-42 and alternate years, Tues. and Thurs., 5:10 P.M.
- 226 *Quantitative Organic Analysis* (3) Knowles
Micro and semi-micro procedures. Prerequisite: Chemistry 22 (formerly 121) and 152; permission of the instructor. Tues. and Thurs., 6:10 to 10:00 P.M.
- †231-32 *Advanced Inorganic Chemistry* (2-2) Hoffman
The chemistry of the less familiar elements. Prerequisite: Chemistry 132 and 152. Offered in 1942-43 and alternate years, Tues. and Thurs., 5:10 P.M.
- †251-52 *Advanced Organic Chemistry* (3-3) Wrenn
An introduction to the literature of Organic Chemistry; the study of the syntheses, reactions, and properties of carbon compounds; the fundamental theories of Organic Chemistry. Prerequisite: Chemistry 152; prerequisite or concurrent registration: Chemistry 111-12. Mon., Wed., and Fri., 6:10 P.M. Open to the senior student with the permission of the instructor.
- 253 *Advanced Synthetic Organic Chemistry* (2) Wrenn
A critical study of the reactions employed in the synthesis of organic compounds. Prerequisite: Chemistry 252. Offered in 1942-43 and alternate years, Tues. and Thurs., 5:10 P.M.
- 254 *Stereo-organic Chemistry* (2) Mackall
The stereochemistry of carbon compounds. Prerequisite: Chemistry 252. Offered in 1942-43 and alternate years, Tues. and Thurs., 5:10 P.M.
- 255 *Carbohydrates* (2) Ambler
The structure and properties of the carbohydrates. Prerequisite: Chemistry 252. Mon. and Wed., 6:10 P.M.
- 256 *Polypeptides* (2) Ambler
The structure and classification of polypeptides and their derivatives. Prerequisite: Chemistry 252. Mon. and Wed., 6:10 P.M.
- 258 *Qualitative Organic Analysis* (2) Mackall
The identification of pure organic compounds, the separation of mixtures, and the identification of their components. Prerequisite: Chemistry 155; prerequisite or concurrent registration: Chemistry 252. Laboratory—Tues. and Thurs., 7:10 to 10:00 P.M.

- 259 *Advanced Organic Laboratory* (3) Mackall, Wrenn
Application of specialized techniques of Organic Chemistry to the preparation, isolation, purification, and identification of carbon compounds. Designed primarily to prepare the student for research in the field of Organic Chemistry. Prerequisite: Chemistry 258; the permission of the instructors. Hours to be arranged.
- 291-92 *Seminar* (1-1) The Staff
All students registered for Master's degrees in Chemistry are required to attend this seminar during the time they are working for the degree. They may register for credit for a maximum of three semester-hours. Fri., 5:10 P.M.
- 297-98 *Research* The Staff
Hours, credits, and fees to be arranged.
Summer Sessions 1941—hours to be arranged, nine weeks' term.
- 299-300 *Thesis* (3-3) The Staff
Summer Sessions 1941 (3-3)—hours to be arranged, nine weeks' term.

CIVIL ENGINEERING

Frank Artemas Hitchcock, M.S. in C.E., C.E., *Professor of Civil Engineering, Executive Officer*

Allen Boyer McDaniel, B.S., *Professorial Lecturer in Civil Engineering*

Charles Edward Cook, B.S. in C.E., B.S. in E.E., *Assistant Professor of Civil Engineering*

George Strollo, B.S. in C.E., M.C.E., *Assistant Professor of Civil Engineering*

Carl Hugo Walther, B.E., M.C.E., *Assistant Professor of Civil Engineering*

Joseph Carl Oleinik, M.S., *Associate in Civil Engineering*

Edgar Stover Walker, B.S. in C.E., *Associate in Civil Engineering*

Minimum requirements for the major.—See page 114.

Fees.—For a statement of laboratory and other fees, see page 24.

FIRST GROUP

2 Surveying (3)

Cook, Walker

Principles, methods, and instruments used in surveying, with field work. Prerequisite: Mathematics 12. Section A: Tues. and Thurs., 12:10 P.M.; section B: Mon. and Fri., 6:10 P.M. Field work required in Summer immediately following final examination period. Section A: two weeks, daily except Sat., 10:00 A.M. to 4:00 P.M.; section B: nine weeks, Sat. only, 1:30 to 6:30 P.M.

14 Materials and Hydraulics Laboratory (2)

Strollo

Determination of the properties of materials by mechanical tests, and a study of the flow of fluids. Prerequisite or concurrent registration: Civil Engineering 26 and 136. Section A: Tues. and Thurs., 1:40 P.M.; section B: Tues. and Thurs., 7:30 P.M.

15-16 Navigation (2-2)

Theory and use of instruments of navigation. Prerequisite: Trigonometry. (Not offered in 1941-42.)

25-26 Materials of Construction (2-2)

Walther

Nonmetallic materials, with emphasis on cement; metallic materials, with emphasis on iron and steel. Prerequisite or concurrent registration: Civil Engineering 123. Section A: Tues. and Thurs., 9:10 A.M.; section B: Mon. and Fri., 5:10 P.M.

- 41 *Graphic Statics* (3) Hitchcock, Walther
Fundamental principles; analyses of beams; determination of stresses in roof trusses and framed bents. Prerequisite or concurrent registration: Civil Engineering 122. Section A: Tues. and Thurs., 11:10 A.M., and Thurs., 1:40 P.M.; section B: Tues. and Thurs., 6:10 P.M., and Tues., 7:30 P.M.
- 42 *Bridge Stresses* (3) Hitchcock, Walther
Determination of stresses in modern types of bridge trusses. Prerequisite: Civil Engineering 41. Prerequisite or concurrent registration: Civil Engineering 123. Section A: Tues. and Thurs., 11:10 A.M., and Thurs., 1:40 P.M.; section B: Tues. and Thurs., 6:10 P.M., and Tues., 7:30 P.M.
- 64 *Highway Engineering* (3) Cook
Highway economics, location, construction, and maintenance. Prerequisite or concurrent registration: Civil Engineering 25 and 71. Mon., Wed., and Fri., 5:10 P.M.
- 71 *Route Surveying* (3) Cook
Curves and earthwork, and methods of location as used on railroads and highways; field work: complete highway location. Prerequisite: Civil Engineering 2. Section A: Tues. and Thurs., 10:10 A.M.; section B: Tues. and Thurs., 5:10 P.M. Field work—Sat., 9:10 A.M. to 1:40 P.M.
- 72 *Railroad Engineering* (3) Cook
Track construction and requirements, rolling stock, cost and operation of railroads, with field work. Prerequisite: Civil Engineering 71. Section A: Tues. and Thurs., 10:10 A.M.; section B: Tues. and Thurs., 5:10 P.M. Field work—Sat., 9:10 A.M. and 1:40 P.M.

SECOND GROUP

- 101 *Higher Surveying* (4) Cook, Walker
Elements of geodesy, triangulation, topography, hydrography, and precise and trigonometric leveling, with field work. Prerequisite: Civil Engineering 2. Section A: Mon., Wed., and Fri., 11:10 A.M.; section B: Mon., Wed., and Fri., 6:10 P.M. Field work—Sat., 9:10 A.M. and 1:40 P.M.
- 121 *Analytical Mechanics: Statistics* (2) Walther, Strollo
Composition and resolution of forces; axial stresses; centroids;

- friction. Prerequisite or concurrent registration: Mathematics 20. Section A: Tues. and Thurs., 11:10 A.M.; section B: Tues. and Thurs., 5:10 P.M.
- 122 *Analytical Mechanics: Dynamics* (3) Strollo
Kinematics of a particle; kinetics of a body in translation, rotation, and plane motion; work and energy; impulse and momentum. Prerequisite: Civil Engineering 121. Section A: Mon., Wed., and Fri., 11:10 A.M.; section B: Mon., Wed., and Fri., 6:10 P.M.
- 123 *Strength of Materials* (3) Strollo
Tension, compression, shear, and torsion; deflection; combined and working stresses. Prerequisite: Civil Engineering 122. Section A: Mon., Wed., and Fri., 10:10 A.M.; section B: Mon., Wed., and Fri., 5:10 P.M.
- 136 *Hydraulics* (3) Strollo
Hydrostatics; flow through pipes and open channels; laminar and turbulent flow. Prerequisite: Civil Engineering 122. Section A: Mon., Wed., and Fri., 10:10 A.M.; section B: Mon., Wed., and Fri., 5:10 P.M.
- 147-48 *Structural Design* (2-2) Walther
Computations and drawings for the design of steel structures. Prerequisite: Civil Engineering 42. Tues. and Thurs., 7:30 P.M.
- 149-50 *Concrete and Masonry Construction* (3-3) Hitchcock, Oleinik
Plain concrete; general properties and theory of reinforced concrete; foundations and retaining walls. Prerequisite: Civil Engineering 25 and 123. Tues. and Thurs., 5:10 P.M., and Mon., 7:30 P.M.
- 151-52 *Statically Indeterminate Structures* (2-2) Hitchcock
A study of such structures as continuous spans, rigid frames, and arches by methods of work, slope deflection, and moment distribution. Prerequisite: Civil Engineering 42. Mon. and Fri., 5:10 P.M.
- 181-82 *Water Supply and Sewerage* (3-3) Cook
Collection, storage, purification, and distribution of water; sewerage systems and treatment of sewage. Prerequisite: Civil Engineering 136; Chemistry 21. First semester—Mon., Wed., and Fri., 6:10 P.M.; second semester—Mon. and Fri., 6:10 P.M., and Wed., 7:30 P.M.

- 187 *Contracts and Specifications* (2) McDaniel
 Contract principles; preparation of engineering contracts; specifications and methods of studying them; important examples of contracts and specifications; practice in analyzing and in writing specifications. Tues. and Thurs., 6:10 P.M.
- 189-90 *Civil Engineering Proseminar* (1-1) Hitchcock and Staff
 Hours to be arranged.

CLASSICAL LANGUAGES AND LITERATURES

John Francis Latimer, Ph.D., *Associate Professor of Classical Languages and Literatures, Executive Officer*

The major in Latin.—Prerequisite: Latin 111-12 (for students entering with only two years of high school Latin); a reading knowledge of French or German; History 39. Required: twenty-four semester-hours of second- or third-group courses (one year of Greek may be substituted for three semester-hours of Latin); Philosophy 111-12.

The major in Greek.—Prerequisite: two years of high school Latin or one year of college Latin; a reading knowledge of French or German; History 39. Required: twenty-four semester-hours, exclusive of Greek 1-2; Philosophy 111-12.

LATIN

FIRST GROUP

†1-2 *First-Year Latin* (3-3) Latimer
Essentials of Latin grammar; reading selections; composition.
Section A: Mon., Wed., and Fri., 10:10 A.M.; section B: Mon.,
Wed., and Fri., 5:10 P.M.

†3-4 *Second-Year Latin* (3-3) Latimer
Review of grammar; wide variety of reading selections; composition. Section A: Mon., Wed., Fri., 11:10 A.M.; section B:
Tues. and Thurs., 5:10 to 6:25 P.M.

SECOND GROUP

111-12 *Selections from Latin Prose and Poetry* (3-3)
(Not offered in 1941-42.)

113-14 *Survey of Latin Literature to 125 A. D.* (3-3) Latimer
Prerequisite: four years of high school Latin or Latin 111-12.
Hours to be arranged.

115-16 *Selected Roman Authors* (3-3) Latimer
Depending upon student interest, certain authors will be
selected for study each semester. The course may be repeated
for credit. Hours to be arranged.

117-18 *Prose Composition* (1-1) Latimer
Since the material varies this course may be repeated for credit.
Hours to be arranged.

GREEK

FIRST GROUP

- †1-2 *First-Year Greek* (3-3) Latimer
Essentials of Greek grammar; reading selections; composition.
Hours to be arranged.
- †3-4 *Second-Year Greek* (3-3) Latimer
Review of grammar; wide variety of reading material; composition. Hours to be arranged.

SECOND GROUP

- 109-10 *Greek Prose and Poetry; Selections* (3-3) Latimer
Since the authors studied vary, this course may be repeated for credit. (Not offered in 1941-42.)

DERMATOLOGY AND SYPHILOLOGY

Harry Ford Anderson, M.D., *Professor of Dermatology and Syphilology, Executive Officer*

George William Creswell, A.B., M.D., *Associate in Dermatology and Syphilology*

Russell Joseph Fields, B.S., M.D., *Associate in Dermatology and Syphilology*

Theodore Claremont Chen Fong, M.D., *Clinical Instructor in Dermatology and Syphilology*

Hayden Kirby-Smith, B.S., M.D., *Clinical Instructor in Dermatology and Syphilology*

Leon Hugh Warren, A.B., M.D., *Clinical Instructor in Dermatology and Syphilology*

313-14 *Dermatology and Syphilology* Anderson
Didactic lectures in diseases of the skin and syphilis. One hour a week.

316 *Neurosyphilis* Fong
Didactic lectures, clinical demonstrations, and practical diagnostic and therapeutic procedures. One hour a week for eight weeks.

317-18 *Clinic* Fields, Kirby-Smith, Warren
Case demonstrations, diagnosis, and treatment of skin diseases and syphilis. Three hours a week. Gallinger Hospital.

407-8 *Clinic* Anderson
Dermatology and syphilology in infants and children. Children's Hospital. Two hours a week.

409-10 *Clinic* Anderson
Clinical demonstration, diseases of the skin. One hour a week. Emergency Hospital.

411-12 *Clinic* Warren, Creswell, Kirby-Smith
Clinical demonstrations, diseases of the skin and diagnosis and therapy of syphilis. One hour a week. University Hospital.

413-14 *Clinic* Creswell
Diagnosis, laboratory procedures, and treatment of syphilis. Two hours a week. Southwest Health Center.

ECONOMICS

John Donaldson, Ph.D., *Professor of Political Economy*
 James Christopher Corliss, A.M., *Adjunct Professor of Inter-American Economics*
 Arthur Edward Burns, Ph.D., *Adjunct Professor of Economics*
 Gerhard Colm, Ph.D., *Professorial Lecturer in Economics*
 Edward Campion Acheson, Ph.D., *Associate Professor of Finance*
 Donald Stevenson Watson, Ph.D., *Assistant Professor of Economics, Acting Executive Officer*
 Allen Buchanan, Ph.D., *Lecturer in Economics*
 Don Dougan Humphrey, Ph.D., *Lecturer in Economics*
 Peyton Armstrong Kerr, Ph.D., *Associate in Economics*

The major.—Prerequisite: Economics 1-2. Required: Economics 105 and twenty-one additional semester-hours in Economics; at least fifteen semester-hours of second-group courses selected from the following departments—Business Administration, History, Philosophy, Political Science, and Statistics. Recommended in addition: History 147 and 174; Statistics 101-2.

FIRST GROUP

1-2 *Introductory Economics** (3-3) Burns, Acheson, Kerr
 Survey of the major economic institutions and economic problems in contemporary society. Lecture—section A: Mon., Wed., and Fri., 11:10 A.M.; section B: Mon., Wed., and Fri., 5:10 P.M.; section C: Tues. and Thurs., 6:35 to 7:50 P.M.
 Summer Sessions 1941 (3-3)—section A: daily except Sat., 9:30 to 11:20 A.M., nine weeks' term (Watson); section B: daily except Sat., 6:10 to 8:00 P.M., nine weeks' term (Kerr).

SECOND GROUP*

105 *Economic Theory* (3) Burns, Humphrey
 Analysis of several major types of contemporary economic theory. Mon., Wed., and Fri., 11:10 A.M.
 Economics 105x—same as Economics 105, but offered second semester. Mon., Wed., and Fri., 7:10 P.M.

Minimum requirements for the major.—See pages 114-15.

Fees.—For a statement of laboratory and other fees, see page 24.

FIRST GROUP

9-10 *Elements of Electrical Engineering* (3-3) Ames

First semester: magnetic and electric circuits, and direct-current instruments and machines; second semester: alternating-current circuits, instruments, and machines. Prerequisite: Physics 12. Prerequisite or concurrent registration: Mathematics 20. Section A: Mon., Wed., and Fri., 12:10 P.M.; section B: Mon., Wed., and Fri., 6:10 P.M.

13-14 *Direct- and Alternating-Current Laboratory* (2-2)

Ames, Ennis, O'Halloran

For the student not majoring in Electrical Engineering. Experiments in direct and alternating currents and direct- and alternating-current machinery. Prerequisite: Electrical Engineering 10. Section A: Mon., 1:40 P.M.; section B: Fri., 1:40 P.M.; section C: Mon., 7:30 P.M.; section D: Thurs., 7:30 P.M.; section E: Fri., 7:30 P.M.

17-18 *Direct-Current Laboratory* (2-2) Ames, Ennis, O'Halloran

For the student majoring in Electrical Engineering. A course in measurements and direct-current dynamo laboratory. Prerequisite: Electrical Engineering 9-10. Section A: Mon., 1:40 P.M.; section B: Fri., 1:40 P.M.; section C: Mon., 7:30 P.M.; section D: Thurs., 7:30 P.M.; section E: Fri., 7:30 P.M.

SECOND GROUP

101 *Electric Circuits* (3) Ennis

Alternating-current-circuit theory. Extensive consideration is given to harmonic analysis and to the study of harmonics in both single-phase and polyphase circuits. Prerequisite: Electrical Engineering 10. Mon., Wed., and Fri., 5:10 P.M.

- 102 *Alternating-Current Machinery* (3) Ennis
Particular attention is given to synchronous generators and motors, and to transformers. Prerequisite: Electrical Engineering 101. Mon., Wed., and Fri., 5:10 P.M.
- 103 *Alternating-Current Machinery* (3) Ames
A continuation of Electrical Engineering 102, covering converters, induction motors, and single-phase motors. Prerequisite: Electrical Engineering 102. Mon., Wed., and Fri., 5:10 P.M.
- 111-12 *Electrical Measurements* (2-2)
Theory of direct-current and alternating-current instruments, bridges, and meters. Prerequisite or concurrent registration: Electrical Engineering 101. Tues. and Thurs., 6:10 P.M.
- 125-26 *Principles of Electric Power Transmission* (2-2) Ennis
Mechanical and electrical characteristics of transmission lines; approximate and rigorous solutions by means of hyperbolic functions; steady-state and elementary transient considerations; the more important phases of distribution of electrical energy. Prerequisite: Electrical Engineering 101. Tues. and Thurs., 6:10 P.M.
- 133-34 *Alternating-Current Laboratory* (2-2) Ames, Ennis, O'Halloran
A continuation of Electrical Engineering 17-18, with experiments on alternating-current circuits, instruments, and machinery. Prerequisite: Electrical Engineering 18 and 103. Section A: Mon., 1:40 P.M.; section B: Fri., 1:40 P.M.; section C: Mon., 7:30 P.M.; section D: Thurs., 7:30 P.M.; section E: Fri., 7:30 P.M.
- 136 *Hydro-electric Engineering* (2) Ames
Present-day theory and practice in hydro-electric engineering. Prerequisite: Electrical Engineering 10; Civil Engineering 136. Tues. and Thurs., 5:10 P.M.
- 137 *Electric Traction* (2) Ames
Theory and practice of modern direct- and alternating-current railways. Prerequisite: Electrical Engineering 10. Tues. and Thurs., 5:10 P.M.
- 140 *Electrical Design* (3) Ames
Principles of design, with reference to materials of construction and electrical equipment. Practical exercises are assigned in connection with classroom work. Prerequisite: Electrical Engineering 103. Mon. and Fri., 5:10 P.M., and Tues., 7:30 P.M.

- 141-42 *Communication Engineering* (3-3) Ennis
 Principles of communication circuits and measurements. Particular attention is given to low and intermediate-frequency phenomena. Prerequisite: Electrical Engineering 101; Physics 132. Offered in 1941-42 and alternate years. Lecture—Tues. and Thurs., 5:10 P.M. Laboratory—Tues. or Thurs., 7:30 P.M.
- 143-44 *High-Frequency Communication* (3-3) Ennis
 Principles of high-frequency communication circuits and of high-frequency measurement. Prerequisite: Electrical Engineering 101; Physics 132. Offered in 1942-43 and alternate years. Lecture—Tues. and Thurs., 5:10 P.M. Laboratory—Tues. or Thurs., 7:30 P.M.
- 189-90 *Proseminar in Electrical Engineering* (1-1) The Staff
 Prerequisite: Electrical Engineering 103. Tues, 6:10 P.M.

The major.—The coordinated knowledge which a student must exhibit in the major in English, and upon which he will be examined at the end of his senior year, is summarized under four general headings: (1) the history of English literature from the Anglo-Saxon period to 1900; (2) the chief English writers (a certain familiarity with each man and his main works and a detailed knowledge of Shakespeare); (3) English social and political history, 1300 to 1900, as it bears upon or is reflected in the literature; (4) European intellectual backgrounds and movements which have affected English literature. It is advised that the student planning to major in English elect courses in English and European historical and intellectual backgrounds before his junior year.

The major in American Thought and Civilization.—For details, see the pamphlet on this subject and consult the adviser.

† Special placement examinations, required of all entering freshmen, will be conducted by the English Department prior to the regular registration periods in September and February. These examinations will test the student's proficiency in spelling, grammar, punctuation, and sentence structure; his vocabulary; and, through an impromptu theme, his ability to present his ideas in logical sequence with clarity and effectiveness. On the basis of these tests students will be classified as follows: (1) especially superior students who, by the unanimous decision of the examiners, are regarded as possessing the equivalent discipline of English 1-2 and who, upon payment of the fee required for waiving curriculum requirements (see page 62), may be relieved of the curriculum requirement of the course; (2) students who score "unsatisfactory" and who will be required to take English o, *Remedial English* (three semester-hours), upon the satisfactory completion of which they will enter English 1-2; and (3) all other students, who will be required to take English 1-2.

 Pearl Holly, M.S., M.D., *Associate in Experimental Medicine*

236 *Clinical Microscopy*

Vedder, Holly

Lectures and laboratory work covering aspects of diagnosis, including the study of urinalysis, blood-counting, blood diseases, feces, spinal fluids, Wassermanns, and parasitology. Three hours a week beginning in January.

416 *Tropical Medicine (elective)*

Vedder, Holly

This course consists of didactic lectures and demonstrations of the more common tropical diseases, with emphasis on their practical application to general medical practice. One hour a week.

GEOLOGY

Ray Smith Bassler, Ph.D., Sc.D., *Professor of Geology, Executive Officer*

Minimum requirements for the major.—Twenty-four semester-hours of Geology beyond the first-group courses.

FIRST GROUP*

5 *Field Geology (6)**

Bassler

Field trips to neighboring localities of geological interest, with classroom study.

Summer Sessions 1941—daily except Sat., 5:10 to 7:00 P.M., and Sat. afternoon.

21-22 *Physical and Historical Geology (3-3)**

Bassler

Survey course covering the principles of physiography, geology, and mineralogy. Mon., Wed., and Fri., 6:10 P.M. Field work—hours to be arranged.

SECOND GROUP

121-22 *Paleontology* (3-3)

Bassler

Lectures and laboratory work on classification and structure of fossil invertebrates, vertebrates, and plants, including their use as guide fossils in stratigraphic geology. Offered in 1941-42 and alternate years, Fri., 7:10 to 9:30 P.M., other hours to be arranged.

123-24 *Regional Geology of North and South America* (3-3)

Bassler

Lectures and map work on the physiographic regions of the Western Hemisphere, stressing the relationship between geology and geography and culture. Offered in 1941-42 and alternate years, Mon., 7:10 to 9:30 P.M., other hours to be arranged.

125-26 *Regional Geology of the Eastern Hemisphere* (3-3)

Bassler

Alternating with Geology 123-24 and with it completing a survey of the world. Offered in 1942-43 and alternate years, Mon., 7:10 to 9:30 P.M., other hours to be arranged.

THIRD GROUP

215-16 *Seminar* (3-3)

Bassler

Detailed study and presentation by the class and instructor of some phase of geology, with review of current literature.

* Geology 5 or 21-22 will satisfy the Junior College requirement in science for admission to Columbian College.

Mineralogy and economic geology will be the subject of study for 1941-42, to be followed in succeeding years by stratigraphy and advanced paleontology including micro-paleontology and geomorphology. Wed., 7:10 to 9:30 P.M.

227-28 *Research*

Bassler

Original work on individual problems, including a digest of the published record. Hours and credits to be arranged.

Summer Sessions 1941—Geology 227 (3), hours to be arranged.

299-300 *Thesis* (3-3)

HEALTH ADMINISTRATION

Daniel LeRay Borden, A.M., M.D., *University Surgeon, Director*
Frank Adelbert Hornaday, M.S., M.D., *Consulting University Physician*
Robert Howe Harmon, A.B., M.D., *University Physician*
Ronald Atmore Cox, A.B., M.D., *Associate University Physician (Eye)*
Jeter Carroll Bradley, M.D., *Associate University Physician (Nose and Throat)*
Charles Seymour Coakley, M.D., *Associate University Physician*
Richard Bernard Castell, A.B., M.D., *Associate University Physician*
Margaret Maxwell Sickler, A.B., M.D., *Associate University Physician*

The payment of the University fee entitles the student to health services hereinafter described. Through student reports and those of University officials, the University attempts to keep informed as to all cases of illness among its students. This service is primarily diagnostic in its intent. It also provides first aid in the event of an emergency.

Medical privileges include: (1) the physical examination of every student entering from secondary schools;* (2) three visits by the University physician or surgeon, office or residence (District of Columbia) in any one illness, exclusive of a specialist, surgical operation, laboratory, or X-ray examination; (3) hospitalization, including board, medicine, and nursing in the University Hospital for not more than two weeks during a school year—the necessity to be determined by the Director of Health Administration. The duration of hospitalization period (maximum, two weeks) is also to be determined by the Director of Health Administration.

This medical benefit does not apply to illness or disability incurred previous to the University term or prior to payment of the University registration fee.

The student is allowed, if he so desires, to engage physicians and nurses of his own choice, but when he does so he will be responsible for the fees charged.

Rules: (1) The Director of Health Administration is empowered to limit or deny the medical benefits where, in his discretion, a student has, by his misconduct or breach of the rules of the University, made himself ineligible; (2) the Director of Health Administration has authority to determine the necessity and length of hospitalization; (3) a student who has severed his connection with the University is ineligible for medical benefits; (4) a student intending to train for an athletic team is required to pass a thorough examination at the beginning of each semester; (5) the above regulations apply also during the Summer Sessions of the University.

* A charge of \$2 is made by the University if a student fails to appear for a physical examination during the period set for this purpose.

HISTORY

Elmer Louis Kayser, Ph.D., *Professor of European History*

Lowell Joseph Ragatz, Ph.D., *Professor of European History*

*Alva Curtis Wilgus, Ph.D., *Professor of Hispanic American History*

Wood Gray, Ph.D., *Associate Professor of American History, Executive Officer*

Howard Maxwell Merriman, Ph.D., *Assistant Professor of American Diplomatic History*

George Howland Cox, *Lecturer on Hispanic American History*

The major.—Prerequisite: History 39-40 and 71-72. The new-type major indicates a knowledge of four fields of history selected from the following list, attested by major examinations: (1) the literature and method of history (required); (2) backgrounds of the modern world, to 1500; (4) diplomatic history and modern imperialism; (5) development of the United States; (6) Hispanic American civilization. A six-hour research seminar, exclusive of History 199-200, is a required part of each major's program to give training in fundamental techniques. For details of courses and readings offering preparation for the major examinations see the pamphlet on this subject or consult the adviser.

 Open only to students who have completed fifty semester-hours. Prerequisite: Law 105 and 239 or 241-42. Section A: Sat., 9:10 to 11:00 A.M.; section B: Wed., 5:10 to 7:00 P.M.
- 345-46 *Patent Law* (2-2) Sutton
 Substantive patent law: patentability; revision, use, and enforcement of patents; Patent Office practice: Rules of Practice; appeal and interference procedure. Mon., 5:10 to 7:00 P.M.
- 349-50 *Patent Moot Court* (2-2) Coe
 This course may be elected instead of Law 335-36 to satisfy the Moot Court requirement. Both subjects may not be counted toward a degree. Wed., 5:10 to 7:00 P.M.
- 352 *Domestic Relations* (2) Compton
 Marriage, annulment, and divorce; rights of husband and wife; rights of parent and child; infants; conflict of laws involving problems of marriage evasion and migratory divorce. Madden and Compton, *Cases on Domestic Relations*. (Not offered in 1941-42.)
 Summer Sessions 1941 (4)—daily except Sat., 5:10 to 7:00 P.M., second term.
- 353 *Public Utilities* (2) Davison
 Limits of regulation of businesses affected with public interest; ascertainment of value of property used for the public service and the fixing of adequate rates of return. Welch et al., *Cases on Public Utility Regulation*. Fri., 5:10 to 7:00 P.M.
- 363-64 *Security Transactions* (2-2) Fryer
 Security interests in real and personal property, their creation, transfer, enforcement, and extinguishment, together with secur-

ity problems in the fields of suretyship and bankruptcy. Sturges, *Cases on Credit Transactions*, 2d ed., 1936. (Not offered in 1941-42.)

Summer Sessions 1941 (4)—daily except Sat., 5:10 to 7:00 P.M., first term (Fryer).

366 *Security Transactions—Mortgages* (2) Fryer

The creation of security interests in realty by legal or equitable mortgage, their transfer, enforcement, and extinguishment. Case book to be announced. Thurs., 5:10 to 7:00 P.M.

371 *Taxation* (4) Collier

Emphasis on the federal estate tax and the federal income tax. Attention given state inheritance and income taxes. Problem of jurisdiction to tax, construction of tax statutes, methods of judicial review of administrative actions in the tax field, modern excise taxes on business concerns. Magill and Maguire, *Cases on Taxation*, 1936 ed. Tues. and Fri., 5:10 to 7:00 P.M.

376 *Trade Regulation I* (4) Oppenheim

Unfair trade practices, combination and monopoly at common law and under various statutes; trade-marks; business torts; Sherman Antitrust Act; Federal Trade Commission and Clayton Acts; marketing, price and patent practices; Fair Trade Acts; mergers; trade associations; remedies. Oppenheim, *Cases on Trade Regulation*. Section A: Mon., Tues., Wed., and Fri., 10:10 A.M.; section B: Tues. and Fri., 5:10 to 7:00 P.M.

381-82 *Trusts* (2-2) Moll

Nature, creation, elements, administration, termination, modification of trusts; charitable, resulting, construction trusts; liabilities of and to third persons; transfer of beneficiary's interest. Scott, *Cases on Trusts*, 3d ed. Section A: first semester, Thurs. and Fri., 10:10 A.M.; second semester, Wed., 11:10 A.M., and Thurs., 10:10 A.M.; section B: Wed., 5:10 to 7:00 P.M.

403 *Administrative Law II* (4) Davison

Research seminar course in special problems, including the study of specific administrative agencies, federal or state. Mon. and Thurs., 5:10 to 7:00 P.M.

405 *Admiralty* (2) Alden

Federal and state jurisdiction; jurisdiction over waters, craft, contracts, torts, crimes, in equitable matters, etc.; laws applicable to maritime workers and maritime liens. Sayre, *Cases on the Law of Admiralty*. Wed., 5:10 to 7:00 P.M.

- 408 *Aviation Law* (2) Ward
Common law liability of operators of airplanes to passengers and to third parties; Civil Aeronautics Act; Civil Air Regulations; state legislation; insurance problems; international conventions. Mimeographed materials. Fri., 5:10 to 7:00 P.M.
- 411 *Business Associations II* (4) Compton
Seminar: study of the historical background and functioning of the statutes involved in the work of the Securities and Exchange Commission. Tues. and Fri., 5:10 to 7:00 P.M.
- 415 *Comparative Law* (4) Moll
Historical and comparative study of some of the institutions and principles of the civil law (law of South and Central America and most of the Continent of Europe) compared with those of the common law; the influence of the former upon the latter. Mimeographed materials; textbook to be announced. Tues. and Fri., 5:10 to 7:00 P.M.
- 421 *Constitutional Law II* (4) Collier
Research seminar in contemporary problems in constitutional law; special emphasis on interstate-commerce cases and due process of law. Mon. and Thurs., 5:10 to 7:00 P.M.
- 426 *Government Corporations and Instrumentalities* (4) McIntire
Municipal corporations: organization, powers, functions, and legal relations of local governmental units. Federal corporate agencies: organization, powers, functions, and legal relations of functional governmental units separately incorporated. A research seminar. Tues. and Fri., 5:10 to 7:00 P.M.
- 431 *International Law* (4) Murdock
Customary and treaty rights and duties of states; diplomatic and consular agents; treaty interpretation; nationality laws; international courts; claims procedure; war; neutrality. Hudson, Cases on International Law, 2d ed. Tues. and Fri., 5:10 to 7:00 P.M.
- 434 *Interstate Commerce Commission Law and Procedure* (2) Miller
Interstate Commerce Act; the Interstate Commerce Commission; practice and procedure before the Commission. Miller, Cases and Materials on I.C.C. Law and Procedure. Wed., 5:10 to 7:00 P.M.

436 *Jurisprudence* (2)

Collier

History of jurisprudence schools of jurists, particularly the nineteenth century schools; sociological jurisprudence; theories of justice; the nature of law; law and morals; law and the state; the scope and subject matter of law; sources and forms of law; the traditional element; analysis of general legal conceptions. Mon., 5:10 to 7:00 P.M.

438 *Labor Relations Regulation* (2)

Ward

Law of relations between workers and management under the National Labor Relations Act. Ward, Cases on Labor Relations Regulation. Tues., 5:10 to 7:00 P.M.

452 *Trade Regulation II* (4)

Oppenheim

A research seminar course in specific problems of trade regulation. Mon. and Thurs., 5:10 to 7:00 P.M.

MATHEMATICS

James Henry Taylor, Ph.D., *Professor of Mathematics, Executive Officer*
 Francis Edgar Johnston, Ph.D., *Professor of Mathematics*
 *Florence Marie Mears, Ph.D., *Associate Professor of Mathematics*
 John William Wrench, Jr., Ph.D., *Instructor in Mathematics*

Minimum requirements for the major.—Fifteen semester-hours of Mathematics beyond Calculus, i.e., of approved second- and third-group courses.

FIRST GROUP

7 *Solid Geometry* (2) The Staff
 Prerequisite: one year each of high school Algebra and high school Geometry. Tues and Thurs., 5:10 P.M.

11 *Introductory College Mathematics*† (3) The Staff
 Rectangular coordinates; trigonometric functions; trigonometric identities; exponents and logarithms; solution of triangles; linear equations; determinants of the third order; quadratic equations; the factor theorem and its use in equations of higher degree; mathematical induction and the binomial theorem; permutations and combinations; the complex-number system. Prerequisite: one year each of high school Algebra and high school Geometry. Section A: Mon., Wed., and Fri., 9:10 A.M.; section B: Mon., Wed., and Fri., 11:10 A.M.; section C: Mon., Wed., and Fri., 5:10 P.M.; section D: Mon., Wed., and Fri., 6:10 P.M.; section E: Mon., Wed., and Fri., 6:10 P.M.; section F: Tues. and Thurs., 6:35 to 7:50 P.M.

Mathematics 11X—same as Mathematics 11, but offered second semester. Section A: Tues., Thurs., and Sat., 11:10 A.M.; section B: Mon., Wed., and Fri., 6:10 P.M.; section C: Tues. and Thurs., 5:10 to 6:25 P.M.

12 *Plane Analytic Geometry* (3) The Staff
 Prerequisite: Mathematics 11, or two years of high school Algebra, one year of high school Geometry, and one half-year of high school Trigonometry. Section A: Mon., Wed., and Fri., 9:10 A.M.; section B: Mon., Wed., and Fri., 11:10 A.M.

* On sabbatical leave second semester 1941-42.

† Mathematics 11 (Introductory College Mathematics) is not available for college credit to the student whose previous training in mathematics meets the prerequisites for Mathematics 12 (Plane Analytic Geometry).

section C: Mon., Wed., and Fri., 5:10 P.M.; section D: Mon., Wed., and Fri., 6:10 P.M.; section E: Tues. and Thurs., 6:35 to 7:50 P.M.

Mathematics 12x—same as Mathematics 12, but offered first semester. Section A: Mon., Wed., and Fri., 9:10 A.M.; section B: Mon., Wed., and Fri., 11:10 A.M.; section C: Mon., Wed., and Fri., 5:10 P.M.; section D: Mon., Wed., and Fri., 6:10 P.M.

Summer Sessions 1941 (3)—daily except Sat., 5:10 P.M., nine weeks' term (Wrench).

19 Differential Calculus (3)

The Staff

Prerequisite: Mathematics 12. Section A: Tues., Thurs., and Sat., 9:10 A.M.; section B: Tues. and Thurs., 5:10 to 6:25 P.M.; section C: Tues. and Thurs., 6:35 to 7:50 P.M.

Mathematics 19x—same as Mathematics 19, but offered second semester. Section A: Mon., Wed., and Fri., 9:10 A.M.; section B: Mon., Wed., and Fri., 11:10 A.M.; section C: Mon., Wed., and Fri., 5:10 P.M.; section D: Mon., Wed., and Fri., 6:10 P.M.

Summer Sessions 1941 (3)—June 16–July 16, daily except Sat., 6:10 to 8:00 P.M. (Wrench).

20 Integral Calculus* (3)

The Staff

Prerequisite: Mathematics 19. Section A: Tues., Thurs., and Sat., 9:10 A.M.; section B: Tues. and Thurs., 5:10 to 6:25 P.M.; section C: Tues. and Thurs., 6:35 to 7:50 P.M.

Mathematics 20x—same as Mathematics 20, but offered first semester. Section A: Tues., Thurs., and Sat., 10:10 A.M.; section B: Tues. and Thurs., 6:10 to 7:25 P.M.

Summer Sessions 1941 (3)—July 17–August 15, daily except Sat., 6:10 to 8:00 P.M. (Wrench).

SECOND GROUP*

102 Fundamental Concepts of Mathematics (3)

(Not offered in 1941–42.)

123 Theory of Equations (3)

(Not offered in 1941–42.)

125 Advanced Algebra (3)

Mon., Wed., and Fri., 5:10 P.M.

Wrench

* Mathematics 20 is prerequisite to all second-group courses.

- 126 *Advanced Analytic Geometry* (3) Taylor
Mon., Wed., and Fri., 5:10 P.M.
- 132 *Differential Equations* (3) The Staff
Section A: Tues., Thurs., and Sat., 10:10 A.M.; section B: Mon.,
Wed., and Fri., 6:10 P.M.
Mathematic 132x—same as Mathematics 132, but offered first
semester. Tues. and Thurs., 6:35 to 7:50 P.M.
Summer Sessions 1941 (3)—daily except Sat., 5:10 P.M.
(Taylor).
- †135-36 *Projective Geometry* (2-2)
(Not offered in 1941-42.)
- 137-38 *Advanced Calculus* (2-2)
(Not offered in 1941-42.)
- 142 *Introduction to Infinite Series* (3)
(Not offered in 1941-42.)
- 167 *Fourier Series of Spherical Harmonics* (3)
Prerequisite: Mathematics 132. (Not offered in 1941-42.)
- 171 *Vector Analysis* (3) Taylor
Mon., Wed., and Fri., 6:10 P.M.
Summer Sessions 1941 (3)—daily except Sat., 6:10 P.M.

THIRD GROUP

- 220 *Theory of Numbers* (3)
(Not offered in 1941-42.)
- †237-38 *Theory of Functions* (3-3) Johnston
Offered in 1941-42 and alternate years, Mon., Wed., and Fri.,
5:10 P.M.
- 249 *Ordinary Differential Equations* (3) Taylor
Tues. and Thurs., 5:10 to 6:25 P.M.
- 250 *Integral Equations* (3)
(Not offered in 1941-42.)
- †255-56 *Differential Geometry* (2-2)
(Not offered in 1941-42.)
- 257 *Theory of Groups* (3) Johnston
Prerequisite: Mathematics 265-66. Hours to be arranged.

- †265-66 *Modern Algebra* (3-3)
Offered in 1942-43 and alternate years.
- †267-68 *Calculus of Variations* (2-2)
(Not offered in 1941-42.)
- 270 *Tensor Analysis* (3)
Prerequisite: Mathematics 171. (Not offered in 1941-42.)
- 271 *Riemannian Geometry* (3)
Prerequisite: Mathematics 255-56 and 270. (Not offered in 1941-42.)
- 275 *Theory of the Potential* (3)
(Not offered in 1941-42.)
- 277 *Partial Differential Equations* (3) Taylor
Tues. and Thurs., 5:10 to 6:25 P.M.
- 297-98 *Reading and Research* (3-3) The Staff
Hours to be arranged.
- 299-300 *Thesis* (3-3) The Staff

MECHANICAL ENGINEERING

- Arthur Frederick Johnson, M.E., Ph.D., *Professor of Mechanical Engineering, Executive Officer*
 Frederick Morris Feiker, B.S. in E.E., D.Eng., *Professor of Engineering Administration*
 Thomas Warren Howard, B.S. in C.E., *Professorial Lecturer in Engineering Management*
 Benjamin Carpenter Cruickshanks, B.S. in M.E., *Associate Professor of Mechanical Engineering*
 Howard Henry Koster, M.S. in M.E., *Assistant Professor of Mechanical Engineering*
 George Franklin Bush, B.S. in M.E., *Assistant Professor of Mechanical Engineering*
 Lindsay Lord, B.S., *Lecturer in Naval Architecture*
 Paul Guthrie Tomalin, *Lecturer in Naval Architecture*

Minimum requirements for the major.—See page 115.

Fees.—For a statement of laboratory and other fees, see page 25.

FIRST GROUP

- 1 *Engineering Survey and Orientation* (1) Koster and Staff
 Open to freshmen only. Section A: Mon., 12:40 P.M.; section B: Tues., 6:10 P.M.
- 3 *Mechanical Drawing* (2) Bush
 Section A: Mon. and Fri., 1:40 to 4:30 P.M.; section B: Mon. and Fri., 7:30 to 10:30 P.M.
- 4 *Descriptive Geometry* (2) Bush
 Section A: Mon. and Fri., 1:40 to 4:30 P.M.; section B: Mon. and Fri., 7:30 to 10:30 P.M.
- 5 *Introductory Naval Architecture* (5) Johnson
 Nomenclature, functions, and arrangement of hull structure, equipment, and machinery for merchant vessels. Lectures supplemented by visits to shipyards. (Not offered in 1941-42.)
 Summer Sessions 1941 (5)—Mon. through Thurs., 5:10 to 7:00 P.M.

7-8 *Machine Drawing* (2-2)

Koster

Prerequisite: Mechanical Engineering 4. Prerequisite or concurrent registration: Mechanical Engineering 13-14. Section A: Mon. and Fri., 1:40 to 4:30 P.M.; section B: Mon. and Fri., 7:30 to 10:30 P.M.

9-10 *Ship Drafting* (2-2)

Lord

Fairing of lines; displacement, stability curves, midship section, general arrangements and structural detail plans, machinery details. Prerequisite or concurrent registration: Mechanical Engineering 15 and 17. Tues. and Thurs., 7:30 P.M.

13-14 *Mechanism* (2-2)

Bush

Prerequisite: Mathematics 12. Prerequisite or concurrent registration: Mathematics 19 and 20. Section A: Tues. and Thurs., 12:10 P.M.; section B: Tues. and Thurs., 5:10 P.M.

15-16 *Elementary Ship Calculations* (2-2)

Johnson

Form characteristics, detailed weights, displacement, transverse and longitudinal equilibrium, launching. Prerequisite: Mechanical Engineering 5. Tues. and Thurs., 5:10 P.M.

17-18 *Marine Engines and Auxiliaries* (2-2)

Johnson

Details, arrangements and performance of steam uniflow, steam turbine, and Diesel propelling plants. Prerequisite or concurrent registration: Mechanical Engineering 5, 13-14, and 111-12. Tues. and Thurs., 6:10 P.M.

SECOND GROUP

101-2 *Advanced Ship Calculations* (2-2)

Lord

Stabilizing model basin practice, powering, steering, launching, hull strength, floodability, vibrations. Prerequisite: Mechanical Engineering 16. Tues. and Thurs., 6:10 P.M.

103-4 *Ship Design* (2-2)

Johnson

Prerequisite: Mechanical Engineering 10, 16, and 18. Tues. and Thurs., 7:30 P.M.

111-12 *Thermodynamics* (3-3)

Cruikshanks

Prerequisite or concurrent registration: Mathematics 20. Section A: Mon., Wed., and Fri., 9:10 A.M.; section B: Mon., Wed., and Fri., 6:10 P.M.

115-16 *Mechanical Laboratory* (2-2)

Cruikshanks

Calibration of instruments; calorimetry; testing of prime mov-

ers, auxiliaries, and combustion engines. Eight-hour boiler test required. Prerequisite: Mechanical Engineering 13-14 and 111-12. First semester—section A: Mon. and Fri., 1:10 P.M.; section B: Mon. and Fri., 7:30 P.M.; second semester: Mon. and Fri., 7:30 P.M.

126 *Methods of Manufacture* (2) Koster
Fixtures, gauging, tools, costs. Prerequisite: Mechanical Engineering 8 and 14; Civil Engineering 26. Tues. and Thurs., 6:10 P.M.

127-28 *Machine Design* (2-2) Johnson
With stress-analysis lectures. Prerequisite: Mechanical Engineering 112 and 126; Civil Engineering 25, 41, 123, and 136. Section A: Tues. and Thurs., 1:40 to 4:30 P.M.; section B: Tues. and Thurs., 7:30 to 10:30 P.M.

129-30 *Power Plants* (3-3) Cruikshanks
Study of design, layout, installation, and operation of power plants and equipment. Prerequisite: Mechanical Engineering 112. Mon., Wed., and Fri., 5:10 P.M.

131 *Heating and Ventilating* (2) Koster
Prerequisite: Mechanical Engineering 112. Tues. and Thurs., 5:10 P.M.

133 *Combustion Engines* (2) Bush
Prerequisite: Mechanical Engineering 112; Civil Engineering 123 and 136; Electrical Engineering 10. Section A: Tues. and Thurs., 11:10 A.M.; section B: Tues. and Thurs., 6:10 P.M.

138 *Refrigeration* (2) Koster
Prerequisite: Mechanical Engineering 112. Tues. and Thurs., 5:10 P.M.

139 *Fluid Dynamics* (3) Johnson
The theories of hydro- and aero-mechanics as influenced by density, viscosity, and turbulence. Prerequisite: Mechanical Engineering 112; Civil Engineering 14. Mon., Wed., and Fri., 6:10 P.M.

140 *Dynamics of Machinery* (3) Johnson
Inertia effects, balancing, vibration phenomena. Prerequisite: Mechanical Engineering 115; Civil Engineering 123 and 136. Mon., Wed., and Fri., 6:10 P.M.

- 141-42 *Management Problems* (2-2) Feiker
Prerequisite: Economics 1-2. Tues. and Thurs., 6:10 P.M.
- 145-46 *Management Controls* (2-2) Howard
Prerequisite: Economics 1-2; Business Administration 101-2.
Hours to be arranged.
- 189-90 *Proseminar in Mechanical Engineering* (1-1) Johnson and Staff
Hours to be arranged.

MEDICINE

- Walter Andrew Bloedorn, A.M., M.D., *Professor of Medicine, Executive Officer*
- Coursen Baxter Conklin, A.M., M.D., *Clinical Professor of Medicine*
- Charles Robert Lee Halley, A.B., M.D., *Clinical Professor of Medicine*
- Paul Frederick Dickens, M.D., *Clinical Professor of Medicine*
- Harry Filmore Dowling, A.B., M.D., *Clinical Professor of Medicine*
- Charles Powell Cake, M.D., *Adjunct Clinical Professor of Medicine*
- Albert Joseph Sullivan, B.S., M.D., *Adjunct Clinical Professor of Medicine*
- Theodore George Klumpp, B.S., M.D., *Adjunct Clinical Professor of Medicine*
- Robert Port Herwick, Ph.D., M.D., LL.B., *Adjunct Clinical Professor of Medicine*
- Frank Adelbert Hornaday, M.S., M.D., *Associate Clinical Professor of Medicine*
- Walter Kendall Myers, B.S., M.D., *Assistant Clinical Professor of Medicine*
- Theodore Judson Abernethy, B.S., M.D., *Assistant Clinical Professor of Medicine*
- John Alton Reed, A.B., M.D., *Associate in Medicine*
- Watson William Eldridge, Jr., M.D., *Associate in Medicine*
- Herman Solomon Hoffman, A.B., M.D., *Associate in Medicine*
- John Minor, A.B., M.D., *Associate in Medicine*
- Maurice Protas, A.B., M.D., *Associate in Medicine*
- Austin Brockenbrough Chinn, M.D., *Associate in Medicine*
- Clayton Bernard Ethridge, M.D., *Associate in Medicine*
- Bernard Lauriston Hardin, Jr., A.B., M.D., *Associate in Medicine*
- A. Fife Heath, M.D., *Associate in Medicine*
- Bernard Walter Leonard, B.S., M.D., *Associate in Medicine*
- John Watkins Trenis, M.D., *Associate in Medicine*
- Nicholas Athanasiou Mandelos, M.D., *Clinical Instructor in Medicine*
- Leo T. Brown, M.D., *Clinical Instructor in Medicine*
- Joseph Francis Elward, Ph.D., M.D., *Clinical Instructor in Radiology*
- Richard Bernard Castell, A.B., M.D., *Clinical Instructor in Medicine*
- George Paul Lemeschewsky, A.B., M.D., *Clinical Instructor in Medicine*
- John Charles Reisinger, M.D., *Clinical Instructor in Medicine*
- Charles Troll Carroll, A.B., M.D., *Clinical Instructor in Medicine*
- John Ellsworth Everett, A.B., M.D., *Clinical Instructor in Medicine*
- Paul Abraham Lichtman, M.D., *Clinical Instructor in Medicine*
- John Bayne Marbury, M.D., *Clinical Instructor in Medicine*

Gilbert Britt Rude, M.D., *Clinical Instructor in Medicine*
 Benjamin Manchester, M.D., *Clinical Instructor in Medicine*
 Joseph James Wallace, Ph.B., M.D., *Clinical Instructor in Medicine*
 Hunter Felix Kennedy, M.D., *Clinical Instructor in Medicine*
 Charles Noble Lewis, B.S., M.D., *Clinical Instructor in Medicine*
 Camp Stanley Huntington, A.B., M.D., *Clinical Instructor in Medicine*
 Simon Weiner, B.S., M.D., *Clinical Instructor in Medicine*
 Clarence Richard Hartman, A.B., M.D., *Clinical Instructor in Medicine*
 Louis Ross, M.D., *Clinical Instructor in Medicine*
 Irving Wolfe Winik, M.D., *Clinical Instructor in Medicine*

124 *Introductory Medical Clinics* Bloedorn and Staff
 Part of a course on introductory medical and surgical clinics.

126 *History of Medicine* Halley
 One hour a week.

241-42 *Physical Diagnosis* Conklin and Staff
 Demonstrations and practice on the normal and abnormal subject; designed to cover the entire subject of physical diagnosis.

244 *General Medicine* Bloedorn, Halley
 Lectures covering general aspects of all phases of medical disease, and including therapeutics. Three hours a week.

246 *Special Lectures* Dickens, Chinn, Protas, Hartman
 Lectures on diseases of the blood; vitamins; diseases of metabolism; diabetes. One hour a week.

312 *Radiology and Radiotherapy* Elward
 One hour a week.

321 *Cardiovascular System* Bloedorn
 Lectures on diseases of the cardiovascular system. One hour a week.

323 *Gastro-Intestinal Tract* Sullivan
 Lectures and clinics on diseases of the gastro-intestinal tract. Gallinger Hospital. One hour a week.

324 *Clinical Physiology* Dickens
 Lectures and clinics for the correlation of preclinical and laboratory studies of physiology with altered function as observed in clinic and ward. One hour a week.

325-26 *Clinical Clerkship* Halley, Dowling, and Staff
 Individual case work under strict supervision (student's his-

tories generally accepted as hospital records). Emergency and Gallinger hospitals.

- 327-28 *Clinical Pathological Conference* Bloedorn, Choisser
Required in the third and fourth years. Correlation of clinical and post-mortem findings: detailed case descriptions from the clinical point of view, followed by thorough demonstrations, grossly and with lantern slides, of post-mortem findings. One hour a week.

- 417-18 *Physiotherapy* Eldridge
Lectures and demonstrations of the fundamentals of physical treatment and their applications to general medical diseases. St. Elizabeths Hospital.

- 420 *Medical Jurisprudence* Eldridge
Lectures on the legal and ethical rights of physicians, and on the legal problems with which the physician is brought into contact. One hour a week for eleven weeks.

- 421-22 *Dispensary Clinics* The Staff
Thorough study of individual cases subsequently reviewed in detail by the Staff. The University and Emergency hospitals.

- 424 *Clinics* Bloedorn and Staff
Etiology, diagnosis, and treatment of the usual and more rare diseases, with special emphasis on differential diagnosis and the demonstration of clinical abnormalities found in various morbid processes. Medical School.

- 425-26 *Clinical Clerkship* Dickens and Staff
Individual case work under strict supervision (student's histories generally accepted as hospital records). The University Hospital.

- 440 *Clinical Pharmacology* Herwick
Brief review in materia medica, prescription writing, and the fundamentals of therapeutics; discussion of the pharmacological basis of therapeutics.

MILITARY SCIENCE AND TACTICS

Philip Weatherly Huntington, M.D., Colonel, Medical Corps, United States Army, *Professor of Military Science and Tactics*

129-30 *Basic Medical Course (elective)* Huntington
Constitutional and legal basis of national defense; organization of the Army; customs of the Service; military sanitation; map reading; supply.

247-48 *Combat Training (elective)* Huntington
Tactics and technique; combat orders; organization and employment of the Medical Department; map problems.

329-30 *Advanced Medical Course (elective)* Huntington
Military preventive medicine; Army administration; Medical Department administration; chemical warfare in offense and defense.

429-30 *Advanced Medical Course (elective)* Huntington
Military law and courts-martial; medical and surgical conditions peculiar to war; medical service of large forces; advanced administration and supply.

NEUROLOGY

Walter Freeman, Ph.D., M.D., *Professor of Neurology, Executive Officer*

James Winston Watts, B.S., M.D., *Associate Clinical Professor of Neurosurgery*

Hyman David Shapiro, M.D., *Assistant Clinical Professor of Neurology*
Alexander Simon, A.B., M.D., *Associate in Neurology*

Zigmond Meyer Lebensohn, B.S., M.D., *Clinical Instructor in Neurology*

Robert Henry Groh, B.S., M.D., *Clinical Instructor in Neurology*

249 *Neurology (elective)* Freeman

Methods of study of the nervous system. Gross and microscopic preparations, embryology, comparative anatomy, stimulation and extirpation, human pathology, etc. Laboratory demonstrations. One hour a week.

250 *Neuropathology (elective)* Freeman

Pathology of the nervous system with laboratory demonstrations. One hour a week.

331 *Neurology* Shapiro

Systematic lectures with lantern slides illustrating the chief neurologic syndromes and their anatomic bases. One hour a week for sixteen weeks.

333-34 *Neurology Clinic (elective)* Freeman and Staff

May be elected in the third or fourth year. Neurological outpatient clinic. Consultation of staff on ambulatory cases, demonstration of diagnostic procedures, disposition of neuropsychiatric cases. Three hours a week.

431 *Neurosurgery (elective)* Watts

Lectures and clinical demonstrations in surgery of the brain, spinal cord, and peripheral nerves. Emphasis is laid upon fundamentals and upon the possibilities of surgery in the relief of symptoms. One hour a week for sixteen weeks.

433-34 *Clinical Neurology* Freeman

Lectures and demonstrations of patients illustrating the diagnosis and treatment of nervous disorders. Material is available.

able at St. Elizabeths Hospital illustrative of the more common disorders and some of the unusual syndromes. One hour a week.

435-36 *Neurologic Examinations*

Freeman and Staff

Practical instruction in the examination of patients presenting nervous diseases. Detailed examination of six patients is required of each student. St. Elizabeths Hospital One fourth of the class, two hours a week.

OBSTETRICS AND GYNECOLOGY

- Howard Francis Kane, A.B., M.D., *Professor of Obstetrics and Gynecology, Executive Officer*
- Radford Brown, M.D., *Professor of Obstetrics and Gynecology*
- Elijah White Titus, Phar.D., M.D., *Clinical Professor of Obstetrics and Gynecology*
- Jacob Kotz, M.D., *Clinical Professor of Obstetrics and Gynecology*
- Henry Laurant Darner, A.B., M.D., *Clinical Professor of Obstetrics and Gynecology*
- John Louis Parks, M.S., M.D., *Adjunct Clinical Professor of Obstetrics and Gynecology*
- Herbert Percy Ramsey, A.B., M.D., *Assistant Clinical Professor of Obstetrics and Gynecology*
- William Preston Haynes, A.B., M.D., *Associate in Obstetrics and Gynecology*
- George Nordlinger, A.B., M.D., *Associate in Obstetrics and Gynecology*
- William Raymond Thomas, M.D., *Associate in Obstetrics and Gynecology*
- Joseph Harris, A.B., M.D., *Associate in Obstetrics and Gynecology*
- Laurence Lee Cockerille, M.D., *Associate in Obstetrics and Gynecology*
- Samuel Mayer Dodek, A.M., M.D., *Associate in Obstetrics and Gynecology*
- Bernard Notes, M.D., *Clinical Instructor in Obstetrics and Gynecology*
- Helen Gladys Kain, B.S., M.D., *Clinical Instructor in Obstetrics and Gynecology*
- Esther Alsylvia Nathanson, A.B., M.D., *Clinical Instructor in Obstetrics and Gynecology*
- Katherine Elizabeth Parker, A.M., M.D., *Clinical Instructor in Obstetrics and Gynecology*
- Harry Samuel Douglas, A.B., M.D., *Clinical Instructor in Obstetrics and Gynecology*
- Howard Pope Parker, M.D., *Clinical Instructor in Obstetrics and Gynecology*
- Roger O'Donnell, Jr., A.B., M.D., *Clinical Instructor in Obstetrics and Gynecology*
- William Dandridge Terrell, Jr., M.D., *Clinical Instructor in Obstetrics and Gynecology*
- James Albert Dusbabek, M.D., *Clinical Instructor in Obstetrics and Gynecology*
- Barton Winters Richwine, M.D., *Clinical Instructor in Obstetrics and Gynecology*

Floyd Sterling Rogers, Jr., M.D., *Clinical Instructor in Obstetrics and Gynecology*

Samuel Hazen Shea, A.B., M.D., *Clinical Instructor in Obstetrics and Gynecology*

253-54 *Pregnancy, Normal and Abnormal* Dodek, O'Donnell
Lectures and recitations on the physiology and management of pregnancy and its complications. One hour a week.

337-38 *Labor, Normal and Abnormal* Kane, Nordlinger
Lectures, recitations, and demonstrations on the mechanism and course of labor and its complications. Two hours a week.

344 *Operative Gynecology* Darner
Lectures on the principles of gynecological surgery. One hour a week for seven weeks.

345-46 *Manikin Demonstrations* Harris
The mechanism of labor and various types of operative delivery demonstrated to sections of the class throughout the year. One hour a week.

439 *Gynecological Pathology (elective)* Brown
Lectures on the essentials of gynecological pathology, and demonstrations and study of gross and microscopic material discussed in the lectures. One hour a week.

441-42 *Clinical Obstetrics* The Staff
Observation of, and participation in, the work of the pre- and post-natal clinics, on the wards, and in the delivery rooms of the University, Gallinger, Columbia, and Garfield Hospitals.

443-44 *Clinical Gynecology* The Staff
Observation of, and participation in, the work at the out-patient clinics, on the wards, and in the operating rooms of the University, Gallinger, Columbia, and Garfield Hospitals.

445 *Female Endocrinology and Operative Gynecology* Kotz, Darner
Lectures on the physiology and pathology of the endocrine system in women and on the principles of gynecological surgery. One hour a week.

OPHTHALMOLOGY

William Thornwall Davis, M.D., *Professor of Ophthalmology, Executive Officer*

Ernest Alfred Watson Sheppard, M.D.C.M., *Associate Clinical Professor of Ophthalmology*

George Victor Simpson, M.D., *Assistant Clinical Professor of Ophthalmology*

Edgar Leonard Goodman, M.D., M.M.S., *Associate in Ophthalmology*

Ronald Atmore Cox, A.B., M.D., *Associate in Ophthalmology*

Albert Edward Meisenbach, Jr., A.B., M.D., *Clinical Instructor in Ophthalmology*

351-52 *Ophthalmology*

Davis and Staff

A lecture course presenting the principles of ophthalmology, with special reference to topics of importance to the general practitioner. One hour a week for twenty weeks.

447 *Clinic*

Davis and Staff

Intensive training in diseases of the eye; etiology, diagnosis, and treatment in their application to clinical cases. Episcopal Hospital. Three hours twice a week.

OTO-RHINO-LARYNGOLOGY

- Daniel Bruce Moffett, A.B., M.D., *Professor of Oto-rhino-laryngology, Executive Officer*
- William Herndon Jenkins, M.D., *Clinical Professor of Oto-rhino-laryngology*
- Leroy Lee Sawyer, Jr., A.B., M.D., *Assistant Clinical Professor of Oto-rhino-laryngology*
- David Davis, A.B., M.D., *Associate in Oto-rhino-laryngology*
- Don R. Johnson, LL.B., M.D., *Associate in Oto-rhino-laryngology*
- Aubrey David Fischer, M.D., *Clinical Instructor in Oto-rhino-laryngology*
- Jeter Carroll Bradley, M.D., *Clinical Instructor in Oto-rhino-laryngology*
- Lyman Brooke Tibbets, Phar.D., M.D., *Clinical Instructor in Oto-rhino-laryngology*
- Joel Norton Novick, M.S., M.D., *Clinical Instructor in Oto-rhino-laryngology*

451 *Oto-rhino-laryngology* Moffett, Jenkins
Lectures and demonstrations on anatomy, physiology, and diseases of the ear, nose, and throat, bronchoscopy and esophagoscopy. Two hours a week.

454 *Bronchoscopy* Davis
A series of lectures on the fundamental principles and the use of instruments, including both the bronchoscope and esophagoscope. One hour a week for ten weeks.

456 *Clinic* The Staff
Practical clinical instruction in the diagnosis and treatment of diseases of the ear, nose, and throat. Episcopal Hospital. One and one-half hours twice a week.

PATHOLOGY

Roger Morrison Choisser, B.S., M.D., *Professor of Pathology, Executive Officer*

Thomas Martin Peery, A.B., M.D., *Assistant Professor of Pathology*

Thelma Brumfield Dunn, A.B., M.D., *Associate in Pathology*

Richard Edward Kelso, M.D., *Instructor in Pathology*

259-60 Pathology

Choisser, Peery

A course covering malformations, inflammations, degenerations and neoplasms, followed by special pathology of the organs and specific diseases. The laboratory work consists of the gross and microscopic study of diseased tissues. Necropsies are held regularly at the University and Municipal hospitals.

307 Necropsy (elective)

The Staff

Students assist in the performance of necropsies. Fresh gross specimens and microscopic sections from each case are presented at weekly conferences. Current literature relating to cases is reviewed and presented by the students.

327-28 Clinical Pathological Conference

Choisser, Bloedorn

Required in the third and fourth years. Case histories are presented and discussed by members of the staff and student body; necropsy and clinical findings are compared, and gross and microscopic specimens examined. One hour a week.

460 Research

Choisser

Hours and credits to be arranged.

PEDIATRICS

- Harry Hampton Donnally, A.M., M.D., *Professor of Pediatrics, Executive Officer*
- Preston Alexander McLendon, B.S., M.D., *Clinical Professor of Pediatrics*
- Charles Aurelius Schutz, M.D., *Clinical Professor of Pediatrics*
- Margaret Mary Nicholson, A.B., M.D., *Clinical Professor of Pediatrics*
- Edward Lewis, M.D., *Clinical Professor of Pediatrics*
- Lewis Kaigler Sweet, A.B., M.D., *Adjunct Clinical Professor of Pediatrics*
- Elizabeth Emery Chickering, A.B., M.D., *Associate in Pediatrics*
- Aaron Nimetz, A.B., M.D., *Associate in Pediatrics*
- William Staton Anderson, A.B., M.D., *Associate in Pediatrics*
- Mabel Harlakenden Grosvenor, A.B., M.D., *Associate in Pediatrics*
- John Augustine Washington, A.B., B.S., M.D., *Associate in Pediatrics*
- Reginald Henry Mitchell, M.D., *Clinical Instructor in Pediatrics*
- John Howell Peacock, B.S., M.D., *Clinical Instructor in Pediatrics*

354 *Pediatrics*

Nicholson

Ward walks and weekly clinic. Gallinger Hospital. Two sections.

355-56 *Pediatrics*

Schutz

Lectures on diseases and malformations of the newly born. Growth, metabolism, nutrition, nutritional diseases, therapeutics, habits, preventive pediatrics, and social aspects are considered. One hour a week for twenty-four weeks.

357-58 *Clinic*

Peacock

Clinical instruction in the care and diseases of the newly born, congenital malformations, birth injuries, and prematurity. Gallinger Hospital. One fourth of the class, one hour a week.

359-60 *Contagious-Disease Clinic*

Grosvenor, Sweet, Mitchell

Bedside instruction in scarlet fever, diphtheria, etc. Gallinger Hospital. One fourth of the class, one hour a week. Ward walks twice a week.

463-64 *Child-Welfare and Preventive Clinic*

Schutz

Clinical course in the infant and the pre-school child. Children's Hospital, Child Welfare Center. One section, one hour a week.

465-66 *Clinic*

Lewis, Washington, Chickering,
Nimetz, Anderson, Grosvenor

Out-patient clinic: minor to serious disorders of children, emotional life of the child, habit formations, and behavior problems. Children's Hospital. One section, Mon., Tues., Wed., and Fri., one and one-half hours.

467-68 *Clinic*

Donnally

Teaching clinic. Children's Hospital. Entire class, one and one-fourth hours a week.

469-70 *Clinical Clerkship*

Donnally, McLendon, Washington,
Nimetz, Chickering, Anderson, Grosvenor

Ward walks, physical diagnosis, pediatric procedures, bedside instruction in contagious diseases, laboratory and necropsy instruction, diagnosis of urgent cases. Children's Hospital. One fourth of the class. Mon., Tues., Wed., and Fri., 9:30 A.M. to 4:30 P.M.

471-72 *Allergy Clinic*

Donnally

Prerequisite: Bacteriology 209. Practical work in the Allergy Clinic of Children's Hospital may be obtained by a small group of senior students. Two afternoons a week.

PHARMACOLOGY AND THERAPEUTICS

George Byron Roth, A.B., M.D., *Professor of Pharmacology, Executive Officer*

Edgar William Ligon, Jr., Ph.D., *Instructor in Pharmacology*

Launce Flemister, A.B., *Instructor in Pharmacology*

263 *Pharmacology* Roth and Staff
Laboratory instruction covering both the chemical nature and the biological effects of drugs. Five hours a week.

265 *Pharmacology* Roth
Lectures and demonstrations to correlate the most prominent facts relating to the more important therapeutic agents. Drugs found in the *United States Pharmacopoeia* and *New and Non-official Remedies* are stressed. Three hours a week.

267 *Pharmacology Conference* Roth and Staff
One hour a week.

269 *Prescription Writing* Roth
Sixteen one-hour conferences on the form of the prescription, with practical exercises.

362 *Research* Roth and Staff
Hours and credits to be arranged.

PHARMACY

- William Paul Briggs, M.S., *Professor of Pharmacy, Executive Officer*
 Lea Gene Gramling, Ph.D., *Assistant Professor of Pharmacology and Pharmacognosy*
 Lloyd Walter Hazleton, Ph.D., *Assistant Professor of Pharmacology*
 Charles Watson Bliven, M.S., *Assistant Professor of Pharmaceutical Chemistry*
 Asa Vernon Burdine, *Lecturer on Pharmaceutical Economics*
 Leopold Henry Forster, Ph.G., *Instructor in Hospital Pharmacy*
 Frank Fortunato, M.S., *Research Associate in Pharmacology*

SEMINAR LECTURERS

- James Johnson Durrett, M.D., *Professorial Lecturer on Trade Commission Policies*
 Evander Francis Kelly, Phar.D., Sc.D., *Professorial Lecturer on Pharmaceutical Organizations*
 Carson Peter Frailey, Phar.D., *Professorial Lecturer on Industrial Pharmacy*
 Frederick John Cullen, Ph.G., M.D., *Professorial Lecturer on Drug Manufacture*
 Warren Fales Draper, A.B., M.D., *Professorial Lecturer on Public Health*
 Harrison Estell Howe, Sc.D., LL.D., D.Eng., *Professorial Lecturer on Scientific Literature*
 Albert Walton Kenner, Phar.D., M.D., *Professorial Lecturer on Military Pharmacy*
 James Albert Horton, LL.B., *Professorial Lecturer on Drug Trade Regulations*
 John Christian Krantz, Jr., Ph.D., *Professorial Lecturer on Pharmaceutical Research*
 Justin Lawrence Powers, Ph.D., *Professorial Lecturer on Official Drug Standards*
 George Clemens Ruhland, M.D., *Professorial Lecturer on Hygiene and Sanitation*
 Robert Lee Swain, Phar.D., LL.B., *Professorial Lecturer on Contemporary Pharmacy*
 George Potter Larrick, *Professorial Lecturer on Drug Control*

Minimum requirements for the degree.—See pages 122-24.

Fees.—For a statement of laboratory fees and deposits, see page 25.

FIRST GROUP

- 1-2 *Principles of Pharmacy* (2-2) Bliven
Pharmaceutical mathematics and fundamental laboratory technique. Mon., 9:10 A.M. Laboratory—Tues., 1:40 to 4:30 P.M.
- 21-22 *Operative Pharmacy* (4-4) Briggs
The theory and manufacture of pharmacopoeial and formulary preparations. First semester: Mon. and Wed., 11:10 A.M. Laboratory—Wed. and Fri., 1:40 to 4:30 P.M. Second semester: Tues. and Thurs., 10:10 A.M. Laboratory—Wed. and Fri., 1:40 to 4:30 P.M.
- 23-24 *Pharmacognosy* (3-3) Gramling
Macroscopic and microscopic. Prerequisite: Botany 1. Wed. and Fri., 9:10 A.M. Laboratory—Mon., 1:40 to 4:30 P.M.

SECOND GROUP

- 102 *Dispensing Pharmacy* (4) Briggs
Compounding of typical prescriptions and a study of incompatibilities. Prerequisite: Pharmacy 2 and 22. Mon. and Wed., 10:10 A.M. Laboratory—Mon. and Thurs., 1:40 to 4:30 P.M.
- 103 *Dispensing Pharmacy* (4) Briggs
Continuation of Pharmacy 102. Tues. and Thurs., 11:10 A.M. Laboratory—Mon. and Thurs., 1:40 to 4:30 P.M.
- 105-6 *Pharmacology I* (2-2) Gramling
Uses of official and new nonofficial drugs; biologicals, glandular products, first aid, and medical requisites. Mon. and Wed., 11:10 A.M.
- 108 *History of Pharmacy* (1) Briggs
Fri., 11:10 A.M.
- 109 *Organic Pharmaceutical Chemistry* (3) Bliven
Preparation and qualitative testing of the official organic chemicals and chemical preparations. Prerequisite: Chemistry 152. Wed. and Fri., 9:10 A.M. Laboratory—Fri., 1:40 to 4:30 P.M.
- 110 *Inorganic Pharmaceutical Chemistry* (3) Bliven
Preparation and qualitative testing of the official inorganic chemicals and chemical preparations. Prerequisite: Chemistry 21. Wed. and Fri., 9:10 A.M. Laboratory—Wed., 1:40 to 4:30 P.M.
- 151 *Advanced Pharmacognosy* (2) Gramling, Fortunato
Microscopical. Prerequisite: Pharmacy 24. Laboratory—Mon. and Fri., 1:40 to 3:30 P.M.

- 153-54 *Pharmacology II* (3-3) Hazleton
Laboratory work in basic pharmacological technique. Prerequisite: Pharmacy 106; Physiology 115 and 117. Hours to be arranged.
- 165-66 *Pharmacology III* (3-3) Hazleton
Pharmacodynamics, toxicology, and biological assays. Prerequisite: Pharmacy 24 and 106; Physiology 115 and 117. First semester: Tues. and Thurs., 9:10 A.M., and Fri., 11:10 A.M.; second semester: Tues. and Thurs., 9:10 A.M. Laboratory—Thurs., 1:40 to 4:30 P.M.
- 168 *Clinical Laboratory Methods* (2) Hazleton, Fortunato
The application of biochemical techniques. Prerequisite: Bacteriology 112. Prerequisite or concurrent registration: Biochemistry 222. Hours to be arranged.
- 172 *Advanced Dispensing Pharmacy* (2) Briggs
The equipment and management of professional pharmacies and advanced dispensing. Prerequisite: Pharmacy 103. Thurs., 10:10 A.M. Laboratory—Mon., 1:40 to 4:30 P.M.
- 173 *Food Analysis* (3) Bliven
Prerequisite: Pharmacy 109; Chemistry 22. Tues. and Thurs., 10:10 A.M. Laboratory—Fri., 1:40 to 4:30 P.M.
- 174 *Quantitative Pharmaceutical Analysis* (4) Bliven
Drug analysis. Prerequisite: Chemistry 22. Tues. and Thurs., 11:10 A.M. Laboratory—Tues. and Fri., 1:40 to 4:30 P.M.
- 176 *Pharmaceutical Law* (1)
Fri., 9:10 A.M.
- 178 *Pharmaceutical Economics* (2) Burdine
Fri., 11:10 to 1:00 P.M.
- 181 *Advanced Pharmacology I* (2) Gramling
Special problems and studies in the field of pharmacology. Prerequisite: Pharmacy 106. Prerequisite or concurrent registration: Pharmacy 165. Hours to be arranged.
- 184 *Advanced Pharmacology II* (2) Gramling
Advanced biologicals and glandular products. Prerequisite: Pharmacy 106. Prerequisite or concurrent registration: Pharmacy 166. Tues. and Thurs., 10:10 A.M.
- 186 *Pharmaceutical Chemistry* (2) Bliven
A study of the relationship of structure to action of synthetic

drugs. Prerequisite: Pharmacy 109. Tues. and Thurs., 10:10 A.M.

187-88 *Seminar (1-1)*

The Seminar Staff

A symposium covering the various phases of Pharmacy. Fri., 10:10 A.M.

192 *Prescription Practice (no credit)*

Forster

The compounding of prescriptions and manufacture of medicinal preparations in the University Hospital Pharmacy. Required of seniors.

PHILOSOPHY

Christopher Browne Garnett, Jr., Ph.D., Litt.D., *Associate Professor of Philosophy, Executive Officer*

Yervant Krikorian, Ph.D., *Visiting Lecturer in Philosophy*

The major.—The major in philosophy, administered under the new plan, provides an opportunity for the student to become acquainted with the broader and more fundamental aspects of his world and his civilization.

FIRST GROUP

1-2 *Introduction to Philosophy* (3-3)

Garnett

The course is designed to introduce the student to the vital issues, both theoretical and practical, with which human intelligence is confronted in the present age. Section A: Mon., Wed., and Fri., 9:10 A.M.; section B: Mon., Wed., and Fri., 6:10 P.M.

SECOND GROUP

103 *Principles of Philosophy* (3)

Garnett

A survey of the problems and theories of philosophy.
Summer Sessions 1941 (3)—daily except Sat., 5:10 P.M., nine weeks' term (Krikorian).

III-12 *History of Philosophy* (3-3)

Garnett

An historical survey of the large periods and the main philosophers in the Orient and the Western world. Tues., Thurs., and Sat., 9:10 A.M.

121 *Logic* (3)

Garnett

A critical study of deductive logic, induction, and the application of the principles of reflective thought in the natural and social sciences. Mon., Wed., and Fri., 5:10 P.M.
Summer Sessions 1941 (3)—daily except Sat., 6:10 P.M., nine weeks' term (Krikorian).

132 *Ethics* (3)

Garnett

A study of wisdom in conduct in personal and group life. Mon., Wed., and Fri., 5:10 P.M.

141 *Contemporary American Philosophy* (3)

Garnett

A comparative study of the general philosophies of Dewey, Perry, Pratt, Stace, Whitehead, Santayana, and Fite. (Not offered in 1941-42.)

151 *Problems in the Philosophy of the Sixteenth and Seventeenth Centuries* (3) Garnett

A comparative study of the general philosophies of Bruno, Bacon, Descartes, Malebranche, Spinoza, Leibniz, and Newton. (Not offered in 1941-42.)

155-56 *Philosophical Movements in the Eighteenth Century* (3-3) Garnett

A study of the general culture of the Enlightenment with special emphasis upon science, art, literature, religion, and politics. Ability to read French and German is desirable. (Not offered in 1941-42.)

199-200 *Proseminar: Readings for the Major* (3-3) Garnett

Hours to be arranged.

THIRD GROUP

221-22 *Research* (3-3) Garnett

Special problems in philosophy. Hours to be arranged.

299-300 *Thesis* (3-3) Garnett

PHYSICAL EDUCATION FOR MEN

*James Ebenezer Pixlee, B.S., *Professor of Physical Education for Men*
Claud Max Farrington, A.M., *Professor of Physical Education for Men,*
Executive Officer

William Henry Myers, A.B., *Assistant Professor of Physical Education*
for Men

—, *Instructor in Physical Education for Men*

This Department includes all the recognized athletic activities of the men students of the University.

A minimum of four semester-hours of Physical Education is required for graduation and is compulsory for all freshman and sophomore men except for those exempt under the regulations stated on pages 141-42.

Upon entering the University, all freshmen or other undergraduate students who have not fulfilled the Physical Education requirement are given a medical examination. Assignments for medical examination will be given at the time of registration. The students who satisfy the requirements of this examination are immediately given a physical-efficiency test of general bodily skills. All other students are assigned activities according to their individual needs. If the physical-efficiency test is passed satisfactorily, the student may elect his activity from the following lists:

Group A

Badminton
Golf
Gymnastics
Handball
Swimming
Tennis
Tumbling

Group B

Basketball
Softball
Speedball
Touch Football
Volleyball

Two semesters of activity must be from Group A and two semesters of activity from Group B unless a substitution is approved by the Department. If the physical-efficiency test is not passed, the student is assigned to individual exercise.

The Department furnishes gymnasium uniforms and personal equipment upon a small payment.

Minimum requirements for the Dual-Major Teacher's Course.—See page 130.

Minimum requirements for the Single-Major Teacher's Course.—See page 130.

Minimum requirements for the minor.—Prerequisite: Physical Education 42, 43-44, 45-46 (all of these courses may be satisfied by examination), 47, 50, 58. Required: twelve semester-hours of second- or third-group courses in Physical Education, including 101, 102, 105-6, and four semester-hours of activity Physical Education.

Fees.—For a statement of locker and towel fees, see page 25.

* On leave of absence 1941-42.

FIRST GROUP

- 1-2 *Freshman Physical Education (1-1)* The Staff
Two periods of supervised activity a week. Assignment for activities and hours to be arranged.
- 9-10 *Sophomore Physical Education (1-1)* The Staff
Two periods of supervised activity a week. Assignment for activities and hours to be arranged.
- 42 *Aquatic Sports, First Aid, and Lifesaving (2)* Farrington
Fri., 1:00 to 3:00 P.M.
- 43-44 *Techniques of Indoor and Outdoor Activities for Freshmen (2-2)*
A critical survey of the fundamental skills, rules, organization, appreciations, and attitudes in these activities. Mon. and Wed., 1:40 to 3:30 P.M.
- 45-46 *Techniques of Indoor and Outdoor Activities for Sophomores (2-2)*
Tues. and Thurs., 1:40 to 3:30 P.M.
- 47 *Introduction to Physical Education (2)* Myers
An orientation course presenting in elementary form the problems of physical education, vocational analysis, historical implication, scientific foundations, and scope of field. Tues. and Thurs., 8:10 A.M.
Summer Sessions 1941 (2)—June 17-July 30, daily except Sat., 7:30 A.M.
- 48 *Fundamentals and Nature of Play (2)*
Critical study of the theory of play; study of the play activities of childhood and youth; types of recreation; playground activities. Tues. and Thurs., 8:10 A.M.
- 49 *Introduction to Methods in Physical Education (2)*
Essential facts of education, psychology, and sociology, with special reference to the problem of method in physical education. Prerequisite: Psychology 1 and 22; Sociology 27 and 28. Tues. and Thurs., 1:40 P.M.
- 50 *Beginning Anatomy and History of Hygiene (3)* Myers
Relationship of anatomy to physical education; fundamentals of health; and elementary physiological functioning of the body. Prerequisite: Biology 1-2. Mon., Wed., and Fri., 1:40 P.M.

- 58 *First Aid and Care of Athletic Injuries* (2) The Staff
 Prevention and emergency care of injuries of all types, with special reference to first aid, bandaging, and massage. A practical course. Prerequisite: Physical Education 50; Biology 1-2. Tues. and Thurs., 1:40 P.M.

SECOND GROUP

- 101 *Principles of Physical Education* (2) Myers
 The interpretation of objectives of physical-education activities under leadership, in terms of development, adjustment, and standards. Prerequisite: Physical Education 47. Mon. and Wed., 9:10 A.M.
- 102 *Administration and Organization of Physical Education* (2) Farrington
 The administration of a unified program; a study of physical-education plants, athletic fields, and equipment. Prerequisite: Physical Education 47. Tues. and Thurs., 9:10 A.M.
- 103 *Applied Anatomy and Physiology* (3) Myers
 The anatomical and physiological effects of physical-education activity. Prerequisite: Physical Education 50; Zoology 1-2. Mon., Wed., and Fri., 1:40 P.M.
- 105-6 *Directed Teaching in Physical Education Activities* (2-2) Farrington
 Practical demonstration of teaching procedures in adapting activities to the various problems in the secondary school organization. Prerequisite: a minimum of twelve semester-hours in Physical Education. Hours to be arranged.
- 107-8 *Methods in Major Sport Activities* (2-2) The Staff
 Teaching procedures in adapting major sport activities to the several age-period groups and to individual differences existing in the secondary school organization. Prerequisite: demonstration of a fair degree of skill in these various activities; Physical Education 49. First semester: Tues. and Thurs., 9:10 A.M.; second semester: Tues. and Thurs., 11:10 A.M.
- 109-10 *Methods in Minor Sport Activities* (2-2) The Staff
 The scientific procedures in adapting these various activities to a secondary school physical-education program. Prerequisite: demonstration of a fair degree of skill in these various activities. First semester: Tues. and Thurs., 11:10 A.M.; second semester: Tues. and Thurs., 9:10 A.M.

111 *Leadership Organization in the Intramural Program* (2)

Farrington

Principles of administration, organization, and supervision of intramural activities in the physical-education program of the junior high schools, senior high schools, and colleges. Prerequisite: Physical Education 47 and 49. Mon. and Wed., 1:40 P.M.

Physical Education 111X—same as Physical Education 111, but offered second semester. Mon. and Wed., 1:40 P.M.

112 *Methods in Health Education* (3)

Myers

Principles involved in the teaching of health at different age levels. Prerequisite: Physical Education 50; Zoology 1-2. Mon., Wed., and Fri., 9:10 A.M.

113 *Psychological Analysis of Activities* (2)

The Staff

A detailed analysis of the mental processes during participation in physical-education activities. Prerequisite: Psychology 1 and 22. Tues. and Thurs., 11:10 A.M.

116 *Community and Personal Hygiene* (2)

Application of principles of health to community and personal life; sources of material for general health knowledge. Prerequisite: Physical Education 50; Zoology 1-2. Tues. and Thurs., 1:40 P.M.

117 *Kinesiology of Sports for the Physically Handicapped* (3)

Methods employed in the teaching of body mechanics which are adapted to the prevention and correction of physical disabilities. Prerequisite: Physical Education 50 and 103; Zoology 1-2. Mon., Wed., and Fri., 10:10 A.M.

118 *Tests and Measurements in Physical Education* (3)

Myers

A critical study of achievement tests in physical education; statistical methods; methods of constructing achievement tests. Prerequisite: Physical Education 47. Mon., Wed., and Fri., 10:10 A.M.

133-34 *Observation and Practice Teaching* (3-3)

Myers

Required of every major student in the junior or senior year. Assignments are made to schools in Washington, D. C., and vicinity. Prerequisite: Education 131. Hours to be arranged.

141-42 *Administration of Community Recreational Programs* (2-2) Farrington

The administrative organization of recreational projects; social organization of recreation; problems of program content. Field trips; observation; practical work. Prerequisite: Physical Education 48. Mon. and Wed., 1:40 P.M.

Summer Sessions 1941 (2-2)—first term, June 17-July 30, daily except Sat., 8:30 A.M.; second term, July 30-September 13, daily except Sat., 8:30 A.M. (Farrington).

THIRD GROUP

201-2 *Seminar: Test Construction in Physical Education* (3-3) Myers

Current trends in the various phases of testing in physical education. Originality and research ability must be shown in a term report. Prerequisite: Physical Education 118. Tues., 7:30 to 9:30 P.M.

PHYSICAL EDUCATION FOR WOMEN

*Ruth Harriet Atwell, A.M., *Professor of Physical Education for Women, Executive Officer*

Helen Bennett Lawrence, A.M., *Assistant Professor of Physical Education for Women*

Jenny Emsley Turnbull, A.M., *Assistant Professor of Physical Education for Women*

Elizabeth Burtner, A.M., *Instructor in Physical Education for Women*

Helen Taylor Hanford, A.M., *Associate in Physical Education for Women*

Two years of Physical Education (Physical Education 1-2 and 11-12) are required of all women for graduation, except of students exempt under the regulations stated on pages 41-42. In the fall a complete medical and physical examination is given each student for the purpose of discovering individual needs. Those students whose examinations indicate the desirability of remedial or restricted activity are assigned to a program especially adapted to their needs. This limited program includes moderate sports and individual body mechanics in small groups under careful supervision.

The required costume for Physical Education classes may be purchased at the University Store.

Minimum requirements for the major.—For the first two years in Junior College see page 60. For the last two years in the School of Education see page 131. Students desiring to prepare themselves to teach another subject in addition to Physical Education may do so by choosing their elective hours in one subject-matter group upon the advice of the Executive Officer.

Fees.—For a statement of locker and towel fees, see page 25.

1-2 Freshman Physical Education (1-1)

The Staff

One lecture on personal hygiene and two periods of activity a week.

Personal hygiene: study of a well-balanced program for daily living based on the general physiological laws of personal hygiene. Section A: Mon., 12:10 P.M.; section B: Tues., 12:10 P.M.

Activities: fall season, soccer or field hockey; winter season, dance, basketball, badminton, ice skating, fencing, or individual body mechanics; spring season, elementary, intermediate, or advanced swimming, or (if the swimming test has been passed) archery, canoeing, golf, tennis, lacrosse, or riding. Section A:

* On sabbatical leave second semester 1941-42.

Mon. and Fri., 1:40 P.M.; section B: Tues. and Thurs., 1:40 P.M.; section C: Mon. and Fri., 2:40 P.M.; section D: Tues. and Thurs., 2:40 P.M.

11-12 *Sophomore Physical Education (1-1)*

The Staff

Two periods of activity a week. Fall season, field hockey, soccer, golf, archery, tennis, or riding; winter season, dance, basketball, badminton, ice skating, fencing, or individual body mechanics; spring season, swimming, or (if the swimming test has been passed) tennis, golf, archery, canoeing, lacrosse, or riding. Section A: Wed. and Fri., 11:10 A.M.; section B: Wed. and Fri., 12:10 P.M.; section C: Mon. and Fri., 1:40 P.M.; section D: Tues. and Thurs., 1:40 P.M.; section E: Mon. and Fri., 2:40 P.M.; section F: Tues. and Thurs., 2:40 P.M.

13-14 *Skill Techniques in Physical Education Activities (2-2)*

The Staff

Practice in basic motor skills for prospective teachers in the following: (1) team sports—field hockey, soccer, basketball, softball, and speedball; (2) dance—folk, tap, modern; (3) body mechanics; (4) individual and dual sports—swimming, tennis, golf, badminton, archery; (5) graded games for all ages; (6) self-testing activities—tumbling, stunts, achievement tests. Programs are arranged according to individual needs. Wed., 1:40 to 4:30 P.M.; others hours to be arranged.

15-16 *Skill Techniques in Physical Education Activities (2-2)*

The Staff

Continuation of Physical Education 13-14. Wed., 1:40 to 4:30 P.M.; other hours to be arranged.

18 *Kinesiology (3)*

Lawrence

A study of the anatomical mechanism of movement; analysis of the action of the muscles in physical-education activities. Prerequisite: Zoology 1-2 and an approved course in anatomy. Mon., Wed., and Fri., 9:10 A.M.

SECOND GROUP

101-2 *Individual Body Mechanics and Physical Examinations (3-3)*

Lawrence

Cause and correction of faulty body mechanics and other abnormal physical conditions; physical-examination methods used in the diagnosis of physical defects; program adaptation to special cases. Prerequisite: Physical Education 18; Zoology 1-2 and an approved course in anatomy. Mon., Wed., and Fri., 10:10 A.M.

- 103 *Nature and Function of Play* (2) Atwell
The significance of play in human growth and development; social and physical aspects of play; play activities in relation to age levels. Tues. and Thurs., 5:10 P.M.
- 104 *History and Principles of Physical Education* (3) Burtner
Prerequisite: Physical Education 103. Mon., Wed., and Fri., 9:10 A.M.
- 109-10 *Methods of Teaching Physical Education Activities* (2-2) The Staff
Teaching procedures and officiating, with opportunities for practice in teaching the following: (1) team sports; (2) individual and dual sports; (3) graded games; (4) dance; (5) body mechanics. Wed., 1:40 to 4:30 P.M.; other hours to be arranged.
- 112 *Administration of Physical Education* (3) Lawrence
Organization and administration of physical education in elementary and secondary schools, colleges, and recreational centers. Prerequisite: Physical Education 103 and 104. Mon., Wed., and Fri., 11:10 A.M.
- 113-14 *Methods of Teaching Physical Education Activities* (2-2) The Staff
Continuation of Physical Education 109-10. Wed., 1:40 to 4:30 P.M.; other hours to be arranged.
- 116 *Clinical Work in Individual Body Mechanics and Physical Examinations* (3) Lawrence
Practice in giving physical examinations, analysis of results, prescription and teaching of corrective exercises; observation in orthopedic clinics in city; first aid and care of athletic injuries, with instruction in bandaging and massage. Prerequisite: Physical Education 18 and 101-2; Zoology 1-2. Hours to be arranged.
- 117 *Tests and Measurements in Physical Education* (2) Atwell
Critical survey of tests in physical activities; methods of test construction; elementary statistics. Tues. and Thurs., 11:10 A.M.
- 118 *Camp Leadership* (1) Turnbull and Lecturers
Philosophy and administration of modern camps. Lectures and discussions by specialists in the various phases of camping; field trips; workshop in camp activities; seminar on camp administration. Additional credit for field work in camp under supervision may be arranged. Thurs., 7:30 to 9:30 P.M.

133-34 *Observation and Cadet Teaching (3-3)*

Atwell, Burtner

Directed teaching with weekly conferences in junior and senior high schools.

RELATED COURSES IN THE DEPARTMENT OF EDUCATION

The major.—Prerequisite: Physics 6, 7, 8, and 55; Mathematics 19 and 20. Required for the Bachelor of Arts degree: Physics 113-14, 116, 121-22, 125, and four semester-hours of second-group laboratory courses; Mathematics 132. Required for the Bachelor of Science degree: same courses as for the Bachelor of Arts degree, plus Mathematics 171.

Fees.—For a statement of material fees, see page 25.

FIRST GROUP

†3-4 *Introductory Survey in Physical Science** (3-3) Seeger, Naeser
 A study of energy and matter, their relation to each other, and their significance to man. Mon., Wed., and Fri., 10:10 A.M. (Same as Chemistry 3-4.)

5 *General Physics* (3) Cheney and Staff
 Introduction to the scientific method as used in the study of energy and forces: the physical properties of solids, liquids, and gases; the phenomena of heat and of light. Lecture—section A: Tues., 11:10 A.M.; section B: Tues., 5:10 P.M. Recitation and laboratory—section L: Thurs., 11:10 A.M., and Wed., 2:40 to 4:30 P.M.; section M: Thurs., 1:40 P.M. and 2:40 to 4:30 P.M.; section N: Fri., 1:40 P.M. and 2:40 to 4:30 P.M.; section R: Thurs., 5:10 P.M., and Tues., 6:40 to 8:30 P.M.; section S: Thurs., 5:10 P.M., and Wed., 7:40 to 9:30 P.M.; section T: Thurs., 5:10 P.M. and 6:40 to 8:30 P.M.

Physics 5x—same as Physics 5, but offered second semester. Lecture—Fri., 11:10 A.M. Recitation and laboratory—section A: Mon., 11:10 A.M., and Wed., 11:10 A.M. to 1:00 P.M.; section B: Mon., 1:40 P.M., and 2:40 to 4:30 P.M.

* Physics 6, 7, and 8 constitute the basic course in Physics. Students who have credit for high school Physics from an accredited high school may omit Physics 3-4 or 5 as a prerequisite to Physics 6 and 7, provided that they pass a qualifying examination given at the beginning of the course (Physics 6 or Physics 7).
 Before completing registration for Physics 5, 6, 7, or 55, each student must obtain from the representative of the Department an assignment to a class section.

6 *General Physics** (3)

Seeger and Staff

Mechanics, wave-motion, sound, and the theory of optical instruments. Offered second semester. Prerequisite: Physics 1-2 or 5. Lecture—section A: Thurs., 11:10 A.M.; section B: Thurs., 5:10 P.M. Recitation and laboratory—section K: Tues., 1:40 P.M. and 2:40 to 4:30 P.M.; section L: Wed., 1:40 P.M. and 2:40 to 4:30 P.M.; section M: Tues., 2:40 P.M., and Thurs., 2:40 to 4:30 P.M.; section N: Tues., 11:10 A.M., and Fri., 2:40 to 4:30 P.M.; section P: Tues., 5:10 P.M., and Mon., 7:40 to 9:30 P.M.; section R: Tues., 5:10 P.M., and 6:40 to 8:30 P.M.; section S: Tues., 5:10 P.M., and Wed., 7:40 to 9:30 P.M.; section T: Tues., 5:10 P.M., and Thurs., 6:40 to 8:30 P.M.

Summer Sessions 1941 (3)—Mon., Wed., and Fri., 5:10 P.M., and Tues. and Thurs., 6:30 to 8:30 P.M., nine weeks' term (Cheney).

7 *General Physics** (3)

Seeger and Staff

Electricity; magnetism; the principles underlying the uses of electric power in everyday life. Offered first semester. Prerequisite: Physics 1-2 or 5. Lecture—section A: Thurs., 11:10 A.M.; section B: Thurs., 5:10 P.M. Recitation and laboratory—section K: Tues., 1:40 P.M. and 2:40 to 4:30 P.M.; section L: Wed., 1:40 P.M. and 2:40 to 4:30 P.M.; section M: Tues., 2:40 P.M., and Thurs., 2:40 to 4:30 P.M.; section N: Tues., 11:10 A.M., and Fri., 2:40 to 4:30 P.M.; section P: Tues., 5:10 P.M., and Mon., 7:40 to 9:30 P.M.; section R: Tues., 5:10 P.M., and 6:40 to 8:30 P.M.; section S: Tues., 5:10 P.M., and Wed., 7:40 to 9:30 P.M.; section T: Tues., 5:10 P.M., and Thurs., 6:40 to 8:30 P.M.

Summer Sessions 1941 (3)—Mon., Wed., and Fri., 6:10 P.M., and Tues. and Thurs., 6:30 to 8:30 P.M., nine weeks' term (Cheney).

8 *General Physics** (2)

Brown, Cheney

The experimental evidence concerning the nature of light, electricity, and matter; practical developments of modern physics, such as X-ray apparatus, electron tubes, and radio. Prerequisite: Physics 6 and 7. Section A: Tues. and Thurs., 11:10 A.M.; section B: Tues. and Thurs., 5:10 P.M.

Summer Sessions 1941 (2)—daily except Sat., 5:10 P.M., six weeks' term (Brown).

* Physics 6, 7, and 8 constitute the basic course in Physics. Students who have credit for high school Physics from an accredited high school may omit Physics 3-4 or 5 as a prerequisite to Physics 6 and 7, provided that they pass a qualifying examination given at the beginning of the course (Physics 6 or Physics 7).

Before completing registration for Physics 5, 6, 7, or 8, each student must obtain from the representative of the Department an assignment to a class section.

- 55 *Physical Measurements* (2) Brown
Theory and use of the methods of precise measurement in the several fields of physics. Prerequisite: Physics 6 and 7. Prerequisite or concurrent registration: Mathematics 19. Lecture—Tues., 5:10 P.M. Laboratory—section A: Tues., 1:40 to 3:30 P.M.; section B: Tues., 7:40 to 9:30 P.M.

SECOND GROUP

- 113-14 *Molecular and Atomic Physics* (3-3) Teller
Constituent particles of matter; kinetic theory and the properties of macroscopic bodies; spectra and the structure of atoms and molecules; introduction to chemical physics. Prerequisite: Physics 8; Mathematics 20. Tues. and Thurs., 6:10 to 7:25 P.M.

- 116 *Optics* (3) Cheney
Geometrical optics; elementary theory of wave motion; interference, diffraction, polarization, and dispersion of light; laws of black-body radiation. Prerequisite: Physics 8; Mathematics 20. Offered in 1941-42 and alternate years, Mon., Wed., and Fri., 5:10 P.M.

- 121-22 *Mechanics and Heat* (3-3) Cheney
First semester: statics, elasticity, dynamics of solids and fluids, and gravitation; second semester: acoustics; thermometry; heat conduction; the laws of thermodynamics with applications to physical systems. Prerequisite: Physics 8; Mathematics 20. Offered in 1942-43 and alternate years, Mon., Wed., and Fri., 5:10 P.M.

- 125 *Principles of Electricity* (3) Cheney
Fundamental phenomena of electricity and magnetism; circuit theory, including elementary alternating-current circuits; terrestrial magnetism; atmospheric electricity. Prerequisite: Physics 8; Mathematics 20. Offered first semester. Offered in 1941-42 and alternate years, Mon., Wed., and Fri., 5:10 P.M.

- 132 *Electronics* (3) Brown
The phenomena of electron emission from solids; the physical properties of electron tubes, and the principles underlying their basic applications. Prerequisite: Physics 8 and 125 or Electrical Engineering 101. Offered second semester. Lecture—Mon. and Wed., 6:10 P.M. Laboratory—Tues., 7:30 to 9:30 P.M.

- 135 *High-Frequency Electrical Phenomena* (3) Brown
 High-frequency measurements; applications of electron tubes to high-frequency circuits, including amplifiers, oscillators, and modulated oscillators. Prerequisite: Physics 132. Offered first semester. Offered in 1941-42 and alternate years. Lecture—Mon. and Wed., 6:10 P.M. Laboratory—Thurs., 7:40 to 9:30 P.M.
- 143-44 *Modern Experimental Physics* (3-3) Brown
 Experimental methods for the study of the physical properties of electrons, atoms, and molecules. Offered in 1941-42 and alternate years. Lecture—Fri., 6:10 P.M. Laboratory—Tues. and Thurs., 7:40 to 9:30 P.M.
- 155-56 *Advanced Physical Measurements* (2-2) Brown
 An individual program of experiments arranged for each student in accordance with his preparation and his special interests. Prerequisite: Physics 55 and 116, 122, or 125. Offered in 1942-43 and alternate years.

THIRD GROUP

- 201-2 *Modern Physical Theories* (2-2) Gamow
 Elements of relativity, quantum theory, and nuclear physics. Prerequisite: Physics 113-14. Offered in 1942-43 and alternate years, Tues. and Thurs., 5:10 P.M.
- 211-12 *Classical Physical Theory* (3-3) Brown
 First semester: dynamics of systems of particles and of rigid bodies; generalized coordinates. Second semester: dynamics of elastic bodies and fluids; electromagnetic field theory. Prerequisite: Physics 121-22 and 125; Mathematics 132 and 171. Mon., Wed., and Fri., 5:10 P.M.
- 215 *Electrodynamics* (3) Teller
 Theory of moving electric charges; electric oscillations and the interactions between electric and magnetic fields and matter. Prerequisite: Physics 121-22 and 125; Mathematics 171. Offered in 1941-42 and alternate years, Mon. and Wed., 6:10 to 7:25 P.M.
- 216 *Theory of Elastic Bodies* (3) Seeger
 Statics of deformable bodies; theory of vibrating systems; wave propagation; applications to geophysics. Prerequisite: Physics

- 121-22; Mathematics 132. Offered in 1941-42 and alternate years, Mon., Wed., and Fri., 6:10 P.M.
- 217-18 *Statistical Physics* (3-3) Seeger
Kinetic theory of gases; foundations of classical and quantum statistics; fluctuations; thermodynamic properties of matter. Prerequisite: Physics 113-14, 121-22. Offered in 1942-43 and alternate years, Tues. and Thurs., 6:10 to 7:25 P.M.
- 221-22 *Quantum Mechanics* (3-3) Teller
Formulation and application of laws holding within the atom; the relation of these laws to those of classical physics. Prerequisite: Physics 113-14. Prerequisite or concurrent registration: Physics 211-12 or 215. Offered in 1942-43 and alternate years, Mon. and Wed., 6:10 to 7:25 P.M.
- 243 *Experimental Electronics* (3) Brown
Advanced laboratory work of research character. Prerequisite: Physics 132 and 143. Offered in either semester, admission by special permission.
- 261 *Nuclear Physics* (3) Gamow
Radioactivity, nuclear transformations, new particles; astrophysical applications. Prerequisite: Physics 113-14 and 211-12. Offered in 1941-42 and alternate years, Mon., Wed., and Fri., 5:10 P.M.
- 266 *Relativity and Gravitational Theory* (3) Gamow
Basic principles; relativistic mechanics and electrodynamics; theory of gravitation; cosmology. Prerequisite: Physics 215 or 211-12. Offered in 1941-42 and alternate years, Mon., Wed., and Fri., 5:10 P.M.
- 271 *Structure of Molecules* (3) Teller
Chemical physics with emphasis upon the chemical bond and on molecular spectra. Offered in either semester on a conference basis, admission by special permission.
- 273 *Structure of Metals* (3) Seeger
Theory of the motion of electrons in a crystal lattice, with applications to the physical properties of metals. Offered in either semester on a conference basis, admission by special permission.
- 275 *Structure of Stars* (3) Gamow
Advanced work on stellar structure and energy sources. Offered in either semester on a conference basis, admission by special permission.

- 291-92 *Seminar: Recent Developments in Physics (1-1)* The Staff
Individual investigations of special problems. All students registered for Master of Arts work in Physics are required to attend this seminar during the time they are working for this degree. They may register for credit for a maximum of three semester-hours. Mon., 8:00 to 10:00 P.M., alternate weeks.
- 299-300 *Thesis (3-3)* The Staff

SPECIAL METHOD COURSE

Biology 172, *Teaching of Science*

PHYSIOLOGY

Errett Cyril Albritton, A.B., M.D., *Professor of Physiology, Executive Officer*

Chester Elwood Leese, Ph.D., *Associate Professor of Physiology*

Alma Fogelberg, Ph.D., *Instructor in Physiology*

Robert Custis Grubbs, M.S., M.D., *Instructor in Physiology*

Fees.—For a statement of material fees, see page 25.

115 *Physiology* (3)

Leese and Staff

Lectures for academic students covering the fundamentals of physiology in its various subdivisions. Prerequisite: one year of general science or one semester of a biological science. Section A: Tues., Thurs., and Sat., 9:10 A.M.; section B: Tues. and Thurs., 5:00 to 6:25 P.M.

117 *Physiology* (1)

Fogelberg, Grubbs

Laboratory exercises in the fundamentals of physiology, for academic students. Prerequisite: Physiology 115 or the equivalent. The two, 115 and 117, may be taken concurrently. Sat., 10:10 A.M. to 1:00 P.M.

132 *Physiology*

Albritton

Intensive survey of vertebrate physiology, for medical students, based on prerequisite work in physics, biology, and chemistry, and establishing the concept of physiology as a science made up of causally interrelated variables. Eight hours a week, the first month.

134 *Experimental Physiology*

Albritton and Staff

Laboratory work and advanced lectures for medical students. The work of each student team is largely self-chosen, and pursued independently, both in nature and tempo, of other current work in the laboratory. Rigorous training is given in experimental method and in standards of scientific proof. Two hours of lectures and nine hours of laboratory work a week.

269-70 *Problems in Physiology*

Albritton and Staff

Hours and credits to be arranged.

272 *Experimental Method*

Albritton

Design of controlled experiments in medical or biological investigation; errors in design; criticism and judgment of evidence, and

tests of the statistical significance of experimental results. May be taken for one credit with additional work. Eight lectures, hours to be arranged.

274 *The Psycho-Physiology of Personality* Leese

Lectures on the genesis and expression of personality, with emphasis on the physiological approach. May be taken for one credit with additional work. Eight lectures, hours to be arranged.

275-76 *Research*

Hours and credits to be arranged.

Albritton and Staff

POLITICAL SCIENCE

Warren Reed West, Ph.D., *Professor of Political Science, Executive Officer*

William Crane Johnstone, Jr., Ph.D., *Professor of Political Science*

Henry Reining, Jr., Ph.D., *Professorial Lecturer on Public Administration*

John Albert Tillema, Ph.D., LL.M., S.J.D., *Associate Professor of Political Science*

John Withrow Brewer, Ph.D., *Associate Professor of International Law*

Karl Ernest Stromsem, Ph.D., *Lecturer on Public Administration*

Minimum requirements for the major.—Prerequisite: Political Science 9-10. Required: twenty-four semester-hours of second- or third-group courses in Political Science, including twelve semester-hours from Political Science 111, 112, 117, 121, 122, 171, 181, and 182; and nine semester-hours from one of the following groups: Group A, Political Science 115, 116, 124, 151, and 152; Group B, Political Science 121, 122, 127, 128, 130, and 141; Group C, Political Science 171, 181, 182, 192, 193, 194, and 294.

FIRST GROUP

9-10 *Government of the United States** (3-3) West, Brewer

Section A: Tues., Thurs., and Sat., 9:10 A.M.; section B: Mon., Wed., and Fri., 11:10 A.M.; section C: Tues. and Thurs., 5:10 to 6:25 P.M.

Summer Sessions 1941—Political Science 9 (3), section A: daily except Sat., 11:30 A.M., nine weeks' term (Tillema); section B: daily except Sat., 5:10 P.M., nine weeks' term (West). Political Science 10 (3), daily except Sat., 6:10 P.M., nine weeks' term (West).

SECOND GROUP*

111 *The Governments of Europe: The Older Democracies* (3)

Tillema

Mon., Wed., and Fri., 6:10 P.M.

112 *The New Governments of Europe* (3)

Tillema

Mon., Wed., and Fri., 6:10 P.M.

Summer Sessions 1941 (3)—daily except Sat., 5:10 P.M., nine weeks' term.

115 *Municipal Government* (3)

(Not offered in 1941-42.)

* Political Science 9-10 is prerequisite to all second-group courses.

- 116 *Political Parties* (3)
(Not offered in 1941-42.)
- 117 *Political Theory* (3) West
Mon., Wed., and Fri., 5:10 P.M.
- 121-22 *The Constitution of the United States* (3-3) West
Tues., Thurs., and Sat., 9:10 A.M.
- 124 *Legislative Organization* (3) West
Mon., Wed., and Fri., 5:10 P.M.
- 127 *Commercial Law: The Principles of Contract, Agency, and Bailments* (3) Tillema
Section A: Mon., Wed., and Fri., 9:10 A.M.; section B: Mon., Wed., and Fri., 5:10 P.M.
Summer Sessions 1941 (3)—daily except Sat., 6:10 P.M., nine weeks' term.
- 128 *Commercial Law: Negotiable Instruments and Corporations* (3) Tillema
Section A: Mon., Wed., and Fri., 9:10 A.M.; section B: Mon., Wed., and Fri., 5:10 P.M.
- 129 *Commercial Law* (3) Tillema
Primarily for accountants. Tues. and Thurs., 5:10 to 6:25 P.M.
- 130 *Admiralty* (3) Tillema
Tues. and Thurs., 5:10 to 6:25 P.M.
- 141 *The Development of Legal Institutions* (3) Brewer
An introduction to classic Roman law and to English common law before 1700. Approval of instructor required. Tues. and Thurs., 11:10 A.M. to 12:25 P.M.
- 151-52 *Public Administration* (2-2) Reining, Stromsem
Tues. and Thurs., 5:10 to 6:25 P.M.
- 161-62 *Administrative Law* (3-3)
Hours to be arranged.
- 171 *International Politics and Organization* (3) Johnstone
Mon., Wed., and Fri., 6:10 P.M.
Summer Sessions 1941 (3)—daily except Sat., 5:10 P.M., nine weeks' term.
- 181-82 *International Law* (3-3) Brewer
Mon., Wed., and Fri., 10:10 A.M.

- 192 *The Near East: Politics and Government since 1878* (3) Johnstone

Mon., Wed., and Fri., 6:10 P.M.

- 193 *The Far East: Politics and Government to 1894* (3) Johnstone

Mon., Wed., and Fri., 11:10 A.M.

- 194 *The Far East: Politics and Government since 1894* (3) Johnstone

Mon., Wed., and Fri., 11:10 A.M.

- 199-200 *Proseminar: Readings for International Relations Major* (3-3) Johnstone

Hours to be arranged.

THIRD GROUP

- 209-10 *Seminar* (3-3) West
(Not offered in 1941-42.)

- 244 *Seminar: Public Personnel Problems* (3) Hubbard
Prerequisite: Personnel Psychology in the Public Service or equivalent experience. Admission by permission of adviser. A study of such problems as employee selection, rating, training, and placement. Particular emphasis will be placed upon personnel problems related to current national events. Wed., 7:40 P.M.

- 281-82 *Seminar: International Law and Relations* (3-3) Johnstone, Brewer
First semester: Tues., 8:10 to 10:00 P.M.; second semester: Mon., 8:10 to 10:00 P.M.

Summer Sessions 1941—Political Science 281 (3), Tues. and Thurs., 8:10 P.M., nine weeks' term (Johnstone).

- 294 *Seminar: Politics and Governments in the Pacific Area* (3) Johnstone

Tues., 8:10 to 10:00 P.M.

- 299-300 *Thesis* (3-3) The Staff
Hours to be arranged.

PSYCHIATRY

Winfred Overholser, A.B., M.D., Sc.D., *Professor of Psychiatry, Executive Officer*

Roscoe Willis Hall, Ph.B., M.D., *Clinical Professor of Psychiatry*

John Edward Lind, M.D., *Clinical Professor of Psychiatry*

Solomon Katzenelbogen, M.D., *Clinical Professor of Psychiatry*

Paul Jacob Ewerhardt, M.D., *Clinical Instructor in Psychiatry*

Harriet Elizabeth Twombly, A.B., M.D., *Clinical Instructor in Psychiatry*

Addison McGuire Duval, M.D., *Clinical Instructor in Psychiatry*

Samuel Alexander Silk, Ph.G., M.D., *Clinical Instructor in Psychiatry*

Alice Heyl Kiessling, A.B., M.D., *Clinical Instructor in Psychiatry*

Edgar Deucher Griffin, A.B., M.D., *Clinical Instructor in Psychiatry*

136 *Introductory Medical Psychology*

Lind

Theoretical and practical aspects of the constitution, character, and personality as related to Medicine; psychological features in various diseases; types of character development and their ways of adaptation. One hour a week for sixteen weeks.

278 *Organic Psychopathology*

Hall

Common organic-reaction types, illustrated with suitable case presentations. One hour a week.

366 *Psychiatry*

Overholser

Major psychoses, illustrated by the presentation of clinical material and utilized for the purpose of explaining the fundamental psychological mechanisms involved. St. Elizabeths Hospital. One hour a week.

368 *Psychosomatic Aspects of General Medicine*

Katzenelbogen

Somatic disorders of functional origin versus organic structural disorders. The role of personality reactions in somatic disorders (illustrative cases). Gallinger Hospital. One hour a week.

370 *Personality Adjustments*

Ewerhardt

Maladaptations occurring in childhood and youth. One hour a week for eight weeks.

473-74 *Ward Work*

The Staff

Personal mental examinations and formal written report of the examination of the various types of psychosis, followed by a re-

view of the cases with an instructor. St. Elizabeths Hospital. Two hours a week.

475 *Psychoneurosis*

Lind

The descriptive aspects, the etiology, the psychopathology, and the treatment of the various psychoneuroses. St. Elizabeths Hospital. One hour a week for twelve weeks.

The functional reading-approach method of Gregg Shorthand; dictation and speed practice. Section A: daily except Sat., 9:10 A.M.; section B: daily except Sat., 5:10 P.M.
- 12 *Intermediate Shorthand* (5) Veon
Emphasis on shorthand principles, dictation, and speed practice. Prerequisite: Secretarial Studies 11 or equivalent; ability to take dictation at 60 words a minute. Section A: daily except Sat., 9:10 A.M.; section B: daily except Sat., 5:10 P.M.
- 15-16 *Transcription* (3-3)
The development of a broad shorthand vocabulary and of speed and accuracy in transcription from shorthand notes. Prerequisite: Secretarial Studies 1, 2, 11, and 12, or equivalent; ability

to take shorthand at 80 words a minute and to transcribe accurately. Section A: Mon., Wed., and Fri., 1:10 to 3:00 P.M.; section B: Mon., Wed., and Fri., 5:10 to 7:00 P.M.

17-18 *Reporting* (3-3)

High-speed dictation; transcription. Prerequisite: Secretarial Studies 1, 2, 11, 12, and 15-16, or equivalent; ability to take dictation at 120 words a minute. Mon., Wed., and Fri., 6:10 to 8:00 P.M.

21-22 *Business Occupations* (2-2)

Veon

Survey of the functions and activities of business firms in which stenographers and secretaries are employed. Tues. and Thurs., 10:10 A.M.

23 *Filing and Indexing* (2)

Study of the various systems and methods of filing correspondence, card records, etc. Practice in the use of filing and indexing equipment. Tues. and Thurs., 6:10 P.M.

28 *Business Machines* (2)

Thorough training in the use and operation of equipment such as dictating and transcribing machines, long-carriage tabulating machines, mimeograph and gelatin duplicators, adding and calculating machines. (Not offered in 1941-42.)

32 *Secretarial Practice* (3)

Veon

The testing of fitness for and the techniques of securing a secretarial position; laboratory projects involving progressively difficult duties as stenographer in the general office, secretary to the general manager, and secretary to the head of the business concern. Prerequisite: Secretarial Studies 1, 2, 11, 12, 15, 23, 41-42, and 51, or equivalent. Section A: Mon., Wed., and Fri., 9:10 to 11:00 A.M.; section B: Mon., Wed., and Fri., 7:10 to 9:00 P.M.

34 *Review of Gregg Shorthand Theory* (3)

Review of the principles of Gregg Shorthand; shortcuts of words and phrases; analysis of the types of dictations received by employed students enrolled in the class. Mon., Wed., and Fri., 6:10 P.M.

37 *Secretarial Techniques for the Government Employee* (3)

Analysis of methods for improving the efficiency of secretaries in the Federal Government; time-saving devices stressed. Mon., Wed., and Fri., 5:10 P.M.

41-42 *Secretarial Accounting* (3-3)

Review of the fundamentals of business arithmetic; elementary principles of bookkeeping; practice in accounting requirements of professional men, schools, hospitals, mercantile organizations, etc. For those preparing for secretarial positions which necessitate the keeping of an employer's private accounts. Mon., Wed., and Fri., 5:10 P.M.

51-52 *Business Correspondence* (3-3)

Training in the composition of effective business letters; special emphasis on service, adjustment, collection, and sales letters; the writing of brief reports and articles; study of words and vocabulary building. Prerequisite: English 1 and 2. Section A: Mon., Wed., and Fri., 11:10 A.M.; section B: Mon., Wed., and Fri., 6:10 P.M. Veon

54 *Secretarial Correspondence for Government Employees* (3)

Letter appraisal and the principles of good writing applied to correspondence and reports in the Federal Government. Designed for the secretary, not the executive. Tues. and Thurs., 5:10 to 6:30 P.M.

57 *Review of English Usage for Government Secretaries* (2)

An intensive review of grammar, punctuation, capitalization, sentence structure, etc. Text: *Government Printing Office Style Manual*, which is supplemented by style manuals of various governmental departments and agencies. Tues. and Thurs., 6:10 P.M.

65 *Business Law* (3)

Introducing the secretary to legal problems involved in contracts, agency, negotiable instruments, sales, insurance, and partnerships. Mon., Wed., and Fri., 5:10 P.M.

SOCIOLOGY

Carl Douglas Wells, B.D., Ph.D., *Associate Professor of Sociology,*
Executive Officer

James Allen Nolan, Ph.D., *Lecturer in Sociology*

The major.—Prerequisite: Sociology 27 and 28. Required: twenty-four semester-hours of second- and third-group courses in Sociology. With special permission, a maximum of six semester-hours of the following closely related courses may be counted toward the major: Economics 141, 142, and 146; History 171-72; Philosophy 132; Psychology 125, 151, and 154; Statistics 102. Additional courses from this list are highly recommended as electives.

FIRST GROUP

27 *Organization of Society* (3) Wells

The origin and development of culture; man's social nature; types of groups and social institutions; social processes; social change and social control. Section A: Mon., Wed., and Fri., 10:10 A.M.; section B: Mon., Wed., and Fri., 5:10 P.M.

Summer Sessions 1941 (3)—daily except Sat., 8:30 A.M., nine weeks' term.

28 *Problems of Society* (3) Wells

Geographic and population problems; psycho-physical problems; problems of race and nativity, social institutions, and social control. Section A: Mon., Wed., and Fri., 10:10 A.M.; section B: Mon., Wed., and Fri., 5:10 P.M.

Summer Sessions 1941 (3)—daily except Sat., 7:30 A.M., nine weeks' term.

SECOND GROUP

121 *Educational Sociology* (3) Wells

The relation of the school to the community; school culture; social control in the school; sociological principles for the construction of the curriculum. Offered in 1941-42 and alternate years, Mon., Wed., and Fri., 6:10 P.M. Offered in 1942-43 and alternate years, Mon., Wed., and Fri., 11:10 A.M.

125 *Rural Sociology* (3) Wells

The origin and development of rural culture; types of rural communities; rural social institutions and personalities; relation to city life; present rural problems and rural planning. (Not offered in 1941-42.)

126 *Urban Sociology* (3)

The origin and growth of cities; types of cities; their social structure, composition, functions, and problems; urban person-

- alities and institutions; urbanization and social control; city planning. Mon., Wed., and Fri., 11:10 A.M.
- 135 *Child-Welfare Problems* (3) Nolan
Social aspects of infant and child morbidity and mortality; socializing the child through the home, play group, and school; the physically handicapped child; dependent children; child labor; juvenile delinquency. Tues. and Thurs., 6:35 to 7:50 P.M.
- 136 *Criminology* (3) Nolan
The nature, types, and distribution of crime; causes of criminal behavior; the machinery of justice; types of treatment; recidivism; rehabilitation; crime-prevention programs. Field trips to local penal institutions. Tues. and Thurs., 6:35 to 7:50 P.M.
- 145 *Social Control* (3) Wells
History of social control; the systems, techniques, and fields of social control; social control and the future of civilization. Mon., Wed., and Fri., 6:10 P.M. (Not offered in 1941-42.)
- 146 *Social Planning* (3) Wells
Utopian social planning; sociological principles basic to sound social planning; fields of present growth in social planning; social planning and the New Deal; limitations of social planning. Mon., Wed., and Fri., 6:10 P.M. (Not offered in 1941-42.)
- 151 *Social Research* (3)
Case study, life history, survey, and other tools of research will be studied, examples in literature examined, and some practice given in their use. Offered in 1941-42 and alternate years, Mon., Wed., and Fri., 11:10 A.M. Offered in 1942-43 and alternate years, Mon., Wed., and Fri., 6:10 P.M.
- 176 *The Modern Family* (3) Wells
Historical backgrounds; role of the family in development of personality and society; modern problems of celibacy, courtship, marriage relations, economic adjustment, parent-child relations. Offered in 1941-42 and alternate years, Mon., Wed., and Fri., 6:10 P.M. Offered in 1942-43 and alternate years, Mon., Wed., and Fri., 11:10 A.M.
- 199-200 *Proseminar for Major Students* (3-3) Wells
Hours to be arranged.
- THIRD GROUP
- 215-16 *Seminar* (3-3) Wells
Community studies and other types of original research. Hours to be arranged. (Not offered in 1941-42.)
- 299-300 *Thesis* (3-3) Wells

STATISTICS

Frank Mark Weida, Ph.D., *Professor of Statistics, Executive Officer*

John Randolph Rigglesman, Ph.D., *Lecturer in Statistics*

Walter Frederick Crowder, Ph.D., *Lecturer in Statistics*

Solomon Kullback, Ph.D., *Lecturer in Statistics*

Minimum requirements for the major.—Prerequisite: Mathematics 11, 12, 19, and 20; Psychology 1 and 2; an introductory course in one of the Social Sciences, one of the Biological Sciences, or one of the Physical Sciences. Required: an understanding of the underlying mathematical theory employed to characterize, compare, and elucidate quantitative or qualitative measurements which is found in (1) the history of statistics, (2) characterization numbers, (3) correlation, (4) frequency distributions and time series, (5) graphical analysis, and (6) collection and presentation of statistical data; a minimum of twenty-four semester-hours of second-group courses in departments unrelated to Statistics. For further details, see the pamphlet on this subject or consult the adviser.

Fees.—For a statement of laboratory fees, see page 26.

FIRST GROUP

†1-2 *Elementary Statistics* (3-3)

The Staff

Introduction to scientific method of gathering and tabulating properties and measures of attributes: elementary principles of their analysis and their limitations and interpretations in various fields of knowledge. Prerequisite: at least one entrance unit in Algebra. Lecture—section A: Mon. and Wed., 11:10 A.M.; section B: Tues. and Thurs., 5:10 P.M. Laboratory—section M: Mon. and Wed., 12:10 to 1:00 P.M.; section N: Mon., 7:10 to 9:00 P.M.; section O: Tues., 7:10 to 9:00 P.M.

SECOND GROUP

†101-2 *Economic and Sociological Statistics* (3-3)

Weida and Staff

Sources of data; collecting and assembling of statistics; tabulation; graphical analysis; averages; measures of dispersion; frequency distributions; index numbers; time series; the normal curve; correlation. Prerequisite: at least one entrance unit in Algebra. Lecture—section A: Tues. and Thurs., 11:10 A.M.; section B: Tues. and Thurs., 5:10 P.M. Laboratory—section P: Wed., 7:10 to 9:00 P.M.; section Q: Thurs., 7:10 to 9:00 P.M.; section R: Fri., 7:10 to 9:00 P.M.; section S: Tues. and Thurs., 12:10 to 1:00 P.M.

Summer Sessions 1941 (3-3)—daily except Sat., 6:10 to 8:00 P.M., nine weeks' term (Weida).

- 103 *Charts and Graphs* (3) Riggleman
Construction, reproduction, publication, and use of statistical charts, graphs, and maps, particularly in the fields of economics, business, and sociology. Prerequisite: at least one entrance unit in Algebra. Offered in 1942-43 and alternate years, Tues. and Thurs., 6:35 to 7:50 P.M.
- 104 *Advanced Economic and Sociological Statistics* (3) Kullback
Advanced study of correlation analysis and frequency analysis; and of sources, their uses and limitations. A thorough study of the problems of practical sampling and the methods of analysis. Prerequisite: Statistics 101-2. Mon., Wed., and Fri., 6:10 P.M.
- 106 *Statistical Analysis of Economic Fluctuations* (3) Crowder
Analysis of prices, price movements, production, employment, cost of living; technique of analyzing business cycles and structural changes in the economy; forecast of business changes. Prerequisite: Statistics 101-2; Economics 1-2. Tues. and Thurs., 5:10 P.M.; third hour to be arranged.
- 107 *Econometrics* (3) Weida
Mathematical methods applied by classical and modern writers to exchange, production, supply and demand, utility and disutility, and interest and taxation. Prerequisite: Statistics 101-2; Mathematics 20. Offered in 1942-43 and alternate years, Mon., Wed., and Fri., 7:10 P.M.
- 111 *Index Numbers* (3) Crowder
Types of index numbers developed and compared; methods of weighting; the reversal and circular tests; speed of calculation and other practical considerations. Prerequisite: Statistics 101-2. Tues. and Thurs., 5:10 P.M.; third hour to be arranged.
- 112 *Mechanical Tabulation* (3) Riggleman
The theory and use of the various sorting and tabulating machines; code cards and their preparation for particular and extensive types of analysis. Prerequisite: at least one entrance unit in Algebra. Offered in 1942-43 and alternate years, Tues. and Thurs., 6:35 to 7:50 P.M.
- †113-14 *Business and Government Statistics* (3-3) Riggleman
External statistics; internal data; statistical technique in forecasting, market analysis, time and wage studies; investment analysis, price situations. Prerequisite: Statistics 101-2. Tues. and Thurs., 6:35 to 7:50 P.M.
- 115 *Applied Sampling* (3)
Theory of sampling, its application and limitations; detailed

consideration of stratified and directed sampling; practical exterior tests of reasonableness, representativeness, and adequacy. Prerequisite: Statistics 101-2. (Not offered in 1941-42.)

116 *Organization and Management in Statistical Work* (3)

Planning projects; estimating costs; conducting surveys; use of mechanical equipment; organization of a statistical department; selection and management of personnel. Prerequisite: Statistics 101-2. (Not offered in 1941-42.)

129 *Introduction to Statistics in Psychology and Education* (3)

The Staff

Graphical presentation; tabulation; averages; measures of representativeness, reliability, and variation; simple correlation. Prerequisite: at least one entrance unit in Algebra. Mon., Wed., and Fri., 10:10 A.M.

Statistics 129x—same as Statistics 129, but offered second semester. Mon., Wed., and Fri., 5:10 P.M.

†131-32 *Statistics in Psychology and Education* (3-3) Weida and Staff

Sources of data; assembling of statistics; tabulation; graphical analysis; averages; dispersion; frequency distributions; intelligence and achievement quotients; normal curve; correlation. Prerequisite: at least one entrance unit in Algebra. Lecture—Tues. and Thurs., 6:10 P.M. Laboratory—section O: Tues., 7:10 to 9:00 P.M.; section Q: Thurs., 7:10 to 9:00 P.M.

Summer Sessions 1941 (3)—daily except Sat., 5:10 P.M., nine weeks' term (Weida).

134 *Factor Analysis* (3)

Weida

The resolution of mental abilities into factors; the two-factor theory; the multiple-factor theory; tetrads and tetrad differences; tetrad correlation and reliability; overlapping variables. Prerequisite: Statistics 131-32. Mon., Wed., and Fri., 5:10 P.M.

155 *Medical Biometry and Statistics* (3)

Weida

Sources of data; collecting and assembling of statistics; tabulation; averages; measures of dispersion; frequency functions; simple sampling; correlations; chi and other tests. Prerequisite: at least one entrance unit in Algebra. Mon., Wed., and Fri., 7:10 P.M.

157-58 *Intermediate Theoretical Statistics* (3-3)

Kullback

Adjustment of observations; curve fitting; design of experiment; simple sampling; theories of dispersion; expectation; frequency

functions; Thiele's semi-invariants; Gram-Charlier series. Prerequisite: Mathematics 20. Mon., Wed., and Fri., 5:10 P.M.

161 *Analysis of Variance* (3) Kullback

A simple technique for segregating from comparable groups of data the variation traceable to specific sources; a method to estimate the experimental error freed of that part of the variability of which the origin is known. Prerequisite: Statistics 101-2. Mon., Wed., and Fri., 6:10 P.M.

169 *History of Statistics* (3) Weida

The origin, development, and importance of various statistical conceptions; the work and life of the contributors to statistical theory and practice. Prerequisite: Statistics 101-2, 157-58, or the equivalent. Hours to be arranged.

†199-200 *Proseminar: Theoretical and Applied Statistics* (3-3) Weida

This course is designed to coordinate the content of the baccalaureate major. Admission by permission of the instructor. Hours to be arranged.

THIRD GROUP

†255-56 *Probability* (2-2) Weida

Scope; classical definition, limit definition; Bayes' theorem; Bernoulli's theorem; expectation; law of large numbers; probabilities in continuum; limit theorems; distribution laws. Admission by permission of the instructor. Offered in 1942-43 and alternate years, Mon. and Wed., 6:10 P.M.

†257-58 *Advanced Theoretical Statistics* (3-3) Weida

Contour integrals; characteristic functions; matrices; quadratic forms; sampling theory; measures of relation; contingency analysis; maximum likelihood; individual differences. Admission by permission of the instructor. Offered in 1941-42 and alternate years, Mon., Wed., and Fri., 6:10 P.M.

261 *Numerical Analysis* (3) Weida

Interpolation; numerical differentiation and integration; mechanical quadrature and cubature; numerical solution of differential and integral equations. Admission by permission of the instructor. Mon., Wed., and Fri., 5:10 P.M.

†263-64 *Statistical Inference* (2-2) Kullback

Sample space; methods for estimating population parameters; fiducial inference and its application to testing hypotheses; Ney-

man-Pearson theory of testing hypotheses. Admission by permission of the instructor. Tues. and Thurs., 6:10 P.M.

- †265-66 *Multivariate Analysis* (2-2) Kullback
Multivariate normal distribution; sample variances and covariances; tests of significance; problems of estimation. Admission by permission of the instructor. Offered in 1942-43 and alternate years, Tues. and Thurs., 6:10 P.M.

- †267-68 *Characteristic Functions, Theory and Applications* (2-2)
Fourier integrals; set functions; inversion formulas; limit theorems; applications to the distribution problem in statistics. Admission by permission of the instructor. (Not offered in 1941-42.)

- †295-96 *Seminar: Applied Statistics* (3-3) Weida
Reading and research in applied statistics. Admission by permission of the instructor. Hours to be arranged.

- †297-98 *Seminar: Theoretical Statistics* (3-3) Weida
Reading and research in theoretical statistics. Admission by permission of the instructor. Hours to be arranged.

- †299-300 *Thesis* (3-3) The Staff
Hours to be arranged.

SURGERY

- Charles Stanley White, M.D., *Professor of Surgery, Executive Officer*
 Daniel LeRay Borden, A.M., M.D., *Clinical Professor of Surgery*
 Harry Hyland Kerr, M.D.C.M., *Clinical Professor of Surgery*
 Paul Stirling Putzki, M.D., *Clinical Professor of Surgery*
 Arch Lockhart Riddick, B.S., M.D., *Clinical Professor of Surgery*
 William Berry Marbury, M.D., *Clinical Professor of Surgery*
 Custis Lee Hall, M.D., *Clinical Professor of Surgery*
 James Ross Veal, A.B., M.D., *Adjunct Clinical Professor of Surgery*
 John Hugh Lyons, M.S., M.D., *Associate Clinical Professor of Surgery*
 Herbert Hermann Schoenfeld, M.D., *Associate Clinical Professor of Surgery*
 William Warren Sager, M.S., M.D., *Associate Clinical Professor of Surgery*
 Guy Whitman Leadbetter, B.S., M.D., *Assistant Clinical Professor of Surgery*
 Benjamin Franklin Dean, Jr., M.S., M.D., *Assistant Clinical Professor of Surgery*
 Alec Horwitz, M.S., M.D., *Assistant Clinical Professor of Surgery*
 Cline N. Chipman, M.D., *Associate in Anesthesia*
 Richard Knight Thompson, D.D.S., *Associate in Dental Surgery*
 Philip Oscar Pelland, M.D., *Clinical Instructor in Surgery*
 Nathan Norman Smiler, M.D., *Clinical Instructor in Surgery*
 Edward Alexander Cafritz, M.D., *Clinical Instructor in Surgery*
 Hazen Eugene Cole, B.S., M.D., *Clinical Instructor in Surgery*
 Crenshaw Douglas Briggs, B.S., M.D., *Clinical Instructor in Surgery*
 William Wiley Chase, A.B., M.D., *Clinical Instructor in Surgery*
 Julius Salem Neviaser, A.B., M.D., *Clinical Instructor in Surgery*
 James Lloyd Collins, A.B., M.D., *Clinical Instructor in Surgery*
 William Ross Morris, M.D., *Clinical Instructor in Surgery*
 Arthur James Mourot, B.S., M.D., *Clinical Instructor in Surgery*
 Donald Harrison Stubbs, A.M., M.D., *Clinical Instructor in Surgery*
 William Carey Meloy, M.D., *Clinical Instructor in Surgery*
 Joseph Francis Conlon, D.D.S., *Clinical Instructor in Dental Surgery*
 Otto Anderson Engh, M.D., *Clinical Instructor in Surgery*
 Charles Seymour Coakley, M.D., *Clinical Instructor in Anesthesia*
 Duane Case Richtmeyer, M.D., *Clinical Instructor in Surgery*
 Richard Lee Jackson, M.D., *Clinical Instructor in Surgery*

- 138 *Introductory Surgical Clinics (elective)* White and Staff
Obvious and classical cases are presented to the student, whose background of the structure of the body serves to give him an understanding of the cases. Two hours a week.
- 279-80 *General Surgery* Borden, Sager
Course of lectures and recitations covering surgical diseases of the neck and chest, herniae, amputations, and pre- and post-operative treatment. One hour a week for twenty-eight weeks.
- 281 *Anesthesia (elective)* Chipman
Theoretical and practical instruction is given in the use of general and local anesthetic agents. One hour a week for nine weeks.
- 282 *Fractures and Dislocations* Leadbetter
One hour a week.
- 283 *Surgical Technique* Marbury
Series of demonstrations of surgical instruments and appliances. The preparation of the patient, the operating room, the materials commonly used, and the duties of each member of an operating team. One hour a week.
- 371-72 *General Surgery* Putzki, Riddick
Course of lectures and recitations covering surgery as applied to the neck, thorax, gastro-intestinal tract, and the bones and skeletal muscles. One hour a week.
- 373-74 *Ward Walks* The Staff
Well-organized group ward-rounds are made with the visiting physicians and their respective staffs in the course of their usual rounds. Gallinger and Emergency hospitals.
- 375-76 *Surgical Clinic* The Staff
Clinical teaching and demonstrations on the care of the various surgical diseases, with special emphasis on the pre- and post-operative management. Gallinger and Emergency hospitals.
- 379-80 *Surgical Clinic* White and Staff
Demonstration to the entire class of the various surgical diseases, with stress upon the differential diagnosis and pre- and post-operative care. Gallinger Hospital. One hour a week.
- 381-82 *Clinical Clerkship* The Staff
The student is assigned and required to work up thoroughly the cases for diagnosis and treatment. Gallinger and Emergency hospitals.

- 478 *Orthopedics* Hall
Etiology, pathology, symptomatology, and treatment of congenital and acquired diseases of the bones and joints, and the clinical instruction in treatment and in the use of appliances for the correction of deformities. One hour a week.
- 479-80 *Private Practice of Surgery (elective)* White and Staff
The student will be given instruction in the private offices of various members of the staff, where he may observe the private practice of surgery.
- 481 *General Surgery* White
One hour a week.
- 483-84 *Dispensary Clinic* The Staff
Dispensary instruction in the principles and practice of surgery. Instruction of small groups is given in general surgery and the specialties, including anesthesia, neurosurgery, orthopedics, proctology, and oral surgery. University and Emergency hospitals.
- 485-86 *Special Problems in Surgery* Sager, Dean
General surgical diagnosis, with special emphasis on the diagnosis and differential diagnosis of surgical diseases and post-operative complications. One hour a week.
- 488 *Surgical Clinic* Borden and Staff
Demonstration to the entire class of the various surgical diseases. One hour a week.
- 489 *Surgical Anatomy* Horwitz
One hour a week.

UROLOGY

Frederick August Reuter, M.D., *Professor of Urology, Executive Officer*
 Thomas Carlton Thompson, B.S., M.D., *Clinical Professor of Urology*
 Alan Jeffries Chenery, M.D., *Associate in Urology*
 Charles Perry Howze, M.D., *Associate in Urology*
 Gilbert Ottenberg, A.M., M.D., *Clinical Instructor in Urology*
 William Glenn Young, M.D., *Clinical Instructor in Urology*
 Gerald Arthur Hopkins, B.S., M.D., *Clinical Instructor in Surgery*

491-92 *Urology*

Reuter

Lectures covering the entire field of urology, including diagnosis, treatment, and morbid pathology. One hour a week.

493-94 *Clinics*

The Staff

Clinical teaching and demonstrations on the care of urological cases, with special emphasis on the pre- and post-operative management. Operative clinics and clinical teaching. Gallinger and Children's hospitals.

495-96 *Clinics*

Reuter and Staff

Clinical demonstrations and teaching in the dispensary, with special attention given to diagnostic procedures. Emergency and University hospitals. One part of each section daily.

ZOOLOGY*

Donnell Brooks Young, Ph.D., *Professor of Zoology*

Ira Bowers Hansen, Ph.D., *Associate Professor of Zoology, Executive Officer*

Lloyd Ancil Spindler, Sc.D., *Lecturer in Zoology*

Edith Elizabeth Mortensen, A.M., *Instructor in Zoology*

The major.—Prerequisite: Zoology 1-2. The student must at the end of his senior year exhibit a correlated knowledge of the following fields: (1) classification, structure, and ecological relations of animals, both invertebrate and vertebrate; (2) embryological development and life histories of important animal types; (3) general principles of physiology, heredity, and evolution; (4) the development of biological principles, hypotheses and theories as revealed in the study of the history of Zoology.

The student will obtain this knowledge in part by taking courses offered in these fields and in part by individual study under the direction of his adviser. For further details, see the pamphlet on this subject or consult the adviser.

Premedical students are required to take Zoology 1-2.

Fees.—For a statement of material fees, see page 26.

FIRST GROUP

†1-2 *Introduction to Zoology* (4-4)

Young, Mortensen

An introduction to the study of the structure, functions, and relation of animals, and of the fundamental biological principles involved. Section A: Tues. and Thurs., 9:10 A.M.; section B: Mon. and Fri., 5:10 P.M. Laboratory—section M: Tues. and Thurs., 11:10 A.M. to 1:00 P.M.; section N: Tues. and Thurs., 1:40 to 3:30 P.M.; section O: Mon. and Wed., 8:00 to 10:00 P.M.

Summer Sessions 1941 (4-4)—daily except Sat., 5:10 to 6:00 and 6:10 to 9:00 P.M., nine weeks' term (Young).

†5-6 *Field Zoology* (3-3)

Summer Sessions—offered in 1942 and alternate summers.

SECOND GROUP

†101-2 *Invertebrate Zoology* (3-3)

Mortensen

A systematic study of invertebrate forms, including the study of morphology, classification, life histories, and phylogenetic relationships. Occasional field trips. Prerequisite: Zoology 1-2 or Biology 1-2. Offered in 1941-42 and alternate years, Mon. and

* See also the Departments of Biology and Botany, pages 166 and 169.

Fri., 1:40 to 4:30 P.M. Offered in 1942-43 and alternate years,
Tues. and Thurs., 7:10 to 10:00 P.M.

¹³⁴ *Ornithology* (3)

The birds of eastern North America. Tues., 5:10 P.M. Laboratory—hours to be arranged.

¹³⁷ *Histology* (3)

Young

An introduction to the microscopical anatomy of normal tissues and organs. Prerequisite: Zoology 1-2. Fri., 6:10 P.M. Laboratory—Mon. and Wed., 6:10 to 8:00 P.M.

¹⁴¹⁻⁴² *Comparative Vertebrate Anatomy* (3-3)

Hansen

Lectures on the organ systems of the vertebrates; laboratory dissections of types. Prerequisite: Zoology 1-2. Section A: Fri., 9:10 A.M.; section B: Fri., 6:10 P.M. Laboratory—section M: Mon. and Fri., 1:40 to 3:30 P.M.; section N: Mon. and Wed., 6:10 to 8:00 P.M.

¹⁴⁴ *Introduction to Vertebrate Embryology* (3)

Hansen

The origin and early development of the individual and the formation of organ systems. Emphasis is placed on the frog, chick, and pig, with reference to the human embryo. Prerequisite: Zoology 1-2, and 141 or 142. Section A: Wed., 9:10 A.M.; section B: Wed., 6:10 P.M. Laboratory—section M: Tues. and Thurs., 1:40 to 3:30 P.M.; section N: Mon., 6:10 to 8:00 P.M., and Wed., 7:10 to 9:00 P.M.

¹⁴⁷⁻⁴⁸ *Experimental Morphology* (3-3)

Hansen

Lectures and class reports on experimental morphology. Prerequisite: Zoology 141-42 or the equivalent. Offered in 1941-42 and alternate years, Mon., Wed., and Fri., 5:10 P.M.

¹⁵⁶ *Parasitology* (3)

Spindler

An introduction to the study of animal parasitology, with a survey of parasitic types from protozoa through arthropods. Prerequisite: Zoology 1-2. Mon. and Wed., 6:10 to 8:00 P.M., and Fri., 6:10 P.M.

THE GRADUATE ENDOWMENT FUND

The Graduate Endowment Fund was founded by the class of 1926 with the object of providing endowment to be used for the development of the University. Membership is limited to seniors and graduates who sign a pledge of \$100, payable annually in ten equal installments.

The pledge notes and funds are held in trust. When the principal reaches the sum of \$100,000, the Board of Administrators of the Fund may pay to the University such sums as it may vote for erection of buildings, acquisition of sites, maintenance, and purchase of equipment. At no time may money be drawn so as to leave a balance of less than \$50,000 on deposit.

On request, the Alumni Secretary of the University will furnish pledge blanks to alumni.

HONOR SOCIETIES

Phi Beta Kappa.—A national honor society recognizing "outstanding intellectual capacity well employed" in the field of liberal arts and sciences. Senior and junior students who are candidates for the degree of Bachelor of Arts or Bachelor of Science in Columbian College (in exceptional cases, senior and junior students in other non-professional divisions of the University) and who have shown broad cultural interests, distinguished scholarly achievement, high character, general promise, and scholarly ideals may, to a number not exceeding 15 per cent of a class, be elected to membership by the Faculty members of the Alpha Chapter of the District of Columbia.

Sigma Xi.—A national scientific honor society, the purpose of which is to encourage original investigation in science pure and applied. Outstanding graduate students in the sciences are eligible for full membership, and undergraduates who have shown marked ability in research may be elected to associate membership.

Order of the Coif.—A national legal society, the purpose of which is to foster a spirit of careful study and to mark in a fitting manner those who have attained a high grade of scholarship. Members are elected each year from the highest 10 per cent of the graduating class of the Law School.

Sigma Tau.—A national engineering fraternity, the purpose of which is to recognize scholarship and professional attainment.

Alpha Lambda Delta.—A national fraternity established to encourage and reward high scholarship and attainment, membership in which is limited to those freshman women who attain a scholastic average of at least 3.50.

Artus.—A national economics society.

Delphi.—An intersorority society.

Delta Sigma Rho.—A national forensic honor society.

Gate and Key.—An interfraternity society.

Iota Sigma Pi.—A national honorary chemical society for women.

Kappa Kappa Psi.—A national honorary fraternity, the purpose of which is to encourage good fellowship, leadership, scholarship, and musical ability among college band members.

Mortar Board.—A national honorary society for senior college women, stressing leadership, scholarship, and service.

Omicron Delta Kappa.—A national fraternity emphasizing leadership in extracurricular activities.

Phi Eta Sigma.—A national fraternity established to encourage and reward high scholarship and attainment, membership in which is limited to those freshman men who attain a scholastic average of at least 3.50.

Pi Gamma Mu.—A national social-science society.

Pi Lambda Theta.—A national honorary fraternity for women in the field of education.

Sigma Gamma Epsilon.—A national honorary geology fraternity.

Sigma Pi Sigma.—A national honorary physics fraternity.

Smith-Reed-Russell Society.—A scholastic society in the School of Medicine. Students of the third and fourth years who maintain a scholastic average of 86 per cent are eligible for associate membership.

William Beaumont Medical Society.—A society founded with the object of encouraging and stimulating medical students in work of individual investigation.

STUDENTS REGISTERED

1940-41

The names of all students registered during the regular sessions in all Colleges, Schools, and Divisions of the University appear in alphabetical order. Students who withdrew at the close of the first semester by graduation are indicated by an asterisk (*); others who were registered for the first semester only are indicated by a dagger (†); students registered for the second semester only are indicated by a double dagger (‡).

The College, School, or Division in which the student is registered is indicated after each name. Arabic numerals indicate the semester-hours of credit at the date of first registration for the 1940-41 regular sessions. Roman numerals after the names of students in the School of Medicine and the Law School indicate the year of the course in which each student is registered.

The following abbreviations are used:

Jun.—The Junior College
Col.—Columbian College
Grad.—The Graduate Council
Med.—The School of Medicine
Law—The Law School
Eng.—The School of Engineering
Pharm.—The School of Pharmacy

Ed.—The School of Education
Govt.—The School of Government
Univ.—The Division of University Students
Spec.—Special
Uncl.—Unclassified

GENERAL INFORMATION

INTRODUCTORY

The School of Medicine of The George Washington University was opened in March 1825; of the medical schools now in existence in the United States, it is the eleventh in chronological order of founding. The University Hospital and Dispensary were established in 1898 and made a part of the organization of the School.

The School is a member of the Association of American Medical Colleges and is one of the medical colleges which have been designated continuously as "class A" by the American Medical Association. The degrees of the School of Medicine are recognized by all state examining boards.

ADVANTAGES OF LOCATION

The Library of the Surgeon General's Office of the United States Army is the most complete general medical library in the world. In addition to its great collections of medical works, all leading medical periodicals of the world are available. This Library, as well as the Library of Congress, the Public Library, and the many excellent libraries of the various Government departments, is available to students and teachers through a service maintained by the Medical School Library.

The Army Medical Museum affords opportunity for studying the conditions met in military and general medicine and surgery. Its collection of anatomical and pathological specimens is unequaled by any other museum in this country. The Museum of Hygiene, the National Museum, the Smithsonian Institution, the Botanic Gardens, and the Department of Agriculture all afford opportunities for study in Medicine and its allied sciences.

EQUIPMENT

Medical School Building.—The building housing the School of Medicine is a modern, five-story structure with lecture rooms and classrooms, laboratories, and students' rooms, equipped with modern improvements.

Laboratories.—A four-story laboratory building is adjacent to the main medical building. The major laboratories are for Anatomy, Histology and Embryology, Bacteriology, Hygiene and Preventive Medicine, Biochemistry, Pathology, Pharmacology and Physiology, and Clinical Microscopy. They are fully equipped to enable students to pursue adequately the laboratory courses and to acquire the technical skill necessary in modern clinical and investigative work.

Medical Library.—The Library contains a selected reference collection of more than 3,000 volumes, and provision is made to add to it the

important new medical works. The principal medical periodicals are received regularly.

The University Hospital and the University Dispensary.—The Hospital and Dispensary are adjacent to the School of Medicine and are controlled by the Faculty of Medicine.

CLINICAL FACILITIES

The city of Washington, with more than a half-million inhabitants, provides ample clinical material. The University Hospital and Dispensary furnish clinical facilities and a large proportion of the materials studied in the courses in Pathology and Clinical Microscopy.

The University Hospital.—All clinics are under the supervision of the Dean, who is also Medical Director of the Hospital. This insures the highest possible utilization of available clinical material for teaching purposes and the proper supervision of clinicians and students; it brings the individual student into direct contact with patients and requires him to do, under authoritative supervision, the clinical and laboratory work necessary for diagnosis and treatment; and it permits proper interpretation of the conditions occurring during the progress of cases and promotes the keeping of adequate records. Clinical and clinico-pathological conferences are held in which the history of cases, the physical findings, laboratory records, and the post-mortem pathology when available, are presented and correlated.

The University Dispensary.—The Dispensary has a large out-patient service in all departments, to which several thousand visits are made annually. Fourth-year students are assigned in rotation by sections for clinical instruction in the Dispensary.

Gallinger Municipal Hospital.—Clinical instruction is available in all branches of Medicine. A great wealth of clinical material is afforded in this hospital by ordinance of the municipal authorities of the District of Columbia, whereby one half of the patients are assigned for treatment and clinical teaching to members of the Faculty of this School, nominated by this University. Third-year students serve their clinical clerkships at this institution.

Children's Hospital.—Clinical instruction in Pediatrics, Dermatology, and Orthopedic Surgery.

Emergency Hospital and Central Dispensary.—Clinical instruction in Medicine, Surgery, Obstetrics and Gynecology, and the specialties.

Garfield Memorial Hospital.—Clinical instruction in Gynecology and Obstetrics in the out-patient department, on the wards, and in the operating room.

St. Elizabeths Hospital.—Clinical instruction in mental and nervous diseases, medicine, post-mortem work, and gross pathology. This hospital,

with four thousand beds, is maintained by the United States Government. The psychiatric clinic is one of the largest in the world.

Episcopal, Eye, Ear and Throat Hospital.—Clinical instruction in Ophthalmology, Otology, Rhinology, and Laryngology.

Columbia Hospital.—Clinical instruction in Gynecology and Obstetrics in the out-patient department, on the wards, and in the operating room.

ADMISSION

For admission to the School of Medicine, a Junior Certificate or the equivalent from an accredited higher institution is required. This certificate must be based on the premedical college requirements totaling at least sixty semester-hours.* Graduation from the Junior College of this University or attainment of junior standing in another college or university does not automatically admit to the School of Medicine.

SPECIFIC EDUCATIONAL REQUIREMENTS

SECONDARY SCHOOL REQUIREMENTS

Of the fifteen secondary school units required, three must be in English, two in one foreign language (ancient or modern), one in Algebra, one in Geometry, one in History, and one in Science (Botany, Chemistry, Physics, or Zoology). Eleven of the units offered must be in English, foreign language, Mathematics, Science, and History. No candidate will be accepted with any condition in secondary school work.

PREMEDICAL COLLEGE REQUIREMENTS

Sixty Semester-Hours

1. Chemistry, twelve semester-hours as follows: (a) eight semester-hours of General Inorganic Chemistry, of which at least four semester-hours are laboratory work (Qualitative Analysis may be counted as General Inorganic Chemistry); (b) four semester-hours of Organic Chemistry, of which two semester-hours are laboratory work. It is strongly recommended, however, that an additional four semester-hours of Organic Chemistry be taken.

2. Physics, eight semester-hours, of which at least two semester-hours are laboratory work. It is recommended that this course be preceded by one in Trigonometry.

3. Biology, eight semester-hours, of which at least four semester-hours are laboratory work. This requirement may be satisfied by a course of eight semester-hours in either General Biology or Zoology, or by a course

* Beginning September 1942, premedical college requirements must total ninety semester-hours, except for those students registered in the premedical curriculum during the academic year 1940-41.

of four semester-hours each in Zoology and Botany, but not by Botany alone.

4. English composition and literature, six semester-hours: the usual introductory college course, or its equivalent. The student should develop facility in speaking and writing English.

5. Modern foreign language: a reading knowledge, preferably of French or German.

6. Electives. It is recommended that the remaining semester-hours required include: (a) Comparative Vertebrate Anatomy; (b) Qualitative and Quantitative Chemical Analysis; (c) Social Science and Psychology.

No student will be accepted with any condition in college work.

ADVANCED STANDING

A student who has satisfactorily attended one or more years at any other "class A" medical school, and who has the necessary preliminary educational requirements, may be admitted to advanced standing. No student, however, will be admitted to advanced standing in the senior class.

APPLICATION FOR ADMISSION

1. Full directions for application will be furnished on request. The applicant should ask the registrar of each college previously attended to send an official transcript of record to the Director of Admissions, The George Washington University. Photostatic copies of credentials without the original signature of the certifying authority are not satisfactory.

2. A recent photograph, with signature, is required of each applicant.

3. As the number of qualified applicants for admission to the School each year far exceeds its capacity, it is urged that, in order to facilitate consideration of their applications, candidates for admission secure from the colleges attended completely compiled premedical credentials and forward them for evaluation as long a time as possible before the opening of the School of Medicine in September.

4. A fee of \$3 to defray the costs of completing the records for final consideration for admission must accompany each application.

REGISTRATION AND ADMISSION TO CLASSES

Registration in the School of Medicine *is for a period of one year.* After the student has entered the courses of instruction he is obligated for the full tuition for the year. No part of the tuition will be refunded upon withdrawal or dismissal for any cause. Acceptance by the School of a student's fees does not in any way obligate the School to accept the student for any subsequent year, and the right is reserved to drop any

student from the School whenever, in the interest of the student or the School, the Faculty deems it advisable to do so.

Students are admitted to classes on presentation of the Comptroller's ticket, which is issued when all required fees have been paid.

FEES AND FINANCIAL REGULATIONS

The following fees are prescribed by statute:

| | |
|--|--------|
| University fee, for each semester or for any part thereof..... | \$8.00 |
| Tuition fee, per annum..... | 534.00 |
| Fee for special examinations, for each subject..... | 5.00 |
| Graduation fee | 20.00 |

UNIVERSITY FEE

Payment of the University fee, charged all students, covers all expenses incident to registration and, in addition secures to them the following University privileges: (1) the issuance of three certified transcripts of record, if and when desired; (2) the services of the Placement Office; (3) the use of the University library facilities, except as otherwise designated; (4) gymnasium privileges; (5) admission to all athletic contests, unless otherwise specified; (6) subscription to the *University Hatchet*, the student newspaper; (7) admission to University debates; (8) medical attention and hospital services as described under the Department of Health Administration, pages 33-34. These privileges, however, with the exception of the issuance of transcripts, terminate, and a student is no longer in residence, when he withdraws or is dropped from the University.

PAYMENT OF FEES

Fees for each semester (including the University fee) are \$275, payable in advance.

All fees are payable at the Office of the Cashier of the University, 725 Twenty-first Street NW. Fees due must be paid at the time of registration; no student is permitted to complete registration or to attend classes until fees are paid.

On account of the many applications for admission, and as the size of each class is limited, places can be reserved only for those qualified applicants who remit a deposit of \$100 which will be credited toward the tuition of the first semester. Should unusual circumstances arise whereby the matriculant is unable to attend, this initial payment, less a charge of \$50 for registration, transfer, etc., will be returned up to one month before the opening of the session.

Students will be required to pay for injury to apparatus and other University property. All breakage and loss not directly traceable to an individual student are assessed pro rata. Each student is required, at the

completion of laboratory courses, to replace or pay for all articles of equipment which he has lost, broken, or destroyed. Credit for work will not be given until this is done.

COST OF TEXTBOOKS AND STUDENT EQUIPMENT

The minimum cost of necessary textbooks and student equipment (microscope, drawing materials, glass slides, clinical thermometer, stethoscope, hemocytometer, etc.) is approximately as follows: first year, \$150; second year, \$87; third year, \$60; fourth year, \$60; total, \$357.

LIVING ACCOMMODATIONS

It is advisable for students to reach the University two or three days before the opening of the term in order that they may become established in satisfactory living quarters before class work begins.

All women students under twenty-three years of age must have their residences approved by the Director of Personnel Guidance. Registration is not complete until such approval is given.

The Hattie M. Strong Residence Hall is open to women students. Charges for rooms in Strong Hall for the academic year (September 15 to June 1) are as follows: In a single room with breakfast and dinner, \$425.00; in a double room with breakfast and dinner, \$365.50. Arrangements may be made to defray dormitory charges in monthly payments. Forms for application for room reservations, together with detailed information about the dormitory, may be obtained from the Director of Personnel Guidance.

For the benefit of men students a register of rooms that have been inspected and approved is kept in the Office of the Director of Personnel Guidance, to whom inquiries in respect to housing facilities should be addressed. Single rooms usually range in price from \$20.00 to \$30.00 a month, and double rooms from \$10.00 to \$20.00 a month a person. Rooms with board consisting of breakfast and dinner cost from \$40.00 to \$50.00 a month a person.

The men's fraternities have houses which provide living accommodations for their members.

SCHOLARSHIPS, PRIZES, LOAN FUNDS

The John Hitz Metzgerott Scholarship is available to students in the School of Medicine.

The Ordronaux Prize of \$80 is awarded to the member of the graduating class of the School of Medicine who has completed the four-year medical course with the highest scholastic standing.

The following loan funds are available to students in the School of Medicine: Daughters of the American Revolution Loan Fund and the Henry Strong Educational Foundation Loan Fund.

For particulars regarding scholarships, prizes, and loan funds, address the Chairman of the Faculty Committee on Student Loans and Scholarships, The George Washington University.

GENERAL REGULATIONS

Students in the School of Medicine are subject to, and are expected to familiarize themselves with, the general University regulations stated in the University Catalogue.

ATTENDANCE

Absence consists in being away from a class or clinic during a scheduled period, entering after the class or clinic has begun, or leaving before either is dismissed.

Absence is not allowed unless an excuse is obtained from the Dean or the instructor.

Excuse for absence due to sickness must be accompanied by a certificate signed by the attending physician and must be filed in the Office of the Dean.

For every unexcused absence a department will deduct one half of one per cent from the student's final grade in the subject involved.

GRADES

Proficiency in all subjects is marked on a basis of *A* (90-100); *B* (80-89); *C* (75-79); *D* (65-74), condition; *E* (below 64) failure; *Inc.*, incomplete. The passing grade in each subject is *C*.

ADVANCEMENT

Any student who has satisfactorily completed the required work of the first, second, or third year of the course and has passed all examinations is eligible for advanced standing, if approved by the Committee on Scholarship. No student may be enrolled for the clinical work of the third and fourth years without first having qualified in all the preclinical sciences.

FAILURE

A student who has failed in any subject will not be advanced until such failure is removed and then only by authority of the Committee on Scholarship. All conditions must be removed at the next make-up examination period provided for this purpose.

EXAMINATIONS

Examinations, which may be written, oral, or practical, will be held at the end of the first semester and at the end of the academic year.

A student who fails to appear at a regularly scheduled final examination will not be examined until the next regular examination, except by special permission of the Committee on Scholarship. For make-up examinations to remove conditions, a fee of \$5 will be charged for each subject.

SPECIAL UNDERGRADUATE AND GRADUATE ADVANTAGES

HEALTH ADMINISTRATION

The payment of the University fee entitles students to health services hereinafter described. Through reports from the students and University officials, the University attempts to keep informed as to all cases of illness among its students. This service is primarily diagnostic in its intent. It also provides first aid in the event of an emergency.

Medical privileges include: (1) the physical examination of all students entering from secondary schools;* (2) three visits by the University physician or surgeon, office or residence (District of Columbia) in any one illness, exclusive of a specialist, surgical operation, laboratory, or X-ray examination; (3) hospitalization, including board, medicine, and nursing in the University Hospital for not more than two weeks during a school year—the necessity to be determined by the Director of Health Administration. The duration of hospitalization period (maximum, two weeks) is also to be determined by the Director of Health Administration.

This medical benefit does not apply to illness or disability incurred previous to the University term or prior to payment of the University registration fee.

Students are allowed, if they so desire, to engage physicians and nurses of their own choice, but when they do so they will be responsible for the fees charged.

Rules: (1) The Director of Health Administration is empowered to limit or deny the medical benefits where, in his discretion, a student has, by his misconduct or breach of the rules of the University, made himself ineligible; (2) the Director of Health Administration has authority to determine the necessity and length of hospitalization; (3) students who have severed their connection with the University are ineligible for medical benefits; (4) students intending to train for athletic teams are

* A charge of \$2 is made if a student fails to appear for a physical examination during the period set for this purpose.

required to pass a thorough examination at the beginning of each semester; (5) the above regulations apply also during the Summer Sessions of the University.

PHYSICAL EXAMINATIONS

All first-year students are given a comprehensive physical examination by the Department of Health Administration upon admission to the School of Medicine. The students are informed of the findings and advised regarding such measures as will tend to maintain a high standard of health.

RESERVE OFFICERS' TRAINING CORPS, U. S. ARMY, MEDICAL UNIT

A Medical Unit of the Reserve Officers' Training Corps is established in this School by authority of the Secretary of War, and an officer of the Medical Corps of the Army is detailed to the University for supervision and instruction of the unit.

Membership in the Unit, which is voluntary, is open to any physically fit male student who is a citizen of the United States. The instruction is divided into two two-year courses, the basic and the advanced. Students who satisfactorily complete the basic course may, up to the quota allowed by the War Department, enter the advanced course. A student who enters the advanced course receives approximately \$200 from the Government. He is obligated to complete the course and to attend one summer camp of six weeks, for which he receives \$21 a month, travel allowance, all camp equipment, uniforms, and medical attention. A student who successfully completes the course is recommended for a commission in the Medical Section, Officers' Reserve Corps, if he desires appointment. A graduate may, after completion of one year's internship in a civil hospital, compete in the examinations held yearly for appointment as first lieutenant in the Medical Corps, Regular Army.

HOSPITAL APPOINTMENTS

Interns and residents are appointed annually in the University Hospital. Students who, after graduation, desire internships in other hospitals should apply directly to the institution which they wish to enter. A list of hospitals approved for intern training is published annually in the *Journal of the American Medical Association*, and a copy of the list may be consulted in the Office of the Dean.

COMMISSION ON LICENSURE, DISTRICT OF COLUMBIA

Graduates who wish to take the examinations of the Commission on Licensure, District of Columbia, or desire to use the District license for reciprocity with the states, should apply to the Secretary, Commission on Licensure, Healing Arts Practice Act, District Building, Washington, D. C.

UNIVERSITY MEDICAL SOCIETY

The George Washington University Medical Society was established in 1905. All alumni and members of the Faculty are eligible for membership on election. Meetings of the Society are held in the School of Medicine on the third Saturday evening of each month from October to May. Senior students may be invited to attend the meetings of this Society.

DEPARTMENTS OF INSTRUCTION

The work of the School is organized under the following departments: Anatomy; Bacteriology, Hygiene, and Preventive Medicine; Biochemistry; Dermatology and Syphilology; Experimental Medicine; Medicine; Military Science and Tactics; Neurology; Obstetrics and Gynecology; Ophthalmology; Oto-rhino-laryngology; Pathology; Pediatrics; Pharmacology and Therapeutics; Physiology; Psychiatry; Surgery; and Urology.

CLINICS

Courses of clinical instruction are included in the announcements of the clinical departments. The Dean prepares schedules of clinics and of student section assignments to the various hospitals and dispensaries.

COURSES OF INSTRUCTION

The courses of instruction are listed in alphabetical order, beginning on page 37.

THE DEGREE OF DOCTOR OF MEDICINE

Upon the satisfactory completion of the requirements of the School of Medicine, the degree of Doctor of Medicine is conferred.

REQUIREMENTS FOR THE DEGREE

Every candidate for graduation with the degree of Doctor of Medicine must be at least twenty-one years of age, of reputable character, and free of all indebtedness to the University. He must have satisfied the admission requirements, completed satisfactorily not less than four years of study as a matriculated student in Medicine, completed all required courses, and passed satisfactorily all prescribed examinations.

Particular attention is called to the statement of graduation requirements in the University Catalogue.

COMBINED ARTS AND MEDICINE CURRICULUM

The candidate registers in the Junior College for the freshman and sophomore years of the premedical curriculum and in Columbian College

for the junior year. In order to be recommended for the degree of Bachelor of Arts, he must complete at least ninety-four semester-hours of prescribed college work including Physical Education (at least thirty-semester-hours and one year of residence must be completed in Columbian College), and the first year of the medical curriculum. Upon completion of the fourth year in the medical curriculum the student becomes eligible for the degree of Doctor of Medicine.

PLAN OF INSTRUCTION

Each year of the medical curriculum is divided into two semesters of sixteen weeks each. The curriculum for the degree of Doctor of Medicine must begin with the fall semester.

Laboratory training, demonstrations, and clinical teaching, with recitations and lectures clarify the many problems presented. The clinical material in the various hospitals and out-patient departments is utilized to the fullest extent for both clinical instruction and laboratory work.

HONORS

A candidate who has completed the four-year medical course with an average grade of *A* may be recommended for graduation "with distinction".

For application blanks, and further information, address the Director of Admissions, The George Washington University, Washington, D. C.

COURSES OF INSTRUCTION

On the following pages of this BULLETIN, under the alphabetically arranged names of the departments of instruction, are listed the courses of instruction offered by the School of Medicine in the academic year 1941-42. The courses here listed are subject to some slight change. The University reserves the right to withdraw any course announced.

EXPLANATION OF COURSE NUMBERS AND SYMBOLS

The number which precedes the name of a course indicates the semester in which that course is offered. An odd number indicates that the course is offered in the first semester; an even number, that it is offered in the second semester; and a double number (e.g., 343-44), that it begins in the first semester and continues in the second.

A number in parentheses after the name of a nonprofessional course indicates semester-hours of credit.

A dagger (†) preceding the number of a year course indicates that the course may not be entered in the second semester and that credit will not be given until the work of both semesters has been completed.

First-year courses are numbered from 101 to 200; second-year courses, from 201 to 300; third-year courses, from 301 to 400; and fourth-year courses, from 401 to 500.

ANATOMY

Claude Matthews MacFall, LL.B., Ph.D., *Professor of Anatomy, Acting Executive Officer*

Paul Calabrisi, A.B., *Instructor in Anatomy*

Vern Lauer Zech, M.D., *Instructor in Anatomy*

101 *Gross Anatomy*

MacFall and Staff

Instruction in osteology, followed by the careful dissection and study of the entire body. Fifteen hours a week.

103 *Histology and Embryology*

The Staff

The histogenesis and microscopic structure of the tissues and organs of the human body. Twelve hours a week.

104 *Neuro-Anatomy*

The Staff

Fifteen hours a week.

203-4 *Research*

The Staff

Hours and credits to be arranged.

300 *Surgical Anatomy (elective)**

The Staff

Two hours a week.

* This course is given in collaboration with the Department of Surgery.

BACTERIOLOGY, HYGIENE, AND PREVENTIVE MEDICINE

Leland Wilbur Parr, Ph.D., *Professor of Bacteriology, Executive Officer*
 Angus MacIvor Griffin, Ph.D., *Assistant Professor of Bacteriology*
 Alden Franklin Roe, Sc.D., *Assistant Professor of Bacteriology*

BACTERIOLOGY

- 112 *General Bacteriology* (4) Roe
 A study of the fundamentals of bacteriology, including industrial and hygienic applications. Several groups of bacteria, yeasts, and molds are studied in the laboratory. Tues., Thurs., and Sat., 9:10 A.M. to 12:00 M.
- 205 *Advanced Bacteriology* Roe
 Prerequisite: Bacteriology 112. Hours and credits to be arranged.
- 209 *Bacteriology and Immunology* Parr, Griffin
 Bacteriological technique; study of micro-organisms related to medical and hygienic problems. Methods of diagnosis are stressed and immunological procedures and theory fully treated. Eighteen hours a week for ten weeks.
- 210 *Immunology and Serology (elective)* Griffin
 Prerequisite: Bacteriology 112 or 209. Hours and credits to be arranged.
- 212 *Intestinal Bacteriology* Parr
 Prerequisite: Bacteriology 112 or 209. Hours and credits to be arranged. (Offered in 1940-41 and alternate years.)
- 214 *Bacteriological Ecology* Parr
 Prerequisite: Bacteriology 112 or 209. Hours and credits to be arranged. (Offered in 1941-42 and alternate years.)
- 303-4 *Research in Bacteriology* The Staff
 Hours and credits to be arranged.
- 305-6 *Staff Seminar* The Staff
 Biweekly.

HYGIENE AND PREVENTIVE MEDICINE

Roscoe Roy Spencer, A.B., M.D., *Adjunct Professor of Hygiene and Preventive Medicine, Coordinating Officer*

SEMINAR LECTURERS

Charles Armstrong, B.S., M.D., Sc.D., *Professorial Lecturer in Preventive Medicine*

Rolla Eugene Dyer, A.B., M.D., *Professorial Lecturer in Preventive Medicine*

Royd Ray Sayers, A.M., M.D., *Professorial Lecturer on Industrial Hygiene*

Ralph Edwin Tarbett, B.S., *Professorial Lecturer on Sanitary Science*

Raymond Aloysius Vonderlehr, M.D., *Professorial Lecturer in Preventive Medicine*

Ralph Gregory Beachley, M.D., Dr.P.H., *Professorial Lecturer on Public Health Administration*

Sara Elizabeth Branham, Ph.D., M.D., Sc.D., *Professorial Lecturer in Preventive Medicine*

Alice Catherine Evans, M.S., M.D., Sc.D., *Professorial Lecturer in Preventive Medicine*

William Henry Sebrell, Jr., M.D., *Professorial Lecturer in Preventive Medicine*

Newton Edward Wayson, A.B., M.D., *Professorial Lecturer in Preventive Medicine*

220 *Hygiene*

Transition from curative to preventive medicine, the problems of medical ethics and medical economics, and the social aspects of medical practice. Two hours a week. Spencer

401 *Preventive Medicine*

Analysis of the epidemiological data; and exposition of the general and specific measures of control usually employed by modern health units. One hour a week. The Staff

402 *Public Health Practice*

Preventive medicine as applied in health-department practice. Eight periods. Beachley

BIOCHEMISTRY

Joseph Hiram Roe, Ph.D., *Professor of Biochemistry, Executive Officer*
 Arnold Kent Balls, Ph.D., *Adjunct Professor of Enzymology*
 Helen Marie Dyer, Ph.D., *Assistant Professor of Biochemistry*
 Oliver John Irish, Ph.D., *Instructor in Biochemistry*
 Alan Hisey, Ph.D., *Instructor in Biochemistry*

113-14 *Biochemistry* Roe, Irish, Hisey
 Physiological and clinical chemistry for the first-year medical student. Tues. and Thurs., 1:00 to 5:00 P.M. Two lectures and two three-hour laboratory periods a week.

120 *Biochemistry of Foods and Nutrition* (4) Dyer
 Lecture and laboratory course designed particularly for the student in the Department of Home Economics. Mon. and Wed., 1:30 to 4:30 P.M.

221-22 *Biochemistry* (4-4) Dyer
 Lecture and laboratory course for nonmedical students. Prerequisite: Chemistry 152. Mon. and Wed., 9:00 A.M. to 12:00 M.

224 *Biochemistry of the Enzymes (elective)* Balls
 Lecture course dealing with the biochemistry of the enzymes and enzyme reactions. Prerequisite: Biochemistry 113 or 221. Wed., 4:45 P.M. One hour a week.

225 *Biochemical Preparations* The Staff
 Hours and credits to be arranged.

226 *Biochemical Laboratory Methods* Roe, Irish
 Hours and credits to be arranged.

227-28 *Biochemistry Seminar* (1-1) Roe and Staff
 The current literature in the field of biochemistry, mainly for graduate students, but open to a limited number of specially qualified medical students. Fri., 4:45 P.M.

229-30 *Research in Biochemistry* Roe and Staff
 Hours and credits to be arranged.

DERMATOLOGY AND SYPHILOLOGY

Harry Ford Anderson, M.D., *Professor of Dermatology and Syphilology, Executive Officer*

George William Creswell, A.B., M.D., *Associate in Dermatology and Syphilology*

Russell Joseph Fields, B.S., M.D., *Associate in Dermatology and Syphilology*

Theodore Claremont Chen Fong, M.D., *Clinical Instructor in Dermatology and Syphilology*

Hayden Kirby-Smith, B.S., M.D., *Clinical Instructor in Dermatology and Syphilology*

Leslie Keith MacClatchie, B.S., M.D., *Clinical Instructor in Dermatology and Syphilology*

313-14 *Dermatology and Syphilology* Anderson
Didactic lectures on diseases of the skin and Syphilis. One hour a week.

316 *Neurosyphilis* Fong
Didactic lectures, clinical demonstrations, and practical diagnostic and therapeutic procedures. One hour a week for eight weeks.

317-18 *Clinic* Fields, MacClatchie, Kirby-Smith
Case demonstrations, diagnosis, and treatment of skin diseases and Syphilis. Three hours a week. Gallinger Hospital.

407-8 *Clinic* Anderson
Dermatology and Syphilology in infants and children. Children's Hospital. Two hours a week.

409-10 *Clinic* Anderson
Clinical demonstration, diseases of the skin. One hour a week. Emergency Hospital.

411-12 *Clinic* MacClatchie, Creswell, Kirby-Smith
Clinical demonstrations, diseases of the skin and diagnosis and therapy of Syphilis. One hour a week. University Hospital.

413-14 *Clinic* Creswell
Diagnosis, laboratory procedures and treatment of Syphilis. Two hours a week. Southwest Health Center.

EXPERIMENTAL MEDICINE

Edward Bright Vedder, A.M., M.D., Sc.D., *Professor of Experimental Medicine, Executive Officer*

Pearl Holly, M.S., M.D., *Associate in Experimental Medicine*

235-36 *Clinical Microscopy*

Vedder, Holly

Lectures and laboratory work covering aspects of diagnosis, including the study of urinalysis, blood-counting, blood diseases, feces, spinal fluids, Wassermanns, and parasitology. Three hours a week beginning in January.

416 *Tropical Medicine (elective)*

Vedder, Holly

This course consists of didactic lectures and demonstrations of the more common tropical diseases, with emphasis on their practical application to general medical practice. One hour a week.

MEDICINE

- Walter Andrew Bloedorn, A.M., M.D., *Professor of Medicine, Executive Officer*
- Coursen Baxter Conklin, A.M., M.D., *Clinical Professor of Medicine*
- Charles Robert Lee Halley, A.B., M.D., *Clinical Professor of Medicine*
- Paul Frederick Dickens, M.D., *Clinical Professor of Medicine*
- Harry Filmore Dowling, A.B., M.D., *Clinical Professor of Medicine*
- Charles Powell Cake, M.D., *Adjunct Clinical Professor of Medicine*
- Albert Joseph Sullivan, B.S., M.D., *Adjunct Clinical Professor of Medicine*
- Frank Adelbert Hornaday, M.S., M.D., *Assistant Professor of Medicine*
- John Alton Reed, A.B., M.D., *Associate in Medicine*
- Watson William Eldridge, Jr., M.D., *Associate in Medicine*
- Herman Solomon Hoffman, A.B., M.D., *Associate in Medicine*
- John Minor, A.B., M.D., *Associate in Medicine*
- Maurice Protas, A.B., M.D., *Associate in Medicine*
- Walter Kendall Myers, B.S., M.D., *Associate in Medicine*
- Theodore Judson Abernethy, B.S., M.D., *Associate in Medicine*

- Clayton Bernard Ethridge, M.D., *Associate in Medicine*
- Bernard Lauriston Hardin, Jr., A.B., M.D., *Associate in Medicine*
- A. Fife Heath, M.D., *Associate in Medicine*
- Elmer Wink Fugitt, M.D., *Associate in Medicine*
- Bernard Walter Leonard, B.S., M.D., *Associate in Medicine*
- Nicholas Athanasiou Mandelos, M.D., *Clinical Instructor in Medicine*
- Leo T. Brown, M.D., *Clinical Instructor in Medicine*
- Joseph Francis Elward, Phar.D., M.D., *Clinical Instructor in Radiology*
- Richard Bernard Castell, A.B., M.D., *Clinical Instructor in Medicine*
- George Paul Lemeschewsky, A.B., M.D., *Clinical Instructor in Medicine*
- John Charles Reisinger, M.D., *Clinical Instructor in Medicine*
- Luther Henry Snyder, A.B., M.D., *Clinical Instructor in Medicine*
- Emil Herbert Bauersfeld, A.B., M.D., *Clinical Instructor in Medicine*
- Charles Troll Carroll, A.B., M.D., *Clinical Instructor in Medicine*
- William Heman Clements, A.B., M.D., *Clinical Instructor in Medicine*
- John Ellsworth Everett, A.B., M.D., *Clinical Instructor in Medicine*

- Paul Abraham Lichtman, M.D., *Clinical Instructor in Medicine*
 John Bayne Marbury, M.D., *Clinical Instructor in Medicine*
 Gilbert Britt Rude, M.D., *Clinical Instructor in Medicine*
 Benjamin Manchester, M.D., *Clinical Instructor in Medicine*
 John Watkins Trenis, M.D., *Clinical Instructor in Medicine*
 Joseph James Wallace, M.D., *Clinical Instructor in Medicine*
 Alfredo Emanuel Briguglio, M.D., *Clinical Instructor in Medicine*
 Theodore George Klumpp, B.S., M.D., *Clinical Instructor in Medicine*
 Robert Port Herwick, M.D., M.S., Ph.D., LL.B., *Clinical Instructor in Medicine*
 Hunter Felix Kennedy, M.D., *Clinical Instructor in Medicine*
 Charles Noble Lewis, M.D., *Clinical Instructor in Medicine*

124 *Introductory Medical Clinics* Bloedorn and Staff
 Part of a course on introductory medical and surgical clinics.

126 *History of Medicine* Halley
 One hour a week.

241-42 *Physical Diagnosis* Conklin and Staff
 Demonstrations and practice on the normal and abnormal subject; designed to cover the entire subject of physical diagnosis.

244 *General Medicine* Bloedorn, Halley
 Lectures covering general aspects of all phases of medical disease, and including therapeutics. Three hours a week.

312 *Radiology and Radiotherapy* Elward
 One hour a week.

324 *Clinical Physiology* Dickens
 Lectures and clinics for the correlation of preclinical and laboratory studies of physiology with altered function as observed in clinic and ward. One hour a week.

325-26 *Clinical Clerkship* Halley, Dowling, and Staff
 Individual case work under strict supervision (student's histories generally accepted as hospital records). Emergency and Gallinger hospitals.

327-28 *Clinical Pathological Conference* Bloedorn, Choisser
 Correlation of clinical and post-mortem findings: detailed case descriptions from the clinical point of view, followed by thorough demonstrations, grossly and with lantern slides, of post-mortem findings. One hour a week.

- 417-18 *Physiotherapy* Eldridge
Lectures and demonstrations of the fundamentals of physical treatment and their applications to general medical diseases. St. Elizabeths Hospital.
- 420 *Medical Jurisprudence* Eldridge
Lectures on the legal and ethical rights of physicians, and on the legal problems with which the physician is brought into contact. One hour a week for eleven weeks.
- 421-22 *Dispensary Clinics* The Staff
Thorough study of individual cases subsequently reviewed in detail by the Staff. The University and Emergency hospitals.
- 423 *Clinics* Bloedorn and Staff
Etiology, diagnosis, and treatment of the usual and more rare diseases, with special emphasis on differential diagnosis and the demonstration of clinical abnormalities found in various morbid processes. Medical School.
- 425-26 *Clinical Clerkship* Dickens and Staff
Individual case work under strict supervision (student's histories generally accepted as hospital records). The University Hospital.
- 427-28 *Clinical Pathological Conference* Bloedorn, Choisser
Same as Medicine 327-28.

MILITARY SCIENCE AND TACTICS

Philip Weatherly Huntington, M.D., Colonel, Medical Corps, United States Army, *Professor of Military Science and Tactics*

129-30 *Basic Medical Course (elective)* Huntington
Constitutional and legal basis of national defense; organization of the Army; customs of the Service; military sanitation; map reading; supply.

247-48 *Combat Training (elective)* Huntington
Tactics and technique; combat orders; organization and employment of the Medical Department; map problems.

329-30 *Advanced Medical Course (elective)* Huntington
Military preventive medicine; Army administration; Medical Department administration; chemical warfare in offense and defense.

429-30 *Advanced Medical Course (elective)* Huntington
Military law and courts-martial; medical and surgical conditions peculiar to war; medical service of large forces; advanced administration and supply.

NEUROLOGY

Walter Freeman, Ph.D., M.D., *Professor of Neurology, Executive Officer*
 James Winston Watts, B.S., M.D., *Associate Professor of Neurosurgery*
 Hyman David Shapiro, M.D., *Associate in Neurology*
 Alexander Simon, A.B., M.D., *Associate in Neurology*
 Zigmond Meyer Lebensohn, B.S., M.D., *Clinical Instructor in Neurology*
 Robert Henry Groh, B.S., M.D., *Clinical Instructor in Neurology*

249 *Neurology (elective)* Freeman

Methods of study of the nervous system. Gross and microscopic preparations, embryology, comparative anatomy, stimulation and extirpation, human pathology, etc. Laboratory demonstrations. One hour a week.

250 *Neurology (elective)* Freeman

Pathology of the nervous system with laboratory demonstrations. One hour a week.

331 *Neurology* Shapiro

Systematic lectures with lantern slides illustrating the chief neurologic syndromes and their anatomic bases. One hour a week for sixteen weeks.

333-34 *Neurology (elective)* Freeman and Staff

Neurological out-patient clinic. Consultation of staff on ambulatory cases, demonstration of diagnostic procedures, disposition of neuropsychiatric cases. One hour a week.

431 *Neurosurgery (elective)* Watts

Lectures and clinical demonstrations in surgery of the brain, spinal cord, and peripheral nerves. Emphasis is laid upon fundamentals and upon the possibilities of surgery in the relief of symptoms. One hour a week for sixteen weeks.

433-34 *Clinical Neurology* Freeman

Lectures and demonstrations of patients illustrating the diagnosis and treatment of nervous disorders. Material is available at St. Elizabeths Hospital illustrative of the more common disorders and some of the unusual syndromes. One hour a week.

435-36 *Neurologic Examinations* Freeman and Staff

Practical instruction in the examination of patients presenting nervous diseases. Detailed examination of six patients is required of each student. St. Elizabeths Hospital. One-fourth of the class, two hours a week.

OBSTETRICS AND GYNECOLOGY

- Howard Francis Kane, A.B., M.D., *Professor of Obstetrics and Gynecology, Executive Officer*
- Radford Brown, M.D., *Professor of Obstetrics and Gynecology*
- Elijah White Titus, Phar.D., M.D., *Clinical Professor of Obstetrics and Gynecology*
- Jacob Kotz, M.D., *Clinical Professor of Obstetrics and Gynecology*
- Henry Laurant Darner, A.B., M.D., *Clinical Professor of Obstetrics and Gynecology*
- John Louis Parks, M.S., M.D., *Adjunct Clinical Professor of Obstetrics and Gynecology*
- Herbert Percy Ramsey, A.B., M.D., *Assistant Professor of Obstetrics and Gynecology*
- William Preston Haynes, A.B., M.D., *Associate in Obstetrics and Gynecology*
- George Nordlinger, A.B., M.D., *Associate in Obstetrics and Gynecology*
- William Raymond Thomas, M.D., *Associate in Obstetrics and Gynecology*
- Joseph Harris, A.B., M.D., *Associate in Obstetrics and Gynecology*
- Laurence Lee Cockerille, M.D., *Associate in Obstetrics and Gynecology*
- Clayton Howard Hixson, M.D., *Associate in Obstetrics and Gynecology*
- Henry John Russell McNitt, B.S., M.D., *Associate in Obstetrics and Gynecology*
- Samuel Mayer Dodek, A.M., M.D., *Associate in Obstetrics and Gynecology*
- Bernard Notes, M.D., *Clinical Instructor in Obstetrics and Gynecology*
- Helen Gladys Kain, B.S., M.D., *Clinical Instructor in Obstetrics and Gynecology*
- Esther Alsylvia Nathanson, A.B., M.D., *Clinical Instructor in Obstetrics and Gynecology*
- Katherine Elizabeth Parker, A.M., M.D., *Clinical Instructor in Obstetrics and Gynecology*
- Harry Samuel Douglas, A.B., M.D., *Clinical Instructor in Obstetrics and Gynecology*
- Howard Pope Parker, M.D., *Clinical Instructor in Obstetrics and Gynecology*
- Roger O'Donnell, Jr., A.B., M.D., *Clinical Instructor in Obstetrics and Gynecology*
- William Dandridge Terrell, Jr., M.D., *Clinical Instructor in Obstetrics and Gynecology*

- James Albert Dusbabek, M.D., *Clinical Instructor in Obstetrics and Gynecology*
 Barton Winters Richwine, M.D., *Clinical Instructor in Obstetrics and Gynecology*
 Floyd Sterling Rogers, Jr., M.D., *Clinical Instructor in Obstetrics and Gynecology*
 S. Hazen Shea, A.B., M.D., *Clinical Instructor in Obstetrics and Gynecology*

- 254 *Pregnancy, Normal and Abnormal* Kane, Dodek, H. Parker
 Lectures and recitations on the physiology and management of pregnancy and its complications. One hour a week.
- 337 *Labor, Normal and Abnormal* Kane, Nordlinger
 Lectures, recitations, and demonstrations on the mechanism and course of labor and its complications. Two hours a week.
- 340 *Gynecological Pathology (elective)* Brown
 Lectures on the essentials of gynecological pathology, and demonstrations and study of gross and microscopic material discussed in the lectures. One hour a week.
- 342 *Female Endocrinology* Kotz
 Lectures on the physiology and pathology of the endocrine system in women. One hour a week for seven weeks.
- 344 *Operative Gynecology* Darner
 Lectures on the principles of gynecological surgery. One hour a week for seven weeks.
- 345-46 *Manikin Demonstrations* Harris
 The mechanism of labor and various types of operative delivery demonstrated to sections of the class throughout the year. One hour a week.
- 441-42 *Clinical Obstetrics* The Staff
 Observation of, and participation in, the work of the pre- and post-natal clinics, on the wards, and in the delivery rooms of the University, Gallinger, Columbia, and Garfield Hospitals.
- 443-44 *Clinical Gynecology* The Staff
 Observation of, and participation in, the work at the outpatient clinics, on the wards, and in the operating rooms of the University, Gallinger, Columbia, and Garfield Hospitals.
- 446 *Principles and Practice of Gynecology* Brown
 Lectures and recitations on gynecology, medical and surgical. One hour a week.

OPHTHALMOLOGY

William Thornwall Davis, M.D., *Professor of Ophthalmology, Executive Officer*

Ernest Alfred Watson Sheppard, M.D.C.M., *Associate Professor of Ophthalmology*

George Victor Simpson, M.D., *Assistant Professor of Ophthalmology*

Edgar Leonard Goodman, M.D., M.M.S., *Associate in Ophthalmology*

Ronald Atmore Cox, A.B., M.D., *Associate in Ophthalmology*

Albert Edward Meisenbach, Jr., A.B., M.D., *Clinical Instructor in Ophthalmology*

351-52 *Ophthalmology*

Davis and Staff

A lecture course presenting the principles of ophthalmology, with special reference to topics of importance to the general practitioner. One hour a week for twenty weeks.

447 *Clinic*

Davis and Staff

Intensive training in diseases of the eye; etiology, diagnosis, and treatment in their application to clinical cases. Episcopal Hospital. Three hours twice a week.

OTO-RHINO-LARYNGOLOGY

- Daniel Bruce Moffett, A.B., M.D., *Associate Professor of Oto-rhino-laryngology*
- William Herndon Jenkins, M.D., *Clinical Professor of Oto-rhino-laryngology*
- Leroy Lee Sawyer, Jr., A.B., M.D., *Assistant Professor of Oto-rhino-laryngology*
- David Davis, A.B., M.D., *Associate in Oto-rhino-laryngology*
- Don R. Johnson, LL.B., M.D., *Associate in Oto-rhino-laryngology*
- Aubrey David Fischer, M.D., *Clinical Instructor in Oto-rhino-laryngology*
- Jeter Carroll Bradley, M.D., *Clinical Instructor in Oto-rhino-laryngology*
- Lyman Brooke Tibbets, Phar.D., M.D., *Clinical Instructor in Oto-rhino-laryngology*
- Joel Norton Novick, M.S., M.D., *Clinical Instructor in Oto-rhino-laryngology*

451 *Oto-rhino-laryngology* Jenkins
 Clinical lectures and demonstration of diseases of the ear, nose, and throat; bronchoscopy and esophagoscopy. Two hours a week for eight weeks.

453 *Oto-rhino-laryngology* Moffett
 Lectures on the anatomy, physiology, and diseases of the ear, nose, and throat. Two hours a week for eight weeks.

454 *Bronchoscopy* Davis
 A series of lectures on the fundamental principles and the use of instruments, including both the bronchoscope and esophagoscope. One hour a week for eight weeks.

456 *Clinic* The Staff
 Practical clinical instruction in the diagnosis and treatment of diseases of the ear, nose, and throat. Episcopal Hospital. One and one-half hours twice a week.

PATHOLOGY

Roger Morrison Choisser, B.S., M.D., *Professor of Pathology, Executive Officer*

Thomas Martin Peery, A.B., M.D., *Assistant Professor of Pathology*

Elizabeth Mapelsden Ramsey, A.B., M.D., *Associate in Pathology*

Thelma Brumfield Dunn, A.B., M.D., *Clinical Instructor in Pathology*

259-60 Pathology

Choisser, Peery

A course covering malformations, inflammations, degenerations and neoplasms, followed by special pathology of the organs and specific diseases. The laboratory work consists of the gross and microscopic study of diseased tissues. Necropsies are held regularly at the University and Municipal hospitals.

307 Necropsy (elective)

The Staff

Students assist in the performance of necropsies. Fresh gross specimens and microscopic sections from each case are presented at weekly conferences. Current literature relating to cases is reviewed and presented by the students.

327-28 Clinical Pathology Conference

Choisser, Bloedorn

Case histories are presented and discussed by members of the staff and student body; necropsy and clinical findings are compared, and gross and microscopic specimens examined. One hour a week.

427-28 Clinical Pathological Conference

Choisser, Bloedorn

The content of this course is the same as that of Pathology 327-28.

460 Research

Choisser

Hours and credits to be arranged.

PEDIATRICS

Harry Hampton Donnally, A.M., M.D., *Professor of Pediatrics,
Executive Officer*

Preston Alexander McLendon, B.S., M.D., *Clinical Professor of
Pediatrics*

Charles Aurelius Schutz, M.D., *Clinical Professor of Pediatrics*

Margaret Mary Nicholson, A.B., M.D., *Clinical Professor of Pediatrics*

Lewis Kaigler Sweet, A.B., M.D., *Adjunct Clinical Professor of
Pediatrics*

Edward Lewis, M.D., *Assistant Professor of Pediatrics*

Elizabeth Emery Chickering, A.B., M.D., *Associate in Pediatrics*

Aaron Nimetz, A.B., M.D., *Associate in Pediatrics*

John Augustine Washington, A.B., B.S., M.D., *Associate in Pediatrics*

William Staton Anderson, A.B., M.D., *Associate in Pediatrics*

Mabel Harlakenden Grosvenor, A.B., M.D., *Associate in Pediatrics*

Reginald Henry Mitchell, M.D., *Clinical Instructor in Pediatrics*

John Howell Peacock, B.S., M.D., *Clinical Instructor in Pediatrics*

355 *Pediatrics*

Schutz

Lectures on diseases and malformations of the newly born. Growth, metabolism, nutrition, nutritional diseases, therapeutics, habits, preventive pediatrics, and social aspects are considered. One hour a week for twenty-four weeks.

356 *Pediatrics*

Nicholson

Ward walks and weekly clinic. Gallinger Hospital. Two sections.

357-58 *Clinic*

Peacock

Clinical instruction in the care and diseases of the newly born, congenital malformations, birth injuries, and prematurity. Gallinger Hospital. One fourth of the class, one hour a week.

359-60 *Contagious-Disease Clinic*

Grosvenor, Sweet, Mitchell

Bedside instruction in scarlet fever, diphtheria, etc. Gallinger Hospital. One fourth of the class, one hour a week. Ward walks twice a week.

463-64 *Child-Welfare and Preventive Clinic*

Schutz

Clinical course in the infant and the pre-school child. Children's Hospital, Child Welfare Center. One section, one hour a week.

465-66 *Clinic*

Lewis, Washington, Chickering,
Nimetz, Anderson, Grosvenor

467-68 *Clinic*

Donnally

Teaching clinic. Children's Hospital. Entire class, one and one-fourth hours a week.

469-70 *Clinical Clerkship*

Donnally, McLendon, Washington
Nimetz, Chickering, Anderson, Grosvenor

Ward walks, physical diagnosis, pediatric procedures, bedside instruction in contagious diseases, laboratory and necropsy instruction, diagnosis of urgent cases. Children's Hospital. One-fourth of the class, Mon., Tues., Wed., and Fri., 9:30 A.M. to 4:30 P.M.

471-72 *Allergy Clinic*

Donnally

Prerequisite: Bacteriology 209. Practical work in the Allergy Clinic of Children's Hospital may be obtained by a small group of senior students. Two afternoons a week.

PHARMACOLOGY AND THERAPEUTICS

George Byron Roth, A.B., M.D., *Professor of Pharmacology, Executive Officer*

Edgar William Ligon, Jr., Ph.D., *Instructor in Pharmacology*

263 *Pharmacology*

Roth and Staff

Laboratory instruction covering both the chemical nature and the biological effects of drugs. Five hours a week.

265 *Pharmacology*

Roth

Lectures and demonstrations to correlate the most prominent facts relating to the more important therapeutic agents. Drugs found in the *United States Pharmacopoeia* and *New and Non-official Remedies* are stressed. Three hours a week.

267 *Pharmacology Conference*

Roth and Staff

One hour a week.

269 *Prescription Writing*

Roth

Sixteen one-hour conferences on the form of the prescription, with practical exercises.

362 *Research*

Roth and Staff

Hours and credits to be arranged.

PHYSIOLOGY

Errett Cyril Albritton, A.B., M.D., *Professor of Physiology, Executive Officer*

Chester Elwood Leese, Ph.D., *Associate Professor of Physiology*

Alma Fogelberg, Ph.D., *Instructor in Physiology*

Robert Custis Grubbs, M.S., M.D., *Instructor in Physiology*

115 Physiology (3)

Leese and Staff

Lectures for academic students covering the fundamentals of physiology in its various subdivisions. Prerequisite: one year of general science or one semester of a biological science. Section A: Tues., Thurs., and Sat., 9:10 A.M.; section B: Tues. and Thurs., 5:00 to 6:25 P.M.

117 Physiology (1)

Fogelberg, Grubbs

Laboratory exercises in the fundamentals of physiology, for academic students. Prerequisite: Physiology 115 or the equivalent. The two, 115 and 117, may be taken concurrently. Sat., 10:10 A.M. to 1:00 P.M.

132 Physiology

Albritton

Intensive survey of vertebrate physiology, for medical students, based on prerequisite work in physics, biology, and chemistry, and establishing the concept of physiology as a science made up of causally interrelated variables. Eight hours a week, the first month.

134 Experimental Physiology

Albritton and Staff

Laboratory work and advanced lectures for medical students. The work of each student team is largely self-chosen, and pursued independently, both in nature and tempo, of other current work in the laboratory. Rigorous training is given in experimental method and in standards of scientific proof. Two hours of lectures and nine hours of laboratory work a week.

269-70 Problems in Physiology

Albritton and Staff

Hours and credits to be arranged.

473-74 *Ward Work*

The Staff

Personal mental examination and formal written report of the examination of the various types of psychosis, followed by a review of the cases with an instructor. St. Elizabeths Hospital. Two hours a week.

475 *Psychoneurosis*

Lind

The descriptive aspects, the etiology, the psychopathology, and the treatment of the various psychoneuroses. St. Elizabeths Hospital. One hour a week for twelve weeks.

477 *Personality Profiles*

The Staff

Utilization of psychological testing methods for the purpose of determining individuals' limitations and special capacities. St. Elizabeths Hospital. One hour a week for four weeks.

SURGERY

 Daniel LeRay Borden, A.M., M.D., *Associate Professor of Surgery*
 Harry Hyland Kerr, M.D.C.M., *Clinical Professor of Surgery*
 Paul Stirling Putzki, M.D., *Clinical Professor of Surgery*
 Arch Lockhart Riddick, B.S., M.D., *Clinical Professor of Surgery*
 William Berry Marbury, M.D., *Clinical Professor of Surgery*
 Custis Lee Hall, M.D., *Clinical Professor of Surgery*
 James Ross Veal, A.B., M.D., *Adjunct Clinical Professor of Surgery*
 John Hugh Lyons, M.S., M.D., *Assistant Professor of Surgery*
 Herbert Hermann Schoenfeld, M.D., *Assistant Professor of Surgery*
 William Warren Sager, M.S., M.D., *Assistant Professor of Surgery*
 Cline N. Chipman, M.D., *Associate in Anesthesia*
 Guy Whitman Leadbetter, B.S., M.D., *Associate in Surgery*
 Benjamin Franklin Dean, Jr., M.S., M.D., *Associate in Surgery*
 Alec Horwitz, M.S., M.D., *Associate in Surgery*
 Richard Knight Thompson, D.D.S., *Associate in Dental Surgery*
 Francis George Speidel, M.D., *Clinical Instructor in Anesthesia*
 Philip Oscar Pelland, M.D., *Clinical Instructor in Surgery*
 Stewart Maxwell Grayson, M.D., *Clinical Instructor in Surgery*
 Nathan Norman Smiler, M.D., *Clinical Instructor in Surgery*
 Edward Alexander Cafritz, M.D., *Clinical Instructor in Surgery*
 Hazen Eugene Cole, B.S., M.D., *Clinical Instructor in Surgery*
 Crenshaw Douglas Briggs, B.S., M.D., *Clinical Instructor in Surgery*
 William Wiley Chase, A.B., M.D., *Clinical Instructor in Surgery*
 Julius Salem Neviaser, A.B., M.D., *Clinical Instructor in Surgery*
 James Lloyd Collins, A.B., M.D., *Clinical Instructor in Surgery*
 William Ross Morris, M.D., *Clinical Instructor in Surgery*
 Arthur James Mourot, B.S., M.D., *Clinical Instructor in Surgery*
 Donald Harrison Stubbs, A.M., M.D., *Clinical Instructor in Surgery*
 William Carey Meloy, M.D., *Clinical Instructor in Surgery*
 Joseph Francis Conlon, D.D.S., *Clinical Instructor in Dental Surgery*
 Charles Seymour Coakley, M.D., *Clinical Instructor in Surgery*

- 138 *Introductory Surgical Clinics (elective)* White and Staff
Obvious and classical cases are presented to the student, whose background of the structure of the body serves to give him an understanding of the cases. Two hours a week.
- 279 *General Surgery* Borden
Course of lectures and recitations covering surgical diseases of the neck and chest, herniae, amputations, and pre- and post-operative treatment. One hour a week for twenty-eight weeks.
- 281 *Anesthesia (elective)* Chipman
Theoretical and practical instruction is given in the use of general and local anesthetic agents. One hour a week for nine weeks.
- 282 *Fractures and Dislocations* Leadbetter
One hour a week.
- 283 *Surgical Technique* Marbury
Series of demonstrations of surgical instruments and appliances. The preparation of the patient, the operating room, the materials commonly used, and the duties of each member of an operating team. One hour a week.
- 371-72 *General Surgery* Putzki, Riddick

- 379-80 *Surgical Clinic* White and Staff
Demonstration to the entire class of the various surgical diseases, with stress upon the differential diagnosis and pre- and post-operative care. Gallinger Hospital. One hour a week.

381-82 *Clinical Clerkship*

The Staff

The student is assigned and required to work up thoroughly the cases for diagnosis and treatment. Gallinger and Emergency hospitals.

478 *Orthopedics (elective)*

Hall

Etiology, pathology, symptomatology, and treatment of congenital and acquired diseases of the bones and joints, and the clinical instruction in treatment and in the use of appliances for the correction of deformities. One hour a week.

479-80 *Private Practice of Surgery (elective)*

White and Staff

The student will be given instruction in the private offices of various members of the staff, where he may observe the private practice of surgery.

481 *General Surgery*

White

One hour a week.

483-84 *Dispensary Clinic*

The Staff

Dispensary instruction in the principles and practice of surgery. Instruction of small groups is given in general surgery and the specialties, including anesthesia, neurosurgery, orthopedics, proctology, and oral surgery. University and Emergency hospitals.

485-86 *Special Problems in Surgery (elective)*

Sager, Dean

General surgical diagnosis, with special emphasis on the diagnosis and differential diagnosis of surgical diseases and post-operative complications. One hour a week.

488 *Surgical Clinic*

White and Staff

Demonstration to the entire class of the various surgical diseases. One hour a week.

UROLOGY

Frederick August Reuter, M.D., *Professor of Urology, Executive Officer*
 Thomas Carlton Thompson, B.S., M.D., *Clinical Professor of Urology*
 Alan Jeffries Chenery, M.D., *Associate in Urology*
 Charles Perry Howze, M.D., *Associate in Urology*
 Gilbert Ottenberg, A.M., M.D., *Clinical Instructor in Urology*
 William Glenn Young, M.D., *Clinical Instructor in Urology*
 Gerald Arthur Hopkins, B.S., M.D., *Clinical Instructor in Surgery*

491-92 *Urology*

Reuter

Lectures covering the entire field of urology, including diagnosis, treatment, and morbid pathology. One hour a week.

493-94 *Clinics*

The Staff

Clinical teaching and demonstrations on the care of urological cases, with special emphasis on the pre- and post-operative management. Operative clinics and clinical teaching. Gallinger and Children's hospitals.

495-96 *Clinics*

Reuter and Staff

Clinical demonstration and teaching in the dispensary, with special attention given to diagnostic procedures. Emergency and University hospitals. One part of each section daily.

THE LAW SCHOOL IN THE NATIONAL EMERGENCY

PLAN OF INSTRUCTION

The Law School is announcing changes in the plan of instruction made to enable students to meet the National Defense needs. Because of the possibility of students being called into the defense services, the teaching plan of a yearly organization for major subjects is to be changed in September of 1941. Courses formerly taught throughout the year will be taught in one semester by increasing the number of class hours.* To illustrate, a course formerly given throughout the year two hours a week will be given in one semester with classes meeting four hours a week. This change will permit students to complete courses and receive both residence and course credit in a semester.

CONSIDERATION OF PERSONAL PROBLEMS

The Dean's Council will endeavor in every way consistent with proper educational standards to approve such special arrangements as may be necessary to meet individual problems arising from the demands made upon students by the National Emergency. Students who have such problems are requested to submit them to the Dean of the Law School for the full and immediate consideration of the Dean's Council.

MILITARY LAW

Many students will have a special interest in Military Law because they are in or expect to enter one of the service branches. The Law School has arranged, under the auspices of the Student Bar Association, to offer without charge lectures on the several phases of Military Law.

* Exceptions to this plan are: (1) *Evidence* (late-afternoon section) and *Trusts*, which will be taught throughout the year with examinations and credit given at the end of each semester; (2) *Moot Court* and *Current Decisions*, which will be taught throughout the year with credit given at the end of each semester by special arrangement, if students are able to attend for only one semester.

PUBLIC LAW

The National Emergency makes inevitable a great increase in governmental regulation and control of the activities of groups and individuals and a marked extension of direct operation of business and industry by the Government. The proper protection, at the same time, of fundamental civil liberties and individual interests makes increasingly important the subject of Public Law. In the professional and graduate curricula, many phases of Public Law are covered, especially in the courses in Administrative Law, Constitutional Law, Government Corporations and Instrumentalities, International Law, Interstate Commerce Law, Labor Law, Labor Relations Regulation, Patent Law, Public Utilities, Taxation, and Trade Regulation.

Research in special problems of public law will be conducted in seminars including Administrative Law II, Constitutional Law II, Government Corporations, and Trade Regulation II.

The George Washington Law Review has gained wide recognition as a law review which specializes in public law. It will continue this specialization during 1941-42. Included will be articles resulting from work in the graduate seminars.

MORNING AND LATE-AFTERNOON SCHEDULE OF CLASSES

The morning sections will meet from 9:10 A.M. to 1:00 P.M. This work is primarily for full-time students, but students employed in the late afternoon or evening may register in the morning sections for a limited program of study. The late-afternoon sections will meet from 5:20 to 7:05 P.M. five days a week. These afternoon sections are primarily for employed students.

HISTORY AND ORGANIZATION

HISTORY

The idea of a university located in the Capital of the Nation was sponsored by George Washington, who during his public life urged the establishment of such an institution and who in his will left fifty shares of stock in the Potomac (Canal) Company for the endowment of a university to be established in the District of Columbia "to which the youth of fortune and talents from all parts thereof might be sent for the completion of their Education in all the branches of polite literature;—in arts and Sciences,—in acquiring knowledge in the principles of Politics & good Government".

It was George Washington's hope that the "General Government" would extend toward such an institution "a fostering hand". No steps were taken by Congress to carry out the provision of Washington's will, and the stock that he had bequeathed for the establishment of a university in the District of Columbia became valueless owing to the failure of the Potomac Canal properties.

Meanwhile, however, a movement was started by private persons under the leadership of Luther Rice to establish an institution of higher learning at the seat of the National Government for the education of the Baptist ministry and to afford general collegiate training. In 1819 an association was formed by Luther Rice, Obadiah B. Brown, Spencer H. Cone, and Enoch Reynolds for the purpose of raising funds to buy land for the use of the college.

A group of the Nation's leaders who were especially interested in Washington's idea became patrons of the college and contributed to funds raised for the purchase of land and erection of buildings. Among them were James Monroe, President of the United States; William H. Crawford, Secretary of the Treasury; John C. Calhoun, Secretary of War; William Wirt, Attorney General; Return J. Meigs, Postmaster General; and thirty-two members of the Congress.

Legally to implement the college a petition was made to Congress for the incorporation of "the General Convention of the Baptist Denomination in the District of Columbia for evangelical and literary purposes". This petition was denied by Congress, on April 26, 1820, because of its sectarian character.

Failing to obtain a denominational charter, members of the association enlarged their objective to embrace national aims, and with the sponsorship of Government leaders there was presented in Congress a bill for the incorporation of "the Columbian Society for literary purposes", it being proposed to realize in this way "the aspirations of Wash-

ington, Jefferson and Madison for the erection of a university at the seat of the federal government".

Acting upon this second petition, on February 9, 1821, Congress chartered Columbian College in the District of Columbia, inserting in the charter by special action the provision "That persons of every religious denomination shall be capable of being elected Trustees; nor shall any person, either as President, Professor, Tutor or pupil, be refused admittance into said College or denied any of the privileges, immunities or advantages thereof, for or on account of his sentiments in matters of religion".

Thus Columbian College in the District of Columbia was chartered by Congress as one of the early nonsectarian institutions of higher learning in the United States, under the distinguished favor of President James Monroe and members of his Cabinet.

A tract of approximately forty-seven acres, extending about one-half mile northwest of Boundary Street (Florida Avenue) between 14th and 15th Streets, was purchased and by 1822 the main building was completed sufficiently to use.

Two years later, when the first Commencement was held on December 15, 1824, Congress and the Supreme Court adjourned their sessions to enable their members to attend the exercises. President Monroe, John Quincy Adams, John C. Calhoun, Henry Clay, and the Marquis de Lafayette headed the eminent company in attendance.

The School of Medicine, established in 1821, was formally opened in 1825 and has been in continuous operation since that time. The Law School, organized in 1826, was discontinued the following year, and was reestablished in 1865. It is the oldest law school in Washington.

By an act of Congress of March 3, 1873, the name of the college was changed to "Columbian University", in recognition of the enlarged scope of the institution. The following year the University was moved from its first location on "College Hill", now Columbia Heights, to the new University Hall built for it at Fifteenth and H Streets. Near-by buildings accommodated the School of Medicine.

For a period of six years, from 1898 to 1904, the University was placed under control of the Baptist Denomination. In 1904 an act restoring the original secular character of the University and authorizing change of name to The George Washington University was passed by Congress.

Subsequently all the Colleges, Schools, and Divisions of the University except the School of Medicine, which is situated on H Street between Thirteenth and Fourteenth Streets NW., were brought together at the present location in the city block bounded by Twentieth, Twenty-first, G, and H Streets NW., and in the blocks adjacent.

In 1930 a new plan of academic organization for the liberal arts work was effected. The Junior College was established, comprising the work of the freshman and sophomore years. The junior and senior years were retained in Columbian College, which was designated the senior college of letters and sciences. As a further step, the year of study leading to the Master's degree was separated from the graduate work for the Doctor's degree and assigned to Columbian College. The Graduate Council was organized to administer the work for the degree of Doctor of Philosophy. These innovations were accompanied by the establishment of a carefully controlled independent study plan, the grouping of departments of instruction under the divisional type of organization, and the institution of a new plan of administration both for the undergraduate major and for the Master's work.

THE COLLEGES, SCHOOLS, AND DIVISIONS

The George Washington University offers courses in twelve Colleges, Schools, and Divisions, as follows: the Junior College; Columbian College, the senior college of letters and sciences; the Graduate Council; the School of Medicine; the Law School; the School of Engineering; the School of Pharmacy; the School of Education; the School of Government; the Division of University Students; the Inter-American Center; and the Summer Sessions.

ACADEMIC STATUS

The George Washington University is on the approved list of the Association of American Universities, the standard accrediting body for the United States. This fact not only assures to students the academic standards of this accrediting body, but also is important to those who desire to transfer credits from one institution to another.

The University is also accredited by its regional accrediting agency, the Middle States Association of Colleges and Secondary Schools, and is on the approved list of the American Association of University Women.

The Law School is a charter member of the Association of American Law Schools and is approved by the Council of Legal Education of the American Bar Association. The School of Medicine is a member of the Association of American Medical Colleges, is one of the medical colleges which have been designated continuously as "class A" by the American Medical Association, and is accredited for all its work by the Combined (Royal) Medical Examining Boards in England. The School of Pharmacy is accredited by the American Council on Pharmaceutical Education and is a member of the American Association of Colleges of Pharmacy. The School of Engineering is on the accredited list of the Engineers' Council for Professional Development.

LOCATION

The George Washington University is located in downtown Washington, four blocks west of the White House and an equally short distance from the Potomac River with its extensive parkway. Within a few blocks are many of the departments of the Government, including the Department of State, the Department of the Treasury, the Department of War, the Department of Justice, the Department of the Navy, the Department of the Interior, the Department of Agriculture, the Department of Commerce, and the Department of Labor. The Corcoran Gallery of Art, the Pan American Union Building, and the National Academy of Sciences are also near by, and the Capitol, the Library of Congress, and the National Gallery of Art can be reached by streetcar in twenty minutes from any of the University buildings.

GOVERNMENT

The government and general educational management of The George Washington University are vested in a self-perpetuating Board of Trustees, with the President of the University as member *ex officio*. The members of the Board are named for a period of three years and are divided into three classes. The members of one class are elected at each annual meeting to fill the places of the members whose terms of office expire. Two members of each class are nominated by the Alumni Association. The charter provides that "persons of every religious denomination shall be capable of being elected Trustees".

ENDOWMENT

The endowment of The George Washington University is \$2,355,137.34. This figure does not include funds temporarily functioning as endowment nor the value of buildings, grounds, and equipment.

GENERAL INFORMATION

INTRODUCTORY

The George Washington University Law School, established in 1826, discontinued later, and reorganized in 1865, is the oldest in the District of Columbia. The course of instruction for the degree of Bachelor of Laws, originally requiring two years, was increased in 1898 to three years. A course leading to the degree of Master of Laws was added in 1877. In 1900 the School took part in the organization of the Association of American Law Schools and has been a member of the association since that time. In 1911 the School became coeducational. On September 1, 1925, the entrance requirements were increased to two years of college work; in 1936 they were increased to a college degree. The School is approved by the Council of Legal Education of the American Bar Association. The Law School building is named Stockton Hall in honor of the late Rear Admiral Charles Herbert Stockton, President of the University from 1910 to 1918.

* The President of the University and the Dean of the Law School are members ex officio of all committees.
 † Elected by the Faculty.

THE LIBRARY

The Law School Library of 22,500 volumes contains the official reports of the decisions of the courts of last resort of all the states prior to the National Reporter System and of fourteen states complete to date; the National Reporter System, complete; the reports of the United States Supreme Court and lower federal courts, and the reports of federal administrative agencies; Shepard's Citations for the units of the Reporter System; the English Reprint and English Law Reports; the United States Statutes; the United States Code, Annotated, and the Federal Code, Annotated; reasonably complete sets of statutes of all of the states; the English statutes; the principal English and American digests and encyclopedias; collections of special reports and annotated cases; and the leading textbooks, casebooks, and legal periodicals.

The Library is open from 9:00 A.M. to 11:00 P.M. each class day (Saturday, 9:00 A.M. to 6:00 P.M.), and from 2:00 to 6:00 P.M. on Sunday.

THE LAW REVIEW

The George Washington Law Review, published monthly from November to June, inclusive, by the University, is edited by the Faculty and students of the Law School. It is devoted exclusively to the field of state and federal public law. The location of the University in the National Capital, where the primary sources of federal public law may be observed in operation, affords an unexcelled opportunity for specialization in this field.

The *Review* is edited by a Faculty editor-in-chief, a Faculty board of associate editors, a board of departmental advisory editors, and a board of student editors. The student editors are chosen each year from those students who have attained senior standing in their work for the professional degree in Law with an average grade of B or higher.

RESEARCH IN PUBLIC LAW

Washington, the capital of the Nation, furnishes unsurpassed advantages for research in the fields of public law. In it are the offices of the major executive departments, the Congress, the Supreme Court of the United States, and four lower federal courts. In the executive departments and among the many independent establishments of the Federal Government there have been estimated to be between seventy-five and one hundred agencies the activities of which involve the various branches of public law, particularly administrative law. The student of public law can study at first hand the work of these administrative agencies. He also has available as sources for investigation their records of administrative adjudications. In addition there are more than double the

number of law offices in the various departmental and independent agencies the principal business of which is public law.

To promote research in public law there have been established in the Law School seminars in Administrative Law, Business Associations, Constitutional Law, Trade Regulation, and Public Corporations. The purpose of this research is to furnish means for training specialists in public law, either as government lawyers or as lawyers representing individuals or corporations in cases in which the Government is a party, and to assist in the analysis, clarification, formulation, and improvement of public law, substantive and procedural.

Candidates for the graduate degrees in the Law School and seniors who are candidates for the degree of Juris Doctor are eligible to pursue this work. Other students may be admitted with the special permission of the professor in charge.

As part of the research in public law the Law School conducts each year a conference on specific problems of public law. Leading experts in the field under discussion are brought together for these conferences. Private practitioners, government lawyers, and government administrative officers are invited. The results of these conferences are published in *The George Washington Law Review*. The following conferences have been held: Government Corporations, July 1938; Administrative Law, February 1939; Constitutional Law, March 1940; and The Law of Labor Relations, March 1941.

THE STUDENT BAR ASSOCIATION

Every student in the Law School is required to be a member of the Student Bar Association. This is organized to enable the student to become better acquainted with problems of the profession, to develop better professional ideals, and to bring about closer contact with members of the profession engaged in active practice of the law.

The work of the Student Bar Association is carried on by various committees and by group and general meetings of a professional and social nature. From time to time lectures are given by outstanding authorities on legal and professional problems. The various committees include the following: Lectures, Court Practice, Literary, Case Clubs, Placement and Alumni Relations, Study Groups, and Social Affairs.

Each member of the Student Bar Association receives a subscription to *The George Washington Law Review*.

PRACTICE AND PRACTICE COURT

The curriculum is planned to include such training in the fundamentals of practice as is feasible in a law school. Classroom instruction is conducted in the theories of pleading and procedure, trial and appellate practice, and evidence. This instruction includes grounding in the

principles of the new Rules of Federal Civil Procedure. In addition each senior student is required to participate in the work of the practice or Moot Court. This includes trying a specified number of cases, both as a senior counsel and junior counsel.

The work of the general practice court is conducted in five parts in order that each student may have the opportunity to take part actively. For students who are planning to practice patent law, there is an additional part devoted exclusively to the trial of cases in that field.

The Moot Court follows the new Federal Rules of Civil Procedure which apply to all federal district courts including the District Court of the United States for the District of Columbia. Recognized court procedure is observed at all the sessions of the various parts in order that students may become familiar with it. One of the parts is presided over by a judge of the District Court of the United States for the District of Columbia and the others by leading members of the bar of long and varied experience.

ORDER OF THE COIF

The Order of the Coif, a national honor society with chapters in thirty-five law schools, aims "to foster a spirit of careful study and to mark in a fitting manner those who have attained a high grade of scholarship". The George Washington University Chapter was established in 1926. Members are elected each year from the highest-ranking ten per cent of the graduating class of the Law School.

ADMISSION

APPLICATION FOR ADMISSION

A student desiring admission should obtain from the Office of the Director of Admissions an application blank which he should fill out completely and return to the Office of the Director of Admissions.

To insure prompt action, applications should be filed not later than July 1 for the first semester, January 1 for the second semester, and May 1 for all Summer Sessions.

An applicant should request the registrar of each higher institution previously attended to mail directly to the Office of the Director of Admissions the transcript of his record, even though credits were not earned, together with an honorable dismissal from the institution last attended. The student must be in good standing as to scholarship and conduct, and must be eligible to return to the previously attended institutions in the semester for which he or she seeks admission to The George Washington University.

FOR THE DEGREES IN THE PROFESSIONAL COURSE

These degrees are Bachelor of Laws (LL.B.) and Juris Doctor (J.D.). To be admitted to candidacy for these degrees the applicant must have received before admission the degree of Bachelor of Arts or an equivalent degree from an approved college or university. The conferring of this degree must be evidenced by proper transcripts or certificates of record.

ADVANCED STANDING

Advanced standing toward the degree of Bachelor of Laws may be granted for work successfully completed in other law schools which are members of the Association of American Law Schools. A student transferring from another approved law school with advanced standing must show that at the time he began the study of law at the other school he could have met the requirements then in force for admission to the Law School of The George Washington University.

Applicants for admission with advanced standing must file certified transcripts of record showing high school, college, and law credits. The right is reserved to refuse such credit, in whole or in part, or to allow it conditionally or after examination, and credit given may be withdrawn for subsequent poor work. No student admitted with advanced standing will be recommended for the degree of LL.B. until he has completed in this School at least one full year of residence and passed successfully twenty-eight semester-hours with the required average for the degree. No student will be admitted who has been in attendance at another law school and who is ineligible, because of poor scholarship, to return to that school.

Students planning to attend summer school sessions at other law schools and desiring to use credits obtained at such schools in their course at this Law School must first have the courses they wish to take approved by the Dean. In no event will credits be recognized in excess of those which might be obtained in a similar period in this School.

Advanced standing toward the degree of Juris Doctor for work in other law schools will not be granted.

FOR THE DEGREES IN THE GRADUATE COURSE

These degrees are Master of Laws (LL.M.) and Doctor of Juridical Science (S.J.D.).

FOR THE DEGREE OF MASTER OF LAWS

Candidates for this degree must, at the time of their admission, have received the degree of Bachelor of Arts or an equivalent degree from an approved college or university and the degree of Bachelor of Laws or an equivalent degree from an approved law school.

FOR THE DEGREE OF DOCTOR OF JURIDICAL SCIENCE

To be admitted to candidacy for this degree an applicant (a) must have received the degree of Juris Doctor from The George Washington University Law School or (b) must have received the degree of Bachelor of Arts from an approved college, must have earned with distinguished record the degree of Bachelor of Laws or the equivalent from The George Washington University Law School or other approved law school, must have demonstrated outstanding capacity for scholarly work in the field of law, and must be accepted as a candidate by the Dean's Council of the Law School.

UNCLASSIFIED STUDENTS

Persons eligible for admission to regular standing but not candidates for degrees may, at the discretion of the Dean, be admitted as unclassified students.

Persons who are in good standing as candidates for degrees in other approved law schools may, at the discretion of the Dean, be admitted to take as unclassified students courses which will be accepted for credit in these other law schools. Such work will not be accepted for credit toward a degree at this law school.

REGISTRATION

Before attending classes each student must present himself in person for registration. No student will be registered in the Law School until proper credentials have been filed and approved by the proper officers of the University (see "Admission", above).

The program of the Law School has been organized on the semester basis. The registration is for the current semester only and all the work taken is to be completed during the semester.

Registration is permitted at the beginning of either semester and at the beginning of the first summer term. Students beginning the study of Law in the second semester, however, may pursue only a limited schedule. Such students may pursue other first-year courses in the succeeding summer session.

Qualified students who are entitled to advanced standing on records from other approved law schools or who have completed courses at this Law School during former periods of attendance may register at the beginning of the second semester for subjects which commence at that time, but not for year subjects.

Registration days for the academic year 1941-42 will be Thursday, Friday, and Saturday, September 18, 19, and 20, 1941, and Wednesday

and Thursday, February 4 and 5, 1942. A late-registration fee of \$5 will be charged each student who is permitted to register after the regular registration days. No registration may be made for a semester subject after the first two weeks of a semester, or for a year subject after the first four weeks of the year.

Registration may be changed only with the permission of the Dean.

UNIVERSITY FEE

Payment of the University fee covers all of the expenses incident to registration and, in addition, secures the following University privileges: (1) the issuance of three certified transcripts of record, if and when desired; (2) the services of the Placement Office; (3) the use of University library facilities, except as otherwise designated; (4) gymnasium privileges; (5) admission to all athletic contests, unless otherwise specified; (6) subscription to the *University Hatchet*, the student newspaper; (7) admission to University debates; (8) medical attention and hospital services as described under "Health Administration", page 30. These privileges, however, with the exception of the issuance of transcripts, terminate, and a student is no longer in residence, when he withdraws or is dropped from the University.

STUDENT BAR ASSOCIATION FEE

This fee is charged all students. It secures membership in the Student Bar Association. Among the privileges of this membership is a subscription to *The George Washington Law Review* for the semester.

PAYMENT OF FEES

All fees are payable at the Office of the Cashier, 725 Twenty-first Street NW. No student is permitted to complete registration or to attend classes until all fees are paid. Fees for each semester are due and payable in advance at the time of registration.

In exceptional cases, subject to the approval of the Comptroller, the student may sign a contract for semester charges, except for the University fee and other fees payable in advance, permitting payments as follows:

First semester—one third at the time of registration, plus the University fee and deposits; one third on November 17; one third on December 17.

Second semester—one third at the time of registration, plus the University fee and deposits; one third on March 17; one third on April 17.

Students in the School of Medicine are not privileged to sign contracts for semester charges.

A student who fails to meet payments when due, on the seventeenth day, but who pays his fees between the eighteenth and twenty-second day, inclusive, of the month in which payment is due is charged a service fee of \$1. A student who fails to meet payments by the twenty-second day of the month in which payment is due will be suspended and may not attend classes until he has been officially reinstated and has paid all accrued fees and a reinstatement fee of \$5. A suspended student may not be reinstated for the semester after two weeks from the date of suspension.

Applications for reinstatement are to be made to the Dean of the College, School, or Division in which the student is registered.

An auditor pays a University fee of \$2 and all other fees chargeable to the student registered for credit except the late-registration fee.

WITHDRAWALS AND REFUNDS

Application for withdrawal from the University or for change in class schedule must be made in person or in writing to the Dean of the Law School. Notification to an instructor is not an acceptable notice.

In authorized withdrawals and changes in schedules, financial adjustments will be made as follows:

First semester—withdrawal dated on or before November 15, cancellation of the second and third payments; withdrawal dated on or before December 15, cancellation of the third payment. No refund or reduction will be allowed on a withdrawal dated subsequent to December 15.

Second semester—withdrawal dated on or before March 15, cancellation of the second and third payments; withdrawal dated on or before April 15, cancellation of the third payment. No refund or reduction will be allowed on a withdrawal dated subsequent to April 15.

In no case will the University fee or any part of an initial payment of fees be refunded, and in no case will tuition be reduced or refunded because of nonattendance upon classes.

Payment applies only to the semester for which a registration charge is incurred and in no case will this payment be credited to another semester.

Authorization to withdraw and certification for work done will not be given a student who has not a clear financial record.

SCHOLARSHIPS, PRIZES, LOAN FUNDS

Charles Worthington Dorsey Memorial Scholarship.—This scholarship, established as a memorial to Charles Worthington Dorsey, Bachelor of Laws '81, Master of Laws '82, is awarded upon the recommendation of the Faculty of the Law School to a needy and promising graduate of Columbian College or other division of the University, with a Bachelor of Arts or other equivalent degree, who has maintained an average of *B* as an undergraduate student and who desires to pursue the study of law as a full-time student. The scholarship covers tuition for the course leading to the first degree from the Law School, Bachelor of Laws or Juris Doctor, provided that the holder maintains an average of *B*. The right is reserved to suspend the benefits of the scholarship for cause at

any time. The scholarship is awarded ordinarily once every three years. In 1940-41 it was held by Marcel Paul Van Hemert.

All other scholarships are administered by the University Committee on Student Loans and Scholarships. Application should be made to the Registrar of the University.

The following prizes are awarded annually in the Law School:

Ellsworth Prize.—The Ellsworth Prize of \$25, established by the late Mr. Fritz von Briesen, is awarded to the student doing the best work in the subject of Patent Law Practice. It was awarded in 1939-40 to Herbert Magil.

John Bell Larner Prize.—This prize, established by the bequest of John Bell Larner, consists of a medal which is awarded annually to that member of the graduating class in the Law School who attains the highest average grade in the entire course for the degree of Bachelor of Laws. It was awarded in 1939-40 to Frank Louis Neuhauser.

John Ordronaux Prizes.—These prizes were established in 1909 by the bequest of John Ordronaux. The amount of \$40 is awarded annually to the student in the Law School who has attained the highest average grade in the first-year, full-time, regular course; and \$40 to the student who has attained the highest average grade in the second-year, full-time, regular course. The former was awarded in 1939-40 to Thomas Nathan Dowd and the latter to John Patrick Burke.

Through the generosity of friends of the University a number of loan funds are available to students in the Law School. Among them is the Henry Strong-William A. Maury Loan Fund established by the Henry Strong Educational Foundation in memory of Henry Strong and William A. Maury. Application for loans should be made to the Comptroller of the University.

GENERAL REGULATIONS

Students in the Law School are subject to, and are expected to familiarize themselves with, the general University regulations stated in the University Catalogue.

HOURS OF INSTRUCTION

The regular course for full-time students is given from 9:10 A.M. to 1:00 P.M. Employed students may take the regular course in the classes held from 5:10 to 7:00 P.M.

AMOUNT OF WORK

A student who takes a majority of his courses in the full-time sections, from 9:10 A.M. to 1:00 P.M., may, with the permission of the Dean, take

work not exceeding fifteen hours a week. For such a student the minimum period of attendance is three academic years.

A student who takes a majority of his courses in the afternoon sections may not register for more than ten hours a week. For such a student the minimum period of attendance is four academic years.

The amount of work carried by any student may be restricted when, in the judgment of the Dean, the best interests of the student require it.

ATTENDANCE

A student who has been absent from more than twenty per cent of the classes in any subject will not be permitted to take the examination in the subject except with special permission of the Dean's Council.

RESIDENCE REQUIREMENTS

A year's attendance in the late-afternoon classes is counted as residence for three fourths of a year. A student admitted with advanced standing must complete at least one year of residence in this School and pass twenty-eight semester-hours with the required average for the degree.

A student who at the end of any regular period of residence—the first semester, the second semester, or the summer session—has completed subjects which equal in semester-hours the total number of semester-hours required for the degree for which he is a candidate, but who has failed to complete the full residence requirements for that degree, must be in residence during additional periods sufficient to satisfy completely the residence requirements. In all such cases the student must be in residence during the entire period and must satisfy the attendance requirements of, and pass the examination in, at least one subject.

GRADES

At the end of each semester each student is given a letter grade in each subject completed and a letter grade indicating the average for the semester.

Grades are indicated by the letters *A*, excellent; *B*, very good; *C*, good; *D*, poor—below standard for graduation; and *F*, failed.

The grades *A*, *B*, *C*, and *D*, mean that the work has been successfully completed and credit given for the subjects.

F, failed, means that the work in the subject has been a failure and that no credit will be given. To obtain credit the student must repeat the subject; but a student who has obtained an average of *C* in the work of the academic year and received a grade of *F* in only one subject may take the next regular examination in that subject, and if on such reexamination he obtains a passing grade he will be given credit in the subject with the grade thus obtained.

EXAMINATIONS

Final written examinations are held at the close of each semester. Every student is required to take the regular examinations in the subjects pursued, unless excused by the Dean. A student who, with the consent of the Dean, does not take the final examination in a subject with the class in which he is enrolled may take the next regular examination given in the subject.

No special examinations will be given; except that, upon written application to the Dean's Council, showing sufficient cause, a candidate for a degree at a convocation before the next regular examination, if he would be entitled to take a postponed examination, may, at the discretion of the Dean's Council, be given a special examination.

EXCLUSION AND PROBATION FOR POOR SCHOLARSHIP

A student who during an academic year fails in two or more full-year subjects or the equivalent in half-year subjects will be excluded. Such a student is not eligible to be registered in the Law School or to attend classes in the next academic year. He may, however, be admitted to the regular examinations in that academic year in those subjects in which he has made a grade below passing, and if he receives a grade of passing in these subjects with an average sufficient to make his general average not less than *C*, he will be reinstated at the beginning of the academic year next succeeding the passing of these examinations.

A student not subject to exclusion under the foregoing rule who at the end of an academic year has failed to maintain a general average of at least *C*, will be on probation during the next academic year. A student on probation may at the discretion of the Dean be required to reduce his program of study. A student on probation will be excluded at the end of the probationary year unless he has made grades sufficient to give him a general average of at least *C*.

The general average of a student shall include all the grades in all the subjects taken while he is in the Law School working for a particular degree. When a subject has been repeated or a reexamination has been taken, both the first grade and the subsequent grade or grades shall be counted in the general average.

In special cases in which it is clear that the student's failure does not indicate lack of ability to pursue the study of law, the student who has become subject to exclusion may be readmitted by vote of the Dean's Council of the Law School.

No student shall be put on probation or excluded because of the work of one semester only, the work of the Summer Sessions, or as the result of a program of less than four hours a week during the academic year.

CLASSIFICATION OF STUDENTS

Students are divided into classes on the completion of semester-hours of credit as follows: First year, to twenty-seven; second year, twenty-eight to fifty-five; third year, fifty-six or more.

RIGHT TO DROP STUDENTS

The right is reserved by the University to drop any student from the University, or from any class or classes, whenever, in the interest of the student or the University, the University Administration deems it advisable to do so.

STUDENT LIFE

STUDENT ACTIVITIES

Control and direction of all student activities are vested in the Committees on Extracurricular Activities and Student Relationships. For list of student activities and rulings governing them see the special printed regulations of the University.

LIVING ACCOMMODATIONS

It is advisable for the student to reach the University two or three days before the opening of the term in order that he may become established in satisfactory living quarters before class work begins.

A woman student under twenty-three years of age must have her residence approved by the Director of Personnel Guidance. Registration is not complete until such approval is given.

The Hattie M. Strong Residence Hall is open to women students. Charges for rooms in Strong Hall for the academic year (September 15 to June 1) are as follows: In a single room with breakfast and dinner, \$425.00; in a double room with breakfast and dinner, \$365.50. Arrangements may be made to defray dormitory charges in monthly payments. Forms for application for room reservations, together with detailed information about the dormitory, may be obtained from the Director of Personnel Guidance.

The University has limited dormitory facilities for men. For the benefit of men students a register of rooms that have been inspected and approved is kept in the Office of the Director of Personnel Guidance, to whom inquiries in respect to housing should be addressed. Single rooms usually range in price from \$20.00 to \$30.00 a month, and double rooms from \$10.00 to \$20.00 a month a person. Rooms with board consisting of breakfast and dinner cost from \$40.00 to \$50.00 a month a person. The men's fraternities have houses which provide living accommodations for their members.

PLACEMENT OFFICE

The Placement Office is maintained to assist graduates and students in finding positions for which their college work has prepared them, and to cooperate with employers who wish to fill vacancies. Enrollment is open to alumni members and students of the University without charge for placement.

For further information address the Placement Office.

STUDENT EMPLOYMENT

An employment service is operated to assist the self-supporting student in finding employment.

The prospective student who expects to earn any part of his expenses and who does not have a definite appointment to a position before coming to Washington should have the means of support for at least one semester. A minimum budget of \$80 a month is recommended.

Many out-of-town students secure positions in the departments of the Government in Washington by taking the United States Civil Service examinations in their home states. The hours of employment permit them to pursue a college course in the late afternoon.

HEALTH ADMINISTRATION

The payment of the University fee entitles the student to health services hereinafter described. Through reports from the students and University officials, the University attempts to keep informed as to all cases of illness among its students. This service is primarily diagnostic in its intent. It also provides first aid in the event of an emergency.

Medical privileges include: (1) the physical examination of every student entering from secondary school;* (2) three visits by the University physician or surgeon, office or residence (District of Columbia) in any one illness, exclusive of a specialist, surgical operation, laboratory, or X-ray examination; (3) hospitalization, including board, medicine, and nursing in the University Hospital for not more than two weeks during a school year—the necessity to be determined by the Director of Health Administration. The duration of hospitalization period (maximum, two weeks) is also to be determined by the Director of Health Administration.

This medical benefit does not apply to illness or disability incurred previous to the University term or prior to payment of the University registration fee.

The student is allowed, if he so desires, to engage physicians and nurses of his own choice, but when he does so he will be responsible for the fees charged.

*A charge of \$2 is made if a student fails to appear for a physical examination during the period set for this purpose.

Rules: (1) The Director of Health Administration is empowered to limit or deny the medical benefits where, in his discretion, a student has, by his misconduct or breach of the rules of the University, made himself ineligible; (2) the Director of Health Administration has authority to determine the necessity and length of hospitalization; (3) a student who has severed his connection with the University is ineligible for medical benefits; (4) a student intending to train for an athletic team is required to pass a thorough examination at the beginning of each semester; (5) the above regulations apply also during the Summer Sessions of the University.

COURSES OF INSTRUCTION

The courses of instruction in Law are listed on page 36.

THE DEGREES

IN THE PROFESSIONAL COURSE

These degrees are Bachelor of Laws (LL.B.) and Juris Doctor (J.D.).

PATENT LAW CURRICULUM

To provide training for the student who plans to specialize in Patent Law, the courses in Substantive Patent Law, Patent Office Practice, and Patent Moot Court are offered as third-year electives. They may be counted toward the degree of Bachelor of Laws or Juris Doctor, or they may be taken by the qualified student not a candidate for degree.

HONORS

The degree of Bachelor of Laws or of Juris Doctor "with distinction" will be awarded the student who obtains a general average of *A* in the work for the degree.

IN THE GRADUATE COURSE

These degrees are Master of Laws (LL.M.) and Doctor of Juridical Science (S.J.D.)

REQUIREMENTS FOR THE DEGREE OF MASTER OF LAWS

To be recommended for this degree the student must have completed a residence period of not less than one academic year. He must have completed satisfactorily twenty semester-hours, of subjects in the graduate curriculum. In individual cases, third- or fourth-year subjects listed in the professional curriculum may be included in the program of study. All requirements for this degree must be completed in a period not exceeding two academic years.

REQUIREMENTS FOR THE DEGREE OF DOCTOR
OF JURIDICAL SCIENCE

To be recommended for this degree the student must have completed a residence period of not less than one academic year. He must have pursued a course of study and research designated by his consultative committee and approved by the Dean's Council of the Law School. At the conclusion of his first year of residence or at such other time as the consultative committee may set, the candidate must pass an oral examination in those fields of study selected by the consultative committee. This examination shall be conducted by the consultative committee and such other members of the faculty as may be assigned by the Dean. The student must then submit a thesis which in the opinion of the examining committee shall constitute a substantial contribution to the field of law concerned and shall be suitable for publication.

FIELDS OF STUDY AND INVESTIGATION

A field of study may be selected from the following: Administrative Law, Civil Procedure, Conflict of Laws, Constitutional Law, Evidence, Federal Jurisdiction, Public Corporations, Government Regulation of Business Organization, History of Law, International Law, Labor Law, Municipal Corporations, Trade Regulation, and Trusts.

SUMMER SESSIONS

Work is conducted in the Law School during the Summer Sessions of the University. This work is in two terms of six weeks each. The requirements for admission and the standards of work are the same as those of the two semesters of the regular academic year. Instruction is given by members of the regular Faculty and by teachers invited from other approved law schools. Classes meet in the late afternoon.

The Summer Session for 1941 begins on Monday, June 16. The first term ends July 28. The second term begins on Tuesday, July 29 and ends September 11.

The following courses will be given: First term—Torts, Constitutional Law I, Administrative Law I, Security Transactions. Second term—Property I, Bills and Notes, Labor Law and Regulation, Persons and Domestic Relations.

Four semester-hours' credit will be given for each subject completed.

The Summer Session for 1942 will begin on Monday, June 15. The first term will end July 27. The second term will begin on Tuesday, July 28 and end on September 10.

A tentative schedule of subjects is announced as follows: Property I, Torts, Agency, Domestic Relations, Contracts II, and three additional subjects.

The final schedule will be announced in November 1941.

For catalogues, application blanks, and further information, address the Director of Admissions, The George Washington University, Washington, D. C.

COURSES OF INSTRUCTION IN LAW

The courses of instruction listed below are subject to some slight change. The University reserves the right to withdraw any course announced.

The number which precedes the name of a course indicates the semester in which that course is offered. An odd number indicates that the course is offered in the first semester; an even number, that it is offered in the second semester; and a double number (e.g., 241-42), that it begins in the first semester and continues in the second.

First-year courses are numbered from 101 to 200; second-year courses, from 201 to 300; third-year courses, from 301 to 400; and graduate courses, from 401 to 500.

The number of semester-hours of credit given for the satisfactory completion of a course is indicated in parentheses after the name of the course. Thus, a year course giving two hours of credit each semester is marked (2-2), and a semester course giving two hours of credit is marked (2).

LETTER OF TRANSMITTAL

December 29, 1941

TO THE PRESIDENT AND THE BOARD OF TRUSTEES
THE GEORGE WASHINGTON UNIVERSITY
WASHINGTON, D. C.

GENTLEMEN:

I am submitting herewith the Report of the Comptroller of The George Washington University for the fiscal year ended August 31, 1941. This report is a review of the budget operations for the year and is based on the budget approved by the Board of Trustees of the University.

The accounts of the University are kept and its financial reports set up as far as practicable in conformance with the recommendations of the National Committee on Standard Reports for Institutions of Higher Education. Under that plan the funds of the University are classified in various fund groups, and the accounts and financial statements are set up to segregate clearly the assets and liabilities of each of these groups as indicated in the balance sheet, Exhibit A.

R. G. Rankin & Co., certified public accountants, have examined the accounts of the University for the past year, and their report is appended herewith.

A condensed summary of the principal facts in the report is presented below and on succeeding pages, followed by detailed financial records.

Respectfully submitted,

HENRY W. HERZOG
Comptroller

CONDENSED SUMMARY
CURRENT FUNDS—UNRESTRICTED

These funds represent unrestricted assets which are available for immediate use in the current operation of the University.

OPERATING INCOME

Operating income for the year was \$1,626,198.18 (Schedule 3).

Scholarships were awarded to students from the following sources: current funds unrestricted (Schedule 4), \$15,952.32; endowment income (Schedule 30), \$4,488.08.

The United States Government through the National Youth Administration made available the sum of \$37,309.20 for the employment of 343 students in various projects at the University. Since the funds were not handled by the University, the amount is not included in the income and expense schedules.

In the interest of National Defense, the University conducted 35 short engineering courses of college grade under Public Act No. 812, 76th Congress, 3d Session, Title I, Subheading "Office of Education", to provide training for properly qualified trainees. The United States government appropriated \$49,734.40 for these courses of which \$43,368.10 was expended in the 1940-41 year (Schedules 7-10). The balance of \$6,366.30 was deferred to the 1941-42 year and of this amount \$3,380.75 was used, the balance of \$2,985.55 being refunded to the Government.

OPERATING EXPENSE

Operating expense for the year was \$1,592,737.33 (Schedule 4).

SURPLUS

The operating net income for the year (Schedule 4) was \$33,460.85. At the end of the fiscal year 1940-41, the Current Funds Unrestricted Surplus amounted to \$40,489.40. A complete analysis of changes affecting this Surplus account may be found on Schedule 1.

CURRENT FUNDS—RESTRICTED

Gifts, grants, and income from endowments comprise these funds which consist of currently expendable assets, limited as to disposition.

During the year restricted gifts for immediate use amounted to \$950.00 (Schedule 5); other restricted gifts for use as needed or specified amounted to \$12,175.88 (Schedules 5-6); restricted endowments earned \$70,817.61.

LOAN FUNDS

For the assistance of students seeking financial aid, loan funds have been established by the University and by other organizations. (Schedule 22). Loans are made at a low rate of interest and when repaid the interest is added to the principal.

During the year, loans were made to 506 students. A gift of \$25.00 was made to the Loan Funds (Schedules 5-25).

ENDOWMENT FUNDS

The principal of all endowment funds amounts to \$2,394,802.20 (Exhibit A). These funds are represented by assets which, under the terms of wills, deeds of gift, or under the by-laws of the University, must be held in perpetual trust for income-producing purposes. The principal amount and purpose of every endowment fund of the University is recorded on Schedule 23 and a summary appears on page 6 of Schedule 23.

Gains and losses on sales of securities of the Consolidated Endowment Funds and the Scottish Rite Endowment Fund are recorded in the respective "Reserve" accounts which have a credit balance of \$65,117.16 (Schedule 23—page 1).

"Consolidated Endowment Funds" consist of sixty-five endowments with a total value of \$846,362.09 (Schedule 26—page 2). The assets of these funds are combined to eliminate the possibility of partial or total loss of any fund through the failure of a specific investment, and to avoid temporary suspension of income; it also prevents carrying uninvested small cash balances in amounts not adapted to investment, and gives all funds equality of treatment. Unless otherwise restricted by the donors, the assets of all new endowments are added to the assets of the Consolidated Endowment Funds. Their earnings are recorded in one income account and distributed at the end of the year to the participating funds in the proportion each fund bears to the total of the entire group. This income, after deductions for amortization of premiums on investments and 10% of the balance as a reserve against losses (Schedule 25), was distributed to the participating funds at the end of the past year at the rate of 3.6621% (Schedule 30).

The Scottish Rite Fund earned 3.5448% net income on its investments during the year just ended. Pledges to the School of Medicine Endowment Fund on August 31, 1941, totaled \$23,600.

PLANT FUNDS—UNEXPENDED

Cash and other assets (Schedules 24-29) not yet expended for development of the physical plant comprise this type of fund.

There was expended from these funds during the past year \$200,164.50 for land and buildings (Schedules 2-25).

Unexpended Plant Funds, including \$3,329.22 Reserve for Protection of Investments, total \$503,674.60 (Exhibit A, and Schedule 24) which is largely invested in temporary investments (Schedule 29).

PLANT FUNDS—INVESTED IN PLANT

The investment in the physical plant of the University includes land, buildings, equipment, and library books; their total value August 31, 1941, was \$4,687,400.27 (Exhibit A).

Additions to land and buildings during the year totaled \$225,607.50 (Schedules 2-20). Equipment was increased by \$21,726.03 and \$9,455.98 was added to library books (Schedules 2-21). Trust notes payable were reduced by \$48,120.36 (Schedules 1-2).

AUDIT CERTIFICATE

December 29, 1941

TO THE PRESIDENT AND THE BOARD OF TRUSTEES
THE GEORGE WASHINGTON UNIVERSITY
WASHINGTON, D. C.

GENTLEMEN:

We have examined the balance sheet of THE GEORGE WASHINGTON UNIVERSITY as at August 31, 1941, and the statements of current operating income and expense, current funds surplus, and other fund transactions for the fiscal year then ended, have reviewed the system of internal control and the accounting procedure of the University, and, without making a detailed audit of the transactions, have examined or tested accounting records of the University and other supporting evidence, by methods and to the extent we deemed appropriate.

In our opinion, the balance sheet and related statements of current operating income and expense, current funds surplus, and other fund transactions included in the accompanying Report of the Comptroller of the University, present fairly the financial position of The George Washington University as at August 31, 1941, and the results of operations for the fiscal year then ended, in conformity with accepted principles of university and college accounting applied on a basis consistent with that of the preceding year.

Respectfully submitted,

R. G. RANKIN & Co.

DEPARTMENT OF SECRETARIAL STUDIES

In response to the constantly increasing demand of business employers for men and women who have general or special college training in addition to business preparation, The George Washington University has established a two-year course leading to the Junior Certificate in Secretarial Studies.

ADMISSION

Procedure.—A student desiring admission should obtain from the Office of the Director of Admissions an application blank which he should fill out completely and return. To insure prompt action, applications should be filed not later than July 1 for the first semester, January 1 for the second semester, and May 1 for the nine weeks' term of the Summer Sessions.

Requirements.—An acceptable certificate of graduation from an accredited secondary school or the satisfactory passing of specified College Entrance Board examinations is required.

Placement Tests.—All entering students with previous training or experience in typing and shorthand will be given special placement tests.

REGISTRATION

No student will be registered until proper credentials have been filed and approved. The registration days will be: June 16 for the nine weeks' term of the 1941 Summer Sessions, September 17-20 for the first semester, and February 3-5 for the second semester. A late registration fee of \$5 will be charged students who register after these dates.

FEES

Fees are as follows: University fee, \$8 a semester (\$4 in the Summer Sessions); tuition fee, for each semester-hour of credit, \$8; late-registration fee, \$5. Laboratory fees, a semester: Secretarial Studies 1, 2, \$6; Secretarial Studies 7, 15-16, 23, \$3; Secretarial Studies 17-18, \$1.50; Secretarial Studies 32, \$4.50.

Sidney Bartlett Hall, formerly Superintendent of Public Instruction, State of Virginia, has joined the staff as Professor of Education and will teach courses in Administration, Supervision, and the Curriculum.

Dr. Hall is a native of Norfolk County, Virginia. He received the degree of Bachelor of Arts from the College of William and Mary in 1918, the degree of Master of Arts from the University of Virginia in 1924, and the degrees of Master of Education and Doctor of Education from Harvard University in 1925 and 1926.

Dr. Hall brings to his work a rich background of teaching and administrative experience. Between 1913 and 1924 he served as high school teacher and principal in Virginia. From 1924 to 1928 he was State Supervisor of Secondary Education in Virginia. For the next three years he was Professor of Secondary Education at the George Peabody College for Teachers. In 1931, he became Superintendent of Public Instruction and Secretary to the State Board of Education, State of Virginia, positions in which he served continuously until his recent resignation to enable him to devote full time to professorial work.

Professor Hall taught courses in Secondary Education and the Curriculum at the George Washington University in the summer of 1937. Since 1938 he has rendered part-time service as Adjunct Professor of Education. The Faculty now takes great pleasure in welcoming him to full time service.

Chester Winfield Holmes, Assistant Superintendent in charge of senior high schools and teachers colleges in the District of Columbia, will assume increased responsibilities in connection with the course on the Administration of Secondary Education, which will now extend over two semesters. Dean Fox will direct the work of the first semester and Dr. Holmes that of the second.

Ruth Kincer Webb who has been a member of the staff for the past two summers and has assisted with courses on other occasions, will join the Faculty this fall to offer a course on the utilization of

community resources in the educational program. Mrs. Webb is Administrative Principal of the Student Teaching Centre of the Wilson Teachers College.

Veryl Gladys Schult, Head of the Department of Mathematics, District of Columbia Schools, will join the Faculty this fall to offer a course dealing with problems in secondary school mathematics.

In cooperation with the new Department of Secretarial Studies improved programs have been developed for the education of teachers of Business Education. Beginning and advanced courses are now available in Typewriting, Shorthand, and other secretarial subjects.

Registration for the first semester will be conducted September 18, 19, and 20. Classes begin September 22.

For information concerning admission, registration, transfer of work, fees and other requirements, consult the general catalogue, a copy of which will be sent on request.

THE FINE ARTS PROGRAM

INFORMATION

This year The George Washington University and the Corcoran Gallery of Art are undertaking a cooperative plan for the teaching of the Fine Arts. The University recognizes this experiment as one that can be especially significant because of the fine opportunities for the teaching of the Fine Arts in the city of Washington.

The Corcoran School of Art, affiliated with the Corcoran Gallery of Art, was established in 1887. Instruction in the fine arts was started in the University in 1888. Both institutions have built up during their existence excellent traditions. It is felt that the cooperative plan now being worked out will strengthen the work in both institutions and make available to those desiring training in the Fine Arts a better-rounded professional program.

ADMISSION, REGISTRATION, CURRICULA REQUIREMENTS, AND GRADUATION

Students are subject to and are expected to familiarize themselves with the regulations regarding Admission and Registration, the requirements concerning Curricula and Graduation, and the general University regulations as stated in the general catalogue.

FEES AND FINANCIAL REGULATIONS

Students are subject to the regulations concerning the (1) Payment of Fees and (2) Withdrawals from the University and Refund of Fees as stated on pages 26 and 27 of the general catalogue.

The following fees are prescribed by statute:

| | |
|--|--------|
| UNIVERSITY FEE | |
| For each semester or for any part thereof..... | \$8.00 |
| For the Summer Sessions..... | 4.00 |
| For auditors and for extension students, for each registration*..... | 2.00 |
| TUITION FEES, for each semester-hour..... | |
| | 8.00 |
| FEES FOR SPECIAL EXAMINATIONS, for each subject..... | |
| | 5.00 |
| GRADUATION FEES | |

| SPECIAL FEES | |
| Late-registration fee, charged each student who fails to register within the designated period..... | 5.00 |
| Service fee, charged each student whose payments, not met when due on the seventeenth day, are paid between the eighteenth and twenty-second days, inclusive, of the month in which payment is due | 1.00 |
| Reinstatement fee, charged each student who is reinstated after suspension for delinquency in fees..... | 5.00 |
| For special physical examination..... | 2.00 |

UNIVERSITY FEE

Payment of the University fee covers all expenses incident to registration and, in addition, secures to each student the following University privileges: (1) the issuance of three certified transcripts of record, if and when desired; (2) the services of the Placement Office; (3) the use of University library facilities, except as otherwise designated; (4) gymnasium privileges; (5) admission to all athletic contests, unless otherwise specified; (6) subscription to the *University Hatchet*, the student newspaper; (7) admission to University debates; (8) medical attention and hospital services as described under the Department of Health Administration. These privileges, however, with the exception of the issuance of transcripts, terminate, and a student is no longer in residence, when he withdraws or is dismissed from the University.

* Payment of this fee does not entitle auditors or extension students to the general privileges to which payment of the preceding fees entitles resident students.

LABORATORY FEES AND DEPOSITS

Fees are charged in each course listed below as indicated. All fees are charged by the semester and unless otherwise indicated may be defrayed in three payments when the tuition is paid in this manner. Fees and deposits payable in advance are due in full at the time of registration.

SPECIAL OFFERINGS

In keeping with its policy of expanding its offerings in Public Personnel Administration as the need arises, the School of Government of The George Washington University announces the following new courses for the first semester of the academic year 1941-42.

Political Science 151

Public Administration (3)

Reining, Stromsem

Tues. and Thurs., 5:20 to 6:35 P.M.

Dr. Henry Reining, Jr., Educational Director of the National Institute of Public Affairs has been appointed Professorial Lecturer on Public Administration at The George Washington University.

Dr. Karl E. Stromsem, Assistant Educational Director of the Institute of Public Affairs has been appointed Lecturer on Public Administration at The George Washington University.

Political Science 243

Seminar: *Position Classification* (3)

Young, DeVoe

Friday, 8:00 to 10:00 P.M.

This is an introductory course designed to give the student an understanding of the fundamental concepts of position classification; the relation of classification to over-all management problems and to other phases of personnel administration. While not intended as a course in detailed classification techniques, approximately one-half of the course will be given over to methods used in classification surveys, and the installation and maintenance of classification plans.

Mr. Edward Young, Personnel Officer of the Bureau of the Budget and Mr. Maxwell A. DeVoe, Chief, Division of Organization and Personnel Management, United States Department of Agriculture, have been appointed Lecturers on Personnel Administration at The George Washington University.

THE PROGRAM FOR PERSONNEL ADMINISTRATION TRAINING

For many years The George Washington University has been training personnel workers for industry, education, and the public service. It has been especially interested in preparing those who seek a career of public service in the Federal Government. This training has been offered in connection with a major in Psychology or in Public Administration. Throughout the past four decades there has been a steadily growing need in the municipal, state, and federal jurisdictions for carefully selected and professionally trained personnel workers, and recent national events have greatly increased this demand.

In response to this demand The George Washington University is expanding its course offerings in the field and is establishing new graduate curricula in Public Personnel Administration leading to appropriate degrees.

UNDERGRADUATE BACKGROUNDS

On the undergraduate level, no formal curriculum in personnel administration is provided, for experience has indicated that a broad background of liberal arts or professional education combined with experience is the best foundation for graduate specialization in personnel work. Undergraduate students who major in Business Administration, Economics, Education, Engineering, Political Science, Psychology, Public Administration, Public Hygiene, or Sociology will be able to include a number of personnel courses in their programs. Undergraduates planning to specialize as graduate students in Public Personnel Administration are advised to elect courses in Economics, Political Science, Psychology, and Statistics as desirable background courses. Such courses will be selected in accordance with the type of personnel work the student desires to undertake.

GRADUATE CURRICULA

The Degree of Master of Arts in Public Personnel Administration

The curricula as offered by the University are designed to train candidates for undertaking personnel service. They lead to the professional degree of Master of Arts in Public Personnel Administration.

Requirements for Admission

The University does not wish to accept a large number of candidates for this degree. Its Committee on Admissions will carefully investigate the qualifications of those making application and will encourage those students to undertake such training who have backgrounds and aptitudes for the work. Among the items which will be considered by the Committee are: graduation from an accredited college or university, appropriate course backgrounds for the type of specialization to be undertaken, and personal qualifications which are thought to be favorable for success in personnel work.

Requirements for the Degree

The degree of Master of Arts in Public Personnel Administration is a professional degree designed to provide the necessary pre-entry training for personnel work. The requirements for the degree cannot be stated definitely in terms of semester-hours, although a minimum of thirty semester-hours including either a thesis (6 semester-hours) or field work (6 semester-hours) is required. Unless a candidate is already credited with the introductory courses in Economics, Political Science, and Psychology prerequisite to admission to second-group courses, he will be required to take these courses without credit toward the Master's degree. Each student's program will be planned in the light of his background and professional objective. A typical program of work is described below. It is assumed that many of these courses will be offered as undergraduate credits and that frequently the program will not exceed thirty semester-hours. Students qualified by experience or independent study may satisfy some of these requirements by examination without taking formal courses, although in no case will less than thirty semester-hours meet the requirement for the degree.

The disciplines for a professional doctorate degree in Public Personnel Administration are being developed in the School of Government, the details of which will be announced in the near future. In the meantime a student having an appropriate Master's degree, who wishes to begin work toward this advanced professional degree, may register as a Special Student in the School of Government and later transfer the work to the doctorate curriculum and be credited with the fees already paid.

Students interested in the degree of Doctor of Philosophy may apply to undertake study in Personnel Psychology or Political Science under the Graduate Council.

For further information, address the Director of Admissions or the Assistant Dean of the School of Government.

* If the candidate has had two years of related professional experience, the fifteen hours of required electives may be reduced to nine hours.

† The total number of hours required may be reduced to as few as 30 provided 15 semester-hours of the above work or approved substitute courses are presented as undergraduate credit.

FUTURE RELATIONS BETWEEN MEXICO AND THE UNITED STATES 60
Señor Dr. Don Francisco Castillo Nájera

Brazilian lady who had just returned from her forty-fifth trip to Europe why she did not visit the United States. Her answer was: "Why should I? You are a race of dollar-chasing barbarians." To her and to millions of others we still lived on the other side of the mountains, which they refused or found no occasion to cross.

Until recent years there was little reciprocal acquaintance between the peoples of the Americas. Our cultural ties, like those of the Latin Americans, were with Europe. We both travelled to Europe, but not in each other's direction. Our students, like theirs, studied at the Sorbonne and Oxford and Vienna. Our leisured classes, like theirs, wintered on the Riviera and toured the continent as a matter of course. The newspapers of the United States and of Latin America featured the affairs of Europe, but gave little space to the happenings of each other. Our international thinking was along parallels of latitude. Our business colonies in the cities of Latin America lived apart from the peoples among whom they resided. They showed surprisingly little curiosity about the cultural life of the countries where they worked and in general ignored their great opportunity to interpret the ways of North Americans and Latin Americans to one another. The few Latin Americans who visited the United States were likely to feel lonely and bewildered.

During that period there was little positive ill-will on either side, but there was a lamentable lack of understanding of each other's way of life, that ill became peoples who shared the same hemisphere and ardently desired to live harmoniously with each other. If the turn of world events should take the wrong course, it might be difficult to preserve that harmony unless we came to know one another better in the meantime. Except as the desire to live at peace with one's neighbors is a matter of self-interest, our efforts to remedy that situation have been disinterested. We covet nothing from Latin America but its esteem. We would neither abridge the sovereignty of its states nor impose our own culture on their peoples. Where the benefits of our own experience in meeting certain problems of our national life, whether in the field of education or public health or applied science, might be of use to them in the solution of their own problems, the results of

our experience are theirs for the asking. And no conditions are attached to the giving.

One of the principal barriers to a closer cultural *rapprochement* between the Americas has been difference of language. Until lately, comparatively few Americans made an effort to learn Spanish or Portuguese and few Latin Americans undertook to learn English. As a second language both of us studied French, the Latin American much more successfully than we did, because of its affinity with his own tongue. Hundreds of thousands of Americans are now diligently studying Spanish, and though much less progress has been made with respect to Portuguese, courses in the language of Brazil are being given in over forty colleges and universities in this country. Similarly, Latin Americans have taken up the study of English in greatly increased numbers.

Naturally, one of the most effective media of cultural interchange consists of books and other publications. Formerly, such of our books as found their way into Latin America generally reached those countries in French translations or in Spanish editions published in Barcelona, or even as reprints put out in London. The flow of books in the other direction was even less impressive and largely consisted of an occasional translation of a Latin American novel hidden away in the catalogue of some New York publishing house. All this time direct relations between the book trade of the United States and of Latin America were practically non-existent.

Then about two years ago a travelling exhibit of representative American books was displayed in the East Coast capitals of South America through the joint initiative of a number of publishers of this country. Since then private machinery for the commercial interchange of books has been set up.

Extensive arrangements for the translation of American books into Spanish and Portuguese have recently been made or are now in process of negotiation with publishing concerns in Rio de Janeiro, São Paulo, Buenos Aires, and Mexico City. These books cover a wide variety of subject matter. They include books on farming, nursing, library practice, industrial processes, child care, engineering, and educational methods. They also include books

on American history and biography, essays and novels, and children's books. Until recently no history of the United States had ever been published in Brazil. During the past six months two standard one-volume histories of this country have appeared in São Paulo in Portuguese translations. *The American Way of Life*, by Faulkner, Kepner, and Bartlett, is now being published in Spanish in Mexico City. In the field of periodical publications a good beginning has already been made by the successful venture of the Spanish edition of *Reader's Digest*, which is circulated widely in the Spanish-speaking republics. Of a less popular character is the publication in Buenos Aires of a Spanish edition of the *Annals of Surgery*, while arrangements have been made for the publication of another well-known medical journal in the same city.

As the popular interest in the other republics has grown in this country American publishers have shown themselves increasingly favorable to the publication of English translations of Latin American books. Typical of progress in this field was the recent publication of an American translation of Ciro Alegria's prize-winning novel of Peru—*El mundo es ancho y ajeno* or *Broad and Alien Is the World*. Last Saturday there was published in this country the winner of second place in the same contest, *Nayar*, by Miguel Angel Menéndez, of Mexico. A much more ambitious project, though less publicized, is the "Inter-American Historical Series", of the University of North Carolina Press, which includes translations of outstanding histories of the leading republics. There still remain many works by Latin American writers, which are not only interesting in themselves, but whose translation into English would do much to make available to us a truer picture of the mind and life of those peoples than it is possible for us to have otherwise.

One of the most successful aspects of the Inter-American program is in the interchange of persons. These include not only students and teachers, but persons distinguished in many fields of activity.

Provision for student fellowships in this country has long been made possible by the great foundations. The Convention for the

Promotion of Inter-American Cultural Relations also provides for the exchange of professors and graduate students between the American republics. Special legislation by Congress has enabled the Government to pay the travelling expenses of Latin American students who receive fellowships or scholarships in the United States and vice versa. The public spirit and generosity of several universities and business firms and the foresight of Congress have made it possible to offer a large number of study opportunities for students from the other republics.

During the past year a number of prominent Latin American writers, educators, physicians, and leaders in other fields have visited the United States as guests of our Government and more will come this winter. One of the most successful developments of this kind was the visit of several Chilean newspapermen, two of whom were attached during their stay in this country to the staffs of the *Washington Post* and the *Evening Star*. All these persons have returned to their own countries with a deeper and friendlier understanding of the United States and of our national culture.

Similarly, several distinguished American writers, educators, and physicians have made extended tours in Latin America, where they have formed strong ties for themselves and for the professions which they represented. A series of lectures delivered in three countries by an eminent American specialist in the treatment of tuberculosis is typical of the work of this group of men.

Never have the American people manifested such a sincere and spontaneous interest in the life of another people as they have shown in recent years in the culture of Latin America. Through travel, the reading of books and magazine articles, the study of Spanish and Portuguese, participation in the activities of Pan American societies and other organizations, and listening to Latin American music, the people of this country have contributed greatly, not only to their own enlightenment but also to a better mutual understanding among the peoples of all the Americas. As a result, no other nation in the world is so well informed about the other American republics.

Much has been accomplished, but yet more remains to be done. For this Inter-American movement is not an ephemeral thing.

We who occupy this hemisphere will have to live together for a long time yet. And if we are to live in peace with one another and to guard our common heritage of democratic principles against whatever menaces threaten it from without, it is best that we should live in mutual knowledge and respect and tolerance—including tolerance of what each may consider the other's idiosyncracies.

LATIN AMERICAN YOUTH LOOKS AT THE UNITED STATES

by MANUEL JOSÉ MÉNDEZ GUARDIA

I would like to begin this talk tonight by mentioning certain traits of Latin American youth which might help to explain its attitude toward the United States. Among these traits we must first consider the sensitivity and pride of Latin American youth. Latin American youth as a whole is supersensitive and this means that it will take seriously and, often too seriously, incidents and actions which the American people would be inclined to laugh off or think nothing of. Thus, little things may make a deep impression on this youth and may not be easily forgotten or forgiven.

The Latin American youth is proud. The Latin American youth does not consider itself superior to any other youths of the world. But, on the other hand, Latin American youth can not and will not admit to inferiority to any. It is second to none.

This sensitivity and pride will explain the high regard Latin Americans have for the dignity and the integrity of their countries. Sensitivity and pride also explain the resentment by Latin Americans of foreign intervention no matter from what source, yes, no matter if it be from a fellow Latin American country. And no matter what the purpose, yes, even if it be to save the people from disease, if this intervention be by force or without their consent.

To Latin American youth foreign intervention is the greatest catastrophe they could think of. Latin American youth prefers chaos and ruin, yes, it prefers an iron-hand home dictatorship, or even abolition of freedom, or anarchy, to the disgrace and humiliation of foreign intervention which disregards its sensitivity, pride, dignity, integrity, and purports to tell it what is best for its country.

But Latin American youth is also highly individualistic. To it the individual and the family are most important, and not the state. Thus Latin American youth will tolerate a dictatorship as long as it does not restrict individual freedom of action and individual initiative. The Latin American dictatorships are therefore

not patterned on the European style. They are a typical product of the neighbors south of the Rio Grande and, though dictatorships, they can not make the individual subservient to the state or greatly impair the freedom of the individual. If and when they attempt this, a revolution will occur and another government will be set up.

The ideal form of government therefore for the highly individualistic Latin American youth is democracy. That it does not always have democracy at home is perhaps due to the eternal restlessness of its youth, which is never satisfied and keeps changing governments in a constant and enviable desire to find one free from corruption or other imperfections.

This Latin American youth is also highly idealistic. It still feels, with the celebrated Don Quixote, that there are too many wrongs in this world in need of redress. It can envision a union of the Americans based on liberty, justice, and equality for all, and will persist in its lofty ideals despite the fact that a materialistic and harsh world around insists that ideals can not triumph.

Finally, one of the most important traits in Latin American youth is intellectual precocity. No sooner is the Latin American in his teens than he is already in a state of unrest and agitation and he keeps thinking of bigger and better things.

This perhaps can be explained by the educational system of Latin America, modeled from the French, which gives great importance to cultural and academic subjects with the result that the student from a very early age realizes he must be able to think for himself. Thus the Latin American high school boy or girl is given too little time for play and he prematurely acquires a solemn and grave consciousness of life and its problems and comes to regard himself as an adult much earlier than do American youths.

No wonder, therefore, that this youth should take an interest in student life and student government. As a result, in the early part of the century, in Argentina (1914) a movement sprang up which soon spread to Chile, Peru, Cuba, and elsewhere, a movement known as "La Reforma Universitaria," which advocated full-time professors, student participation in the election of administrative officials, student representation in the dean's councils and on the

university boards of trustees, and various reforms in the educational system, such as dismissal of certain professors, suppression of ecclesiastical control of teaching, and academic freedom. The youth felt this was its responsibility and a challenge and to realize these desires youth did not hesitate to resort to strikes, riots, and even violence.

But the intellectual effervescence of Latin American youth would not confine itself to university life. Thus we find students taking up the cause of labor or of the forgotten Indian or engaging in anticlerical activities. We also find youth taking an internationalist attitude, advocating peaceful solution of differences between countries and condemning the antagonistic and narrow minded attitude of the elders. In one Latin American country students went so far in their efforts for reconciliation with their Latin American neighbor that bloody incidents occurred between the Army, supporting the Government's nationalistic view, and the students.

Finally, we find the growth of youth movements such as the Aprista group in Peru, led by Haya de la Torre, which announced as its objectives: (1) action vs. Yankee imperialism; (2) furtherance of the political unity of Latin America; (3) nationalization of land and industries; (4) internationalization of the Panama Canal; and (5) solidarity with all of the oppressed peoples of the world. These youth movements arise simultaneously in various Latin American countries and advocate social, political, and economic reforms. Many of them are leftists in their programs, though not extreme leftists, for as a rule Latin American youth abhors communism.

These youth movements are led in many cases by able and patriotic students who wish to correct the abuses and imperfections of the political and governmental systems. The leaders are sincere in their manifestations and are willing to spend many years in jail or in exile or even to give up their lives for the cause in which they believe.

These youth movements have often played and still play a very important part in bringing about betterment of conditions of the working and poorer or illiterate classes. Most of them have provisions in their platforms regarding specific problems between

Latin America and the United States but I do not have the information nor the time to tell you about them.

I shall, however, attempt to give you a rough classification, a very rough one, I repeat, of the various attitudes of Latin American youth of today towards the United States. This classification is the result of my conversations with a number of students from various Latin American countries. It is not, therefore, a scientific classification and is only a poll of student opinion which may be as accurate as the Gallup Poll or as inaccurate as the now famous *Literary Digest* polls!

I feel that Latin American youths can be divided today, 1942, into three main groups, which groups of course may be subdivided ad infinitum.

These three main groups are: (1) the pro-American group; (2) the anti-American group; and (3) the middle of the road group or one which I would call "Americanista".

Let us take these three groups in the order mentioned. First we have the pro-American group. This is by far the smallest of the three groups. This group believes the United States has done all it can towards the Latin American sister republics and in fact has done more than its share and that the United States, in keeping with its dignity as a world power, cannot go any further. This group feels Latin America should accept gracefully as an undisputed fact that the English race and the English language must predominate in this hemisphere and that Latin America should consider itself most fortunate in having the United States as a neighbor instead of Germany or Japan. In this group you find a number of those who have married American men or women or who have lived in the United States for several years and have come to love the United States even more than they do their own country though, of course, they will never admit that the latter is true.

The second group in Latin American youth is the anti-Yankee and anti-imperialism party. It has been the leading party since the beginning of the century and I believe it still commands the largest following today, notwithstanding all the talk about the

"Good Neighbor" policy and continental solidarity that we hear in Washington.

The majority of this group is sincere in its belief that the United States is not a true friend of Latin America. This is due in part to the fact that they have not yet forgotten the traditional American policies of the "big stick" or of "dollar diplomacy". They look on the Colossus of the North as eager to exploit Latin American wealth and Latin American labor. They blame the United States support for some of the existing dictatorships and they are suspicious of American efforts to get bases and airports in Latin America. They believe that the United States regards the Monroe Doctrine as a unilateral doctrine and that this Doctrine was proclaimed to keep Europe out of South America but, at the same time, to advance American penetration and imperialism in South America. This group, however, does not have such a deep-rooted prejudice that it could not be overcome by a program of educational propaganda and good will on the part of the United States.

It is important, however, to note that a large part of this group is as strongly anti-totalitarian as it is anti-American, but perhaps even more anti-totalitarian. That is why a large part of this group has hailed President Roosevelt as the savior of democracy though at the same time it bitterly denounced the American people as a group.

And it is important also that you do not rush to the conclusion that the "Good Neighbor" policy has failed. On the contrary, to it is responsible in great part the considerable steady decline in the anti-American group, and an intensification of the "Good Neighbor" policy will, I am convinced, result in a further decrease and eventual disappearance of the anti-American group.

Within this group of anti-Americans there is a small minority which is the most vociferous in its protests and which takes this attitude merely for political expediency. This small group will do everything it can to keep the flames of anti-United States feeling burning in Latin America. This minority will cheer when they get the news about the Congress of the United States refusing to pass the bill reducing the tariff on Argentine meat. In the same way it will be cheered by the remarks of a Congressman proposing

the annexation of Cuba to the United States or those of a few prominent American statesmen, like former Undersecretary of State Castle, who advocate a return to the "big stick" policy. This minority will not overlook the distasteful article about the President of Chile published by *Time* nor any derogatory remarks by a few irresponsible American travelers in South America. But that it should rejoice at such news is not so bad. Worse is that it gives prominent publicity to such news in newspapers and radio programs used as proof that the "Good Neighbor" policy will not outlast Roosevelt or will last, at most, for the duration of the world crisis, which makes it convenient for the United States to woo Latin America.

Thus this minority group is ready to make political capital out of remarks of a few Americans or isolated actions of the United States Government. These things told Latin Americans may seem trifles to you but they make good reading and they serve to strengthen the suspicions that the majority of this group honestly have about the United States.

Finally, there is a third group, which I would call the "Americanista" group, for this group believes that the American Continent is not only a geographical but also a political unit and that therefore we must all act together for the common good. This group seeks to achieve mutual understanding through an economic agreement and intellectual cooperation. This group is not as powerful yet as the anti-Yankee group but its strength is growing day by day at the expense of the anti-American group and it includes youth of unquestionable integrity and patriotism. This group recognizes that the United States is not without its faults but it looks at the matter objectively and realizes well that the United States has, all in all, the best record for observance of international agreements and respect of small countries among world powers today.

This "Americanista" group is firmly convinced of the sincere devotion to Pan Americanism of President Roosevelt, Secretary Hull, Undersecretary Welles, and other leaders of United States foreign policy. This group is also convinced that the United States will listen with an attentive and sympathetic ear to all just com-

plaints from the neighbors south of the Rio Grande, and that it will try to reach a solution in the greater part in favor of Latin America, though sometimes for reasons of political facesaving at home it will not go so far as Latin Americans would like it to go or so far as reason, fairness, and justice, would seem to require.

This "Americanista" group is under constant fire in Latin America from the other group of anti-imperialists who accuse the "Americanistas" of being pro-Yankee or mere satellites of the Colossus of the North. But this group, despite the critics, continues its work and continues to increase its following. Its fight is primarily a fight against the ignorance of Latin American people and their ways of life that exists among North Americans; and against a similar ignorance at home among most Latin American youths concerning North Americans and their ways of life.

To summarize, Latin American youth looks at the United States as follows: (1) a majority, each day smaller but still a majority, to whom the United States remains the Colossus of the North and to whom the "Good Neighbor" policy is nothing more than high-sounding words perhaps representing the desires of a few United States leaders. This group, however, is also strongly pro-democracy in its views; (2) a growing number of Latin American youth who seek to arrive at a mutual understanding; and (3) a small and rather inactive pro-United States minority.

What can you do to change the hostile attitude of some Latin American youth toward the United States? First of all, make this country a bilingual country. Everyone should be required to study Spanish from elementary school up, and Portuguese must be offered in the universities or, preferably, in the high schools as well as the universities.

The history of Latin America should be made a major subject in the American curriculum of studies, of equal importance, if possible, to the history and geography of the United States. At present Latin American history and geography are given only a brief and hurried glance, with the result that college students, in the capital of the United States, have asked me whether my country, the Republic of Panama, is just a canal and a jungle, whether we

dress in skins as in primitive times, and whether Panama is one of the Philippine Islands!

You must stimulate the creation of Pan American, Spanish, and Portuguese clubs in all high schools and universities. Above all, you must develop in American youth a "continental attitude". Americans must be taught to think in terms of the continent, not in terms of the United States alone. They must be told again and again that Latin Americans are their equals in culture and in civilization.

These measures, when taken, will make the American youth more broadminded and understanding and more eager to solve their difficulties with Latin American youth and treat them as brothers.

Something that would affect directly Latin American youth would be to create a large scale exchange of youths between South and North America. The United States, being the richer nation, should be the most active. Not ten or fifteen students must be sent to Latin America, but a hundred or two hundred to each country. These students must be chosen for their interest in Latin America and their sincere desire to bring about a better understanding and also they should possess the best traits of American character and American genius.

Similarly, the United States should invite several hundred students from the Latin American countries to study and live in the United States for two or three years. In this way Latin Americans would learn at first hand that all Americans are not Indians and cowboys and that all Americans do not hate Latin Americans but that, on the contrary, Americans are willing to learn about Latin America and are very friendly and understanding.

The American families would have a part in such a program too. A number of them should be chosen to receive these Latin American students as guests in their homes for the duration of their stay. Or, if this is not possible, American homes should be secured for Latin American students for their Christmas or their Easter holidays. In this way Latin American youth would see for itself how Americans act and live and just what if any prejudices they have against foreigners, particularly Latin Americans. Un-

fortunately, the truth is that very little of this is done today. Ninety-nine per cent of the Latin American students in this country live in boarding houses or fraternity houses and consequently have no satisfactory idea of the unit of American greatness: the American family.

Furthermore, Latin American students should be invited by American students to their parties and they should mix in as much as possible. Little of this is being done today, for far too often the Latin American student finds it hard to find his way into a circle of American friends and therefore he must turn to other Latin Americans in the United States. This defeats, to a great extent, the purpose of an exchange of students, and in many cases Americans themselves are to blame because they consider these youths foreigners, or forget their existence. Similarly American students in Latin America should try to mix in. This is something which, I have found, most Americans in my country are unwilling to do. Their attitude seems to be: We have a large enough American group here so why bother about these Panamanians?

Other things can be done to bring about better relations and a change in the attitude of Latin American youth. The United States should contribute \$20,000,000 and Latin America a similar amount for the completion of the Pan American highway which would increase travel a thousandfold, stimulate trade and cultural understanding, and might even prove of military importance.

A very important step in convincing Latin American youth of the sincerity of the "Good Neighbor" policy would be through the reaching of an economic understanding. I have only time to indicate briefly some of the steps in such an economic understanding:

- (1) division of products to be grown by North and South America;
- (2) encouragement with capital and machinery by the United States of the growth in Latin America of products and strategic materials which the United States needs and Latin America can grow or which the United States now gets from other continents;
- (3) elimination of slipshod methods of trade; (4) reciprocal trade agreements; (5) investment of American capital in South America, but not with the idea of exploiting native labor—rather to help

develop South America for South Americans. The capitalist would be assured a fair return on his investment, but no more.

Such an economic adjustment is not impossible, nor is the fusion of our two cultures and civilizations into one new-world civilization an impossible task.

I have faith that some day we shall see the dream of the Liberator Bolívar of a united America become a beautiful reality. For in March 1941, did not the United States approve the purchase of Argentine canned beef, and shortly afterward sign an agreement for the purchase of Bolivian tin over a five-year period?

And was not an Inter-American Development Commission set up recently in Washington to increase importation into the United States of noncompetitive products from Latin America, to stimulate trade among the Latin American countries, and to encourage the development of industry in the southern republics? And was there not a recent boost in the United States-Mexican friendship as a result of the signing of an agreement settling the oil dispute? And, finally, hasn't this world war brought all of us closer together and made us all conscious of what a good thing it is to live in peace and friendship with each other?

The prospects for the future of Pan Americanism are therefore very bright and we the youths of the American republics can say with supreme confidence: DESTINY IS OURS AND WE ARE MARCHING FORWARD!

WHAT THE LATIN AMERICAN EDITOR EXPECTS FROM THE UNITED STATES

by JOSHUA B. POWERS

Diplomats and politicians speak for the governments of the nations living side by side in the Americas. But they do not always speak for the people. In a good many instances it is only the editors who speak for them.

In this country recently we have heard a great deal from statesmen, but we have not heard so much from the people nor from the editors. When representatives of the nations convene next Thursday in Rio de Janeiro to discuss what they will do to help keep America free, we should be more confident of the outcome if we could feel that all of them spoke for their people. If, however, we desire to hear the authentic voice of the people we must at times go to their editors, and to them alone.

What do the editors think? What is their attitude toward the war? What is their attitude toward the United States? What do they expect from the United States for themselves, for their people, and for their countries?

I shall try to answer some of these questions, speaking as a Latin American editor, and, because really I am not a Latin American editor, saying, perhaps, some things that the editor would not say for himself. My right to speak in this manner comes from long service to and long companionship with these editors. In 1919 I went to Buenos Aires as an emigrant looking for streets paved with gold. It was my good fortune to find a job in an advertising agency, later to spend a year or more in the Associated Press, and then to become manager of the United Press in Buenos Aires. After some years spent in selling news to editors in six countries I found an opportunity to return to the United States to serve as general representative for one of the greatest of all newspapers, adding to this representation from time to time that of other leading newspapers, and, in course of time, founding an editorial organization that serves a hundred or more Latin American

newspapers with editorial material. My feeling of kinship with editors of Latin America, therefore, is so keen that I do not hesitate to interpret some of their spoken and unspoken thoughts.

First, however, let me say something about the kind of editor for whom I speak. There are in all Latin America several thousand newspapers and an infinite number of publications of other kinds. General public opinion, however, is not formed by the multitude of magazines, nor the hundreds of political newspapers, nor the many organs of foreign colonies, and still less by the few prostituted propaganda sheets, but by the strong, continuing newspapers that comprise the real free press, just as they do in this country, and that deal primarily in news. In any city of the United States there may be a great many publications but only two or three or four serious newspapers, so it is in a city like Buenos Aires where there may be a couple of hundred publications and even twenty or thirty appearing daily in newspaper form, but at most only half a dozen newspapers that serve their people a serious, well edited objective report of world news as a result of which public opinion is formed. Taking Latin America as a whole there are not more than two hundred newspapers of fundamental importance.

This group forms the free press. The free press came into existence a century and a quarter ago largely because the defeat of Napoleon made freedom of any kind in Latin America possible. It can only remain in existence now if Hitler is defeated.

Until the United States became free and made it possible for quiet, thoughtful men in other countries to hope that they too might be able to throw off the yoke oppressing their own people, and until Napoleon's fall brought about the loosening of the strangle hold with which Spain held her colonies, there was no free press in Latin America, and, outside of official society, there was scarcely a carefree heart. The first free editors were courageous men, who more often than not were also leaders in the formation of the other American republics. It still takes extraordinary courage in some places to be a free editor.

Most of us have forgotten that the early editors devoured books in English written by Franklin, Madison, Jefferson, Tom Paine,

John Marshall, and other American revolutionary thinkers and that in spirit they were our blood brothers.

As time went on, and after their first successes had been won, it became easier and easier for them to communicate with Europe and more and more difficult to maintain intellectual and spiritual relations with the United States. As the fires of revolt cooled the forces of authoritarianism once again began to win social and cultural skirmishes. The patriots whose libraries were filled with solid books in English bound in calfskin gave way to their sons who threw away the dog-eared inspirations of their fathers and replaced them with paper bound tomes from France.

Early newspaper editors who spent their years of exile, as many of the best of them did sooner or later, either across the border in a neighboring country or in the United States, gave way to younger and often more prosperous men who spent their holidays or schooldays elsewhere, imbibing the culture of Europe. Newspapers during the long and tumultuous years received their news and also their cultural, political, and background material from Europe. There even came a time, so little did the north and south find themselves interested in each other, when the Associated Press of the United States made an alliance with the Havas agency of France in which the right to supply news to South American newspapers was ceded to France. In the meantime, however, South American journalism continued to develop in a most important way.

At the beginning of the last war, in 1914, editors of newspapers published in the United States suddenly woke up to the fact that for years practically all their European news had been filtered through official or semi-official European news channels before it reached them, and responsible editors of Latin America discovered the same thing. The situation became more complicated when the various warring parties began to flood all news distributing offices with tendentious dispatches and propaganda. North American editors responded by demanding of the Associated Press and of the United Press that they should do more independent reporting, and by sending special, unbiased correspondents to all news centers. Editors in Latin America saw the quick response here, and

themselves called in, first, the United Press and, later, the Associated Press to give them straight news, reported without bias by men who served no other master than journalism.

This news, of course, cost a great deal of money, which was cheerfully paid by responsible editors who took pride in giving their readers correct information. After the war, when the European news services tried to regain their lost clients and when their governments even went so far as to give them great subsidies so that they could supply their services practically or entirely free, these editors and their readers refused to accept them but preferred to continue to pay the high costs involved in getting news from uncontrolled sources. I say editors and their readers with forethought because the reading public of Latin America is quite discriminating as to the origin of news reports. By 1920 the Associated Press had about forty-five or fifty newspaper clients in Latin America and the United Press had a dozen or more. Today, I suppose the Associated Press must have a hundred and the United Press two hundred. Between them they send many, many thousands of words of objective, unbiased news to Latin America each day, words that are paid for by the free press and that form the basis for public opinion. Newspaper readers in Latin America, in fact, are even better informed on world affairs than are the average readers in the United States for the simple reason that their lives are more quickly affected by economic and political changes abroad and their editors print more foreign news every day than do ours.

Long after the news pages became filled with the straight reporting of world events supplied by the great free agencies, it was still unfortunately true, that too much of the background material came from European and frequently from biased sources. This has been somewhat corrected, but not entirely.

From this point on, I assume to speak in the voice of the Latin American editor. I shall speak in the first person. To you, I am the editor. I am the kind of editor who came into being when Napoleon fell and who hopes to remain after Hitler falls. I am the responsible editor, who wants to give his readers honest news, who believes in the freedom of the press because he believes in the

essential rights of man, who brings his newspaper out everyday, who speaks for human rights when he dares to speak for human rights. My readers know as much about world events as good reporting can tell them. They even know a good deal about the United States. This was not true twenty-five years ago but since your press services came my readers have come to expect and demand more and more news from the United States. If you would pick up one of my editions of 1912 you would find nothing about the United States unless it might be about a fire, a flood, or a disaster. But if you will pick up one of my editions of today you will find serious news coverage of all important events that are not purely local in interest. Look at an average copy of my paper. You will find that it consists of from sixteen to twenty-two pages. Of these there will be from three to five pages of foreign news, practically all from American press services, but maybe a little from Reuter's. A few months ago I might have had a few items from Transocean sent to me free and printed out of deference to those of my German clientele who had American money to spend, or perhaps something from Havas. In addition, I print each day a lot of sense and nonsense that they like, half a dozen photographs received from the United States but covering world events, and perhaps five or six feature articles of one kind or another, originating almost anywhere but sent from New York.

Being an editor who publishes a newspaper primarily in the interest of his readers, my life is not an easy one. Let me illustrate by assuming for a moment that I am the editor of a certain somewhat hypothetical newspaper, founded in 1827 and still strong and free. And as long as we are making this assumption, let us go a step further and assume that I have served that newspaper continuously for one hundred and fifteen years.

During that time my country, which is one of the more stable countries, has had forty-one presidents, dictators, or other chiefs of state with an average term of office of less than three years. It has had five different constitutions. One president served only one day. Another served one hundred days. In two separate years we have had as many as five presidents in one year, and in

another year we had three. In the last sixty years we have had between eighty and a hundred different cabinets. We have had many short, sharp revolutions and one long and devastating revolution. We have had one serious foreign war, and other minor foreign conflicts.

Continuously there has been a struggle by the people against rigid control of society by the forces of domination. During the last sixteen years this struggle has been so determined that between 1925 and 1941 we have had sixteen presidents, and next month we are due to get another.

I have written editorials for or against all these chiefs of state, all these constitutions, all these movements. Believing that a dead editor is of no use at all to his community, I have steered my course down the years so as to keep on publishing every day. Setting policy, and surviving, under such circumstances has been about as easy as steering a greased bobsled down a streak of chain lightning.

Up to now I have survived, usually a little battered and sometimes with my ideals in shreds, but I am still here. Dozens of my more belligerent or more devoted contemporaries have failed to survive, being destroyed by economic pressure, governmental confiscation, attacks by hired thugs, or other conditions. But even though I have dodged and ducked and sidestepped for so long that I am hard to pin down and eliminate, I know that unless you of the United States help me I cannot survive a victory by Hitler. A free editor certainly can find no place in an enslaved world.

What do I want of the United States? Let me first speak quite practically of material things. I want newsprint, ink, parts and replacements for my machinery, supplies of all kinds at reasonable prices. I want you to see to it that shipping exists to carry my supplies to me. I do not mind paying reasonable prices for what I buy, but I do want you to protect me from profiteers, and above all to make it possible for deliveries to be made. This is, I conceive, as much in your interest as in mine, as I verily believe that it is important to you to keep my people supplied with news, if for no other reason than that they may be able to check up on what their political leaders tell them.

Second, please do not send me any of the same kind of silly propaganda that the Germans have usually tried to feed me on and that both my readers and I resent. Let your news services continue to send me honest news. I can take the good with the bad and both my readers and I can distinguish the true from the false fully as well as the average politician. I must say that I have heard from time to time rumors that have disturbed me to the effect that some of your leaders have thought that you should organize elaborate propaganda for our benefit. Do not believe them. Hitler has spent many millions of dollars trying to discredit your news services. He has had no important success in this direction.

There is something that you can send me, however, that is not really propaganda but that in the long run is the best propaganda conceivable. I need more background material of all kinds and more cultural material, prepared by journalists for newspaper use. I need pictures of people and places to illustrate the daily editions. I want short biographies and photographs of the people who are likely to be mentioned in the news. I also want cultural material, book reviews, books to review myself, articles on scientific progress and on all kinds of intellectual subjects. Our readers like a greater proportion of this kind of newspaper material than do yours. At the present time there are not many places where I can get this kind of material because I cannot afford to pay much for it. Formerly our editors clipped most of it out of French and Spanish newspapers and rewrote it. They cannot any longer do this, and really it is not in your interest to have them do it.

Third, I need advertising, honest commercial advertising. Your exporters and your industries need to build up and maintain good will among my people both now and after the war. Encourage them to advertise in the American way for the purpose of creating and holding markets. I need this advertising because I need dollars with which to buy paper, and ink, and other supplies in the United States, and because these dollars preserve my independence.

Finally, what I need more than anything else is that you should win the war. Five hundred years from now, looking backward

through history, it will be clearly seen that this war is simply a continuation of your American Revolution. Your inspired leaders at that time set up the principle that all men were created free and equal, and your Bill of Rights testified to the essential integrity and dignity of man the individual, not man the slave of the state. The forces of authoritarianism have struggled constantly to destroy that doctrine. Unless you win this war that doctrine will be destroyed.

During the early decades after your conquest of freedom, you were zealous in the propagation of your principles and you gave aid and comfort freely to men struggling against tyranny in every part of the world. You helped us in Latin America win our freedom. As the years rolled on, however, all the democratic nations became strong and careless and neutral. But the forces of totalitarianism remained awake. During your Civil War they invaded Mexico, but they could not hold it. Again, they attacked Peru, without success. In 1914 they threw the world into war, but were defeated. Today they have thrown it again into war, and they must be defeated again.

It will be harder to defeat them this time because they are stronger, and better organized. In Latin America they have, during recent years, won many silent battles. Our governments still speak with the words of freedom but the shadow of totalitarian substitute governments stand behind them. The cause of liberty has in fact lost a great many powerful friends among us in recent years. But the press is largely still free and the people believe in the cause of freedom.

Because the press is largely still free, you may win united expression of support at Rio de Janeiro. In fact, I believe that you will. The responsible press has been almost unanimous in recommending unity of action. But your enemies are well prepared, and some of your friends let their eyes roll toward all horizons before their lips form words. Some of them are physically frightened. Some do not believe you can defend their coasts. Some are impressed by the plans your enemies have laid for creating new American governments favorable to them.

But we editors have no illusions. There are no soft places into

which editors may fall, unless it is that their heads may fall in nice springy baskets. The enemy will not appoint us mayor of the village after he has taken it. Nor do we have any desire to see our people living under the shadow of a lot of German policemen, or our children, and yours, grow up to be houseboys to a lot of Japs.

Before the war is finished the United States alone must carry most of its burden. We editors are awaiting word that you are fully aware of this fact and prepared to do it successfully. We have great confidence in you, but we are also awaiting the moment when you begin to speak with the voice of decision and authority. We shall welcome the sound of that voice. That is the most important thing that we expect from you. When we hear that voice we shall know that you will win the war, and that we shall win the war, and that the institutions offered to the world by Washington, Bolívar, Jefferson, Belgrano, San Martín and Lincoln will live on for us and our children.

EFFECTIVE INTER-AMERICAN COOPERATION

by HENRY GRATTAN DOYLE

I take as the text of my remarks this evening a quotation from the address of the Chairman of the National Foreign Trade Council, Mr. James A. Farrell, President of the United States Steel Corporation, at the Twenty-eighth National Foreign Trade Convention held in New York early in October 1941. Like all of Mr. Farrell's speeches it was penetrating and realistic. According to Mr. Farrell:

Our defense interests, both military and economic, are not benefited by failure on our part to implement our "Good Neighbor" policy by something more substantial and convincing than a wearisome repetition of our goodwill intentions. A shipload of goods to meet their needs is more valuable to them than a shipload of good neighbor propagandists. The most practical policy is that which is translated into neighborly deeds. The propagandist too often does more harm than good, by betraying a lack of knowledge of the psychology of the twenty Americas, each of which presents different characteristics.

Nothing could be more harmful than the wishful thinking which conceives of the Latin American republics as permanently alienated from Europe and no longer dependent upon European markets. For centuries they have been closer to Europe than to the United States and have roots in European cultural soil which will survive their present temporary isolation from that continent.

Our highest expectations, as a result of our present financial aid and the consequent increase in Inter-American trade, are not to monopolize Latin American markets, but to rescue them from dependence on bilateral barter agreements which have undermined their economies, by depriving them of foreign exchange and freedom of multilateral transactions.

It is our aim to aid them in becoming more self-reliant, to encourage the growth of intra-Latin American trade, and to enable these Americas, whose economy has been demoralized by the war, to present a front no longer vulnerable to European exploitation.

The trade relations between the other Americas and the United States have been greatly strengthened by our efforts to aid them in this crisis. We look to a continuing increase in Inter-American trade, especially in purchases by us of a number of specialties formerly ob-

tained by us from Europe, and which Latin America is beginning to supply, in addition to strategical raw materials.

To keep alive the spirit of cooperation and unity within this Pan American area, much remains to be done on our part to establish a real sentiment of co-equality of cultural attainment. We cannot expect much longer to overcome the natural attraction which Europe holds out to Latin Americans, unless we apply ourselves assiduously to the task of educating our rising generation in the use of foreign languages.

"A wearisome repetition of our goodwill intentions." How that phrase strikes home! How often have our ears and eyes suffered in recent weeks and months from speeches, and articles, and books, which so rarely get down to the fundamentals of cooperation with our sister republics, as Mr. Farrell has done! For of course he is right. Recent reports that Latin Americans are "fed up" with so-called goodwill ambassadors who can't speak Spanish or Portuguese focus attention upon this situation. To be effective in our efforts to cooperate we must assist our Latin American neighbors economically and financially, with *actions*, not merely with *words*. The efforts of various government agencies in this direction, for instance, the Office of the Coordinator of Inter-American Affairs, under the leadership of Mr. Nelson A. Rockefeller, and the Export-Import Bank, which Mr. Warren Pierson heads, and other agencies, give indications that this problem is receiving attention, though much doubtless remains to be done. But I claim no special competence in the economic field. I shall therefore devote myself to other phases of the problem to which Mr. Farrell referred, namely, the plague of uninformed speeches and writings on Latin America, and the need to "apply ourselves assiduously to the task of educating our rising generation in the use of foreign languages."

Of course no one can deny that we have been making progress in our relations with Latin America; but that progress has been largely the result of two factors. The first is the tremendous respect and admiration, amounting at times to veneration, that Latin Americans feel for Franklin D. Roosevelt. The second is the cumulative effect of President Roosevelt's policies in dealing with Latin American problems from the very outset of his administration—policies in which he has had the able collaboration of a

truly great American Secretary of State, Cordell Hull. The change in the attitude of Latin Americans towards us from distrust to confidence (insofar as such a change has occurred) is a personal tribute to these two men, and to the effective work of their collaborators and subordinates in the diplomatic, economic, and cultural fields.

The fortunate circumstance that gave us such a leader as President Roosevelt, and such a Secretary of State as Secretary Hull at this particular stage of our history is an instance of the good fortune that sometimes befalls democracies through no particular merit or foresight of their own. For as a nation, and apart from the personal achievements of these two men (and a few others) in bringing about increased good feeling between our sister republics and ourselves, our record has in general been nothing to feel any satisfaction about. Even today, friendly Latin Americans sometimes admit concern as to whether we will persevere in our "Good Neighbor" policies. They realize that a single presidential election may undo all or nearly all of the good work that has been done, by giving us again an arrogantly nationalistic, "dollar-diplomacy" leadership in international affairs (or a lethargic and indifferent one, which is nearly as bad) such as those under which our Inter-American relations have suffered in the past.

The answer is plain. We need to be convinced, as a nation, of the value of these policies—so convinced that no future administration will find it possible to abandon or modify (in the sense of weakening) them. To convince our people—all of our people—of the importance of Latin American friendship for us, from a selfish point of view if no other, is a major educational task. More than that, it is a patriotic task, one that calls for the best efforts of all those among us who have the advantages of special training, special aptitude, or special experience, in all the fields that can contribute to the desired result.

We must frankly recognize, at the outset, however, that some of our people either oppose or are indifferent to our national program of Inter-American cooperation. Let me attempt to analyze these groups.

Those who actually discourage efforts to improve our relations with Latin America may be roughly divided into categories. (I am not referring to those who know a great deal about the tremendous difficulties in the way of *rapprochement* or permanent cooperation, whether cultural, political, or economic, and who are frankly and sincerely dubious about the possibility of solving some of the admittedly thorny problems involved. These may have reason to be pessimistic. I have in mind the average person, not particularly well-informed nor directly interested in these matters.)

The first obstructionist group is made up of "little Americans"—people of the 200-per-cent-American stripe, who "don't like foreigners," although their own foreign background sometimes may be uncomfortably close. This group includes or overlaps another—the racial and religious bigots who don't see why we should try to make friends with "Latins", or with nations some of which contain large numbers of people of mixed racial stocks, or which, like the Latin American countries, are predominantly Catholic in religion.

Another group is composed of bitter-end Roosevelt-haters, who are against the "Good Neighbor" program simply because President Roosevelt has consistently fostered it. (How many of our now suddenly quieted isolationists were of this unthinking type is another interesting question.) How unfortunate it is that a few Americans should ever allow their pet political hates to blind them to the best interests of their own country! Sincerely, perhaps, but certainly stupidly, they put political grudges above patriotism, party before country. Anything "that man" does is wrong, as far as they are concerned, even when he's right. This group, is, I hope, much smaller in numbers than the preceding one, and largely, perhaps, overlaps with it. Certainly it is an unpopular one today. The present attitude is well portrayed in a recent issue of the *New Yorker*, which tells us that "An elderly matron in Schrafft's sighed comfortably last Friday and said to her companion, 'It's so nice, isn't it, that we aren't mad at Mr. Roosevelt any more.'"

A still smaller group is made up of those who are secretly un-American or anti-American—Nazi sympathizers and, undoubtedly, some Nazi agents. Their interest in sabotaging our Inter-American program is obvious.

But the largest group among our fellow-citizens consists of people who just haven't waked up to the importance of Latin America and therefore don't realize the vital role that Latin America plays in our national defense and in our future security and prosperity. To them Latin America is new. It has just been discovered. It may be a fad—and the over-enthusiastic antics of some of the recent discoverers of Latin America unfortunately give some color to this impression.

The problem that we face here is fundamental. Unless we can wake up this large fraction of our population, we shall undoubtedly fail in our Inter-American efforts. What this may mean in terms of loss of national security, or even of ultimate disaster to our country, not even the experts can say; but it does not take much of an expert to discern how serious a threat to our national future would be involved in any failure to foster genuine, effective Inter-American cooperation in every possible way. Anything less at this stage in world affairs is not only unintelligent and unrealistic; it is definitely unpatriotic.

I now turn to the "lack of knowledge" element in the present enthusiasm for Inter-American matters, to which Mr. Farrell referred.

From everywhere and nowhere, as a crowd springs up around a street accident, a host of synthetic authorities on Latin American affairs has been developed and is busily experting. Writers, professors, radio commentators, and educationists are all blossoming out with "authoritative" articles and even books on our neighbors to the South. Men who have been trained in other fields have taken up Latin America, as if it were Mah-Jong, or the latest dance, or a new style in women's hats. The infallible mark of these experts, the one distinguishing characteristic that they have in common, is that almost without exception they know no Spanish or Portuguese. In fact, most of them think that ability to read the newspapers and books of the countries on which they are

experting is a trivial detail, and that talking with inhabitants of those countries in their own language is a useless waste of time. The situation is well described by James Irwin Miller, vice-president of the United Press, in these words:

I am pleased at this awakening on the part of the American public, and at the same time a bit amused. What strikes me most forcibly, coming back home, is the feeling manifest everywhere that South America has just been discovered. And I, almost a part of Latin America for twenty-three years, feel a bit as though I had just been discovered, too. Here I am, after devoting many happy years among peoples as highly cultured and as alive politically as any in the world, suddenly besieged by North Americans as excited as Queen Isabella on the return of Columbus.

This is amusing, but a bit surprising. I find two-page magazine advertisements bursting with news of a continent below the Rio Grande. Periodicals are full of articles discussing this or that—usually too much of this, and not enough of that. And after spending twenty-three years building up the United Press in every country south of Panama, I now wonder at special correspondents and writers who rush by air over the entire South American Continent in two weeks, and return to the United States to "tell all."

It is actually true that recently a newspaper syndicate sent a writer to visit every South American capital. He arrived in each of these great cities as dusk fell—and left the next day at dawn. Any articles written by such hasty observers contain unbelievable misstatements of fact.

But enough of that. These are merely first impressions on my return. From these impressions I gather one significant fact: there is in the United States for the first time a hungry interest in the South. And where there is hunger, food can be secured.

But what food? I can suggest several articles which must go into any lasting diet. Our educators must begin to teach Spanish in the grade schools, as a national second language. At the present time, our children do not have an opportunity to study Spanish before high school or college. Of what use is a program to bring the Americas closer together if we can not understand each other? The sign language will not help.

A recent news item indicates that it is now possible to make the circuit of South America by air and be back in one's New York office within a week, if one wants to. Why stop at all? Why not just give these people a bird's-eye view of Latin America by air in a week, and when they disembark at the first airport on United States soil hand each air-traveler a nicely engraved diploma certi-

an alleged portrait of José María Heredia, the Cuban poet-patriot, which is really the picture of his French cousin of the same name. No one thoroughly familiar with the unhappy life and frail health of the "Singer of Niagara" could have passed as his the portrait of Heredia's more fortunate (in terms of health, worldly prosperity, and long life) French cousin.

Even a book which has had the advantage of republication and revision falls into unnecessary errors. The second edition of Mrs. Katherine Carr Rodell's *South American Primer*, first published under her maiden name two years ago, perpetuates the peculiar inconsistencies in the treatment of Spanish proper names that characterized the first edition. Names like that of the late President of Chile, Aguirre Cerda, and such names as López Contreras of Venezuela and Sánchez Cerro of Peru are indexed under the second family name instead of the first. Gómez and López are consistently written with an accent, but Sánchez and Rodríguez are not. The most curious instance of uncertainty about the use of the accent mark in Spanish that occurs in Mrs. Rodell's book is in the name of Simón Bolívar, in which the accent is religiously used in Bolívar and religiously omitted from Simón. This assures what we would call in baseball a .500 average.

I mention these things not to detract from the reputation of otherwise useful compilations, but merely to emphasize the importance of fundamental, thoroughgoing study by people who plan to write on Spanish-American topics, and to point out the dangers to genuine Inter-American understanding inherent in a superficial approach to these matters. Mr. Walter E. Myer, editor of *The American Observer*, in his article, "South American Impressions", in the *Journal of the National Education Association*, for November 1941 writes:

When I was in South America last summer, I discovered that many of the people there have a lively contempt for visitors from the United States who spend a little while among them, then go home and write extensively about their problems. "Take a look; then write a book," was said to describe the activities of too many American visitors.

I could cite a number of examples of the harm that can be done by practitioners of the "take a look, write a book" philosophy. I

quote from a recent "letter to the editor" published in the Washington *Evening Star*, written by the editor of *La Razón*, of La Paz, Bolivia:

One of the obstacles which the policy of Inter-American rapprochement must face is the new crop of so-called "experts" on Latin America which suddenly has appeared in the United States. Most of them are but plain and simple tourists, who, after a twenty-four-hour sojourn in each of the Latin American capitals judge themselves authorized to produce articles, pamphlets, conferences and sometimes even dare to write books on the subjects.

To this crop of self-appointed "experts", now must be added the name of the journalist John Gunther, author of *Inside Europe*, *Inside Asia*, and *Outside Latin America*, the latter being sold under the title of *Inside Latin America*.

We knew, in the countries to the South, that sooner or later such a book as Mr. Gunther's would appear; but although we expected it to be naïve and superficial, we never thought that he would dare to present it as the fruit of a profound study of the characters and events of the Latin American countries, of which he hardly had a bird's-eye view.

It is inconceivable, for instance, that in the case of Bolivia, of which country I am proud to be a citizen, and which is one of the largest of the Americas, Mr. Gunther pretends to give a version of what he saw during twenty-four hours as a true picture of things as they really are in my homeland.

A milder criticism of Mr. Gunther's background occurs in Ernesto Montenegro's review of *Inside Latin America* published in the *New York Times*:

Inside Latin America is not and could not be "all" about these twenty-one republics. It cannot even pretend to objective impartiality, for the author in limiting his scope to the position and the attitude of those countries toward the paramount issue of hemispheric defense has naturally colored the perspective of each in accordance with the degree of friendliness or antipathy toward Pan American armed solidarity which he observed in a particular spot. Neither can his book pretend to a mature knowledge as to the social background of these peoples. Let us consider only how many years it took trained historians like Prescott to gain an understanding of one or two racial unities in the continent. And pile on top of this the fact that our journalistic Marco Polo in using the modern magic carpet to hop from one country onto another has not had time enough to get even a smattering of the two chief Latin American languages—Spanish and Portuguese.

And Herschel Brickell, Senior Cultural Relations Assistant at the United States Embassy in Bogotá, reviewing a book on Latin America by a real expert, Dr. W. L. Schurz, writes:

The South Americans, with their typically sardonic humor, have invented several epithets for North Americans who stop over between planes and write books about their neighbors. They call our fast-traveling journalists "Paracaidistas," or parachutists, also blitz reporters, and sometimes even sixth columnists. But amid the welter of hastily done, inaccurate, and generally worthless books on the Southern Hemisphere, a few have appeared that make up in lasting value what they may lack in flashiness and melodrama.

One of the best of these is *Latin America: A Descriptive Survey*, by William Lytle Schurz, author of *Manila Galleon*, a book that deserved a far wider reading than it received. Mr. Schurz is one of the "old Christians" of the "Good Neighbor" policy, who differs from so many people now writing on South American topics by knowing something of the subject.

Now for a word or two on the other side of the picture. I quote first from a review by A. A. Wulff of the Erpi Films on Latin America in *Progressive Education* for November 1941:

With these facts in mind it was interesting to check the Erpi Films available on our Latin American neighbors. And it was encouraging to find that a representative list had been compiled even before today's preparedness program became the thought of the hour. Of course the list is far from complete, but it evinces careful planning and in no way bears the stigma of "rush order". Thus it is hoped that our Southern neighbors will realize that some educators here were conscious of the uniquely beautiful and fascinating linguistic, as well as cultural, differences of the adjoining Americas, even before this subject became the timely inspiration for journalistic jaunts and radio reveries.

And lastly from a review by Hubert Herring of Albert E. Carter's *The Battle of South America*, published in the New York *Herald-Tribune* "Books" for November 2, 1941:

The war is on for South America, Germans and British and Americans are fighting there, it is high time we turn our eyes south. So argues Mr. Carter, who took time off from his newspapering and lived with the Latin Americans for a couple of years. He learned to speak Spanish acceptably, traveled leisurely and widely and met a good many people other than bartenders, prime ministers and professional friends of the United States. His report, written with a modesty which assumes no

vast knowledge, shows that he stayed by South America long enough so that he feels it, smells it, tastes it. This puts Mr. Carter in a different category from the flock of commentators who take their swift swing around the circle and paste together a book out of newspaper clippings and the columns of the *Encyclopedia Britannica*.

Isn't it time to stop the bluffing and the pretending and the faking and the four-flushing about Latin America? Isn't it time to turn to people who know something about Latin Americans, their language, their culture, their ways of thinking? To people who didn't need a push from Hitler to make them discover Latin America? Isn't it time for the synthetic experts, with their superficial opinions, their "take a look, write a book" volumes, to retire in favor of people who at least know the languages concerned, can read the newspapers, can talk with Latin Americans who don't happen to know English?

In a dispatch from Santiago de Chile, Miss Frances R. Grant, an American who really knows Latin America and Latin Americans—and speaks their languages—quotes a Chilean leader as follows:

I want to speak to you, not in my role as an official but as a friend of your country. We who are really sympathetic to the United States are willing to speak very frankly to you as to why we look rather askance at the present efforts of your country to court our affections. In the first place, we find your procedures extremely ingenuous.

We are particularly annoyed by the plethora of writers who have come here recently—mind you, it is not writers *per se* that we object to; it is the absolute lack of intellectual integrity of the great number who have come. They remain here a few days, ignorant of our language. They see a few of our officials, seize a few fragmentary impressions, then return to write articles or books filled with errors and the evidence of a profound ignorance of our situation.

Or else they may be as silly and superficial as a young woman I met who was writing about our skiing and whose only reaction was a criticism of the skiing costumes of the women. No less ignorant was an article in one of your leading magazines studying a "typical Chilean family" and taking for this typical citizen one of our greatest millionaires who has spent practically his entire life abroad.

I find just as serious the invasion of your official messengers of goodwill who leave the same impression of superficiality, lack of seriousness and frequently of impudence. Personally pleasant as some of them may

be, we cannot take very seriously the cinema actor who is sent to solve our problems of international understanding, or the numerous travelers sent here by the Committee on National Defense, without preparation either of language or Latin American backgrounds, with the intention of swallowing enough in five days to become experts in Latin America.

Some of my American friends have said to me that the United States is no longer making mistakes in its dealings with Latin America—perhaps not as great mistakes as you once made, but still many, many small ones.

What would we think, I repeat, of a Latin American who would attempt to deliver authoritative opinions about us on the basis of a brief tour of our country, during which he was debarred by ignorance of our language from reading our books, our magazines, our daily papers and—what is probably even more important—talking with our everyday people, our average man or average woman?

And in a dispatch from Buenos Aires, Miss Grant quotes Raúl Damonte Taborda, anti-Nazi member of the Argentine Congress, as follows:

However, I believe that you of the United States will also have to do something on your part toward keeping our attitude pro-American. It seems to me that you have not yet done the proper job in the promotion of real understanding between our peoples, and that your work for Inter-American relations, in a human sense, is being directed by those who know nothing of Latin America.

There are three things I would like to recommend especially as steps toward guaranteeing greater understanding between our peoples. First, sending down on your goodwill missions people who are better equipped both to understand us and to transmit their impressions with greater dignity to your people. They ought to be persons who know our language and our background.

Secondly, in order that we, too, may take advantage of this new interchange, the United States should establish a tourist dollar, of stabilized value, as Germany did. Today practically every Latin American country is laboring under the burden of an unfavorable currency exchange. With such a tourist dollar, many more of our people would be enabled to visit your country—and these visits would serve to eliminate the misunderstandings which have done such harm to our relationships in the past.

Finally, there should be greater study in your country of Latin American backgrounds—particularly the differences which characterize each of these countries. There is a tendency among people of your country to confuse all Latin Americans, entirely unaware of the great differences

in our economic, social and racial backgrounds. This lack of discrimination has also served to keep us apart.

In refreshing contrast to all this experting without Spanish or Portuguese is the attitude of an American newspaperman, an observer who goes to learn as much as he can from others, who is modest about his own gifts, humble about his own ignorance. In his widely published newspaper column, Ernie Pyle, the traveling correspondent of the Scripps-Howard newspapers, during a tour of Latin America some years ago (that is before the recent discovery) wrote:

Don't ever let anybody tell you that you don't need to speak Spanish. You do need to, if you're to do anything more than stand and goggle, like a jayhawk at a peep show.

Oh, sure, you can get by. Even a dummy like me learns how to buy cigarets and order his breakfast and a few things like that. And in a pinch you can usually find somebody around who knows a little English.

But you can't really know a country that way. You can't know the spirit of a country, or the feeling of a people, unless you can sit and talk intimately with them.

It seems to me that if there is ever to be any great League of Western Hemisphere Nations it will be built on sand until we learn to sit and talk to each other in the same language. And it seems to me that it wouldn't hurt us in the States to start learning Spanish *en masse*.

In Guayaquil one noon, the tables were full and the waiter sat me down with a blond young man. He looked like an American, and I spoke to him in English. He replied in perfect English, and helped me order my luncheon.

But it turned out he was German, and he never had been in the States in his life. He spoke German, French, English, Italian, and Spanish, all fluently. He wasn't more than twenty-five years old. He lived in Berlin, and was on a selling trip through South America.

No wonder the Germans make headway down there. They're better qualified than we are. They learn the language faster, and fit in with the people better.

I notice, as an American example, that most of the Panagra pilots speak only a little Spanish, even those who have been down here for years. They say the steward is always with them to interpret, so they don't bother to learn Spanish. But that's no way to infiltrate ourselves into a new continent, if that's what we're trying to do. Or are we?

It is encouraging to have the unsolicited testimony of people who by no stretch of the imagination can be accused of having an

axe to grind, and who at the same time—unlike some experts—have some degree of first-hand information of the practical, everyday kind about the problems they discuss. So it is refreshing to hear from a newspaperman who spent months—not a few days or a few weeks, like some of our bird's-eye view commentators—in Latin America, and who really tried to get at the heart of some of the problems of Inter-American cooperation. Again, in a more recent article, summing up his impressions after a long Spanish-American tour, Mr. Pyle had this to say about language needs (Washington *Daily News*, March 30, 1940):

If I were the kind who worked up campaigns, I'd certainly beat the tom-tom all over America to get Spanish taught in our primary schools. If we're serious about the spiritual union of Western Hemisphere countries, we've got to be able to talk with each other.

I'd put Spanish in our schools starting with the fifth grade. And even if the kids grew up and never saw a Latin in their lives, it would still do them as much good as many other subjects.

In contrast to this evidence from Mr. Pyle, let me quote again from the article by Dr. Myer published in the *Journal of the National Education Association*:

Even though one does not speak Spanish, as I do not, he experiences few language difficulties. In every hotel and in all of the larger stores, English-speaking clerks are found. English is studied in all the high schools and in some of them practically all the students are taking English.

What Dr. Myer and many of our countrymen who labor under the same handicaps apparently fail to realize is that this kind of statement naturally inspires a question, or rather two questions. The first is "How would you have managed away from population centers, or hotels, or steamship agencies, or educated circles generally, with nothing but English?" And the second is, "What would happen to a Spanish-speaking person who really wanted to know our country if he came here suffering from the same disabilities with respect to English that you and many other American tourists in Latin America suffer from with respect to Spanish or Portuguese?" In other words, put the shoe on the other foot. After all, Inter-Americanism is a two-way affair. To pat oneself

on the back for getting along in Latin America with nothing but English carries with it, it seems to me, the obligation on our part, as "good neighbors", to see to it that our Spanish-speaking and Portuguese-speaking friends shall be able to get along equally well when they come to *our* country with only *their* native language to serve them—that they in turn shall find that "nearly everybody" here speaks *their* language. Or don't we believe that turn about is fair play?

In common with other specialists in Hispanic culture or in the Latin American field in particular, all of whom without exception lay stress on the basic importance of knowledge of Spanish and Portuguese as primary prerequisites not only to serious work in that field but to any real understanding of it, I am getting weary of a certain type of remark that is becoming too common in speeches and articles about Inter-American relations. I refer to such statements as "Merely to teach Spanish or Portuguese will not solve Inter-American problems", "Requiring every high school pupil to study Spanish and Portuguese will not turn the trick", and the like. I have watched the growing use of these and similar statements, with feelings in turn of amusement, annoyance, and irritation—feelings shared I am sure by others whose interest in Latin America and concern for "cultural cooperation", "understanding", and "friendship" between the Latin Americans and us is not of the freshly minted, opportunist variety represented by too many of those who are speaking and writing in this vein for educational audiences. On the contrary, our interest and concern have been proved by the test of faith and works—the faith and works of years, not recent months or weeks. For us Latin America is not a new discovery, a new fad, a new intellectual thrill, as with some of those who now speak or write so readily and copiously on anything connected with the Latin American field, but a long standing, serious interest, to which we have devoted time and effort and which we have carried on at first-hand and from sources available only to those who will go to the trouble to study the languages in which Latin American civilization is largely expressed.

It will not be surprising if with this background, some of us are

becoming irritated to the point of righteous wrath by these persistent implications either (1) that Inter-American problems can be solved if the study of Spanish or Portuguese is neglected or minimized or assigned a minor role, or (2) on the other hand, that anyone seriously maintains that "merely" studying Spanish or Portuguese will solve these problems, or that they should be attacked by studying Spanish and Portuguese "alone", or that the study of these languages should be "required" of "every high school pupil".

To understand this situation, one need only check up on the attitude towards foreign language study that has been prevalent among many of our educationists for the past generation at least. They have consistently opposed foreign languages, criticized them, questioned their cultural and practical values, "damned them with faint praise".

I have elsewhere discussed the brilliant contributions of such educationists as Franklin Bobbitt and Thomas H. Briggs to this subject during the 1920's—contributions that well illustrated Goethe's remark that "Nothing is more dangerous than active ignorance." I have also had something to say elsewhere about the "Spanish and Portuguese are all right, but—" school of educationists, whose motto seems to be "Bedtime stories, but no Spanish or Portuguese", or "Learn all about Latin America, but learn about it exclusively in English and from 'experts' who know no Spanish or Portuguese."

An egregious example of the present tendency among educationists, and other synthetic or self-constituted experts and authorities on Inter-American cultural relations, to minimize, or asperse, or ignore obvious language needs in any program for the development of Inter-American cultural cooperation, is found in the pamphlet entitled *For These Americas*, published by the Educational Policies Commission of the National Education Association. This masterpiece of self-defeating good intentions not only gives Spanish scant attention—and a gratuitous dig—but blandly ignores Portuguese and French altogether. And its sub-title is "Education for Inter-American Friendship"!

Another instance of an indifferent or perhaps even depreciative

attitude towards the need for increased study of Spanish and Portuguese in the United States is the paper delivered by Dr. Luther H. Gulick, chairman of the Committee on Education of the Office of the Coordinator of Inter-American Affairs, at the 1941 meeting of the American Council on Education, published in the *Educational Record* for July 1941. Although Dr. Gulick's subject is "A Program for Latin American Cultural Relations" and although he lists as the first of his "five important bases" for such a program "mutual understanding", he does not even mention the omnipresent language obstacles to the cultivation of better relations with our Latin American brethren, much less advocate increased study of Spanish and Portuguese here and increased study of English in the Latin American countries. In other words, he displays the skittishness about foreign languages that has come to be characteristic of a good many educationists.

Dr. Gulick's reliability as an "expert" on such a program is revealed by one sentence from his paper. It is this: "But I am told that we do more for friendship when we send baseball players and movie actors (to Latin America) than we do when we send statesmen and our educators." If he thinks so, reports from Latin American papers do not support him—though I would be inclined to agree with him regarding our educators, most of whom would undoubtedly be a complete failure in Latin America, not only because of their ignorance of foreign languages, but because of their too general lack of cultural background—a background which some of them, of course, despise or even denounce as "aristocratic". But it is not true that movie actors "do more for friendship than statesmen". The harm done by unintelligent North American movies on Latin American subjects or with a Latin American *locale* is only increased by sending a movie actor to Latin America as a goodwill emissary, even one with as much good sense as Douglas Fairbanks, Jr., seems to have.

In contrast to Dr. Gulick's somewhat ingenuous attitude I venture to cite a recent article by a man who thoroughly knows Latin American conditions, a business man who doesn't disdain "culture", and who incidentally speaks the languages, Mr. James S. Carson, vice-president of the Pan American Society and of the

American and Foreign Power Company. Mr. Carson's article appeared in the *Survey Graphic* for August 1941 and bears the significant title, "Where We Fail As a Good Neighbor". Mr. Carson quotes a Venezuelan graduate of our own Columbia University:

I can't understand it. You are letting Hitler and Mussolini get away with murder down south. If there is one thing which we people admire in you North Americans it is your efficiency and organizing ability. Nevertheless, you send down representatives to our countries in these critical times who speak no Spanish, and who do not have the feel of the places they visit because they know nothing of our historic backgrounds or our mental processes. With the best of intentions, they often offend and are always inadequate.

Why did someone think that Latin Americans would be pleased to receive a motion-picture actor, no matter how charming, as a special ambassador? In their minds the acting profession and that of diplomacy are miles apart. I met a Brazilian friend the other day who happened to be in the office of an executive of the State of São Paulo when the latter received an invitation to a function in honor of this "Special Ambassador". The official was outraged. He resented the "comico", as motion-picture actors are often called. "They didn't give any banquet to Carmen Miranda when she was in New York", was the comment of my Brazilian friend.

Many similar instances of unhappy choices have been mentioned to me by Latin American friends. They may sound captious and ungenerous, but there is no denying that our European rivals do not make errors of this kind. Their people at least are equipped with customs and traditions before they embark on important missions. No matter how able a man or woman may be he should have more than a U. S. measuring rod in his kit if he expects to visit Latin America on an interpretative mission. Our untrained representatives nearly always try to "tell 'em", when the essential approach is to learn something from them.

According to a Colombian friend, a former cabinet member who knows the United States well, this learning process was beautifully done by Thornton Wilder, novelist and playwright, who spent three months in Colombia, Ecuador and Peru. As a member of a Carnegie group sent south, Mr. Wilder's sincerity and genuine interest made him extremely popular. He was universally pronounced *muy simpático*, which is the quintessence of being congenial. He learned a good deal of Spanish, had a thoroughly good time, and altogether represented the best of what we like to think of as good Americans. Similar testimony reached me from Ecuador and Peru. "Send us more such men", was the universal remark about the author of *The Bridge of San Luis Rey*. I am sorry to report

that they also mentioned in contrast an engineer, the head of a research group, who passed through these countries at the same time. His generally patronizing attitude is too common a fault among North Americans in contact with the South.

Educators' ingrained reluctance or stubborn unwillingness to recognize the value of knowledge of foreign languages as an asset for Americans appears in unexpected places. It usually betrays itself by such phrases as "Merely to learn a foreign language", or by similar qualifications and quibbles of every conceivable kind. These qualifications are usually extraneous, sometimes apropos of nothing at all. In refreshing contrast to them is the forthrightness with which Dr. John W. Studebaker, United States Commissioner of Education, has endorsed the study of Spanish and Portuguese. The same definiteness characterizes the statements of Vice-President Henry A. Wallace; Mr. Nelson A. Rockefeller, the Coordinator of Inter-American Affairs; and others. In his message to the Eighth International Conference of the New Education Fellowship held at the University of Michigan last July, for instance, Mr. Rockefeller used these words:

The study of the republics of this continent can become one of the most interesting and formative tasks of our times. We must come to know the national heroes, the traditions, the songs and the folklore of each of the other republics. At the threshold is the barrier of language. Spanish, or its sister tongue Portuguese, must become a second language in North America. It is my hope that English may become a second tongue for the republics of the South. A union of our intellectual forces is needed. Such a union can bring with it an American renaissance of unlimited possibilities. We need the aid of parents in planning the education of their children, the assistance of boards of education and of our schools and colleges.

I should like to state emphatically that there can be no promotion of cultural unity under the domination of any one of the republics. Each of the American nations values its freedom and independence, its own cultural history. Each is a guardian of great historical values, which came from the same great sources and which it seeks to preserve and to expand. The traditions of liberty, of fair dealing, of mutual helpfulness we all prize in common. These traditions, proved by time, are in danger today. But in seeking to protect them, we must respect the differences, the individual cultures which cause each of the republics to take pride in the strength of its own independence.

"At the threshold", says Mr. Rockefeller, "is the barrier of language." And again, "Spanish, or its sister tongue Portuguese, must become a second language in North America. It is my hope that English may become a second tongue for the republics of the South."

Here is frank recognition of the language barrier and its position at the threshold of the whole program for cultural cooperation.

We who have for many years been urging increased study of Spanish and Portuguese in the United States have long since become accustomed to misrepresentation regarding what seem to us to be the perfectly clear, obvious, logical, reasonable, and natural claims of Spanish and Portuguese to basic importance and a key position in any educational program designed to foster Inter-American cultural cooperation, the "Good Neighbor" policy, or hemisphere defense.

These perfectly clear, obvious, logical, reasonable, and natural claims of Spanish and Portuguese may be summed up in a single sentence: "You can't understand or cooperate with other nations, other peoples, unless you can speak, read, and write their language." "You" in this instance means a substantial fraction of the people of the United States.

Advocates of these claims do *not* urge that everybody must study Spanish and Portuguese, as alleged by certain educationists who, while giving lip-service to Inter-American cooperation, are openly or secretly opposed to any serious effort to increase the opportunities for American school-children to study Spanish or Portuguese.

What advocates of increased opportunities to study Spanish and Portuguese have *really* said and *do* believe is: (1) that Spanish and Portuguese are fundamental, essential, and indispensable to any educational program looking towards increased cooperation by the United States with Latin America, whether cultural, commercial, political, or military; that (2) the study of Spanish and Portuguese in the United States should be greatly increased and opportunities for that study greatly expanded; and (3) that an important way to demonstrate a sincere belief in Inter-American

cooperation, without mental reservations (in other words, without "ifs, ands, and buts"—or even "merelys") is to do everything possible to foster increased study of Spanish and Portuguese in the United States, along with every other means that contributes to the same end. That is all that Spanish teachers and other groups seriously interested in increased study of Spanish and Portuguese assert, maintain, advocate, or claim. This has been made clear again and again. Yet it seems that they have to go on patiently explaining that they do *not* advocate or believe that everybody, or every high school pupil, should be required to study Spanish and Portuguese, or that merely studying Spanish and Portuguese will solve Inter-American problems, or that knowledge of Spanish and Portuguese *alone* will solve these problems.

In the light of these facts, statements by certain educationists of the sort described above are inexcusable. Implications that proponents of increased study of Spanish and Portuguese do believe in or advocate requiring every high school pupil to study Spanish and Portuguese are misleading, misrepresentative, and false. Those who continue to make these statements, or statements carrying these implications, in the future will have only themselves to blame if someone publicly charges them with deliberate misrepresentation, or hypocrisy, or intellectual dishonesty.

We who have given most of our active lives to arousing our countrymen to the importance of Spanish and Portuguese will doubtless go on patiently advocating the same obvious and reasonable program that we have advocated in the past and correcting the false implications attached to that program, either by those who because of blindness or narrowness are honestly opposed to it, or by those who, because they lack the courage to oppose it openly, attempt to sabotage it by misrepresentation or other underhanded means. In the latter case advocates of Spanish and Portuguese will have to find consolation and inspiration in two lines of Kipling's "If":

"If you can bear to hear the truth you've spoken
Twisted by knaves to make a trap for fools . . ."

Of course it ought to be clear that an essential feature of any program for Inter-American cultural or popular cooperation is the removal or at least the reduction of existing linguistic barriers. This can be accomplished through more general and more effective instruction in the languages—English for Latin Americans, Spanish and Portuguese for Anglo-Saxon Americans. So much ought to be obvious to any logical mind, clear to any unclouded (or unjaundiced) eye. But apparently it isn't obvious or clear to some of our educationist friends, who still deliver long speeches on "Hemisphere Defense", "Inter-Americanism", or "Cultural Cooperation with Latin America" without even mentioning the fundamental language difficulties. "None so blind as he who will not see." Some of these experts on Inter-American cooperation apparently labor under the delusion that they can wish out of existence a great, big, obvious, practical fact, simply by ignoring it. They seem to think they can simply close their eyes—or better still, make another speech (in English) on "Democracy"—and lo, the language problem will have disappeared! Such wishful thinking may be all right in fairy-stories, but it doesn't seem to help much in Hemisphere Defense, or in fact in any phase, educational or otherwise, of the present crisis. No, my educationist friends. "Good Neighborliness" on a sign-language basis simply will not work—it just isn't practical. Cultural cooperation without specific and consistent (and *sincere*) efforts to overcome the language handicaps from which we Americans suffer isn't realistic, isn't what real educational leadership demands. Wake up, educationists! Wishful thinking won't eliminate language barriers. Neither will stubborn silence about them.

Is it unreasonable to ask that educationists who insist on talking and writing about Inter-American matters stop their hemming and hawing about the needs for increased study of Spanish and Portuguese, and other foreign languages, here in the United States? That they abandon their everlasting qualifying phrases, leave out their "merelys" and "buts", and all the other quibbles? That they come down to earth and implement their talk about democracy in the Americas with something practical? That they

accept the situation that is perfectly obvious to everyone else—namely that the language barrier is the first and most difficult handicap we face in the cultivation of better relations with Latin America? Can't they realize that once that is overcome, other obstacles will be easier to overcome? Even the stupidest must see that. That it is foolish to talk about democracy unless we fully understand the Latin Americans' concept of democracy, and they fully understand ours? Haven't our educationists, along with Stuart Chase, discovered the "Tyranny of Words"? How can we understand any people unless we understand the language with which their ideas, their ideals, their psychology is clothed, which gives a form and substance to those ideals and psychology, in words that another language cannot faithfully render?

Let's implement all this talk about "goodwill." Let's leave off the "wearisome repetition of goodwill intentions" of which Mr. Farrell speaks, and get down to fundamentals. In the economic field, that means hard work on the problems of shipping facilities and priorities, on foreign exchange, on loans and financing, on trade developments, on new markets and new products, in short a two-way effort to remove the barriers to economic interchange and develop a healthy economic life for the whole of this hemisphere.

And in the cultural field, it means the cultivation of everything that leads to better understanding, including a general effort to remove the language barriers which, as Mr. Rockefeller truly says, stand at the threshold of Inter-American cooperation.

Let's have a real program of language teaching here in the United States, with vastly increased opportunities for learning not only Spanish and Portuguese, but, French, and German, and Italian, and Russian, and Polish, and Dutch, and the Scandinavian and other languages, including those of the Far East. Let's provide abundant opportunities for adults to take short-range courses, with frankly limited aims—to learn to speak a little, or read a little, or handle simple correspondence. But let's also give our school-children a thoroughgoing, adequate program, ample in point of time, of efficiency, of skillful teaching.

As I have said, I do not claim to know much about the effectiveness of various steps, actual or potential, in the economic or

financial field. But I do know this. I do know that providing boys and girls here in the United States, whom God has endowed with sufficient native intelligence to learn a language, with an adequate program of instruction in Spanish and Portuguese will do far more for genuine Inter-Americanism than all the hifalutin and uninformed speeches by Professors of Education about "our common heritage of democracy in the Americas"; all the books and pamphlets written by non-specialists; all the committees composed of leaders in education who wouldn't recognize a sentence in Spanish or Portuguese as belonging to one of those languages, much less understand it; all the synthetic experts and self-appointed, made-to-order authorities on Latin America—in short, all the pretentious talk and writing and waste of good paper and printers' ink by people who haven't bothered to learn what they are talking about before bursting into speech or print.

And by an adequate program of instruction in Spanish and Portuguese I mean an adequate program—a program that allows students—capable students, I repeat, not every student—to begin a language early enough and continue its study long enough really to master it, not only for reading purposes but for speaking, understanding, and writing purposes as well.

Let's have done with the faking, the superficiality, the petty criticisms, the deliberate or unintelligent omissions of all references to language barriers by Professors of Education, members of committees, and authors of programs for improving Inter-American understanding. Let's recognize that providing vastly increased opportunities for learning the languages is not the only step that will improve Inter-American relations, but that it is a primary, fundamental, essential, indispensable step, without which all other steps will be less effective, if not partly or entirely wasted. Let's be sincere and honest with ourselves and our Good Neighbors. Let's substitute action for talk. Let's do the language-learning job that needs to be done here in the United States and do it right. That will be a real contribution to "Effective Inter-American Cooperation", and consequently to the best interests of our own country.

TOMORROW'S SHAPE OF THINGS IN LATIN AMERICA

by JAMES S. CARSON

Tomorrow's shape of things in Latin America is already in the mold. Its outlines can be discerned. No one is wise enough to see the future with certainty, but there are trends which make deductions plausible. In the case of Latin America these are very marked. In my talk tonight I shall endeavor to sustain the thesis that the countries of Latin America may be the only nations emerging from the World War debt free and distinctly advanced economically, sociologically, and culturally.

When the war broke out in Europe in the fall of 1939 and spread with such tragic and devastating effects, the countries of Latin America were jarred to the core. They lost about \$500,000,000 worth of markets and for a time seemed doomed to an inevitable economic disaster. This stage proved to be but a passing phase, however. The United States of North America in the championship of the democratic philosophy of life and government as against the totalitarian doctrines of the Axis powers was sucked into the world struggle, first as an economic ally and then as an armed contender. As the arsenal of the democracies and the supplier of materials to Britain and her allies, which has permitted them to carry on, the United States has bought huge quantities of raw materials from the southern countries, taking up the slack occasioned by the half-billion loss of European markets and at the same time preventing the Axis powers from procuring much-needed strategic materiel.

This saving of the first threatening situation insofar as the countries of Latin America are concerned is of necessity transitory, for these huge purchases will cease with the coming of peace; but with a protracted world war profound, fundamental, and enduring changes will take place in the economy and the ways of life of the peoples of the Southern Hemisphere. That the trend will be upward seems certain because Europe is destroying manpower and

capital goods at a horrifying rate. The same thing is happening in Asia. The United States is underwriting the defense of all the democracies of the world at a staggering cost. The countries of Latin America will carry relatively little of these great burdens.

The economic life of the southern republics in the century and a quarter following the era of the wars fought for independence, and up to the present, has been similar and clearly marked. The inhabitants of the different nations have been almost exclusively engaged in the extractive industries; that is, agriculture, mining, and lumbering. The resulting raw material products have been exchanged: first, in a bilateral trade for the manufactured goods and luxuries which Europe had to offer; and later, in a triangular trade with the United States, a relatively new and ever-increasingly important participant. There has been little or no industrialization in the southern countries although World War I stimulated the manufacture of consumer goods in some of the countries, notably Argentina, Brazil, and Chile, and this movement has grown in the intervening twenty-five years.

Today we are witnessing a real world war and the blockade maintained by England and her allies makes imperative the manufacture of many goods in Latin American countries if the normal economic life is to be maintained. This trend towards more self-sufficiency, together with such factors as increased trade between the countries of Latin America itself, which was relatively very small up to a few years ago; new tariff laws, possibly a Pan American Customs Union; new loans; new highways; increased communication and transportation facilities; and, most important of all, the supplying of materials to the United States which that country formerly obtained in the distant Far East—all these things will come as a consequence of the war now raging. As a result the per capita purchasing power and the standard of living in the various countries of Central and South America will be raised, with beneficial effects extending to every phase of community life.

I would like to comment in more detail on some of these probable happenings. Take the matter of industrialization for example. Up to 1914 the Latin American countries were trading about as

they had for the past hundred years, exchanging raw materials for the manufactured goods of Europe and the United States. The first armed world conflict forced considerable local manufacturing in order to take care of consumer wants, particularly in Argentina, Brazil, and Chile. This trend grew slowly in the intervening twenty-five years. The outbreak of hostilities in Europe in the fall of 1939 quickened the movement. One illustration may serve to show what is happening today. In 1910 industrial production in Brazil was 1,000,000 contos (\$50,000,000); in 1920 about 3,225,000 contos (\$161,250,000); in 1940 13,709,000 contos (\$685,000,000). Even more rapid growth has come in Argentina. The west coast republics of Chile and Peru also show activity. While large scale industrialization in the modern sense is still a long way off in Latin America these great wars have given it a push which must be taken into consideration in any survey of the future.

At present the danger of inflation in Latin America is as great as here. Inability to import from Europe and restrictions on imports from the United States imposed by the shipping shortage and defense needs have, as indicated, reduced sharply supplies of manufactured goods in Latin America. At the same time, purchasing power within Latin American countries is on the increase due to heavier exports of raw materials at higher prices to the United States. Shortages of manufactured goods in the face of expanding purchasing power creates this danger of commodity price inflation. Advances have already occurred in the commodity price level in most of these countries, and the movement may go a good deal further.

The nature of the inflation problem there is different from that in the United States. Shortage of manufactured goods in Latin America is not due to the diversion of productive capacity to defense programs which limits the output of consumer goods here. It results from import restrictions. A runaway rise in manufactured goods prices in these countries could be checked by expanding the manufacture of consumer goods in each of them. Brazil, Argentina, and some others studied the matter and evolved plans for developing home industries to take the place of foreign sources of supply. The inability to import machinery constitutes

an obstacle to industrialization. Textile and shoe production, however, have been expanded considerably. If the war is a long one, new manufacturing capacity will be expanded largely despite difficulties in obtaining machinery. We should aid in every possible way in this new program of industrialization in Latin America. Even from the selfish standpoint we should remember that experience has taught that the development of trade between industrial nations is always greater than between an industrial and an agricultural country. For this and other reasons it would appear that dollar loans to encourage manufacturing in a number of the Latin American countries will be a sound procedure. The Export-Import Bank has already moved in this direction in the case of projected steel mills in Brazil. Many other such transactions will follow. Thus the war will usher in a new era in parts of Latin America which will change economic history in that part of the world.

Following this new trend, and also as a result of the war, will come a new procedure in revenue raising in the more progressive of these governments. For generations practically all of them have depended on certain indirect taxes for the revenues necessary to carry on operations. These have been collected largely in the form of customs and shipping charges. A study made some years ago showed the following percentages of total ordinary revenue derived from customs and shipping duties:

| | | | |
|-----------|-----|-----------|-----|
| Argentina | 27% | Ecuador | 46% |
| Brazil | 42% | Paraguay | 63% |
| Bolivia | 41% | Peru | 28% |
| Chile | 57% | Uruguay | 41% |
| Colombia | 57% | Venezuela | 51% |

This method of raising revenue has characterized all economically young countries and was practiced in the United States for the first hundred years of its independent existence. It is thoroughly dangerous. It has been the motivating reason for many debt defaults and some revolutions in the case of our southern neighbors. When depressions come and imports are restricted and the world price level of exports drops, a whole chain of evil

effects ensues. The beginnings of industrialism will force a new system of revenue raising. The old oligarchies of landowners who kept real estate taxes low, paying for production in depreciated currencies and selling for the more stable ones in world markets, are losing political power and passing out of the picture. Income levies and other direct taxes will be introduced more generally as the people become more tax-paying minded. This eventually will make for the narrowing of the gulf between the "haves" and the "have nots" by the creation of middle classes. The war will intensify and hasten this change, the coming of which is already discernible.

While the present war has greatly increased and will continue to swell the volume of Inter-American commerce, this does not mean that it may eventuate in hemisphere self-containment. Such a system would violate one of the aims of the democracies in the present armed struggle; namely, free access to raw materials and a lessening of trade barriers everywhere. A Pan American Customs Union might come into existence, however, without restricting freer trade in the world. Under existing conditions the countries of Latin America produce and export less than two dozen commodities. They want to be assured the United States will continue to buy these in large volume after armed struggles cease in Europe and Asia. Can we do so by decreasing existing tariffs or even removing them entirely and establishing free trade between the Americas and yet not harm the domestic economy of our own country? An analysis of the situation favors an affirmative answer and this war may bring about just such a solution.

To justify such a conclusion it will be helpful to examine briefly the export movement in Latin America over the five year period preceding the outbreak of hostilities in the fall of 1939. These countries depended at that time on the exportation of relatively few agricultural and mineral staples. Twenty-three commodities accounted for 86 per cent of the total value of all of the sales abroad of the entire twenty countries constituting Latin America. The United States took about one third of these exports. Only three of them were really competitive with what we produce here; the wheat of Argentina; the copper of Chile, Mexico, and Peru;

the petroleum of Venezuela, Colombia, Ecuador, Peru, and Mexico. We have often sold wheat in the world markets against Argentine wheat. We used to have an export surplus of copper in this country of from 85,000 to 100,000 tons, the price of which used to be controlled by an international copper cartel. While foreign production costs may be somewhat less, nevertheless since the United States was on an export basis for some years, it is doubtful if the removal of the tax on South American copper would increase greatly imports here. As for petroleum, we are the largest producer in the world, United States citizens are the principal owners of Venezuelan wells, the sole owners of those in Colombia, and control in other countries. Technically petroleum and its products are duty free, but a tax on crude and fuel oil is levied on imports. Removal of this would merely cause a further but not large increase in shipments of crude and fuel oil to the Atlantic seaboard. Free trade or a Pan American Customs Union between the Americas may not come as a result of this war, but if not, certainly a broadening and liberalization of Secretary Hull's reciprocal trade program is sure and this will do its share towards holding the level of our purchases in Latin America after the peace. The most difficult obstacle to this lowering of tariffs may be in Latin America, not here, because such a large part of the revenue needed to run those governments comes from customs duties, as I have already mentioned.

What the war really will do to sustain the present volume in Inter-American trade does not concern the coffee, sugar, flaxseed, bananas, cacao, tobacco, quebracho, and a dozen other staples which we have been getting and must continue to obtain from there. These will take care of themselves. It is those other products such as rubber, copra, abacá, quinine, and tannin which we have been buying in markets from eight to ten thousand miles away despite warnings over the past years. War has cut off this trade for the present and we are rushing to our southern neighbors to see how they can help. The following hasty review may interest you:

1. *Cacao (chocolate)*. We are the largest importer and consumer of chocolate in the world (an average of \$55,000,000 a

year—625,000,000 pounds.) Although Latin America has been the home of chocolate (cacao) since the days of the Aztecs, we were buying our great supply from Africa; 425,000 tons a year, compared with 200,000 tons from the Latin American producing countries—Ecuador, Brazil, Guatemala, Salvador, and the Dominican Republic.

2. *Rubber.* We use about 600,000 tons a year. We used to buy about 96 per cent of this from the East Indies and the Straits Settlements, although rubber is a native of Brazil, Mexico, and the Central American countries. Here is a quarter of a billion dollars worth of business we should be doing with Latin America, giving employment to some 600,000 workers. Rubber is as important as steel to the modern world. The English and the Dutch saw this early and they cultivate the tree scientifically.

No tires, no golf balls, no girdles, and all because of a lack of intelligent precaution. Mr. Ford, Mr. Firestone, and the Good-year organization did their part, however. A substantial foundation has been laid by them for the development of rubber growing areas in the Western Hemisphere. Results cannot be expected soon, but history will bless these men for their foresight and patriotism. It was less than thirty years ago when we were hunting wild rubber in the great Amazon Valley. We'll be doing it again now, but our neighbor Mexico will give us some of the precious staple from the Guayule bush. The war will vindicate the vision of Henry Ford and other pioneers and a large part of our future rubber supply will come from Latin America to the mutual advantage of all concerned.

3. *The Coconut Business.* It is not generally realized that the cocoanut crop is one of the most important for mankind. We import and consume more cocoanut products than any other country in the world. They go into soaps, oils, cosmetics, perfumes, drugs, margarines, and other products. We used to import 500,000 tons of copra (dried cocoanut meat) alone each year. Only 10 per cent of this came from Latin America, although the greatest cocoanut groves in the world are found in Mexico, Central America, the West Indies, Venezuela, Colombia, and Brazil. Cocoanuts are one of the first five crops of the Western Hemisphere. The

trees grow wild and bear fruit for seventy-five years. Previous to this war we got most of our cocoanut products from Ceylon and the Philippines 10,000 miles away. The crop in those parts is carefully tended and harvested.

4. *Quinine* comes from the bark of the cinchona tree, a native of Peru, Ecuador, Bolivia, Guatemala. For three centuries some one or other of these countries supplied the world with this most necessary drug. Up to December 7th last, nine tenths of all commercial quinine came from Java, Sumatra, and the East Indies. Dutch chemists organized the business and found it profitable. We with Latin America must do likewise now.

5. *Tannin*. We use 250,000 tons of this a year in the form of wood extractives. Great quantities of woods like the mangrove grow everywhere in Latin America yet we're importing most of our mangrove tannin from Portuguese East Africa.

6. *Fibers* (henequen, abacá, and sisal). We had to import 250,000,000 pounds of these fibers yearly. While it is true we get our henequen from Yucatan, Mexico, we had to go thousands of miles away to Java and the Far East for our sisal, to the Philippines for our abacá. We can grow them profitably a few hundred miles away in Latin America. Except for bananas, American dollars have not been invested largely in the soil of South and Central America. With our great genius for organization we have missed the boat here. The timidity or ignorance of American investors has kept them out of agriculture. The war will change this. We will have to drop the banquet eloquence of the "Good Neighbor" policy and get down to brass tacks with the economic variety. We've done a good job with bananas; we must help our neighbors to do it now with these other crops. Latin American riches are in the fields, the mines, and the forests.

It would be interesting to speculate on the changes which the war will bring in Latin America in the sociological and cultural realms, but these depend closely on the economic changes. Whatever may occur will be upward, not downward. Of course the vast expanse of the territory involved makes it unintelligent to attempt to generalize. If we divide Latin America into the three grand divisions of the eleven predominating Indian republics, the six

mixed or mestizo countries, and the three white republics we might safely prognosticate the following: first, the Indian movement which crystallized and gained strength in the recent convention at Patzcuaro, Mexico, promises much for the betterment of the aborigines. They have been held in spiritual slavery by illiteracy and ignorance and know little of the advance of modern science and hygiene since the days of the Conquistadores. The mixed or mestizo countries will make particularly rapid strides in the fields of public education. The white republics will find themselves through a new middle class that will create a way of life which will stem from today rather than the Colonial era. Brazil, occupying more than half the area of South America with a language and a traditional background differing from those of her nineteen sister nations of Latin America must be considered separately in any evaluation of the future. The possibilities of this land are enormous, and it will bulk very large in the history of the next few decades.

Let me conclude by saying that the task of raising the standards of living in most of the Latin American countries and many other parts of the world, such as India and China, will be so tremendous that all of the greatly expanded and giant productive capacity of the United States which the war will help to create, can be utilized after the peace without even adequately filling these needs. The course of true Pan Americanism is clear. We should encourage and aid any sound movement in Latin America which will raise the per capita purchasing power. Then we, up here, must make more and more goods at less and less cost for more and more people. In measuring what is to be in the realm of our southern neighbors we should not be blinded by the relative lack of material progress registered during the past two centuries. Even our own boasted industrial era has been a late comer historically speaking. Just a little over a hundred years ago here in the United States there was not a single public library; almost all furniture was imported from England; Virginia contained a fifth of the whole population of the country; two stage coaches bore all the travel between New York and Boston; beef, pork, salt fish, and hominy were the staple diet all the year round. Things do change, and the century ahead may belong to Latin America.

FUTURE RELATIONS BETWEEN MEXICO AND THE UNITED STATES

by SEÑOR DR. DON FRANCISCO CASTILLO NÁJERA

Not so long ago, it would have been embarrassing for an official representative of Mexico in the United States to deal, before a North American audience, with a subject which, without the slightest apprehension, I venture to discuss with you this evening.

Although the greater part of the confidential correspondence between the two governments can be found in printed form and has been analyzed in various books, the speaker would not have dared to mention such material; and, in outlining the picture of our future relations, he would of necessity limit himself to expressing mere generalities ornamented with conventional phrases, ending with the usual assurance of "the friendly bonds which fortunately unite the two countries will be even closer, if that were possible, as time goes on. . . ."

Today, the transformation which has taken place in the relations between Mexico and the United States is evident, not only in its superficial aspect, but—which is more important—in its basic elements; in the very spirit in which our peoples and our governments find inspiration.

Questions of mutual interest and the way in which they are dealt with, hardly demand discretion to prevent uncomfortable interference and any unwarranted agitation in limited sectors of public opinion in both countries.

With absolute good faith, one may say that there are no "secrets of state". The average man, in both our countries, follows the development of pending negotiations. If the details cannot be found in official declarations, they can be easily deduced by wise and experienced newspapermen, who report them to the public with appreciable accuracy and, with very few exceptions—which formerly was the rule—without hidden intentions.

The time has come when understanding between the two coun-

tries, anxious to know and to like each other, is a concrete reality. The masses have become aware that the banner of higher ideals must float over the field of private interests. That banner is international collaboration; the one needed to accomplish the joint task with which fate has entrusted the two neighbor republics.

The simple statement of differences of the past would cover numerous pages. It is surprising that the continuous causes of irritation did not result in disastrous and numberless armed conflicts.

The United States organized itself into a federal republic, almost a third of a century before the birth of New Spain as an independent nation. Our movement for emancipation was viewed with natural sympathy by the rising North American Republic. A common ideal, the democratic aspiration, was a good omen of future harmony. However, in spite of that similarity of tendencies, the two republics followed a different course; even their geographical proximity has been a cause of friction rather than of friendly understanding. We find the germ of that process of differentiation and misunderstanding in the political, economic, spiritual, and intellectual evolution, peculiar to the Colonies.

By detecting the evil, at its origin, we can also discover and correct later mistakes; and also remove obstacles which stand between inhabitants not only of the same continent but of lands united forever by the irrevocable bonds of geography.

The British Colonies took their first steps in independent government through the practice of home legislatures and local administration. They enjoyed a rather broad commercial freedom. And, as is well known, religious tolerance was the foundation of their existence. Their spiritual and intellectual horizon found, therefore, no other limit than that of the world of ideas. Scientific, literary, philosophical works circulated freely. And so did newspapers, without mutilation from any censorship.

The Viceroyalty of New Spain was ruled by the "Laws of Indies", formulated in far-away Madrid, by a council in which the Colonies lacked representation. The "*Cabildos*" which, in the Spanish Colonies, were the equivalent of the Municipal Govern-

ments existing in the mother country, were first appointed by the Spanish founders of the cities. After the Spanish domination began to take shape, these municipal bodies were integrated through election by selected groups, without the intervention of Spanish authorities. Unfortunately, this democratic process came to nothing when it was agreed that the *Cabildo* itself would designate its new members. Not infrequently, *Cabildo* vacancies were sold at auction and they even became hereditary. In the last days of the Colony, the "*Criollos*"—"creoles"—excluded from prominent state and church positions, were allowed to participate in the administration of the *Cabildos*. And when the "*Open Cabildos*"—*Cabildos Abiertos*—were adopted, we witnessed an improvement in democracy, since a larger number of people participated in them; and that number even included mestizos. Such rudiments of autonomy are the forerunners of the assemblies or "*juntas*" in which the first moves for emancipation were outlined at the beginning of the nineteenth century.

Economic policy opposed the development of industries capable of competing with Spanish products; and trade, almost during the entire colonial epoch, became a monopoly in favor of the Spanish Crown. On the other hand, the Spanish Crown also benefited from the income of the Clergy which was the monopolizer of wealth and the largest landowner as well as the biggest money-lender of the country. In the spiritual field, the Church had also a monopoly. Its authority, necessary to maintain Monarchy in power, used to be greater than that of the civil authority. The Catholic Religion was the *only* religion tolerated. The Inquisition's Holy Office, which existed until the days of Independence, was kept busy punishing heretics, judaizers, and witches. Education, managed directly or indirectly by the ecclesiastic hierarchy, created an atmosphere of prison and ostracism. There was no freedom of speech nor of the press. Only books and papers authorized by the twofold censorship of Government and Church, could be printed. The same restriction applied to imported material. No foreign book on colonial affairs could enter without a specific permit from the Council of the Indies.

Some copies of the forbidden works, smuggled in by pirates,

were eagerly read and circulated under cover in the limited groups which opposed intellectual isolation and which had more or less vague ideas of political freedom and social improvement.

It is evident that absolutism could not teach autonomy to the government to be established after independence would be proclaimed. That was not so in the case of the British Colonies.

The British Colonies, once independent, had only to modify their existing institutions in order to adapt them to the republican pattern; the normal process went on as far as the social order is concerned, and the federation achieved in spite of ephemeral obstacles, could face economic problems and look for the proper solution, in accordance with available resources.

Mexico had to achieve a task of true creation while, at the same time, it had to destroy defective institutions three centuries old. After the colonial government was overthrown, it became imperative for Mexico to give shape and solidity to the amorphous, semi-fluid masses which were to become its population.

It was an easy job for the United States to model its republican structure which, erected upon firm foundations, soon was on the road to normalcy and could hope for expansion of territory and improvement of administration. It was the land of promise for the flourishing of democracy.

The historical antecedents related above, explain the painful convulsions which have shaken my country for such a long time and which only ceased when it was possible to achieve a social and political pattern in accordance with popular aspirations.

The evils of the Spanish colonial system are not such that they becloud the brilliant episodes of the Conquest nor do they diminish the gigantic task of civilization realized by Spain. In these enterprises of such magnitude, without parallel in history, acts of courage, recklessness, tenacity, and nobility, were registered with the most generous intentions to serve the country and mankind, in the way conceived by rulers of the time. The disaster of Spain was mainly the result of the degeneration of a tyranny without talent. The Spanish decline began with the defeat of the famous *Gran Armada*—the Spanish Armada. And that happened when the newly pacified territories were beginning to organize and

while the conquest of the unexplored New World was still going on.

The Spanish people, the Spanish masses, victims of autocracy, shared our own sorrows. By character, which Spanish Americans have inherited, the Spaniard is essentially individualistic and a true lover of freedom. His passion for democracy is an attribute. He is profoundly convinced, as we are, that without the enjoyment of freedom, no benefit is worth anything; and that, therefore, one may well risk everything in order to secure that enjoyment from which a lasting collective happiness will be derived.

Our struggle for emancipation took an unexpected turn. A pact between Iturbide, chief of the Royalist forces, and the stern General Guerrero, insurgent *caudillo*, consummated our independence. With the help of the conservative classes, which dominated the former colonial viceroyalty, Iturbide became Agustín I, Emperor of Mexico.

By then, our neighbor Republic in the North had extended its territory through the purchase of Louisiana and Florida; and in the minds of politicians, projects of new expansions towards Texas and the Pacific Ocean were beginning to take shape.

Our insurgent caudillos intended to establish diplomatic relations with the North American Republic but all attempts failed. The first effective Envoy was Mr. José Bermúdez de Zozaya, representative of the Mexican Empire. He presented his credentials to President Monroe on December 12, 1822. Since August of that year, Mr. Joel R. Poinsett had been acting as special agent of the United States on secret mission in Mexico.

Our relations started badly. It was natural for the republicans of North America to dislike the existence of an Empire. The Administration of Monroe accepted the Emperor's Envoy only to let it be known that the Government in Washington had recognized Mexico as an independent state without ties with the Old World.

In January 1823, General Jackson was offered the post of Minister to the Mexican Empire. In a letter addressed to Secretary Adams, Jackson refused the distinction on the ground that his sympathy for the Mexican people, fighting against the usurper, together with his republican convictions, would make his situation

at Iturbide's Court rather embarrassing. Let us add at this point that the partisans of popular principles in Mexico, have had, practically always, the sympathy of the United States mentioned by General Jackson.

Zozaya, shortly after presenting credentials, sent a note to Iturbide's government anticipating the future hostility of "these republicans whose arrogance does not permit them to consider us as equal but as inferior" and he added: "In the course of time they will become our staunch enemies, and with that in mind we must treat them today as such, when they appear to be our friends." Moreover, he added, that "in the sessions of the general Congress and in those of the local legislatures, one hears constant talk of military preparations which evidently have no other purpose than the ambitious designs over the province of Texas". This information, as many other previous ones coming from various sources, contributed to create an atmosphere of legitimate anxiety, which was aggravated by the misguided moves of Poinsett who, during his confidential mission, never made a secret of his hostility towards the monarchy or his contempt for the Emperor.

With unspeakable indiscretion and audacity, Poinsett stated his personal opinions on the subject of the international border, drawing on a map, before Colonel Azcárate, Iturbide's officer, a dividing line whereby the United States would acquire a very large portion of our territory.

Once officially accredited before President Victoria, Poinsett became actively involved in Mexican domestic policies, much to the dissatisfaction of every one. During the presidency of Guerrero, successor of General Victoria, the irritation against Poinsett became so intense that his expulsion from the country was requested.

It is pertinent to quote here the opinions of a distinguished Mexican writer and an outstanding authority from the United States. Says Francisco J. Gaxiola: "Thus appears for the first time in Mexico this illustrious and harmful personage, founder of the Legation of the United States in my country, initiator of the fallacious policy, which unfortunately has been often used as a model by the Chancery in Washington, and promoter of our biggest misfortunes." The author adds that all the Spanish Conti-

ment, "has had to suffer more or less from the pernicious influence that he (Poinsett) exerted in American diplomacy which has been guided since a century ago by his biased reports."

W. R. Manning, whose opinion is reproduced by another competent historian, J. M. Callahan, writes: "In the quibblings and misunderstandings of the period of Poinsett's Mexican mission, from 1825 to 1830 (largely a period of orderly government in Mexico), may be found the origin and largely the explanation of the growing and apparently irreconcilable differences of the next two decades and the discord of half a century—which influenced in part the distrust of another half century."

At all times, men with practical vision and fully aware of the necessity to put an end to so absurd a situation, have endeavored, from both sides of the border, to destroy the century-old distrust. Transitory improvements and even apparent truces of friendly relations had not succeeded in bringing about any fundamental change. The latter has been achieved now and its results have begun to be felt.

It would take too much time to analyze in detail the data which I believe indispensable for understanding of the initial period. I shall be very brief.

The successor of Poinsett, Butler, incited Texan rebels, urged President Jackson to conquer Texas, without further consideration; quarrels with the Secretaries of War and Foreign Affairs in Mexico thus motivated his recall and obliged the administration in Washington to present a written apology.

Events, in Texas, overwhelmed the tense atmosphere; our Minister, Gorostiza, presented energetic notes, demanded apologies and on failing to receive same, put an end to his mission. He circulated a pamphlet which, in the opinion of the Administration in Washington, violated diplomatic practices and Mexico's disavowal of the pamphlet was demanded; Mexico refused, but a year later, it agreed to do so.

Ellis, North American representative, whose efforts for the settlement of claims were useless, asked for his passport and left.

The recognition of Texas added fuel to the blaze, and increased Mexican animosity. The establishment in 1839 of a Mixed Claims

Commission was useless; and the adjustment of claims in 1842 delayed the storm for a while. Mexico knew what to expect; late in 1838, Secretary Adams had stated in the Senate that the purpose of the Administration was to annex Texas.

Different incidents with North American ships, in definite or doubtful combination with bellicose Texan activity and arrests of North Americans, particularly in California, provoked new claims and the correspondence between Secretary Bocanegra and Minister Thompson, filled with mutual recriminations, was circulated among the Diplomatic Corps accredited in Mexico.

General Almonte, our Minister, protested in Washington the annexation of Texas and requested his passport when armed operations were imminent.

The end, which was a natural consequence of expansionism so long encouraged, was precipitated by the deliberate policy of Polk. In an adverse war Mexico suffered a painful mutilation, losing more than half of its territory.

The treaty of Guadalupe, the ratifications of which were exchanged in May 1848, puts an end to this regrettable chapter.

Official relations were resumed, but this did not dissipate the distrust of the Mexican people who soon were convinced that the voracity of its neighbor had not been satisfied. Threats of a new aggression and the price of ten million dollars resulted in the signing by Santa Anna—the cynical dictator—and Gadsden—the unscrupulous Minister—of the *Tratado de la Mesilla*, whereby a new stretch of Mexican land went over to the United States.

Subsequent North American administrations had as objectives the acquisition of new regions and the domination of the Tehuantepec transoceanic route. The strategy of Mexican policy was to oppose such attempts.

On his own initiative, Minister Forsyth started negotiations to purchase the Mexican State of Sonora and proposed that his Government secure commercial privileges until Mexico was ripe to be "Americanized". He pretended that the conservative Government would cede to the United States the zone beyond 30° North, since "the *manifest destiny*, supported by the inevitable, unchangeable and inscrutable laws of the Creator" so demands. He

failed and addressed an insulting note to Minister Cuevas, and became a sworn enemy of the Government of Zuloaga.

On his part, McLane, maneuvering the Constitutional Government, obtained the conclusion of the McLane-Ocampo Treaty, indecorous for Mexico, the signing of which can only be explained by the passion which burned the parties engaged in a ruthless civil war and by the desire to avoid greater exigencies of the United States. For reasons of internal policy, the North American Senate, fortunately, did not ratify the Convention.

The natural sympathy of the eminent Lincoln for the republican government of Juárez deprived the transitory Empire of Maximilian, of United States recognition; and, at the triumph of the unionists, Lincoln insisted on the withdrawal of French troops by means of forceful diplomatic representations.

Seward, who had ceased being Secretary of State, visited Mexico in 1869, and on several occasions addressed the public expressing his hopes for a glorious future for all the peoples of the Continent. Neither this visit nor the Claims Treaty, signed the previous year, contributed to diminish Mexican sentiment. "In the following decade, prejudice and distrust remained predominant." (Callahan.)

In fact, border incidents became more acute with incursions of cattle rustlers and savage Indians into United States territory. North American public opinion was for sending punitive troops and it was even proposed to occupy a Mexican zone, to insure protection for Texas.

In order to grant recognition to General Díaz, who had assumed power through a revolution, and was later constitutionally elected, the Hayes Administration imposed conditions, among others, that American troops enter Mexican territory to pursue bandits and savages. Díaz stubbornly resisted all kinds of pressure, directed force to repeal force, and, finally, was recognized unconditionally.

The dictatorship of Díaz, interrupted only from 1880 to 1884, lasted until May 1911, and during that long period Mexican-American relations acquired peculiar aspects. A friendly spirit presided over official dealings. Claims were adjusted, except for the California Pious Funds, which having been referred to the

Hague Court, resulted in an unfavorable decision for Mexico that was accepted without objection.

The international policy of Díaz, designed as one of "economic penetration", was not endorsed by the large majority of Mexicans. Concessions for colonization, particularly in Lower California, kept suspicions alive regarding North American imperialistic intentions; these suspicions grew stronger when certain speculators, acting for personal gain, proposed to the Government in Washington, territorial annexations or the concession of privileges out of all proportion. The permit for the use of Magdalena Bay by North American ships for target practice, was reputed as one step further toward annexation of the Lower California peninsula. General Díaz, feeling the weight of opposition, refused to extend the term for the concession.

President Cleveland, upon referring to a controversy between the two governments, expressed hopes for the solution of the case in consideration of "the interests of good neighborhood of *irrevocable neighbors*", which was again invoked by Secretary Bayard in his instructions to Minister Bragg, regretting that a matter of criminal jurisdiction had not deserved a more favorable consideration "in the interest of good neighborhood."

The Chamizal case, still unsettled, is among the ones which has aroused most of the interest of Mexican opinion. The International Boundary Commission, formed since 1889 and responsible for so many good services, failed in its attempt to decide upon the property of a zone that, because of deviations of the Rio Grande, has expanded the city of El Paso, Texas, at the expense of Ciudad Juárez. The Governments agreed (June 1910), to refer the matter to the North American and Mexican members of said Commission, and a third member was added as president. The decision, unanimous or by majority, can not be appealed. The Canadian jurist Eugene La Fleur acted as the third member. The meetings at El Paso (June 2-10, 1911) ended with a majority decision to the effect that the disputed territory should be divided between the parties. The United States Commissioner filed a dissenting opinion on the ground that the Commission lacked power to pronounce itself on the division of the territory.

Later on negotiations were undertaken which, for various reasons, have been postponed. I believe that at present there are no reasons to delay the solution. The goodwill of the governments and the better understanding between the peoples, guarantee an early satisfactory settlement.

The dictatorship endeavored to give to its relations with the Government in Washington appearances not only of friendship but of outspoken cordiality. Great importance was attached to the visit which, in 1898, Secretary of Foreign Relations Mariscal made to Chicago as personal representative of Díaz. In 1907, Secretary of State Elihu Root was the guest of the Mexican nation; at the ostentatious banquet tendered him by Díaz, Root stated that the dictator was "the most interesting thing in Mexico" and that he considered him to be one of the greatest men in the world, to whom "Mexicans owe the steadfast loyalty of a lifetime".

The interview between Díaz and Taft at the international border (October 1909), was given ample publicity and enormous significance was attached to it. Nothing has been learned about what was discussed in that meeting, except the official program for the ceremonies at El Paso and Ciudad Juárez. It is believed that in their interview an agreement was reached to submit the Chamizal dispute to arbitration.

The pompous manifestations stirred popular sentiments. North American Governments were regarded as accomplices of the destructor of civic liberties whom the people reproached for having delivered the resources of the country into foreign hands, thus bringing about economic servitude.

Persecution of free press kindled the ire against Díaz which was extended to the Government of the United States whose complacency for the dictator went so far as to institute a systematic persecution of refugee journalists in North American cities. From 1900 to 1910, numerous writers were often jailed and attacked by agents of Díaz who always evaded the authorities.¹

The dictatorship spread information to the effect that at the first sign of rebellion, North American military intervention might

¹The Flores Magón brothers (Ricardo and Enrique), Juan Sarabia and Antonio I. Villarreal, were the principal victims in cities of Texas and California, and even in St. Louis, Mo.

be provoked. Those who belong to my generation remember the frequency with which we used to hear such threatening prognostication.

Long suppressed popular aspirations broke out in a revolution which, within a few months, overthrew a dictatorship whose oppression had been felt during a quarter of a century.

Ambassador Lane Wilson, in summarizing the causes of opposition to Díaz, mentioned "Concentration of wealth, objectionable forms of taxation, condition of the lower classes, rising interest of the middle class in public affairs, corrupt judiciary and anti-American feeling". The latter, considered as "one of the strongest assets of the Revolution", Wilson attributes to resentment caused by "American commercial aggression" and "envy of American property and thrift" (Callahan). In regard to this latter, I have already expressed my personal opinion.

The short-lived administration of President Madero is characterized by the hostility of Ambassador Wilson. The latter notified Lascurain, Secretary of Foreign Relations, in September 1912, that the Mexican Government should show its ability to handle the situation or else confess its impotence; adding that in this case, the North American Government would consider what steps should be taken.

In 1913, during the so-called "Tragic Ten Days", in which the Mexican capital became the theatre of the fight between the forces loyal to Madero and the rebel ones which stood against him, Ambassador Wilson intervened, openly, in favor of the rebels. He convoked a meeting of the Diplomatic Corps, on learning that the President had been arrested; and he suggested that a declaration should be made proclaiming the disappearance of the legal government and the recognition of Huerta's usurpation. As everyone knows, the President and the Vice-President of Mexico were assassinated and, in spite of Ambassador Wilson's insistence on the immediate recognition of Huerta by the United States, President Taft, about to end his term, preferred to leave the matter in the hands of his successor. The new executive, mainly for moral reasons, refused to recognize the Government of Huerta and called back Ambassador Wilson. The policy of "watchful waiting"

was applied by the President to the Mexican case. John Lind was sent as Confidential Agent to suggest Huerta's resignation, but his mission failed. The constitutionalist revolution led by Venustiano Carranza was spreading throughout the country, obtaining overwhelming successes which foretold the crushing defeat of Huerta. President Wilson, irritated by Huerta's obstinacy in remaining in power, began to cherish the idea of armed intervention. The incident of the detention of United States sailors in Tampico, and Huerta's refusal to give the Stars and Stripes a salute of apology, gave the excuse that was desired. Veracruz was bombed and occupied on April 21, 1914. The Mexican people, unanimously, protested against the act of aggression which was branded unnecessary and unfair. Carranza, the revolution's "First Chief", as he was called, proceeded immediately to protest against the outrageous attack on the sovereignty of the nation. Carranza, finally triumphant over Huerta, negotiated with the Washington Government, and the invaders abandoned Veracruz in November 1914.

Hostilities broke out between Carranza and Villa; the Government of Washington, hesitant at first, finally recognized, in October 1915, Carranza's Administration as a *de facto* government. Permission was given the constitutionalist troops of Mexico to cross United States territory in order to enter Sonora to fight the remnants of Villa's forces.

Villa's resentment was shown in the assassination of eighteen North American miners. President Wilson, seriously preoccupied, thought once more of using armed intervention in order to punish the murderer; but he accepted Carranza's pledge to pursue Villa. At the beginning of March 1916, Villa, unexpectedly, made an incursion into Columbus, New Mexico. The North American Government decided to send a punitive expedition south of the Rio Grande, under the command of General Pershing. Negotiations were initiated to bring about the withdrawal of the expeditionary forces which, after eleven months of fruitless pursuit, abandoned Mexican territory, not without having clashed with Carranza's forces.

In May 1917, Carranza inaugurated his term as Constitutional

President. The relations between the two countries were not characterized by their cordiality; claims were presented for the losses suffered by United States citizens during the civil war. Carranza's Government was accused of being pro-German and, in the Senate, new propositions were presented for the purchase of Lower California and part of Sonora. The crisis was becoming more acute when Carranza was overthrown. Adolfo de la Huerta, Governor of Sonora, provisionally assumed power. His government was not recognized by the United States. Nor was the administration that followed it (1920), presided over by General Obregón, until lengthy negotiations had taken place, in which North American commissioners, repeating what had occurred in 1877 under General Díaz, demanded, as a prerequisite to recognition, unacceptable conditions. Obregón's Government, as Díaz' had done, defended itself stubbornly and, finally, was recognized on the last day of August 1923. In the following month, two Agreements were signed: a "General Claims Convention," in which were considered cases pending since 1868, and the other, relative to damages caused during the period of the Revolution.

Obregón was succeeded by General Plutarco Elías Calles (1924); and soon took place, between the two Governments, an exchange of notes on the application of the Oil and Agrarian Laws. In the North American press, it was published that if Ambassador Sheffield did not succeed in making the Mexican Government abrogate or modify the legislation detrimental to North American interests, the United States would withdraw its official recognition. An exchange of notes continued, in which the retroactive effects of the laws were discussed, without making headway along the road of understanding. Again there was talk of armed intervention and President Calles thought he had found proof of an anti-Mexican plot, in North American documents which, as has been said, were forged and then stolen to provoke a crisis.

Ambassador Sheffield resigned, and President Coolidge appointed Dwight W. Morrow (1927), to replace him. Soon after presenting credentials, the new Ambassador made a speech in the Chamber of Commerce advising the American colony to have faith in the Government, to behave properly in Mexico, as much for its

own dignity as to show its respect for Mexico's sovereignty. Direct friendship was established between President Calles and Ambassador Morrow and it became possible to reach an agreement on the questions under discussion.

The mission of Ambassador Morrow established a betterment in the relations between the two countries. Matters concerning claims were re-examined and after Morrow's departure they continued to be considered by the new Ambassador, J. Reuben Clark, Jr. (1930). It was agreed that the Special Claims Commission would initiate its work, in Mexico City, on February 1, 1931, and the General Claims Commission, in Washington, on July 5. During Ambassador Clark's mission, an agreement on the Chamizal and the international waters was attempted; questions which, as I have said, have not been solved yet but whose solution, favorable and not distant may be predicted.

The task initiated by Morrow was the rise of the new day that brightened the skies when the "Good Neighbor" policy was proclaimed.

President Roosevelt selected, as his Ambassador to Mexico, Josephus Daniels who quickly won the friendship of the Mexican people. He understood our social evolution and knew how to uphold, firmly, the principles of Roosevelt's policy (1933-1941).

On the fourth of March, 1933, President Roosevelt expressed his new doctrine, in one of the paragraphs of his first inaugural message. Said he: "In the field of world politics, I dedicate this Nation to the "Good Neighbor" policy—the good neighbor who resolutely respects himself, and because he does so, respects the rights of others."

Here a digression seems pertinent. The "Good Neighbor" policy has been translated into Spanish as "*Política del Buen Vecino*". The sentence, like many others quickly coined, began to circulate and has not been discussed. Some Spanish writers give it the restricted meaning of physical proximity, inferring that it is limited to adjoining countries or, at the most, to the countries of the Continent. My interpretation is that neighbor should have been translated into Spanish as "fellowman", thus giving it a universal, truly human meaning. In effect, "neighbor" is used in the language of

the Bible as an equivalent of the Spanish word "*prójimo*"—"fellowman". The Decalogue commands, in English, "Thou shalt not covet thy neighbor's house, thou shalt not covet thy neighbor's wife," and the Spanish translation reads: "*No codiciarás las cosas ajenas ni la mujer de tu prójimo*", giving to *prójimo* the meaning of "fellowman".

This connotation differs from the "good neighborhood" invoked by President Cleveland and quoted previously. It refers to immediate vicinity, to contiguity. Roosevelt's conception does not limit itself to the geographical union of countries nor to the racial parentage of men, but to the communion of spirits.

The policy proclaimed and maintained by the present Chief Executive of the American Nation has been rich in results. It has succeeded in accelerating the consolidation of Pan American consciousness. Thanks to it, each of the countries of the Hemisphere views itself as the good neighbor of the other, willing to strengthen the family of American nations, as a precursor of the future family which will be integrated by all the nations of the world. In April 1935, in the annual meeting of the Academy of Political and Social Sciences of Philadelphia, speaking of the then recent "Good Neighbor" policy, I referred to the abrogation of the Platt Amendment, the withdrawal of the last marines from Haiti, and I expressed that this surprising change in the policy of the White House was answered by similar change in the international atmosphere of Latin America. I added: "President Roosevelt, with the tactfulness of an exceptional statesman and a keen psychologist, has become the founder of a Pan Americanism free from suspicion. He has initiated an era without precedent in the history of Inter-American relations." My speech ended thus: "A program of Pan Americanism, liable of being modified in accordance with the transitory circumstances originated by its natural development, but always based on mutual respect, on a more extensive and sustained *rapprochement*, in real economic cooperation and in an interchange of spiritual values, assures us a future of harmonious progress and of international justice which will be an example to the world and a glory to the American Hemisphere."
